Your power steering wheel column may begin to flash, contact your authorized dealer as soon as possible. If the light does not turn on at ignition or remains on, if this light fails to illuminate, remains on or is blinking after the engine is started, the engine is controlled by the Solenoid, which is set to any setting except off. The wiper present on the windshield and the control automatically activate when moisture is detected. Press the GAP up or press GASP down to select from four active. Press GAP up or press GAP down to select from four active.

If the risk of collision increases, the dashboard warning system will activate. Press up/down to voice recognition. Your vehicle may be equipped with a heated steering wheel. To activate, press the HEATED STEERING WHEEL button once. The parking lamps will turn off. Refer to your Owner's Guide for more information. On your MyLincoln Touch® screen, the system will inform you which vehicles are moving in your blind spot. Refer to your Owner's Guide for more information. For more information on activating and deactivating the system, refer to the Owner's Guide for more information.

The Lane Keeping System will warn you when your vehicle begins to leave the designated lane without proper turn signal input. Refer to your Owner's Guide for more information. The Collision Warning System will warn you when your vehicle begins to leave the designated lane without proper turn signal input. Refer to your Owner's Guide for more information. The Rearview Camera (if equipped) will display messages to warn you which vehicles are moving in your blind spot. Refer to your Owner's Guide for more information.
CONVENIENCE

INTELLIGENT ACCESS

To unlock your vehicle, place your key fob’s intelligent access key area on the driver’s door handle. After 3 seconds, press this area to access your vehicle. You will hear an audio tone and see the front door handle indicator light glow green. Press the button to open the door or press and hold for 2 seconds to unlock all doors.

To lock all vehicle doors, press the lock button on the key fob. Press the button again to lock all doors. A chime will sound and the front door handle indicator light will glow green.

To access your vehicle’s remote start feature, press the remote start button on your key fob. You will hear an audio tone and see the front door handle indicator light glow green. The vehicle will start and you may remove your key fob. Be sure to turn off your vehicle in the absence of the key fob. Your vehicle will automatically lock all doors once remote start is performed.

To activate the panic alarm, press the panic button twice within three seconds, or the alarm will sound for 30 seconds, then shut off. To deactivate, press and hold the panic button for 3 seconds.

The intelligent access key also contains a securICODE™ keyless entry system: Press the button while applying key pressure to the driver’s door handle to open your vehicle. Ensure that you have your five digit factory code and, within five seconds, enter your five digit factory code. If you have previously set a securicode, press the button while applying key pressure to the driver’s door handle to lock your vehicle. To unlock, enter your five digit factory code and press the lock button on your key fob. You may also use your remote start button for security purposes. Please refer to your Owner’s Guide for complete details on changing securicode.

SIRIUS® TRAVEL LINK™ (if equipped), SIRIUS® Satellite Radio (for more information, refer to your MyLincoln Touch™ supplement.)
