## GENERAL MAINTENANCE INFORMATION

### Get the most from your vehicle with routine maintenance

Routine maintenance is the best way to help ensure you get the performance, dependability, long life and resale value you expect from your vehicle. This is exactly why we've put together the Scheduled Maintenance Guide. It outlines the services required to properly maintain your vehicle and when they should be performed. The focus is on maintaining your vehicle while it's running great, which goes a long way toward preventing major repairs and expenses later.

Here are a few suggestions to help you get started on the road to routine maintenance:

- Familiarize yourself with your vehicle by going through your *Owner's Guide*
- Take a few minutes to review this handy *Scheduled Maintenance Guide*
- Make it a habit to use this guide to record scheduled maintenance
- Consider your Ford and Lincoln Mercury Dealership for all your vehicle's needs

### Protect your warranty!

Routine maintenance is not only the best way to help keep your vehicle running great, it's also the best way to protect your warranty. While maintenance and repair services may be performed by you or by any automotive service provider you choose, it is your responsibility to see that all scheduled maintenance is performed and that the materials used meet Ford Engineering specifications. Failure to perform scheduled maintenance specified in this guide will invalidate warranty coverage on parts affected by the lack of maintenance. We can't stress enough how important it is to keep records of all maintenance. This guide will help you do just that. Ford Motor Company will not deny a warranty claim simply because there is no documentation. **However, damage or failures due to neglect or a lack of proper maintenance are not covered under warranty.**

### Keeping maintenance records is easy with the Scheduled Maintenance Guide

It's important to document the maintenance of your vehicle. Every time you bring your vehicle in for scheduled maintenance, be sure to present this guide and certify the work. Also record the date of service, mileage at the time of service, and attach your receipt. This will make record keeping easy and, should your vehicle ever require warranty coverage, you will have all the documentation to show you've properly maintained it.

### Maintenance Interval

Ford Motor Company establishes recommended maintenance intervals based upon engineering testing to determine the most appropriate mileage to perform the various maintenance services. This protects your vehicle at the lowest overall cost to you. Ford Motor Company recommends that you not deviate from the maintenance schedules presented in this Scheduled Maintenance Guide.

## 4 Scheduled Maintenance

## GENERAL MAINTENANCE INFORMATION

### Determine which maintenance schedule to follow

It's important to follow the maintenance schedule that most closely mirrors your driving habits and the conditions under which you drive. For this reason, the Scheduled Maintenance Guide is divided into two basic maintenance schedules: the *Normal Schedule* and *Special Operating Conditions*.

Determining which maintenance schedule is right for you is easy. For the most part, do you drive your Ford, Lincoln or Mercury vehicle under typical, everyday conditions? If so, follow the *Normal Schedule*.

### Special Operating Conditions

However, if one of the Special Operating Conditions outlined below better describes how you typically operate your vehicle, you will need to perform some maintenance services more often than the Normal Schedule calls for.

- Towing a trailer or carrying heavy loads
- Extensive idling and/or driving at low-speeds for long distances
- Driving in dusty conditions
- Off-road operation

**Important:** For further details and information regarding these Special Operating Conditions see page 25.

### Exceptions

Some exceptions for specific vehicles and special applications are outlined below. In addition, you will find further information under *Exceptions* on page 28.

- Engine oil and Motorcraft Premium Gold Engine Coolant - time and mileage based interval

If you're unsure which maintenance schedule to follow, ask your Ford and Lincoln Mercury Dealership, or visit the Maintenance area of [www.genuineservice.com](http://www.genuineservice.com).

### Oils, Fluids and Flushing

In many cases, fluid discoloration is a normal operating characteristic and, by itself, does not necessarily indicate a concern or that the fluid needs to be changed. However, discolored fluids that also show signs of overheating and/or foreign material contamination should be inspected immediately by a qualified expert such as the factory-trained technicians at your Ford or Lincoln Mercury Dealership. Your vehicle's oils and fluids should be changed at the specified intervals or in conjunction with a repair. Flushing is a viable way to change fluid for many vehicle sub-systems during scheduled maintenance. It is critical that systems are flushed only with new fluid that is the same as that required to fill and operate the system, or using a Ford-approved flushing chemical.

## GENERAL MAINTENANCE INFORMATION

### Chemicals and Additives

Non-Ford approved chemicals or additives are not required for factory recommended maintenance. In fact, Ford Motor Company recommends against the use of such additive products unless specifically recommended by Ford for a particular application.

Your vehicle is very sophisticated and built with multiple complex performance systems. Every manufacturer develops these systems using different specifications and performance features. That's why it's important to rely on your Ford or Lincoln Mercury dealership to properly diagnose and repair your vehicle.

When planning your maintenance services, consider your Ford or Lincoln Mercury dealership for all your vehicle's needs.

### Get the most from your service and maintenance visits

There are a lot of reasons why visiting your Ford or Lincoln Mercury Dealership for all your service needs is a great way to help keep your vehicle running great.

### Convenience

Many Dealerships have extended evening and Saturday hours to make your service visit more convenient. How's that for quality service?

### Factory-trained Technicians

Ford and Lincoln Mercury service technicians participate in extensive factory-sponsored certification training to help them become experts on the operation of your vehicle. Ask your Dealership about the training and certification their technicians have received.

### Genuine Ford and Motorcraft Replacement Parts

Ford and Lincoln Mercury Dealerships use Ford and Motorcraft branded replacement parts. These parts meet or exceed Ford Motor Company's specifications, and we stand behind them. Maintenance parts installed at your Ford or Lincoln Mercury dealership carry a nationwide, 12-month, 12,000-mile parts and labor limited warranty. Your dealer can give you details.

### Value Shopping for Your Vehicle's Maintenance Needs

Your dealership recognizes the competitive landscape of maintenance and light repair automotive services. With factory-trained technicians and one-stop service for everything from routine maintenance like oil changes and tire rotations to your most complex needs, Ford and Lincoln Mercury Dealerships offer outstanding value.

## 6 Scheduled Maintenance

## OWNER CHECKS AND SERVICES

It is recommended that the following basic maintenance checks and inspections be performed at the designated time intervals. See your "Owner's Guide" for more information.

### Check every month for all vehicles

- Check function of all interior and exterior lights.
- Check tires for wear and proper air pressure, including spare.
- Check engine oil fluid level.
- Check windshield washer fluid level.

### Check every six months for all vehicles

- Check lap/shoulder belts and seat latches for wear and proper operation.
- Check power steering fluid level.
- Check washer spray, wiper operation, and clean all wiper blades (replace blades as necessary).
- Check parking brake for proper operation.
- Check and lubricate all hinges, latches, door check straps (see dealer) and outside locks.
- Check and lubricate door rubber weatherstrips.
- Check and clean body and door drain holes.
- Check safety warning lamps (brake, ABS, air bag, safety belt) for operation.
- Check engine cooling system level and strength.
- Check battery connections and clean if necessary.

General Owner's  
Information

**KEEP IT GENUINE**

### **Factory Authorized Systems Checks**

In the event your vehicle experiences a component related concern, please contact your Ford, Lincoln or Mercury dealership. The Ford Motor Company Trained Technicians who work at Ford, Lincoln or Mercury dealerships are specifically trained to understand your vehicle.

A proper repair begins with a thorough system check. Factory Authorized Systems Checks can ONLY be found at a Ford or Lincoln Mercury dealership. In some circumstances, the Technician may need to request your authorization to perform additional operations to determine the final diagnosis. The Technician's goal is to ensure that your vehicle is fixed right the first time, at the best value to you.

The following list represents several of the Factory Authorized Systems Checks available at participating Ford and Lincoln Mercury Dealerships:

- **Climate Control**
- **Check Engine Light**
- **All Wheel Drive/Four-Wheel Drive**
- **Automatic Transmission**
- **Engine Cooling/Cabin Heating**
- **Suspension/Steering**
- **Charge/Start/Battery**
- **Wheel Alignment**
- **Brakes**

And when your vehicle needs replacement parts, insist that only parts meeting Ford Motor Company's specifications are used. Genuine Ford and Motorcraft branded parts meet these specifications. You can find them at your Ford and Lincoln Mercury Dealership. Look for the following brand logos to ensure the parts installed on your vehicle meet Ford Motor Company Specifications.

**8** *Scheduled Maintenance*

**KEEP IT GENUINE**

## Tires

**Keep It Genuine**

Proper tire maintenance and replacement are critical to your vehicle's performance and helps keep you and your passengers safe. Only use replacement tires and wheels that are the same size, load index, speed rating and type (such as P-metric versus LT-metric or all-season versus all-terrain) as those originally provided by Ford. The recommended tire and wheel size may be found on either the Safety Compliance Certification Label or the Tire Label which is located on the B-Pillar or edge of the driver's door. If this information is not found on these labels then you should consult your Ford Dealer. Use of any tire or wheel not recommended by Ford can affect the safety and performance of your vehicle, which could result in an increased risk of loss of vehicle control, vehicle rollover, personal injury and death. Additionally the use of non-recommended tires and wheels could cause steering, suspension, axle or transfer case/power transfer unit failure. If you have questions regarding tire replacement, see an authorized dealer. When you need to replace your tires, please visit your Ford or Lincoln Mercury Dealership for name-brand tires and people who know your vehicle.

**MICHELIN**

**PIRELLI**

**Republic**

**UNIROYAL**

The technicians at your Ford or Lincoln Mercury dealership can determine the health of your vehicle's battery during any service visit. The Motorcraft Tested Tough Max Series with its "long-life" design outlasted other long-life batteries by up to 200%. That's one reason why we stand behind this battery with a national, 3-year, free replacement warranty and prorated-cost replacement thereafter for up to 100 months and unlimited mileage. Should your battery need to be replaced, please consider a Motorcraft brand battery that meets your vehicle's Ford Motor Company specifications.

**10 Scheduled Maintenance**

**KEEP IT GENUINE**

## Brakes

Your Ford or Lincoln Mercury Dealership has the right brake parts for your vehicle and their factory-trained technicians know exactly how to install them. Ford Original Equipment and Motorcraft replacement brake pads, shoes, rotors and drums meet the stringent standards of Ford Motor Company engineers, and they're also Federal Motor Vehicle Safety Standard (FMVSS) compliant. In addition, all Ford Original Equipment replacement brake pads, shoes, rotors, and drums are vehicle tested for durability and noise suppression. The right brake parts and installation are essential to proper brake system operation.

**Keep It Genuine**

## Oil & Lubricants

It is important to follow a regular maintenance schedule for changing your vehicle's oil and lubricants. Motorcraft Oils and Lubricants meet the stringent standards set by Ford Motor Company. Motorcraft Oils are formulated to reduce engine friction, improve fuel economy, and protect against deposits and wear. The American Petroleum Industry certifies them, so you know Motorcraft oil stands up to the tests of both Ford and independent engineers.

**Scheduled Maintenance 11**

## KEEP IT GENUINE

### Collision

An accident is an upsetting experience and collision repair is often complicated and confusing. Here are a few pointers to help you better understand the collision repair process and make sure your vehicle is properly repaired with the right parts. Properly repairing your vehicle will help maintain its value.

#### **Your rights as a consumer**

As a consumer, you are within your rights to insist on original equipment replacement parts. These genuine parts are made by the manufacturer to meet stringent criteria for fit, finish, structural integrity, corrosion protection and dent resistance, just like the parts that were originally on your vehicle. Insist on genuine Ford replacement parts.

#### **The collision shop**

Many Ford and Lincoln Mercury Dealerships offer collision repair services. Ask your selling dealership about their capabilities to help with collision repair.

#### **Parts**

Genuine Ford Collision Parts are designed, engineered, and warranted by Ford Motor Company. See your dealer for limited warranty details. They are manufactured to the same specifications as those on your vehicle when it was built. The right replacement parts will help maintain the value of your vehicle.

## MULTI-POINT INSPECTION

Ford recommended scheduled maintenance — In order to keep your vehicle running right, it is important to have the systems on your vehicle checked regularly. This can help identify potential issues and prevent major problems. Ford Motor Company recommends the following multi-point inspection be performed at every scheduled maintenance interval to help ensure your vehicle keeps running great.

Keep It Genuine

### MULTI-POINT INSPECTION - Recommended at every visit

- Check and top up fluid levels: brake, coolant recovery reservoir and automatic transmission (if equipped with an underhood dipstick), power steering and window washer
- Inspect tires for wear and check air pressure, including spare.
- Check exhaust system for leaks, damage, loose parts and foreign material.
- Check battery performance.
- Check operation of horn, exterior lamps, turn signals and hazard warning lights.
- Check radiator, coolers, heater and air conditioning hoses.
- Inspect windshield washer spray and wiper operation.
- Check windshield for cracks, chips and pitting.
- Inspect for oil and fluid leaks.
- Inspect engine air filter.
- Inspect half shaft dust boots, if equipped.
- Check shocks and struts and other suspension components for leaks and damage.
- Inspect steering and linkage.
- Inspect accessory drive belt(s).

## NORMAL SCHEDULE CARS & MINIVANS

### 7,500 miles

### Brakes

The factory-trained technicians at your Ford or Lincoln Mercury Dealership can properly install the right brake parts for your vehicle. Ford Original Equipment and Motorcraft replacement brake pads, shoes, rotors, and drums meet the stringent standards of Ford Motor Company engineers, and they're also Federal Motor Vehicle Safety Standard (FMVSS) compliant.

In addition, all Ford Original Equipment replacement brake pads, shoes, rotors, and drums are vehicle tested for durability and noise suppression. The right brake parts and installation are essential to proper brake system operation.

## SPECIAL OPERATING CONDITIONS

### Items Needing Special Attention

If you operate your Ford/Lincoln/Mercury **primarily** in one of the more demanding **Special Operating Conditions** listed below, you will need to have some items maintained more frequently. If you only **occasionally** operate your vehicle under these conditions, it is not necessary to perform the additional maintenance. For specific recommendations, see your Ford or Lincoln Mercury Dealership Service Advisor or Technician.

#### Towing a trailer or using a camper or car-top carrier

<b>Every 5,000 miles or 6 months</b>	Change engine oil and replace oil filter
<b>Every 5,000 miles</b>	Rotate tires
<b>Every 30,000 miles</b>	Change automatic transmission/transaxle fluid

#### Extensive idling and/or low-speed driving for long distances as in heavy commercial use such as delivery, taxi, patrol car or livery

<b>Every 5,000 miles, 6 months or 200 hours of engine operation</b>	Change engine oil and replace oil filter
<b>Every 5,000 miles or 3 months</b>	Lube front lower control arm and steering linkage ball joints with zerk fittings, if equipped
<b>Every 5,000 miles</b>	Inspect brake system Rotate tires
<b>Every 30,000 miles</b>	Change automatic transmission/transaxle fluid
<b>Every 60,000 miles</b>	Replace spark plugs
<b>As required</b>	Replace cabin air filter

#### Operating in dusty conditions such as unpaved or dusty roads

<b>Every 5,000 miles or 6 months</b>	Change engine oil and replace oil filter
<b>Every 5,000 miles</b>	Rotate tires
<b>Every 30,000 miles</b>	Change automatic transmission/transaxle fluid
<b>As required</b>	Replace engine air filter Replace cabin air filter (if equipped)

Special Operating  
Conditions &  
Exceptions

## SPECIAL OPERATING CONDITIONS

### Off-road operation

<b>Every 5,000 miles or 6 months</b>	Change engine oil and replace oil filter Rotate tires
<b>Every 30,000 miles</b>	Change automatic transmission/transaxle fluid
<b>As required</b>	Replace cabin air filter (if equipped) Inspect and lubricate steering linkage ball joints with zerk fittings

**Special Operating Conditions & Exceptions**

## EXCEPTIONS

In addition, there are several exceptions to the Normal Schedule. They are listed below:

### Maximum Oil Change Interval

- Normal Schedule: 7,500 miles or 6 months, whichever occurs first.
- Special Operating Conditions: 5,000 miles, 6 months, or 200 hours of engine operation, whichever occurs first see appropriate schedule on page 25.

### Motorcraft Premium Gold Engine Coolant

- 6 years or 105,000 miles - change Premium Gold coolant (whichever comes first)
- After initial change - change Premium Gold coolant every 3 years or 45,000 miles (see page 29)

### Normal Vehicle Axle Maintenance

- Rear axles and Power Transfer Units (PTUs) containing synthetic lubricant and light duty trucks equipped with Ford-design axles are lubricated for life. These lubricants are not to be checked or changed unless a leak is suspected service is required or the axle assembly has been submerged in water. The axle and PTO lubricant should be changed anytime the axle and PTO have been submerged in water. During extended trailer tow operation above 70°F (21°C) ambient and wide open throttle for extended periods above 45 mph, non-synthetic rear axle lubricants should be replaced every 3,000 miles or 3 months, whichever occurs first. The 3,000 mile lube change interval may be waived if the axle was filled with 75W140 synthetic gear lubricant meeting Ford specification WSL-M2C192-A, part number F1TZ-19580-B or equivalent. Add friction modifier C8AZ-19B546-A (EST-M2C118-A) or equivalent for complete refill of Traction-Lok rear axles (see *Owner's Guide* for quantity). The axle lubricant should be changed anytime an axle has been submerged in water.

### California Fuel Filter Replacement

- If vehicle is registered in California, the California Air Resources Board has determined that the failure to perform this maintenance item will not nullify the emission warranty or limit recall liability prior to the completion of the vehicle's useful life. Ford Motor Company, however, urges you to have all recommended maintenance services performed at the specified intervals and to record all vehicle service.
