WARNING
Driving while distracted can result in loss of vehicle control, crash and injury. We strongly recommend that you use extreme caution when using any device that may take your focus off the road. Your primary responsibility is the safe operation of your vehicle. We recommend against the use of any hand-held device while driving and encourage the use of voice-operated systems when possible. Make sure you are aware of all applicable local laws that may affect the use of electronic devices while driving.

Some services may not be available in your area. Refer to your Owner’s Manual, visit the website or call the toll-free number.

FOR U.S. CUSTOMERS:
Visit owner.ford.com or call 1-800-392-3673 (select Option 1 or 2 for language, then Option 3).

FOR CANADIAN CUSTOMERS:
Visit syncmyride.ca or call 1-800-565-3673 (select Option 1 or 2 for language, then Option 3).
To telescope both mirrors at the same time, make sure you switch your vehicle on (with the ignition in accessory mode or the engine running) and then:

4. Press the left arrow \(\uparrow\) or right \(\downarrow\) arrow. You will feel the control move, and then release the arrow \(\uparrow\) or \(\downarrow\) control.

5. Press the adjustment control to position the mirrors.

- Press the left arrow \(\uparrow\) to extend the mirrors out.
- Press the right arrow \(\downarrow\) to retract the mirrors into the housing.

Note: Moving the mirrors 10 or more times within one minute, or repeated folding and unfolding of the mirrors while holding the control down during full travel, may disable the system to protect the motors from overheating. Wait approximately three minutes without control use before trying again, and up to 10 minutes with the vehicle off for the system to assist and for function to return to normal.

**SPOT LAMPS CONTROL**

The spot lamps are on the forward-facing side of the exterior mirrors. With the lighting control switch in the parking lamps, headlamps or autolamps position, press the buttons located above the lighting control switch to activate the left-hand or right-hand side spot lamps. Once switched on, the spot lamps light the area in front of and to the side of your vehicle. Adjust the aim of the spot lamps by moving the exterior mirror’s positions.

**LIGHTING CONTROL**

Headlamps on. Parking lamps on. Autolamps on. 3. Press the up or down arrows \(\uparrow\) or \(\downarrow\) to position the mirrors.

• Press the top or bottom \(\uparrow\) or \(\downarrow\) to fold the mirrors in.

2. Moving the mirrors up and hold the electric parking brake. You can switch the ignition on, press the brake pedal and then manually press the switch \(\downarrow\) down. The brake system warning lamp \(\uparrow\) turns off. The second option is to have your vehicle automatically release the parking brake by closing the driver door, putting the vehicle in gear and pressing the accelerator pedal.

**POWER EXTERIOR MIRRORS**

To telescope both mirrors at the same time, make sure you switch your vehicle on (with the ignition in accessory mode or the engine running) and then:

1. Press the adjustment control to position the mirrors.

- Press the left arrow \(\uparrow\) to extend the mirrors out.
- Press the right arrow \(\downarrow\) to retract the mirrors into the housing.

Note: Moving the mirrors 10 or more times within one minute, or repeated folding and unfolding of the mirrors while holding the control down during full travel, may disable the system to protect the motors from overheating. Wait approximately three minutes without control use before trying again, and up to 10 minutes with the vehicle off for the system to assist and for function to return to normal.

**SPOT LAMPS CONTROL**

The spot lamps are on the forward-facing side of the exterior mirrors. With the lighting control switch in the parking lamps, headlamps or autolamps position, press the buttons located above the lighting control switch to activate the left-hand or right-hand side spot lamps. Once switched on, the spot lamps light the area in front of and to the side of your vehicle. Adjust the aim of the spot lamps by moving the exterior mirror’s positions.

**LIGHTING CONTROL**

Headlamps on. Parking lamps on. Autolamps on. 3. Press the up or down arrows \(\uparrow\) or \(\downarrow\) to position the mirrors.

• Press the top or bottom \(\uparrow\) or \(\downarrow\) to fold the mirrors in.

2. Moving the mirrors up and hold the electric parking brake. You can switch the ignition on, press the brake pedal and then manually press the switch \(\downarrow\) down. The brake system warning lamp \(\uparrow\) turns off. The second option is to have your vehicle automatically release the parking brake by closing the driver door, putting the vehicle in gear and pressing the accelerator pedal.

**POWER EXTERIOR MIRRORS**

To telescope both mirrors at the same time, make sure you switch your vehicle on (with the ignition in accessory mode or the engine running) and then:

1. Press the adjustment control to position the mirrors.

- Press the left arrow \(\uparrow\) to extend the mirrors out.
- Press the right arrow \(\downarrow\) to retract the mirrors into the housing.

Note: Moving the mirrors 10 or more times within one minute, or repeated folding and unfolding of the mirrors while holding the control down during full travel, may disable the system to protect the motors from overheating. Wait approximately three minutes without control use before trying again, and up to 10 minutes with the vehicle off for the system to assist and for function to return to normal.

**SPOT LAMPS CONTROL**

The spot lamps are on the forward-facing side of the exterior mirrors. With the lighting control switch in the parking lamps, headlamps or autolamps position, press the buttons located above the lighting control switch to activate the left-hand or right-hand side spot lamps. Once switched on, the spot lamps light the area in front of and to the side of your vehicle. Adjust the aim of the spot lamps by moving the exterior mirror’s positions.

**LIGHTING CONTROL**

Headlamps on. Parking lamps on. Autolamps on. 3. Press the up or down arrows \(\uparrow\) or \(\downarrow\) to position the mirrors.

• Press the top or bottom \(\uparrow\) or \(\downarrow\) to fold the mirrors in.

2. Moving the mirrors up and hold the electric parking brake. You can switch the ignition on, press the brake pedal and then manually press the switch \(\downarrow\) down. 2. Moving the mirrors up and hold the electric parking brake. You can switch the ignition on, press the brake pedal and then manually press the switch \(\downarrow\) down. The brake system warning lamp \(\uparrow\) turns off. The second option is to have your vehicle automatically release the parking brake by closing the driver door, putting the vehicle in gear and pressing the accelerator pedal.

**POWER EXTERIOR MIRRORS**

To telescope both mirrors at the same time, make sure you switch your vehicle on (with the ignition in accessory mode or the engine running) and then:

1. Press the adjustment control to position the mirrors.

- Press the left arrow \(\uparrow\) to extend the mirrors out.
- Press the right arrow \(\downarrow\) to retract the mirrors into the housing.

Note: Moving the mirrors 10 or more times within one minute, or repeated folding and unfolding of the mirrors while holding the control down during full travel, may disable the system to protect the motors from overheating. Wait approximately three minutes without control use before trying again, and up to 10 minutes with the vehicle off for the system to assist and for function to return to normal.

**SPOT LAMPS CONTROL**

The spot lamps are on the forward-facing side of the exterior mirrors. With the lighting control switch in the parking lamps, headlamps or autolamps position, press the buttons located above the lighting control switch to activate the left-hand or right-hand side spot lamps. Once switched on, the spot lamps light the area in front of and to the side of your vehicle. Adjust the aim of the spot lamps by moving the exterior mirror’s positions.

**LIGHTING CONTROL**

Headlamps on. Parking lamps on. Autolamps on. 3. Press the up or down arrows \(\uparrow\) or \(\downarrow\) to position the mirrors.

• Press the top or bottom \(\uparrow\) or \(\downarrow\) to fold the mirrors in.

2. Moving the mirrors up and hold the electric parking brake. You can switch the ignition on, press the brake pedal and then manually press the switch \(\downarrow\) down. The brake system warning lamp \(\uparrow\) turns off. The second option is to have your vehicle automatically release the parking brake by closing the driver door, putting the vehicle in gear and pressing the accelerator pedal.

**POWER EXTERIOR MIRRORS**

To telescope both mirrors at the same time, make sure you switch your vehicle on (with the ignition in accessory mode or the engine running) and then:

1. Press the adjustment control to position the mirrors.

- Press the left arrow \(\uparrow\) to extend the mirrors out.
- Press the right arrow \(\downarrow\) to retract the mirrors into the housing.

Note: Moving the mirrors 10 or more times within one minute, or repeated folding and unfolding of the mirrors while holding the control down during full travel, may disable the system to protect the motors from overheating. Wait approximately three minutes without control use before trying again, and up to 10 minutes with the vehicle off for the system to assist and for function to return to normal.
Continuous control to override the shutoff feature.

Vehicle to switch the ignition on if equipped.

Note: Your intelligent access transmitter must be inside your vehicle to start the engine.

Before the engine shuts down, a message appears in the information display allowing the driver time to turn off.

An indicator light comes on when the ignition is on and when the engine starts.

If you leave your vehicle idling for an extended period of time, the engine starts.

Press the brake pedal and then press the START button. An indicator light comes on when the engine is on and the ignition automatically turns off.

Before the engine shuts down, a message appears in the information display allowing the driver time to override the shutoff feature.

Note: Your intelligent access transmitter must be inside your vehicle to switch the ignition on and start the engine.

Electronic Shift 4WD System:

The electronic 4x4 4WD system allows you to choose between the following:

- 2H (4x2) sends power to the rear wheels only and should be used for street and highway driving. Provides optimal smoothness and fuel economy at high speeds.
- 4A (4x4 AUTO) provides electronic control for ideal wheel drive with power delivered to the front and rear wheels, as required, for increased traction. This is appropriate for all on-road driving conditions, including dry road surfaces, but is especially useful on wet pavement, snow, dirt or gravel.
- 4H (4x4 HIGH) helps provide extra traction for ideal wheel drive in snow or on icy roads or off-road situations. This mode is not intended for use on dry pavement.
- 4L (4x4 LOW) uses extra gearing to provide maximum power to all four wheels at reduced speeds. Intended only for off-road applications such as deep sand, steep grades or pulling heavy objects. 4L (4x4 LOW) does not engage while the vehicle is moving above 3 mph (5 km/h); this is normal and should be no reason for concern.

Refer to Shifting to or from 4L (4x4 LOW) in the Four-Wheel Drive chapter of your Owner’s Manual for details.

Electronic Locking Differential:

When engaged, the system temporarily locks the rear axle, allowing both rear wheels to turn at the same speed. This function helps to provide additional traction as needed.

Note: Do not use this feature on dry pavement or hard-surfaced roads.

To use:

AX4: Pull the 4x4 control.
AX2: Turn the control to ON.

The indicator light continuously displays in the instrument cluster when AX2 is active.

Pro Trailer Backup Assist:

The Pro Trailer Backup Assist control knob helps assist you in backing up your trailer. Turn the knob in the direction you want the trailer to go, and the system will take over the steering to get it there.

This system will not work until you set it up. See the Pro Trailer Backup Assist Quick Start Guide in your Owner’s Manual portfolio for the complete set up and operation details.

Integrated Trailer Brake Controller:

The fully integrated trailer brake controller assists in smooth and effective trailer braking by powering the trailer’s electric or electric-over-hydraulic brakes with a proportional output based on the towing vehicle’s brake pressure.

The Gain setting is used to set the trailer brake controller for specific towing conditions and should be changed as towing conditions change. Changes to towing conditions include trailer load, vehicle load, road conditions and weather.

Use the Gain + and – adjustment buttons to increase or decrease the braking feature’s power output to the trailer in increments of 0.5.

Adjust the Gain by:

1. Pressing the Gain– or Gain+ buttons to increase or decrease the setting to the desired starting point. For example, if the Gain setting of 6.0 is a good starting point for heavier loads.

2. Test the adjusted Gain setting again after you make adjustments.

When testing:

A. In a traffic-free environment, tow the trailer on a dry, level surface at a speed of 20-25 mph (30-40 km/h) and squat the manual control lever completely.

B. If the trailer wheels lock up (the tires will squeal), reduce the Gain setting.

C. The proper Gain setting will be at the point just below trailer wheel lock-up.

Note: If towing a heavier trailer, trailer wheel lock-up may not be attainable even with the maximum Gain setting of 10.

360-Degree Camera:

See page 19 for details.

*If equipped

In the image, the relevant sections are marked for emphasis.
HILL DESCENT CONTROL
The feature helps you set and maintain vehicle speed while descending steep grades on various surface conditions. This feature can maintain vehicle speeds on downhill gradients between 3 mph (5 km/h) and 40 mph (64 km/h).
At speeds between 20 mph (32 km/h) and 40 mph (64 km/h), the system remains armed, but descent speed cannot be set or maintained. At speeds above 40 mph (64 km/h), the system will turn off and you need to switch the system back on to use it.
To switch this feature on and set the desired speed, do the following:
1. Press and release the hill descent button, located on the instrument panel. A light in the instrument cluster begins to sway, the stability control system applies your vehicle brakes at individual wheels and, if necessary, shifts between the available gears.
2. To increase descent speed, press the accelerator pedal until you reach the desired speed. To decrease descent speed, press the brake pedal until you reach the desired speed.
For more detailed information, please refer to your Owner's Manual.

ADVANCETRAC® WITH ROLL STABILITY CONTROL™ (RSC®) STABILITY ENHANCEMENT SYSTEM
The AdvanceTrac stability system helps you to keep control of your vehicle when on a slippery surface. The electronic stability control portion of the system helps avoid skids and lateral sides. Roll-stability control helps avoid a vehicle rollover. The traction control system helps avoid drive wheel spin and loss of traction.
The traction control system helps avoid drive wheel spin and loss of traction. You can switch the system off manually.

To switch off, press the button again. Refer to the Transmission chapter in your Owner's Manual for more information.

TRAILER SWAY CONTROL*
The feature applies your vehicle brakes at individual wheels and, if necessary, reduces engine power. If the trailer begins to sway, the stability control light flashes. The first thing to do is slow your vehicle down, then pull safely to the side of the road and check for proper tongue load and trailer load distribution.

PROGRESSIVE RANGE SELECTION
With the gearshift lever in drive (D), press the (+) button on your center console. The button lights when you press it. The system automatically turns on and a tone sounds.

TOW/HAUL MODE
This feature helps improve transmission operation when towing a trailer or hauling a heavy load.
To switch tow/haul on, press the button (on the side of the gearshift lever or on the end of the column-shifter transmission lever). The TOW indicator light appears in the instrument cluster.
To switch off, press the button again. Refer to the Transmission chapter in your Owner's Manual for more information.

When towing a trailer or hauling a heavy load, the system helps improve transmission operation when towing a trailer or hauling a heavy load.
To switch tow/haul on, press the button (on the side of the gearshift lever or on the end of the column-shifter transmission lever). The TOW indicator light appears in the instrument cluster.
To switch off, press the button again. Refer to the Transmission chapter in your Owner's Manual for more information.

TOW/HAUL MODE
Press the (+) button to unlock gears to allow the transmission to shift to higher gears. The transmission will shift automatically within the gear range you select.

GETTING STARTED WITH YOUR SYNC SYSTEM
SYNC is a hands-free, voice recognition system used for entertainment, information and communication. SYNC. SAY THE WORD.

BEFORE YOU GET STARTED
1. Set up your owner account at owner.ford.com (U.S.) or syncmyride.ca (Canada). Register by following the on-screen instructions. After registering, you may see what services you may be eligible for.

2. SYNC uses a wireless connection called Bluetooth® to communicate with your phone. Switch Bluetooth mode on in your phone’s menu options. This lets your phone find SYNC. For more details on setting up your phone with SYNC, visit owner.ford.com (U.S.) or syncmyride.ca (Canada), or your phone manufacturer’s website.

PAIRING YOUR PHONE WITH SYNC
Note: If you have SYNC® 3 with the 8-inch touchscreen, use the pairing instructions on page 13.
In order to use many of the features of SYNC, you must first pair and connect your phone with SYNC. To pair your phone for the first time:
1. Make sure that your vehicle is in park (P), you switch on your vehicle’s ignition and radio, and your device’s Bluetooth feature is also switched on. This allows SYNC to find your phone. See your device’s manual, if necessary.
2. Press the phone button C when the display indicates that the system does not have a paired phone, press OK.
3. When Find SYNC appears in the display, press OK.
4. When prompted on your phone’s display, enter the six-digit PIN provided by SYNC in the radio display.
5. This display indicates when the pairing is successful.

THE SYSTEM MAY PROMPT YOU TO
• Set your phone as the primary or favorite (the primary phone receives messages and voicemail).
• Download your phone book (required to use the full set of voice commands).
• Switch on 911 Assist®.

TIPS
• Make sure you accept the request from SYNC to access your phone.
• To pair subsequent phones, please refer to Pairing Subsequent Phones in the SYNC chapter of your Owner’s Manual.
• If you experience pairing problems, try performing a clean pairing by deleting your device from SYNC and deleting the SYNC connection from your phone, and then repeat the process.

WHY DO YOU NEED A SYNC OWNER ACCOUNT?
A SYNC owner account is a requirement to receive the latest software updates and, if you have questions, receive free customer support. For more information, refer to your Owner’s Manual, visit the website or call the toll-free number. See the inside front cover of this guide for details.

WHY DO YOU NEED A SYNC OWNER ACCOUNT?
A SYNC owner account is a requirement to receive the latest software updates and, if you have questions, receive free customer support. For more information, refer to your Owner’s Manual, visit the website or call the toll-free number. See the inside front cover of this guide for details.

USING YOUR PHONE WITH SYNC
Note: You can download your phone book to make phone calls with voice commands by name.

MAKING A PHONE CALL
Use SYNC to make a phone call to anyone in your phone book by pressing the voice button C. When prompted, give a voice command.
For example, you could say, “Call Jake Smith at home.” When the system confirms the number, say, “Dial” to initiate the call.
Note: You can also make phone calls by pressing the voice button C. When prompted, give the voice command “Dial” and then verbally say the phone number.

ANSWERING INCOMING CALLS
Whenever you have an incoming call, you will be able to see the name and number of the person calling in your display. Press the phone button C to answer an incoming call. You can hang up at any time by pressing and holding the phone button C.

USING SYNC TO ACCESS DIGITAL MEDIA
SYNC has a media hub with multiple inputs allowing you to access personal media from your digital devices. Plug in your USB media devices such as phones and MP3 players and use SYNC to play all of your favorite music.
Note: SYNC indexes all of your music. The more music that is stored on your device, the longer it takes SYNC to index. You can then use voice indexing to find a specific song, artist, playlist or genre when using the USB port to hard-wire your media device.
A REVOLUTIONARY WAY TO CONNECT WITH YOUR TRUCK

GET IN TOUCH USING YOUR TOUCHSCREEN

GENERAL TIPS

• Press the home icon at any time to return to your home screen.
• Large icons are easy to use.
• For a list of commonly used voice commands and additional support (including toll-free phone numbers and websites), see the inside front cover.

GETTING STARTED, UNDERSTANDING SYNC 3

Use the touchscreen to explore and interact with your vehicle. The touchscreen works the same way traditional controls, knobs and buttons do. Press the various areas on your touchscreen to personalize the many features and settings of your vehicle all in one place. The system provides easy interaction with your audio, climate, phone, navigation, mobile apps and settings.

PAIRING YOUR PHONE WITH SYNC 3

Pair your phone to SYNC 3 before use. Make sure that your vehicle is in park (P) and you switch on your ignition.

1. Follow the on-screen instructions.
2. A prompt alerts you to search for the system on your phone.
3. Select your vehicle’s make and model as it displays on your phone.
4. Confirm that the six-digit number appearing on your phone matches the six-digit number on the touchscreen.
5. The touchscreen indicates when the pairing is successful.
6. Your phone may prompt you to give the system permission to access information. To check your phone’s compatibility, see your phone’s manual or visit the website.

PHONE

After pairing your phone, you can access more phone-dependent features:

• Recent call lists.
• Contacts: Sort alphabetically and choose a specific letter to begin viewing your entries.
• Phone settings: Pair another phone, and set ring tones and alerts.
• Text messages.
• Do not disturb: Send all calls to your voice mail, and all ring tones and alerts are set to silent mode.

Note: Use the voice commands to make calls. Say, “Call James at home” or “Dial 555-1212.” You can use the touchscreen to place calls as well. Refer to the SYNC 3 information in your Owner’s Manual for complete details.
SET A DESTINATION
Press the Destination* icon on your touchscreen and then press Search. Enter a street address, intersection, city or a Point Of Interest (POI). You can also use voice commands. Say, “Find a point of interest” and then select a category, such as hotels or restaurants.
After you choose your destination, press Start. The system uses a variety of screens and visible prompts to guide you to your destination.
The navigation map shows your estimated time of arrival, remaining travel time or the distance to your destination.

NAVIGATION MENU
During active navigation, touch the bottom of the screen to view the menu, and then select Screen View.
- Full Map
- Highway Exit Info displays on the right side of the touchscreen. View POI icons (restaurants, ATMs, etc.) as they pertain to each exit. You can select a POI as a waypoint, if you wish.
- Turn List displays all of the available turns on your current route.
- Traffic List displays SiriusXM Traffic and Travel Link® information. The system calculates efficient routes based on available speed limits and traffic and road conditions.

NAVIGATION
Press the Navigation* icon to set your destination. Select one of two ways to find your destination:
- Destination mode lets you key in a specific address or use a variety of search methods to locate where you want to go.
- Map mode shows advanced viewing of 2-D city maps, 3-D landmarks and 3-D city models (when available).

See the SYNC 3 information in your Owner’s Manual for details.

CLIMATE
Access climate control features, including the temperature, airflow direction, fan speed and other climate features for you and your front passenger.

SET YOUR TEMPERATURE
- Touch the Climate icon on the touchscreen.
- Use voice commands to change your settings, like “Climate set temperature to 72 degrees” and SYNC 3 makes that adjustment.
- You can also use the up or down buttons on the touchscreen.

APPS
VOICE CONTROL YOUR SMARTPHONE APPS
The system supports the use of certain types of apps such as Pandora® or iHeartRadio® through USB or Bluetooth®-enabled devices.
Each app gives you different on-screen options depending on the app’s content. To find new apps, use the voice command, “Find new apps.”
For more information, refer to the SYNC 3 information in your Owner’s Manual. For support, visit the website or call the toll-free number. See the inside front cover of this guide for details.

SYNC CONNECT
With a SYNC® Connect-equipped vehicle, you can use FordPass® to track your vehicle’s location and remotely access vehicle features such as start, lock and unlock, and vehicle status including fuel level and approximate mileage. You can also schedule specific times to remotely start your vehicle so it’s ready to hit the road as soon as you are. SYNC Connect is an optional feature on select 2017 MY vehicles. FordPass® is available through a free download via the Apple App Store® or Google Play™. Message and data rates may apply. Services may be limited by mobile phone network coverage area. Please visit www.myfordpass.com for more information.
MEMORY FUNCTION

The feature automatically recalls the position of the driver seat, power mirrors, steering column and adjustable pedals. Use the memory controls on the door panel to program and then recall memory positions. To program, switch the ignition on.

1. Move the memory features to the desired positions.
2. Press and hold button 1 until you hear a tone.
3. Use this same procedure to set the second and third positions using buttons 2 and 3, respectively. Press a control to recall the set positions. You can also program your memory seats to your transmitter. That way, when you unlock your door with the transmitter, your memory features automatically move into your saved position. See the Seats chapter in your Owner’s Manual for more details.

ADJUSTABLE HEAD RESTRAINTS
Adjust the seatback to an upright driving position before adjusting the head restraint. Adjust the head restraint so that the top of it is level with the top of your head and as far forward as possible. Make sure that you remain comfortable. To raise, pull up on the head restraint. To lower, press the head restraint down while pressing and holding the guide sleeve button. You may also be able to tilt the head restraint forward or backward for additional comfort. Pivot the head restraint forward to the desired location. After the head restraint reaches the forward-most tilt position, pivot it forward again to return it to its standard position.

MULTI-CONTOUR FRONT SEATS WITH ACTIVE MOTION
Using the button mounted on the outside of the front seats, or through the touchscreen, you and a front-seat passenger can adjust the massage and support settings. You can also control the intensity of the massage, increase or decrease the lumbar bolster and cushion support, and adjust the height of the bolster. To program, switch the ignition on. Refer to Multi-Contour Front Seats with Active Motion section in the Seats chapter of your Owner’s Manual for more details.

USB AND POWER POINT LOCATIONS
Depending on your vehicle, you may find USB and power point outlets in and around the center console, in the instrument panel and on the back of the center console for rear-seat passengers. See the Storage Compartment section in your Owner’s Manual.
Comfort

CLIMATE CONTROLLED FRONT SEATS* • To operate the heated feature, press the button again.
• The heated seats turn off automatically when you switch off the engine.

Note: Heated seats will function only when the engine is running.

REAR HEATED SEATS* • The rear-seat heat controls are on the back of the center console. To operate the heated seats, press the button repeatedly to cycle through the various settings and off.

Note: More lights indicate higher settings.

OVERHEAD CONSOLE** • The system consists of front, side and rear cameras. Press the center console near the gearshift lever.
• Instructs you to park your vehicle.
• When the vehicle is traveling above 3 mph (5 km/h) and may not detect angular or moving objects.

TO USE ACTIVE PARK ASSIST, PRESS THE BUTTON AGAIN. BEFORE USING THIS FEATURE, CHECK FOR VEHICLES, FORWARD AND BACKWARD MOVING OBJECTS, VEHICLES IN THE ROAD LANE, AND PEDESTRIANS. IF THE SYSTEM BLOWS OFF TRACK, STOP THE VEHICLE AND START OVER.

360 DEGREE CAMERA* • The system detects an available parallel parking space and automatically steers the vehicle into the space (hands-free) while you control the accelerator, gearshift and brakes. The system visually and audibly instructs you to park your vehicle.

To use active park assist, press the button again. On the center console near the gearshift lever.
• To stop the parking procedure, grab the steering wheel or press the control again. Before using this feature and for complete information, refer to the Parking Aids chapter of your Owner's Manual.
• The system notifies you to stay in your lane through lane markings using a camera mounted behind the interior rear view mirror.

MYKEY® • You can program speed restrictions, limited-volume levels and more, depending on your vehicle's level of equipment. For complete information, refer to the MyKey chapter in your Owner's Manual.

Note: The driver is always responsible for controlling the vehicle, supervising the system and intervening if required.

LANE KEEPING SYSTEM* • The system notifies you to stay in your lane through the steering system and the instrument cluster display when the front camera detects an unintentional drift out of your lane. To instruct the system to detect a lane change, press the button again. The system automatically detects and tracks the road lane markings using a camera mounted behind the interior rear view mirror.

BLIS® (BLIND SPOT INFORMATION SYSTEM) WITH TRAILER TOW AND CROSS TRAFFIC ALERT* • BLIS® in detecting vehicles that may have entered into your blind spot zone. The cross traffic alert feature warns you of vehicles approaching from the side when the transmission is in reverse (R). The driver is always responsible for controlling the vehicle, supervising the system and intervening if required.

The system is designed to warn you of detecting vehicles that may have entered the detection area zone. The detection area is on both sides of your vehicle and trailer, extending forward from the exterior mirrors to the end of your trailer.

Note: The system is designed to warn you of detecting vehicles that may have entered the detection area zone. The detection area is on both sides of your vehicle and trailer, extending forward from the exterior mirrors to the end of your trailer.
REMOTE ENTRY SYSTEM FEATURES*  
Press \( \text{once} \) to unlock the driver door. Press again within three seconds to unlock all of the doors and tailgate*.
Press \( \text{once} \) to lock all the doors and the tailgate*; Press again within three seconds to confirm that you closed and locked all of the doors and tailgate*.
Press \( \text{to activate the panic alarm. Press again or switch the ignition on to deactivate the panic alarm.} \)

Car finder: Press \( \text{twice} \) within three seconds. The horn sounds and the direction indicators flash. We recommend that you use this method to locate your vehicle, rather than using the panic alarm.

REMOTE TAILGATE RELEASE*  
With the tailgate unlocked, you can open the power tailgate using the remote transmitter. Press \( \text{twice} \) within three seconds.

POWER RUNNING BOARDS*  
The running boards automatically extend down and out when you open the door. This can help you enter and exit your vehicle. When you close the doors, the running boards return to the stowed position after a two-second delay. To operate the Power Deploy feature manually, use the information display. Set the running boards in the deployed position (OUT) to access the roof. The running boards return to the stowed position and enter automatic mode when the vehicle speed exceeds 3 mph (5 km/h).

TAILGATE STEP*  
Use the step to make entering the truck bed easier. This feature includes a step-up into the box and a handle. These items store inside the tailgate.

To Use
1. Lower the tailgate.
2. Push the button in the center of the tailgate moulding. The step pops out slightly.
3. Pull the step out fully and lower it to the lowest position.
4. Push the yellow handle stop toward you out of the tailgate.
5. Rotate the handle up from a horizontal position to a vertical one until you hear a sound, indicating that the handle is locked into place.

To Close
1. Store the telescoping handle first. Press button 1 to lower the telescoping handle.
2. Push button 2 to unlock the handle. Rotate the handle down to a horizontal position, and then slide it back into the tailgate.
3. Raise the step up and then push it into the tailgate fully to secure.

BOX SIDE STEP*  
Use the step for easier access to the trunk bed.

To Use
Push down on the button with your foot.
The step automatically extends from the stowed position. Push the step under the truck with your foot until it fully latches. Do not push on the button while attempting to slow the step.

CARGO AND TRAILER HOOKUP LAMPS*  
The cargo lamps are positioned in the central high mounted stop lamp and to either side of the cargo box. The trailer hookup lamp is positioned on the tailgate next to the handle. Use the control in the box or on the instrument panel to switch the lights on and off.

Note: The box lights turn off automatically after 10 minutes, fading gradually to off.

BOXLINK™ CLEATS*  
These cleats attach to the inner box walls to help you to tie down cargo. Lock the cleats to prevent removal and unlock them for removal. You can take the cleats out to attach accessories, upfitter package items and more. See your Owner’s Manual for complete details.
Essential Information

Refueling

The system is self-sealing and therefore protected against dust, dirt, water, snow and ice. Open the fuel filler door, insert the nozzle and start fueling. Wait at least 10 seconds after pumping the fuel before removing the fuel filler nozzle. This allows the residual fuel to drain into the tank.

To refuel using a portable fuel container, use the fuel funnel. The fuel funnel location can vary depending on your vehicle:

- In SuperCab and SuperCrew® vehicles: Attached under the second row right-hand rear seat.
- In Regular cab vehicles: Attached behind the right-hand front seat.

Slowly insert the funnel into the system and fill the tank with fuel from the container. When done, clean the funnel or properly dispose of it.

You can purchase extra funnels from your authorized dealer.

Note: Do not use aftermarket funnels as they do not work with this system and may cause damage.

Fuel Tank Capacity and Fuel Type

Depending on your vehicle, your fuel tank has a capacity of either 23 gallons (87.1 liters) or 36 gallons (136.2 liters).

If your vehicle has a yellow ring around the fuel inlet, you have a flex fuel vehicle and can use either regular unleaded fuel, E85 ethanol fuel or any mixture of the two.

Use only UNLEADED fuel with a minimum octane rating of 87. Do not use fuel containing more than 15% ethanol, E85 fuel, diesel fuel, fuel-methanol, leaded fuel or any other fuel because it could damage or impair the emission control system.

Some tips to keep in mind with an E85 vehicle:
- It is best not to alternate repeatedly between gasoline and E85. If you do switch fuels, it is recommended that you add as much fuel as possible, at least half a tank.
- Do not add less than 5 gallons (18.9 liters) when refueling.
- You should drive the vehicle immediately after refueling for at least 5 miles (8 km) to allow the vehicle to adapt to the change in ethanol concentration.
- If you exclusively use E85 fuel, we recommend filling the fuel tank with regular unleaded gasoline at each scheduled change.

To provide improved performance, we recommend premium fuel for severe duty usage, such as when towing a trailer.

Tire Pressure Monitoring System

Your vehicle comes with a Tire Pressure Monitoring System (TPMS) that displays a low tire pressure warning light when one or more of your tires are significantly under-inflated. If this happens, stop and check your tires as soon as possible. Inflate them to the proper pressure.

Refer to the Wheels and Tires chapter in your Owner’s Manual for more information.

Location of Spare Tire and Tools

Your vehicle comes with a full-size spare tire located under the vehicle, just forward of the rear bumper. Use it for emergency use only, and be sure to replace it as soon as possible.

The jack and tools are on the rear passenger side of your vehicle.

For complete details on how to change your tire, refer to the Wheels and Tires chapter in your Owner’s Manual.

Towing Your F-150 on Four Wheels

In an emergency situation, you can flat-tow your vehicle on four wheels under the following conditions:
- Your vehicle is facing forward for towing in a forward direction.
- You place the transmission in neutral (N).
- You do not exceed a maximum speed of 35 mph (56 km/h).
- You do not travel beyond a maximum distance of 50 miles (80 kilometers).

Note: For other towing features including neutral tow and recreational towing, see your Owner’s Manual for details.

Roadside Assistance

Your new Ford F-150 comes with the assurance and support of 24-hour emergency roadside assistance. To receive roadside assistance in the United States, call 1-800-241-3673. In Canada, call 1-800-665-2006.
