INSTRUCTION 3:

Insert the Owner's Guide.

When driving, an actively engaged instrument panel may not always display all the gauges.

The gas engine may turn off during acceleration should you step on the accelerator pedal heavily. This is normal and will not damage your vehicle. Low gear (L) and variable transaxle (eCVT) are hygienic systems. Your hybrid vehicle is designed to use the electric motor to minimize fuel consumption and decrease the fuel economy.

INSTRUMENT Cluster

Learning About Your New Instrument Cluster

Your new hybrid vehicle has a盏Light Environmental System, where you will find many indicators and gauges. To familiarize yourself with the system, you can choose a desired cluster and then choose to customize the cluster to your exact preferences. Lincoln highly encourages you to take advantage of the demo feature to familiarize yourself with these new features.

Your hybrid vehicle comes equipped with several features. Depending on your driving efficiency, you may notice slight changes in air movement coming from below the rear seat cushions.

The vehicle is ready to drive.
**AUDIO Control**

The In-Dash CD6/MP3 Satellite Compatible Sound System (if equipped) features an easy-to-use design allowing you to take advantage of portable music devices. The system is designed for maximum flexibility and single disc control, allowing you to enjoy your entire music library.

**ADDITIONAL Features**

1. **BTM®** (BlinD Spot information SyStem) (if equipped) has five preset memory locations which enable you to use the blind spot detector. The button will flash each time you alter the memory.

2. **SYNC®** is an in-vehicle hands-free control system. It provides voice-activated access to your phone. The system can store your phonebook and allows you to dial your number or contacts with your voice. Press and release the voice button; then talk into the microphone.

3. **Vehicle speed can be limited** (if equipped) following state, province, or federal laws. To lock all vehicle doors, press 7-8 and press the feature in the control. To unlock all vehicle doors, press 5-6 and press the feature in the control. To open: Press and release the rear deck to open. To close from a venting position: Press the rear deck and turn to lock.
