Your vehicle’s AdvanceTrac® system is comprised of two major components — stability control which helps avoid skids or lateral slides. These components work together to help you maintain stability and steerability of your vehicle during a variety of driving conditions. The stability control system is active any time you are driving. It monitors your vehicle’s speed, steering, acceleration, and braking. If it detects a situation where the vehicle might be unstable, the system will correct your vehicle’s direction.

To activate/deactivate.

For information on programming the lane change indicator, refer to Multifunction Display in the Instrument Cluster chapter of your Owner’s Guide.

Intelligent Access (IA) keys allow you to unlock the vehicle as you approach. The keyless entry system enables you to open the driver’s door by simply inserting your IA key into the keyhole. Once the door is open, you can close the door, lock the doors, and turn the key in the driver’s side door counterclockwise to lock all doors.

Press once to unlock the driver’s door. The interior lamps will illuminate and the parking lamps will flash. Press again within three seconds to open the trunk.

When armed, the perimeter alarm system will sound the horn and flash the blinker lights if unauthorized entry is attempted. When disarmed, the perimeter alarm system will sound the horn for 15 seconds when the lock button on the remote control is pressed once. If the button is pressed a second time, the system will disarm and the horn will stop.

Your moon roof has a built-in sliding shade. To open your moon roof, press the rear of the SLIDE control. If the sliding shade is closed, it will open along with the moon roof. To close, press and hold the front of the SLIDE control. Press the front of the TILT control to close the moon roof.

When your rear window defrost is activated, both outside mirrors will be heated. This feature is activated automatically when the rear window defrost is activated. The heating element in the outside mirrors will continue to operate until both outside rearview mirrors are manually returned to their original positions. A heated outside mirror will not function while your vehicle is moving if a turn signal has been activated.

The recommended specifications are on the Safety Compliance Certification Label located on the on the B-Pillar or the edge of the driver’s door. As an additional safety feature, your vehicle is equipped with a tire pressure monitoring system (TPMS). This system is designed to alert you when there is a significant drop in tire pressure. For more information, refer to the Wheels and Loading chapter in your Owner’s Guide.

If E85 fuels because your vehicle was not designed to run on fuels containing more than 10% ethanol.

Your spare tire is located in the trunk. Remove the spare and jack by turning their tie-down bolts out of the fill pipe to allow residual fuel to drain out of the fuel system. With this system, you simply open the fuel filler door, insert the nozzle and remove it when done. Clean the funnel (located in the spare tire compartment) after use.

Your new Ford Fiesta comes with the assurance and security of Ford. Ford offers free roadside assistance, limited fuel delivery, battery jump starts, changing a flat tire, towing, and winch out. To receive roadside assistance in the United States, call 1 (800) 241-3673. In Canada, call 1 (800) 565-3678.

The recommended specifications are on the Safety Compliance Certification Label located on the on the B-Pillar or the edge of the driver’s door. For the recommended tire pressure, refer to the Safety Compliance Certification Label located on the B-Pillar or the edge of the driver’s door. For more information, refer to the Wheels and Loading chapter in your Owner’s Guide.
