ABOUT THIS PUBLICATION

WARNING: Driving while distracted can result in loss of vehicle control, crash and injury. We strongly recommend that you use extreme caution when using any device that may take your focus off the road. Your primary responsibility is the safe operation of your vehicle. We recommend against the use of any hand-held device while driving and encourage the use of voice-operated systems when possible. Make sure you are aware of all applicable local laws that may affect the use of electronic devices while driving.

Thank you for choosing Ford. We recommend that you take some time to get to know your vehicle by reading this publication. The more that you know about your vehicle, the greater the safety and pleasure you will get from driving it.

Note: Use and operate your vehicle in line with all applicable laws and regulations.

Note: Pass on all printed owner’s information when selling this vehicle.

Features and Options

Note: This publication describes product features and options available throughout the range of available models, sometimes even before they are generally available. It could describe options that are not available on the vehicle you have purchased.

Illustrations

Note: Some of the illustrations in this publication could show features as used in different models, so could appear different to you on your vehicle.

Location of Components

This publication could qualify the location of a component as left-hand side or right-hand side. The side is determined when facing forward in the seat.

A Right-hand side.
B Left-hand side.

USING THIS PUBLICATION

To quickly locate information about your vehicle, use the word search within the Owner's Manual application.

WARNINGS AND NOTES USED IN THIS PUBLICATION

Warnings Used in This Publication

We include warnings in this publication to make you aware of possible danger. You can keep yourself and others safe if you follow the instructions highlighted by the warning symbol.

Notes Used in This Publication

We include notes to give you more information to those instructions that require further explanation.
Symbols Glossary

**SYMBOLS USED ON YOUR VEHICLE**

These are some of the symbols you may see on your vehicle.

- **Airbag**
- **Air conditioning system**
- **Air conditioning system lubricant type**
- **Anti-lock braking system**
- **Avoid smoking, flames or sparks**
- **Battery**
- **Battery acid**
- **Blower motor**
- **Brake fluid - non petroleum based**
- **Brake system**
- **Brake system**
- **Cabin air filter**
- **Check fuel cap**

- **Child safety door lock or unlock**
- **Child seat lower anchor**
- **Child seat tether anchor**
- **Cruise control**
- **Do not open when hot**
- **Electric Parking brake**
- **Engine air filter**
- **Engine coolant**
- **Engine coolant temperature**
- **Engine oil**
- **Explosive gas**
- **Fan warning**
- **Fasten seatbelt**
- **Flammable**
- **Front fog lamps**

Data Privacy

**WARNING:** Do not connect wireless plug-in devices to the data link connector. Unauthorized third parties could gain access to vehicle data and impair the performance of safety related systems. Only allow repair facilities that follow our service and repair instructions to connect their equipment to the data link connector.

We respect your privacy and are committed to protecting it. The information contained in this publication was correct at the time of release, but as technology rapidly changes, we recommend that you visit the local Ford website for the latest information.

Your vehicle has electronic control units that have data recording functionality and the ability to permanently or temporarily store data. This data could include information on the condition and status of your vehicle, vehicle maintenance requirements, events and malfunctions. The types of data that can be recorded are described in this section. Some of the data recorded is stored in event logs or error logs.

**Note:** Error logs are reset following a service or repair.

**Note:** We may provide information in response to requests from law enforcement, other government authorities and third parties acting with lawful authority or through a legal process. Such information could be used by them in legal proceedings.

Data recorded includes, for example:

- Operating states of system components, for example fuel level, tire pressure and battery charge level.
- Vehicle and component status, for example wheel speed, deceleration, lateral acceleration and seatbelt status.
- Events or errors in essential systems, for example headlamps and brakes.
- System responses to driving situations, for example airbag deployment and stability control.
- Environmental conditions, for example temperature.

Some of this data, when used in combination with other information, for example an accident report, damage to a vehicle or eyewitness statements, could be associated with a specific person.

**Services That We Provide**

If you use our services, we collect and use data, for example account information, vehicle location and driving characteristics, that could identify you. We transmit this data through a dedicated, protected connection. We only collect and use data to enable your use of our services to which you have subscribed, with your consent or where permitted by law. For additional information, see the terms and conditions of the services to which you have subscribed.

For additional information about our privacy policy, refer to the local Ford website.

**Services That Third Parties Provide**

We recommend that you review the terms and conditions and data privacy information for any services equipped with your vehicle or to which you subscribe. We take no responsibility for services that third parties provide.
Data Privacy

SERVICE DATA

Our dealers collect service data through the data link connector in your vehicle. They use service data, for example error logs, to help them if you take your vehicle for repair. They share this data with our technical team, if required, to help with diagnosis. In addition to using the information for diagnosis and repair, we use and share service data with our service providers, for example parts suppliers, where required and where permitted by law, for continuous improvement or with other information that we have about you, for example your contact information, to offer you products and services that may be of interest to you according to your preferences and where allowed by law. Our service providers are equally required by law to protect your data and retain it in accordance with data retention policies.

**Note:** Third party repair facilities can also collect service data through the data link connector.

EVENT DATA

This vehicle is equipped with an event data recorder. The main purpose of an event data recorder is to record, in certain crash or near crash-like situations, such as an airbag deployment or hitting a road obstacle; this data will assist in understanding how a vehicle's systems performed. The event data recorder is designed to record data related to vehicle dynamics and safety systems for a short period of time, typically 30 seconds or less.

The event data recorder in this vehicle is designed to record such data as:

- How various systems in your vehicle were operating.
- Whether or not the driver and passenger seatbelts were buckled/fastened.
- How far (if at all) the driver was depressing the accelerator and/or the brake pedal.
- How fast the vehicle was traveling.
- Where the driver was positioning the steering wheel.

This data can help provide a better understanding of the circumstances in which crashes and injuries occur.

**Note:** Event data recorder data is recorded by your vehicle only if a non-trivial crash situation occurs; no data is recorded by the event data recorder under normal driving conditions and no personal data or information (for example name, gender, age, and crash location) is recorded. However, parties, such as law enforcement, could combine the event data recorder data with the type of personally identifying data routinely acquired during a crash investigation.

To read data recorded by an event data recorder, special equipment is required, and access to the vehicle or the event data recorder is needed. In addition to the vehicle manufacturer, other parties, such as law enforcement, that have such special equipment, can read the information if they have access to the vehicle or the event data recorder.
Data Privacy

SETTINGS DATA
Your vehicle has electronic control units that have the ability to store data based on your personalized settings. The data is stored locally in the vehicle or on devices that you connect to it, for example, a USB drive or digital music player. You can delete some of this data and also choose whether to share it through the services to which you subscribe. See Settings (page 497).

Comfort and Convenience Data
Data recorded includes, for example:
- Seat and steering wheel position.
- Climate control settings.
- Radio presets.

Entertainment Data
Data recorded includes, for example:
- Music, videos or album art.
- Contacts and corresponding address book entries.
- Navigation destinations.

CONNECTED VEHICLE DATA - VEHICLES WITH: MODEM
The modem has a SIM. The modem was enabled when your vehicle was built and periodically sends messages to stay connected to the cell phone network, receive automatic software updates and send vehicle-related information to us, for example diagnostic information. These messages could include information that identifies your vehicle, the SIM and the electronic serial number of the modem. Cell phone network service providers could have access to additional information, for example cell phone network tower identification. For additional information about our privacy policy, visit www.FordConnected.com or refer to your local Ford website.

Note: The modem continues to send this information unless you disable the modem or stop the modem from sharing vehicle data by changing the modem settings. See Connected Vehicle (page 465).

Note: The service can be unavailable or interrupted for a number of reasons, for example environmental or topographical conditions and data plan coverage.

Note: To find out if your vehicle has a modem, visit www.FordConnected.com.

MOBILE DEVICE DATA - VEHICLES WITH: SYNC 3/ SYNC 4
If you connect a mobile device to your vehicle, you can display data from your device on the touchscreen for example, music and album art. You can share your vehicle data with mobile apps on your device through the system. See Apps (page 496). See App Requirements (page 521).

The mobile apps function operates by your connected device sending data to us in the United States. The data is encrypted and includes, for example, the vehicle identification number of your vehicle, the SYNC module serial number, odometer, enabled apps, usage statistics and debugging information. We retain it only as long as necessary to provide the service, to troubleshoot, for continuous improvement and to offer you products and services that may be of interest to you according to your preferences and where allowed by law.
If you connect a cell phone to the system, the system creates a profile that links to that cell phone. The cell phone profile enables more mobile features and efficient operation. The profile contains, for example data from your phonebook, read and unread text messages and call history, including history of calls when your cell phone was not connected to the system.

If you connect a media device, the system creates and retains a media device index of supported media content. The system also records a short diagnostic log of approximately 10 minutes of all recent system activity.

The cell phone profile, media device index and diagnostic log remain in your vehicle unless you delete them and are generally accessible only in your vehicle when you connect your cell phone or media device. If you no longer plan to use the system or your vehicle, we recommend you use the master reset function to erase the stored information. See Settings (page 497). See Performing a Master Reset (page 526).

System data cannot be accessed without special equipment and access to your vehicle's module.

For additional information about our privacy policy, refer to the local Ford website.

Note: To find out if your vehicle has connectivity technology, visit www.FordConnected.com.

EMERGENCY CALL SYSTEM DATA - VEHICLES WITH: EMERGENCY ASSISTANCE

When the emergency call system is active, it may disclose to emergency services that your vehicle has been in a crash involving the deployment of an airbag or activation of the fuel pump shut-off. Certain versions or updates to the emergency call system may also be capable of electronically or verbally disclosing to emergency services operators your vehicle location or other details about your vehicle or crash to assist emergency services operators to provide the most appropriate emergency services. If you do not want to disclose this information, do not activate the emergency call system.

Note: You cannot deactivate emergency call systems that are required by law.

EMERGENCY CALL SYSTEM DATA - VEHICLES WITH: ECALL

When the emergency call system is active, it may disclose to emergency services that your vehicle has been in a crash involving the deployment of an airbag or activation of the fuel pump shut-off. Certain versions or updates to the emergency call system may also be capable of electronically or verbally disclosing to emergency services operators your vehicle location or other details about your vehicle or crash to assist emergency services operators to provide the most appropriate emergency services. If you do not want to disclose this information, do not activate the emergency call system.

Examples of data that the system could transmit are:
• Vehicle identification number.
• Vehicle fuel type.
Data Privacy

- Current time.
- Vehicle location and direction.
- Whether the call was automatically or manually initiated.
- Vehicle category.
- Number of occupants in the vehicle.

**Note:** You cannot deactivate emergency call systems that are required by law.
PROTECTING THE ENVIRONMENT

You can take significant steps toward protecting the environment with correct vehicle usage and the authorized disposal of waste, cleaning and lubrication materials.

For additional information about our sustainability progress and initiatives, visit www.sustainability.ford.com.

Only child restraints certified to ECE-R129 or ECE-R44.03 (or later) have been tested and approved for use in your vehicle.

**Note:** Mandatory use of child restraints varies from country to country.

**WARNING:** Extreme Hazard! Never use a rearward facing child restraint on a seat protected by an active airbag in front of it. Death or serious injury to the child can occur.

**WARNING:** You must switch the passenger airbag off when using a rearward facing child restraint on the front seat.
**WARNING:** If you use a child restraint and a seatbelt, make sure that the seatbelt is not slack or twisted.

**WARNING:** Do not install a booster seat or a booster cushion with only the lap strap of the seatbelt.

**WARNING:** Do not install a booster seat or a booster cushion with a seatbelt that is slack or twisted.

**WARNING:** Make sure that your children sit in an upright position.

---

**CHILD RESTRAINT ANCHOR POINTS**

**WHAT ARE THE CHILD RESTRAINT ANCHOR POINTS**

Anchor points are designed to allow you to quickly and safely install a child restraint.

**LOCATING THE CHILD RESTRAINT LOWER ANCHOR POINTS**

Lower anchor points are on the rear outermost seats.

**LOCATING THE CHILD RESTRAINT TOP TETHER ANCHOR POINTS - 4-DOOR**

For child restraints with a top tether, tether anchor points are behind the second row seats.
LOCATING THE CHILD RESTRAINT
TOP TETHER ANCHOR POINTS -
5-DOOR/WAGON

Top tether anchor points are on the back of the rear seat.
# Child Safety

## Child Restraints

### Child Restraint Position Information

</tr>
</tbody>
</table>

1. We recommend that you secure children in a government approved child restraint, on the rear seat.
2. Do not use a child restraint with a support leg on the rear center seat unless stated as suitable in the child restraint manufacturer's product information.

**X** Not suitable for children in this mass group.

**U** Suitable for universal category child restraints approved for use in this mass group.

**UF** Suitable for universal category forward facing child restraints approved for use in this mass group.

<tr>
<td>3  22–36 kg (49–79 lb)</td>
<td>Britax Römer.</td>
<td>KidFix.</td>
<td>ISOFIX and seatbelt or seatbelt only.</td>
</tr>
</tbody>
</table>

1We recommend that you secure children using an ISOFIX child restraint on the rear outermost seats.

2We recommend that you use a booster seat that combines a cushion with a backrest instead of a booster cushion only.

See an authorized dealer for the latest details relating to our recommended child restraints.
INSTALLING CHILD RESTRAINTS

**WARNING:** Read and follow the manufacturer’s instructions when you are installing a child restraint.

**Note:** Always follow the manufacturer’s instructions for installing a child restraint with a top tether.

**WARNING:** Do not attach the top tether strap to anything other than the correct top tether strap anchor point.

**WARNING:** Make sure that the top tether strap is not slack or twisted and is properly located on the anchor point.

**WARNING:** If you use a child restraint that has a support leg, make sure the support leg rests securely on the floor.

**WARNING:** Make sure the child restraint rests tightly against the vehicle seat. You may need to adjust the seats to properly secure the child restraint. Make sure that the seat backrest is in an upright position. It may also be necessary to lift or remove the head restraint.

When using a child restraint on a front seat, follow these seat positioning guidelines:

- The child restraint must not be in contact with the instrument panel.
- Position the passenger seat as far rearward as possible and route the seatbelt forward and downward from the B-pillar ring to the child restraint.
- If it proves difficult to tighten the lap section of the seatbelt without slack remaining, adjust the seat backrest to the fully upright position and raise the height of the seat.

**Note:** When using a child restraint on a rear seat, adjust the front seat to a position to prevent contact with the child’s feet or legs.

BOOSTER SEATS

**Booster Seat**

Secure children that weigh greater than 15 kg (33 lb) but are less than 150 cm (60 in) tall in a booster seat or on a booster cushion.

We recommend that you use a booster seat that combines a cushion with a backrest instead of a booster cushion only. The raised seating position will allow you to position the shoulder strap of the adult seatbelt over the center of your child’s shoulder and the lap strap tightly across their hips.

**Booster Cushion**

**WARNING:** When using a booster cushion, make sure you adjust the vehicle head restraint on that seating position.
Secure children that weigh greater than 22 kg (49 lb) but are less than 150 cm (60 in) tall on a booster cushion.

**CHILD SAFETY LOCKS**

**WARNING:** You cannot open the rear doors from inside if you have put the child safety locks on.

A child safety lock is on the rear edge of each rear door. You must switch the child safety lock separately on each door.

**Left-Hand Side**

Turn the key clockwise to switch the child lock on and counterclockwise to switch it off.

**Right-Hand Side**

Turn the key counterclockwise to switch the child lock on and clockwise to switch it off.
Seatbelts

SEATBELT PRECAUTIONS

**WARNING:** Make sure that the seatbelts are securely stowed away when not in use and not outside your vehicle when closing the doors.

FASTENING AND UNFASTENING THE SEATBELTS

Fastening the Seatbelts

All seatbelts in your vehicle are a three-point combination lap and shoulder seatbelt.

1. Pull the seatbelt out steadily.

   **Note:** It may lock if you pull it sharply or if the vehicle is on a slope.

2. Insert the tongue into the buckle.

3. Pull the seatbelt tight to remove any slack.

Unfastening the Seatbelts

1. Press the red button on the buckle to release the seatbelt.

2. Hold the seatbelt tongue and let it retract completely and smoothly to its stowed position.

ADJUSTING THE SEATBELTS DURING PREGNANCY

**WARNING:** Position the seatbelt correctly for your safety and that of your unborn child. Do not use only the lap strap or the shoulder strap.

Pregnant women should always wear their seatbelt. The lap belt portion of a combination lap and shoulder belt should be positioned low across the hips below the belly and worn as tight as comfort will allow. The shoulder belt portion of a combination lap and shoulder belt should be positioned to cross the middle of the shoulder and the center of the chest.
ADJUSTING THE SEATBELT HEIGHT

**WARNING:** Position the seatbelt height adjuster so that the seatbelt rests across the middle of your shoulder. Failure to adjust the seatbelt correctly could reduce its effectiveness and increase the risk of injury in a crash.

1. Press the button and slide the height adjuster up or down.
2. Release the button and pull down on the height adjuster to make sure it is locked in place.

SEATBELT REMINDER

SEATBELT REMINDER INDICATORS

A warning lamp illuminates if the ignition is on and any of the following occur:

- A front seat is occupied and the seatbelt has not been fastened.
- A rear seatbelt has been recently unfastened.

The warning lamp illuminates until you fasten your seatbelt.

SEATBELT REMINDER AUDIBLE WARNINGS

A warning tone sounds and the warning lamp illuminates if you are not wearing your seatbelt when your vehicle exceeds a relatively low speed.

The warning tone sounds for a short period of time or until you fasten your seatbelt.

SWITCHING THE SEATBELT REMINDER ON AND OFF

We recommend that you contact an authorized dealer.
**Seatbelts**

**CHECKING SEATBELT STATUS - VEHICLES WITH: 4.2 INCH INSTRUMENT CLUSTER DISPLAY SCREEN**

A  Seatbelt fastened.
B  Seatbelt not fastened.

Airbags

HOW DO THE FRONT AIRBAGS WORK

The front airbags are designed to deploy during a significant frontal or near-frontal crash. The airbags inflate within a few thousandths of a second cushioning forward body movement and deflate on contact with the occupant. The front airbags are not designed to deploy during a minor frontal crash, rear crash, side crash or a vehicle rollover.

HOW DO THE SIDE AIRBAGS WORK

⚠️ WARNING: Do not place objects or mount equipment on or near the headliner at the siderail that may come into contact with a deploying curtain airbag. Failure to follow these instructions may increase the risk of personal injury in the event of a crash.

⚠️ WARNING: Do not lean your head on the door. The side airbag could injure you as it deploys from the side of the seatback.

⚠️ WARNING: Accessory seat covers not released by Ford Motor Company could prevent the deployment of the airbags and increase the risk of injuries in a crash.

⚠️ WARNING: Do not attempt to service, repair, or modify the supplementary restraint system or associated components. Failure to follow this instruction could result in personal injury or death.

⚠️ WARNING: If a supplementary restraint system component has deployed, it will not function again. Have the system and associated components inspected as soon as possible. Failure to follow this instruction could result in personal injury or death.

The side airbags are on the outermost side of each front seat backrest. There is a label attached to the side of each backrest to indicate this.
The side airbags are designed to inflate between the door panel and the occupant to enhance the protection in certain crashes. The side airbags are designed to deploy during a significant lateral crash. They could also deploy during a significant frontal crash. The side airbags are not designed to deploy during a minor lateral or frontal crash, rear crash or a vehicle rollover.

**HOW DO THE SIDE CURTAIN AIRBAGS WORK**

⚠️ **WARNING:** Do not place objects or mount equipment on or near the headliner at the siderail that may come into contact with a deploying curtain airbag. Failure to follow these instructions may increase the risk of personal injury in the event of a crash.

The airbags are designed to deploy during a significant lateral or frontal angled crash. The airbags are not designed to deploy during a minor lateral and frontal crash, rear crash or a vehicle rollover.

**AIRBAG PRECAUTIONS**

⚠️ **WARNING:** Extreme Hazard! Never use a rearward facing child restraint on a seat protected by an active airbag in front of it. Death or serious injury to the child can occur.

⚠️ **WARNING:** Do not modify the front of your vehicle in any way. This could adversely affect deployment of the airbags. Failure to adhere to this warning could result in serious personal injury or death.

⚠️ **WARNING:** Wear a seatbelt and keep sufficient distance between yourself and the steering wheel. Only when you use the seatbelt correctly, can it hold you in a position that allows the airbag to achieve its optimum effect. Failure to adhere to this warning could result in serious personal injury or death.
**WARNING:** Repairs to the steering wheel, steering column, seats, airbags and seatbelts must be carried out by an authorized dealer. Failure to adhere to this warning could result in serious personal injury or death.

**WARNING:** Keep the areas in front of the airbags free from obstruction. Do not affix anything to or over the airbag covers. Objects could become projectiles during airbag deployment. Failure to follow this instruction could result in personal injury or death.

**WARNING:** Do not poke sharp objects into areas where airbags are fitted. This could damage and adversely affect deployment of the airbags. Failure to follow this instruction could result in personal injury or death.

**WARNING:** Accessory seat covers not released by Ford Motor Company could prevent the deployment of the airbags and increase the risk of injuries in a crash.

**WARNING:** Do not attempt to service, repair, or modify the supplementary restraint system or associated components. Failure to follow this instruction could result in personal injury or death.

**WARNING:** If a supplementary restraint system component has deployed, it will not function again. Have the system and associated components inspected as soon as possible. Failure to follow this instruction could result in personal injury or death.

*Note:* A loud bang sounds and there is a cloud of harmless powdery residue if an airbag deploys. This is normal.

**AIRBAG LOCATIONS**

A Front Airbags.
B Side Curtain Airbags.
C Side Airbags.

*Note:* The location of airbags are indicated by the word Airbag.

**PASSENGER AIRBAG INDICATORS**

![Airbag Indicator](image)
The passenger airbag on and off indicators are close to the climate control unit.

**SWITCHING THE PASSENGER AIRBAG ON AND OFF - VEHICLES WITH: SYNC 2.5**

### Switching the Passenger Airbag Off

**WARNING:** You must switch the passenger airbag off when using a rearward facing child restraint on the front seat.

1. Using the information display controls on the steering wheel, select Settings.
2. Select Vehicle settings.
3. Select Passenger airbag.
4. Select Off.
5. Press and hold the OK button until a confirmation message appears in the information display.

### Switching the Passenger Airbag On

**WARNING:** You must switch the passenger airbag on following the removal of the child restraint.

1. Using the information display controls on the steering wheel, select Settings.
2. Select Vehicle settings.
3. Select Passenger airbag.
4. Select On.
5. Press and hold the OK button until a confirmation message appears in the information display.

**AIRBAGS – TROUBLESHOOTING**

**AIRBAGS – WARNING LAMPS**

If it does not illuminate when you switch the power on, continues to flash or remains on when your vehicle is running, this indicates a malfunction. Have your vehicle checked as soon as possible.

**AIRBAGS – AUDIBLE WARNINGS**

Sounds when the airbag warning lamp is not working.
WHAT IS EMERGENCY ASSISTANCE

Emergency Assistance is a system that automatically uses your paired phone to call the emergency services in the event of a severe accident.

HOW DOES EMERGENCY ASSISTANCE WORK

If an accident results in an attempt to deploy an airbag, excluding knee airbags and rear inflatable seatbelts, or to shut off the fuel pump, your vehicle can contact emergency services by dialing the emergency number through a paired and connected Bluetooth-enabled phone.

To switch Emergency Assistance on and off please view the settings information. See Settings (page 497).

During an emergency call, the system transmits vehicle data to the emergency service. Before setting this feature on, make sure that you read the Emergency Assistance Privacy Notice. See Emergency Call System Data (page 28).

Note: If any user sets Emergency Assistance to on or off, that setting applies for all paired phones. If Emergency Assistance is switched off and the phone is connected to SYNC, an icon displays on the status bar.

Not all crashes deploys an airbag or activates the fuel pump shut-off. If a connected cell phone sustains damage or loses its connection to SYNC during a crash, SYNC searches for and tries to connect to a previously paired cell phone, SYNC then attempts to call the emergency services.

Before making the call:

- SYNC provides a short window of time, about 10 seconds, to cancel the call. If you fail to cancel the call, SYNC attempts to dial Emergency.
- SYNC says the following, or a similar message: "SYNC will attempt to call Emergency, to cancel the call, press Cancel on your screen or press and hold the phone button on your steering wheel."

If you do not cancel the call, and SYNC makes a successful call, a pre-recorded message plays for the Emergency operator, and then the occupant in your vehicle is able to talk with the operator. Be prepared to provide your name, phone number and location immediately, because not all Emergency systems are capable of receiving this information electronically.

EMERGENCY CALL REQUIREMENTS

WARNING: Unless the Emergency Assistance setting is on prior to a collision, the system does not attempt to place an emergency call. This could delay the response time, increasing the risk of serious injury or death.

WARNING: For this feature to work, your mobile phone must be Bluetooth-enabled and compatible with the system.
WARNING: Do not wait for Emergency Assistance to make an emergency call if you can do it yourself. Dial emergency services immediately to avoid a delayed response time. If you do not hear Emergency Assistance within five seconds of the crash, the system or cell phone may be damaged or non-functional.

WARNING: Always place your phone in a secure location in your vehicle so it does not become a projectile or get damaged in a crash. Failure to do so may cause serious injury to someone or damage the phone which could prevent Emergency Assistance from working properly.

Emergency Assistance works correctly when all of the following occur:
- SYNC works properly at the time of the incident and throughout feature activation and use.
- The Emergency Assistance feature is set on before the incident.
- You must pair and connect a Bluetooth-enabled and compatible cell phone to SYNC.
- A connected Bluetooth-enabled phone has the ability to make and maintain an outgoing call at the time of the incident.
- A connected Bluetooth-enabled phone has adequate network coverage, battery power and signal strength.
- The vehicle has battery power and is in a territory where Emergency Assistance is supported.

EMERGENCY CALL LIMITATIONS

Emergency Assistance may not work if:
- Your cell phone or Emergency Assistance hardware sustains damage in the crash.
- The vehicle battery or the system has no power.
- A crash ejects your cell phone from your vehicle.
- You do not have a valid and registered SIM card with credit in your cell phone.
- You are in a country where Emergency Assistance cannot call the local emergency services. For additional information, please refer to the local Ford website.

Note: This feature only works in a country where Emergency Assistance can call the local emergency services. For additional information, please refer to the local Ford website.

Note: Every mobile phone operates differently. While Emergency Assistance works with most mobile phones, some mobile phones may experience difficulties using this feature.

Emergency Assistance does not currently call emergency services in the following countries:
- Albania.
- Armenia.
- Azerbaijan.
- Belarus.
- Bosnia and Herzegovina.
- Georgia.
- Macedonia.
- Moldova.
- Netherlands.
Emergency Assistance

- Russia.
- Ukraine.
WHAT IS ECALL

eCall is an emergency call system that complies with European Union Regulation (EU) 2015/758. See eCall User Information (page 557).

The system uses the public cell phone network to initiate a call to the public emergency services when activated automatically in a severe accident or manually by the vehicle occupants.

eCall is designed for emergency calls in case of severe accidents or other emergencies that require the emergency services. It does not support other voice calls.

HOW DOES ECALL WORK

If an accident results in an attempt to deploy an airbag, excluding knee airbags and rear inflatable seatbelts, or to shut off the fuel pump, the system initiates a call to the emergency services. This call cannot be canceled.

In the case of an emergency, the system, as a means of communication aid, can help you contact specific rescue departments of public emergency services. The system does not deploy the rescue operations. The local public emergency service deploys specific rescue operations according to the actual situation.

During an emergency call, the system transmits vehicle data to the emergency service. See Emergency Call System Data (page 28).

Note: If the transmission is unsuccessful, this could result in the emergency operator not receiving your vehicle data.

Note: If the system is unable to initiate a call to the emergency services, a voice prompt plays and the emergency call indicator illuminates.

EMERGENCY CALL REQUIREMENTS

The system only operates in areas with a compatible cell phone network and emergency services infrastructure.

EMERGENCY CALL LIMITATIONS

Not all accidents activate the system. If an accident does trigger the system, it initiates a call to the emergency services. Do not wait for the system to initiate a call if you are able to do so. Call emergency services immediately to avoid a delayed response time. If you do not hear the system within five seconds of the accident, the system could be non-functional.

Using a non-Ford audio system could result in the system not properly operating.

MANUALLY MAKING AN EMERGENCY CALL

WARNING: Use caution when making a manual emergency call when driving.

1. Switch the ignition on.
2. Press the SOS symbol on the overhead console to open the emergency call button cover.
3. Press the emergency call button to initiate a call to the emergency services.

Note: Press the button again before the call is connected to cancel it.

4. Speak to the operator.
**Note:** After completing an emergency call, the emergency operator can call your vehicle. The system automatically answers incoming calls for approximately an hour.

**EMERGENCY CALL INDICATORS**

![WARNING: If the system malfunctions, have your vehicle checked as soon as possible.]

The indicator is integrated into the emergency call button cover on the overhead console. It illuminates brightly for a short time when you switch the ignition on.

REMOTE CONTROL LIMITATIONS

The typical operating range for your remote control is approximately 10 m (33 ft).

A decrease in operating range could be caused by:

- Weather conditions.
- Nearby radio towers.
- Structures around your vehicle.
- Other vehicles parked next to your vehicle.

The radio frequency used by your remote control can also be used by other short distance radio transmissions, for example amateur radios, medical equipment, wireless headphones, remote controls and alarm systems. If the frequencies are jammed, you will not be able to use your remote control. You can lock and unlock the doors with the key.

**Note:** Make sure you have locked your vehicle before leaving it unattended.

**Note:** If you are within range of your vehicle, the remote control will operate if you unintentionally press any button.

**Note:** The remote control contains sensitive electrical components. Exposure to moisture or impact may cause permanent damage.

OPENING AND CLOSING THE FLIP KEY

Press the button to release the key. Press and hold the button to fold the key back when not in use.

REMOVING THE KEY BLADE

The passive key contains a removable key blade that you can use to unlock your vehicle.

1. Press and hold the buttons on the edges of the transmitter to release the cover. Carefully remove the cover.
2. Remove the key blade from the transmitter.
LOCATING YOUR VEHICLE

Press the lock button on the key twice within three seconds. The direction indicators will flash.

CHANGING THE REMOTE CONTROL BATTERY - VEHICLES WITH: KEYLESS ENTRY

**WARNING:** Keep batteries away from children to prevent ingestion. Failure to follow this instruction could result in personal injury or death. If ingested, immediately seek medical attention.

**WARNING:** If the battery compartment does not securely close, stop using the remote control and replace it as soon as possible. In the meantime, keep the remote control away from children. Failure to follow this instruction could result in personal injury or death.

**CAUTION:** The battery can cause severe or fatal injuries in two hours or less if swallowed or placed inside any part of the body. Seek medical attention immediately.

Make sure that you dispose of old batteries in an environmentally friendly way. Seek advice from your local authority about recycling old batteries.

The remote control uses one coin-type three-volt lithium battery CR2032 or equivalent.

1. Press and hold the buttons on the edges of the transmitter to release the cover. Carefully remove the cover.
2. Remove the key blade from the transmitter.
3. Use a suitable tool, for example a screwdriver, to carefully separate the two halves of the remote control.
4. Twist the screwdriver in the position shown to separate the two halves of the remote control.

5. Carefully remove the battery with the screwdriver.

**Note:** Do not touch the battery contacts or the printed circuit board with the screwdriver.

6. Insert a new battery with the + facing downward.

**Note:** Do not wipe off any grease on the battery terminals or on the back surface of the circuit board.

7. Assemble the two halves of the remote control.

8. Reinstall the key blade.

---

**CHANGING THE REMOTE CONTROL BATTERY - VEHICLES WITH: REMOTE FLIP KEY**

**WARNING:** Keep batteries away from children to prevent ingestion. Failure to follow this instruction could result in personal injury or death. If ingested, immediately seek medical attention.

**WARNING:** If the battery compartment does not securely close, stop using the remote control and replace it as soon as possible. In the meantime, keep the remote control away from children. Failure to follow this instruction could result in personal injury or death.

Make sure that you dispose of old batteries in an environmentally friendly way. Seek advice from your local authority about recycling old batteries.

The remote control uses one coin-type three-volt lithium battery CR2032 or equivalent.

1. Press the key release button.
2. Insert a suitable tool, for example a screwdriver, in the position shown and gently push the clip.

3. Press the clip down to release the battery cover.

4. Carefully remove the cover.

5. Insert a screwdriver as shown to release the battery.

Note: Do not touch the battery contacts or the printed circuit board with the screwdriver.

6. Remove the battery.

7. Install a new battery with the + facing upward.

8. Replace the battery cover.

REPLACING A LOST KEY OR REMOTE CONTROL

You can purchase replacement keys or remote controls from an authorized dealer. If possible, provide them with the key number from the tag provided with the original key. You can also obtain extra keys.

**WHAT IS MYKEY**

MyKey allows you to program keys with restricted settings to promote good driving habits.

**MYKEY SETTINGS**

**NON-CONFIGURABLE MYKEY SETTINGS - EXCLUDING: ST**

**Seatbelt Reminder**

The audio system mutes when the seatbelt reminder turns on. The seatbelt reminder cannot be switched off with a MyKey.

**Early Low Fuel**

The low fuel level warning lamp turns on earlier.

**Driving and Parking Aids**

Parking aids, blind spot information system and cross traffic alert turn on when you start the engine and cannot be switched off with a MyKey.

Pre-collision assist and lane keeping alert turn on when you start the engine, but can be switched off with a MyKey.

**SELECTABLE DRIVE MODES**

You cannot select some drive modes when using a MyKey.

**Traction Control and Stability Control**

You cannot switch traction control or stability control off when using a MyKey.

**CONFIGURABLE MYKEY SETTINGS - EXCLUDING: ST**

You can configure the following settings after creating a MyKey.

**Speed Limit**

**WARNING:** Do not set MyKey maximum speed limit to a limit that will prevent the driver from maintaining a safe speed considering posted speed limits and prevailing road conditions. The driver is always responsible to drive in accordance with local laws and prevailing conditions. Failure to do so could result in accident or injury.

You can set a speed limit for your vehicle. Warning messages appear in the information display and a tone sounds if your vehicle reaches the set speed. You cannot override the set speed when using a MyKey.
**Speed Reminder**

You can set a speed reminder for your vehicle. Warning messages appear in the information display and a tone sounds if your vehicle exceeds the set speed.

**Audio System Volume Limit**

The audio system maximum volume is reduced. A message appears in the information display if you attempt to exceed the volume limit. Automatic volume control turns off.

**Emergency Assistance**

If you set emergency assistance to be always on, it cannot be switched off with a MyKey.

**Do Not Disturb**

If you set do not disturb to be always on, it cannot be switched off with a MyKey.

**Traction and Stability Control**

If you set traction control or stability control to be always on, you cannot switch it off with a MyKey.

**CONFIGURABLE MYKEY SETTINGS - ST**

You can configure the following settings after creating a MyKey. See Creating a MyKey (page 64).

---

**Speed Limit**

**WARNING:** Do not set MyKey maximum speed limit to a limit that will prevent the driver from maintaining a safe speed considering posted speed limits and prevailing road conditions. The driver is always responsible to drive in accordance with local laws and prevailing conditions. Failure to do so could result in accident or injury.

You can set a speed limit for your vehicle. Warning messages appear in the information display and a tone sounds if your vehicle reaches the set speed. You cannot override the set speed when using a MyKey.

**Speed Reminder**

You can set a speed reminder for your vehicle. Warning messages appear in the information display and a tone sounds if your vehicle exceeds the set speed.

**Audio System Volume Limit**

The audio system maximum volume is reduced. A message appears in the information display if you attempt to exceed the volume limit. Automatic volume control turns off.

**Emergency Assistance**

If you set emergency assistance to be always on, it cannot be switched off with a MyKey.

**Do Not Disturb**

If you set do not disturb to be always on, it cannot be switched off with a MyKey.
CREATING A MYKEY - VEHICLES WITH: SYNC 2.5/KEYED IGNITION

1. Switch the ignition on using an admin key.
2. Using the information display controls on the steering wheel, select Settings.
3. Select MyKey.
4. Select Create MyKey.
5. Press and hold the OK button until a confirmation message appears in the information display.
6. Switch the ignition off.

**Note:** We recommend that you label this key.

CREATING A MYKEY - VEHICLES WITH: SYNC 2.5/PUSH BUTTON START

1. Switch the ignition on using an admin key.
2. Using the information display controls on the steering wheel, select Settings.
3. Select MyKey.
4. Select Create MyKey.
5. Press and hold the OK button until a confirmation message appears in the information display.
6. Switch the ignition off.

**Note:** We recommend that you label this key.

CREATING A MYKEY - VEHICLES WITH: SYNC 3/KEYED IGNITION

1. Switch the ignition on using an admin key.
2. Press Settings on the touchscreen.
4. Press MyKey.
5. Press Create MyKey.
6. Switch the ignition off.

**Note:** We recommend that you label this key.

CREATING A MYKEY - VEHICLES WITH: SYNC 3/PUSH BUTTON START

1. Remove the rubber mat.
2. Place the admin key in the position shown, with the buttons facing upward.
3. Switch the ignition on.
4. Using the information display controls on the steering wheel, select Settings.
5. Select MyKey.
6. Select Create MyKey.
7. Press and hold the OK button until a confirmation message appears in the information display.
8. Switch the ignition off.

**Note:** We recommend that you label this key.
CREATING A MYKEY - VEHICLES WITH: SYNC 3/ SYNC 4/PUSH BUTTON START

1. Remove the rubber mat.
2. Place the admin key in the position shown, with the buttons facing upward.
3. Switch the ignition on.
4. Press Settings on the touchscreen.
5. Press Vehicle.
6. Press MyKey.
7. Press Create MyKey.
8. Switch the ignition off.

Note: We recommend that you label this key.

PROGRAMMING A MYKEY - VEHICLES WITH: SYNC 3/ SYNC 4

You can only program MyKeys to the same settings.
1. Switch the ignition on using an admin key.
2. Press Settings on the touchscreen.
4. Press MyKey.
5. Select a setting and press the OK button.
6. Configure the setting.
7. Switch the ignition off.

CLEARING ALL MYKEYS - VEHICLES WITH: SYNC 2.5

When you clear all MyKeys, you remove all restrictions and return all MyKeys to their original admin key status.
1. Switch the ignition on using an admin key.
2. Using the information display controls on the steering wheel, select Settings.
3. Select MyKey.
5. Press and hold the OK button until a confirmation message appears in the information display.
CLEARING ALL MYKEYS - VEHICLES WITH: SYNC 3/SYNC 4

When you clear all MyKeys, you remove all restrictions and return all MyKeys to their original admin key status.
1. Switch the ignition on using an admin key.
2. Press Settings on the touchscreen.
4. Press MyKey.
5. Press Clear all MyKeys.

CHECKING MYKEY SYSTEM STATUS - VEHICLES WITH: SYNC 3/SYNC 4

You can find information about the distance traveled using a MyKey and also the number of admin keys and MyKeys created for your vehicle.
1. Switch the ignition on.
2. Press Settings on the touchscreen.
4. Press MyKey.
5. Press MyKey Information.

USING MYKEY WITH REMOTE START SYSTEMS

The system is not compatible with non-Ford remote start systems.

MYKEY — FREQUENTLY ASKED QUESTIONS - VEHICLES WITH: KEYED IGNITION

What is an admin key?
An admin key is a key that you have not created as a MyKey.

Why am I not able to create a MyKey?
The key used to switch the ignition on is not an admin key. The key used to switch the ignition on is the only admin key. There has to be at least one admin key.

Why am I not able to program a MyKey?
The key used to switch the ignition on is not an admin key. You have not created any MyKeys.

Why am I not able to clear the MyKeys?
The key used to switch the ignition on is not an admin key. You have not created any MyKeys.

Why is the MyKey distance not accumulating?
The key used to start the engine is an admin key. An admin key and a MyKey are inside your vehicle. You have not created any MyKeys. You have cleared the MyKeys.

Why am I not able to start the engine with a MyKey?
An admin key and a MyKey are inside your vehicle. The system recognizes only the admin key when both are present.

MYKEY — FREQUENTLY ASKED QUESTIONS - VEHICLES WITH: PUSH BUTTON START

What is an admin key?
An admin key is a key that you have not created as a MyKey.

Why am I not able to create a MyKey?
You have not placed the admin key in the backup position. The key used to switch the ignition on is not an admin key. The key used to switch the ignition on is the only admin key. There has to be at least one admin key. You did not switch the ignition off after creating the last MyKey.

Why am I not able to program a MyKey?
The admin key is not inside your vehicle. The key used to switch the ignition on is not an admin key. You have not created any MyKeys.

Why am I not able to clear the MyKeys?
The admin key is not inside your vehicle. The key used to switch the ignition on is not an admin key. You have not created any MyKeys.

Why is the MyKey distance not accumulating?
The key used to start the engine is an admin key. An admin key and a MyKey are inside your vehicle. You have not created any MyKeys. You have cleared the MyKeys.

Why am I not able to start the engine with a MyKey?
An admin key and a MyKey are inside your vehicle. The system recognizes only the admin key when both are present.
OPERATING THE DOORS FROM OUTSIDE YOUR VEHICLE

UNLOCKING AND LOCKING THE DOORS USING THE REMOTE CONTROL

You can only use the remote control when your vehicle is stationary.

Unlocking the Doors
Press the button to unlock all doors.

Locking the Doors
Press the button to lock all doors. One short flash of the turn signal lamps confirms that your vehicle has locked.

Note: For more information on operating the doors from outside your vehicle See Keyless Entry (page 75).

UNLOCKING AND LOCKING THE DOORS USING THE KEY BLADE

Removing the Lock Cylinder Cap
1. Release the key blade from the remote control. See Removing the Key Blade (page 57).
2. Fully insert the key blade into the key slot.
3. Gently pull the lock cylinder cap toward you to release it.
4. Insert the key blade into the lock cylinder.

Locking the Doors
Turn the top of the key toward the front of your vehicle.

Unlocking the Driver Door
Turn the top of the key toward the rear of your vehicle.

Note: If the child safety locks are on and you pull the interior handle, you only switch off the emergency locking, not the child safety lock. You can only open the doors using the external door handle.
Reinstalling the Lock Cylinder Cap

1. Place the cap over the lock cylinder.
2. Push the cap forward until it clicks into place. Make sure you have properly installed the cap by trying to move it rearward.

DOUBLE LOCKING THE DOORS USING THE REMOTE CONTROL

WARNING: Do not use double locking when passengers or animals are inside your vehicle. The doors cannot be unlocked or opened from the inside when double locked.

Double locking is a theft protection feature that prevents someone from opening the doors from the inside. You can only double lock the doors if all the doors are closed.

1. Remove the lock cylinder cap. See Unlocking and Locking the Doors Using the Key Blade (page 69).
2. Turn the top of the key toward the front of your vehicle twice within three seconds.
3. Reinstall the lock cylinder cap.

DOUBLE LOCKING THE DOORS USING THE KEY BLADE

WARNING: Do not use double locking when passengers or animals are inside your vehicle. The doors cannot be unlocked or opened from the inside when double locked.

Press the button twice within three seconds. Three short flashes of the direction indicators confirm that your vehicle has double locked.
INDIVIDUALLY UNLOCKING AND LOCKING THE DOORS USING THE KEY BLADE

Locking the Doors

If the central locking function does not operate, individually lock the doors using the key in the position shown.

Left-Hand Side
Turn counterclockwise to lock.

Right-Hand Side
Turn clockwise to lock.

Unlocking the Doors

If the central locking function does not operate, unlock the driver door and then individually unlock all other doors by pulling the interior door handles.

Note: When the doors have been unlocked using this method, the doors must be individually locked until the central locking function has been repaired.

OPERATING THE DOORS FROM INSIDE YOUR VEHICLE

UNLOCKING AND LOCKING THE DOORS USING THE CENTRAL LOCKING

The power door lock control is on the driver door.

Press the button to unlock all doors.

Press the button to lock all doors.

Note: The central locking only operates if the front doors are fully closed.

REPROGRAMMING THE UNLOCKING FUNCTION - VEHICLES WITH: SYNC 2.5

You can program the unlocking function so that only the driver door unlocks.
Press and hold the unlock and lock buttons on the remote control simultaneously for at least four seconds with the ignition off. The direction indicators flash twice to confirm the change.

To return to the original unlocking function, repeat the process.
If you program the unlocking function so that only the driver door unlocks, the following occurs:

- If you unlock the driver door first, all other doors remain locked. You can unlock all of the other doors from inside your vehicle using the power door lock control on the driver door. Doors can be individually unlocked by pulling the interior door handles on those doors.
- If you press the unlocking button on the remote control once, only the driver door unlocks. Press the unlocking button on the remote control twice within three seconds to unlock all doors.
- If you unlock any other door first, all other doors and the liftgate unlock.

You can also change between the unlocking modes in the information display.
1. Select Settings.
2. Select Vehicle settings.
5. Select All doors or Driver’s door.

**Reprogramming the Unlocking Function - Vehicles with: SYNC 3/ SYNC 4**

You can program the unlocking function so that only the driver door unlocks.

Press and hold the unlock and lock buttons on the remote control simultaneously for at least four seconds with the ignition off. The direction indicators flash twice to confirm the change.

To return to the original unlocking function, repeat the process.

---

**Door Lock Switch Inhibitor**

**How Does the Door Lock Switch Inhibitor Work**

The door lock switch inhibitor is a theft protection feature that prevents someone unlocking the vehicle from inside using the power door lock control switch.

When you lock your vehicle with the remote control, the power door lock control switch does no longer operate after 20 seconds.
Doors and Locks

**Note:** You must unlock your vehicle with the remote control, or switch the ignition on, to restore the power door lock control switch function.

**AUTOUNLOCK**

**WHAT IS AUTOUNLOCK**

Autounlock is an unlocking feature that unlocks the vehicle doors when your vehicle comes to a stop.

**AUTOUNLOCK REQUIREMENTS**

Autounlock unlocks all the doors after all of the following occur.

1. All the doors are closed and your vehicle is moving at a speed greater than 12 mph (20 km/h).
2. Your vehicle comes to a stop.
3. You open the driver door within 10 minutes of switching the ignition off or to the accessory position.

**Note:** If you open the driver door after 10 minutes, Autounlock does not unlock all other doors.

**SWITCHING AUTOUNLOCK ON AND OFF - VEHICLES WITH: SYNC 2.5**

1. Select **Settings**.
2. Select **Vehicle settings**.
3. Select **Locks**.
4. Switch **Auto Unlock** on or off.

**MISLOCK**

**WHAT IS MISLOCK**

Mislock is a locking feature that warns you if your vehicle has not locked.

**HOW DOES MISLOCK WORK**

The horn sounds when you press the lock button on the remote control twice within three seconds and a door is open.

**MISLOCK LIMITATIONS - VEHICLES WITHOUT: ANTI-THEFT ALARM**

When you press the lock button once, the direction indicators do not flash if any door or the liftgate is open.

If you switch mislock off, the horn does not sound if you press the lock button on the remote control when a door is open.

**MISLOCK LIMITATIONS - VEHICLES WITH: ANTI-THEFT ALARM**

When you press the lock button once, the direction indicators do not flash if:

- Any door or the liftgate is open.
- The hood is open.

If you switch mislock off, the horn does not sound if you press the lock button on the remote control when a door is open.

**SWITCHING MISLOCK ON AND OFF - VEHICLES WITH: SYNC 2.5**

1. Select **Settings**.

---

Focus (CGE) Vehicles Built From: 05-09-2022, CG3929en enGBR, Edition date: 202201, First-Printing
2. Select Vehicle settings.
4. Switch Mislock chirp on or off.

**SWITCHING MISLOCK ON AND OFF - VEHICLES WITH: SYNC 3/ SYNC 4**

1. Press Settings on the touchscreen.
2. Press Vehicle.
4. Switch Mislock Chirp on or off.

**AUTORELOCK**

**HOW DOES AUTORELOCK WORK**

The doors automatically relock if you do not open a door within 45 seconds of unlocking the doors with the remote control. The door locks and the alarm return to their previous state.

**DOOR LOCK INDICATORS**

An LED on the power door lock control illuminates when you lock the door. It remains on for up to five minutes after you switch the ignition off.

**DOORS AND LOCKS AUDIBLE WARNINGS**

**Door Ajar Audible Warning**

Sounds when a door is not fully closed and your vehicle is moving.

**DOORS AND LOCKS – TROUBLESHOOTING**

**DOORS AND LOCKS – WARNING LAMPS**

**Door Ajar Warning Lamp**

Illuminates when you switch the ignition on and remains on if any door or the hood is open.

**DOORS AND LOCKS – INFORMATION MESSAGES**

**Keyless Entry**

**Keyless Entry Limitations**

Make sure your remote control is within 1 m (3 ft) from the front door handles and the tailgate.

The system could not function if:
- The remote control remains stationary for about a minute.
- The vehicle battery has no charge.
- The remote control battery has no charge.
- There is interference causing issues with the remote control frequencies.
- The remote control is too close to metal objects or electronic devices, for example keys or a cell phone.

**Keyless Entry Settings**

**Switching Keyless Entry On and Off - Vehicles with: 4.2 Inch Instrument Cluster Display Screen/SYNC 2.5**

1. Using the information display controls on the steering wheel, select **Settings**.
2. Select **Vehicle settings**.
3. Select **Locks**.
4. Switch **KeyFree** on and off.

**Switching Keyless Entry On and Off - Vehicles with: SYNC 3/SYNC 4**

1. Press **Settings** on the touchscreen.
2. Press **Vehicle**.
3. Press **Locks**.
4. Switch **KeyFree** on or off.

**Reprogramming the Unlocking Function - Vehicles with: SYNC 2.5**

You can program the unlocking function so that only the driver door unlocks when you touch the unlock sensor on the exterior door handle.

If you program the unlocking function so that only the driver door unlocks, the following occurs:
- If you open the driver door first, all other doors remain locked. You can unlock all of the other doors from inside your vehicle using the power door lock control on the driver door. You can unlock individual doors by pulling the interior door handles on those doors.

**You can change between the unlocking modes in the information display.**

1. Using the information display controls on the steering wheel, select **Settings**.
2. Select **Vehicle settings**.
3. Select **Locks**.
4. Select **Unlocking**.
5. Select **All doors** or **Driver's door**.

**Reprogramming the Unlocking Function - Vehicles with: SYNC 3/SYNC 4**

You can program the unlocking function so that only the driver door unlocks when you touch the unlock sensor on the exterior door handle.
If you program the unlocking function so that only the driver door unlocks, the following occurs:

- If you open the driver door first, all other doors remain locked. You can unlock all of the other doors from inside your vehicle using the power door lock control on the driver door. You can unlock individual doors by pulling the interior door handles on those doors.
- If you open any other door first, all other doors and the liftgate unlock.

You can change between the unlocking modes on the touchscreen.

1. Press **Settings** on the touchscreen.
2. Press **Vehicle**.
3. Press **Locks**.
4. Press **Unlocking**.
5. Select a setting.

### LOCKING AND UNLOCKING THE DOORS USING KEYLESS ENTRY

### UNLOCKING THE DOORS

Unlock sensors are on the back of the exterior front door handles.

Touch the unlock sensor to unlock your vehicle and disarm the alarm. The direction indicators flash. Do not touch the lock sensor on the top of the door handle. Keep the door handle clean to make sure the system correctly operates.

After unlocking the doors with the unlock sensor, there is a brief delay before you can lock your vehicle. When the delay period is over, you can lock the doors again, provided the passive key is within the respective detection range.

### LOCKING THE DOORS

Lock sensors are on the top of the exterior front door handles.

Touch a lock sensor once to lock your vehicle and arm the alarm. The direction indicators flash. Keep the door handle clean to make sure the system correctly operates.

**Note:** Your vehicle does not automatically lock. If you do not touch a lock sensor your vehicle remains unlocked.

After locking the doors with the lock sensor, there is a brief delay before you can unlock your vehicle. This delay lets you pull the handle to make sure your vehicle is locked. When the delay period is over, you can unlock the doors again, provided the passive key is within the respective detection range.

### DOUBLE LOCKING THE DOORS

Touch a lock sensor twice within three seconds to double lock your vehicle and arm the alarm. The direction indicators flash. Do not touch the unlock sensor on the back of the door handle.
Keyless Entry

LOCKING AND UNLOCKING THE LIFTGATE USING KEYLESS ENTRY

UNLOCKING THE LIFTGATE

Press the exterior release button hidden above the license plate.

Note: A valid passive key must be within the detection range.

LOCKING THE LIFTGATE

The liftgate locks after you fully close it.

KEYLESS ENTRY – TROUBLESHOOTING

KEYLESS ENTRY – FREQUENTLY ASKED QUESTIONS

Why does the keyless entry system not function?

If the system does not function it may be limited. See Keyless Entry Limitations (page 75). If the system still does not function use the remote control or the key blade to lock and unlock your vehicle.

Why can I not lock my vehicle?

If you electronically lock your vehicle with a rear door or the liftgate open, the system searches for a passive key inside your vehicle after you close the last door. If the system detects a key, all doors unlock indicating that a key is inside. Your vehicle locks if another passive key is within the detection range after you close the last door.

Why does the passive key not work?

The system deactivates passive keys left inside your vehicle when you lock it. You cannot switch the ignition on using a deactivated passive key. Press the unlock button on the remote control to reactivate a passive key.
LIFTGATE PRECAUTIONS

**WARNING:** It is extremely dangerous to ride in a cargo area, inside or outside of a vehicle. In a crash, people riding in these areas are more likely to be seriously injured or killed. Do not allow people to ride in any area of your vehicle that is not equipped with seats and seatbelts. Make sure everyone in your vehicle is in a seat and properly using a seatbelt. Failure to follow this warning could result in serious personal injury or death.

OPENING THE LIFTGATE

OPENING THE LIFTGATE FROM OUTSIDE YOUR VEHICLE

1. Press the control button to unlatch the liftgate.
2. Raise the liftgate.

**Note:** Be careful when opening or closing the liftgate in a garage or other enclosed area to avoid damaging the liftgate.

**Note:** Do not hang anything, for example a bike rack, from the glass or liftgate. This could damage the liftgate and its components.

**Note:** Do not leave the liftgate open while driving. This could damage the liftgate and its components.

OPENING THE LIFTGATE USING THE REMOTE CONTROL

Press the button twice within three seconds. The liftgate unlocks for 45 seconds, during which time you can open the liftgate.

1. Press the control button to unlatch the liftgate.
2. Raise the liftgate.

**Note:** Be careful when opening or closing the liftgate in a garage or other enclosed area to avoid damaging the liftgate.

**Note:** Do not hang anything, for example a bike rack, from the glass or liftgate. This could damage the liftgate and its components.

**Note:** Do not leave the liftgate open while driving. This could damage the liftgate and its components.

CLOSING THE LIFTGATE

CLOSING THE LIFTGATE FROM OUTSIDE YOUR VEHICLE

**WARNING:** It is extremely dangerous to ride in a cargo area, inside or outside of a vehicle. In a crash, people riding in these areas are more likely to be seriously injured or killed. Do not allow people to ride in any area of your vehicle.
that is not equipped with seats and seatbelts. Make sure everyone in your vehicle is in a seat and properly using a seatbelt. Failure to follow this warning could result in serious personal injury or death.

⚠️ WARNING: Make sure that you fully close the liftgate to prevent exhaust fumes from entering your vehicle. If you are unable to fully close the liftgate, open the air vents or the windows to allow fresh air to enter your vehicle. Failure to follow this instruction could result in personal injury or death.

A recessed grip or handle is located inside the liftgate to help with closing.

Note: Make sure that you fully close the liftgate to prevent cargo from falling out.

LIFTGATE – TROUBLESHOOTING

LIFTGATE – WARNING LAMPS

Illuminates when the liftgate is not completely closed.

LIFTGATE PRECAUTIONS

**WARNING:** It is extremely dangerous to ride in a cargo area, inside or outside of a vehicle. In a crash, people riding in these areas are more likely to be seriously injured or killed. Do not allow people to ride in any area of your vehicle that is not equipped with seats and seatbelts. Make sure everyone in your vehicle is in a seat and properly using a seatbelt. Failure to follow this warning could result in serious personal injury or death.

**WARNING:** Keep keys out of reach of children. Do not allow children to operate or play near an open or moving power liftgate. You should supervise the operation of the power liftgate at all times.

OPENING THE LIFTGATE

OPENING THE LIFTGATE FROM INSIDE YOUR VEHICLE

**WARNING:** Make sure all persons are clear of the power liftgate area before using the power liftgate control.

Press the button next to the lighting control.

*Note:* Be careful when opening or closing the liftgate in a garage or other enclosed area to avoid damaging the liftgate.

*Note:* Do not hang anything, for example a bike rack, from the glass or liftgate. This could damage the liftgate and its components.

*Note:* Do not leave the liftgate open while driving. This could damage the liftgate and its components.

OPENING THE LIFTGATE FROM OUTSIDE YOUR VEHICLE

1. Unlock the liftgate using an authorized device.

   *Note:* If an authorized device is within 1 m (3 ft) of the liftgate, the liftgate unlocks when you press the liftgate control button.

2. Press and release the liftgate control button.

   *Note:* Allow the power system to open the liftgate. Manually pushing or pulling the liftgate may activate the system’s obstacle detection feature and stop the power operation or reverse its direction, replicate a strut failure, or damage mechanical components.

   *Note:* Be careful when opening or closing the liftgate in a garage or other enclosed area to avoid damaging the liftgate.

   *Note:* Do not hang anything, for example a bike rack, from the glass or liftgate. This could damage the liftgate and its components.

   *Note:* Do not leave the liftgate open while driving. This could damage the liftgate and its components.
OPENING THE LIFTGATE USING THE REMOTE CONTROL

Press the button twice within three seconds.

**Note:** Be careful when opening or closing the liftgate in a garage or other enclosed area to avoid damaging the liftgate.

**Note:** Do not hang anything, for example a bike rack, from the glass or liftgate. This could damage the liftgate and its components.

**Note:** Do not leave the liftgate open while driving. This could damage the liftgate and its components.

OPENING THE HANDS-FREE LIFTGATE

Make sure you have the authorized device within 1 m (3 ft) of the liftgate.

1. Stand behind your vehicle, and face the liftgate.
2. Move your foot, in a single-kick motion, without pausing, under and away from the rear bumper detection area.

3. The liftgate opens.

Avoid the following actions when using the hands-free opening feature:

- Making physical contact with the bumper.
- Holding your foot under the bumper.
- Sweeping your foot from side to side, or kicking at an odd angle.

Detection Zones

The detection area is in the center of the rear bumper.

**Note:** Allow the power system to open the liftgate. Manually pulling the liftgate may activate the system's obstacle detection feature and stop the power operation or reverse its direction, replicate a strut failure, or damage mechanical components.

**Note:** Any physical actions that mimic a kicking motion such as splashing water, trailer chains or vacuum hoses may cause the hands-free liftgate to activate. Switch the power liftgate off through your vehicle settings or keep the authorized device away from the rear bumper detection area.

SWITCHING THE POWER LIFTGATE ON AND OFF - VEHICLES WITH: SYNC 2.5

1. Using the instrument cluster display controls on the steering wheel, select *Settings*.
2. Select *Vehicle settings*. 
3. Select **Power liftgate**.
4. Select a setting and press the **OK** button.

When switched off, the liftgate only unlatches and will not power open or close.

**SWITCHING THE POWER LIFTGATE ON AND OFF - VEHICLES WITH: SYNC 3**

1. Press **Settings** on the touchscreen.
2. Press **Vehicle**.
3. Press **Power liftgate**.
4. Select a setting.

When switched off, the liftgate only unlatches and will not power open or close.

**SETTING THE LIFTGATE OPENING HEIGHT**

1. Open the liftgate.
2. Stop the liftgate movement by pressing the control button on the liftgate when it reaches the desired height.

**Note:** Once the liftgate stops moving, you can manually move it to the desired height.

3. Press and hold the control button on the liftgate until a tone sounds, indicating programming is complete.

**Note:** You can only use the liftgate control button to program the height.

**Note:** You cannot program the height if the liftgate position is too low.

4. The power liftgate now opens at the programmed height. To change the programmed height, repeat the steps.

**Note:** You can fully open the liftgate by manually pushing it upward to the maximum open position if it opens in a lower position.

**Note:** The system recalls the new programmed height until you reprogram it, even if you disconnect the battery.

**CLOSING THE LIFTGATE**

**CLOSING THE LIFTGATE FROM INSIDE YOUR VEHICLE**

**WARNING:** Make sure all persons are clear of the power liftgate area before using the power liftgate control.

Press the button next to the lighting control. A tone sounds when the liftgate begins to close.

**Note:** Make sure that you close the liftgate before operating or moving your vehicle, especially in an enclosure, like a garage or a parking structure. This could damage the liftgate and its components.

**Note:** Make sure the area behind your vehicle is free from obstruction and that there is enough room for you to operate the liftgate. Objects too close to your vehicle, for example a wall, garage door or another vehicle may come into contact with the moving liftgate. This could damage the liftgate and its components.

**Note:** Make sure that you fully close the liftgate to prevent cargo from falling out.

**CLOSING THE LIFTGATE FROM OUTSIDE YOUR VEHICLE**

**WARNING:** Make sure all persons are clear of the power liftgate area before using the power liftgate control.
Press and release the liftgate button. A tone sounds when the liftgate begins to close.

Note: Make sure that you close the liftgate before operating or moving your vehicle, especially in an enclosure, like a garage or a parking structure. This could damage the liftgate and its components.

Note: Make sure the area behind your vehicle is free from obstruction and that there is enough room for you to operate the liftgate. Objects too close to your vehicle, for example a wall, garage door or another vehicle may come into contact with the moving liftgate. This could damage the liftgate and its components.

Note: Make sure you fully close the liftgate to prevent cargo from falling out.

CLOSING THE HANDS-FREE LIFTGATE

Make sure you have the authorized device within 1 m (3 ft) of the liftgate.

1. Stand behind your vehicle, and face the liftgate.
2. Move your foot, in a single-kick motion, without pausing, under and away from the rear bumper detection area.
3. The liftgate closes.

Note: A tone sounds when the liftgate begins to close.

Avoid the following actions when using the hands-free feature:
Liftgate - Vehicles With: Power Liftgate

- Making physical contact with the bumper.
- Holding your foot under the bumper.
- Sweeping your foot from side to side, or kicking at an odd angle.

Detection Zones

The detection area is in the center of the rear bumper.

**Note:** Allow the power system to close the liftgate. Manually pushing the liftgate may activate the system’s obstacle detection feature and stop the power operation or reverse its direction, replicate a strut failure, or damage mechanical components.

**STOPPING THE LIFTGATE MOVEMENT**

**Note:** Do not apply sudden excessive force to the liftgate while it is in motion. This could damage the power liftgate and its components.

**Note:** Selections will vary depending on region or options.

You can stop the liftgate movement by doing any of the following:
- Pressing the liftgate control button on the liftgate.
- Pressing the liftgate control button inside the vehicle.
- Pressing the liftgate button on the remote control twice.
- Pressing the liftgate button on an authorized device.
- Moving your foot under and away from the center rear bumper in a single-kick motion.

**LIFTGATE OBSTACLE DETECTION**

**Closing the Liftgate**

The system stops when it detects an obstacle. A tone sounds and the system reverses to open. Once you remove the obstacle, you can power close the liftgate.

**Note:** To prevent accidental obstacle detection, let the power liftgate close completely before you enter your vehicle.

**Opening the Liftgate**

The system stops when it detects an obstacle and a tone sounds. Once you remove the obstacle, you can continue to operate the liftgate.

**LIFTGATE – TROUBLESHOOTING**

**LIFTGATE – WARNING LAMPS**

Illuminates when the liftgate is not completely closed.

LIFTGATE – FREQUENTLY ASKED QUESTIONS

Why won't my power liftgate function?

It can happen in freezing conditions or when parking on downhill slopes. Make sure the power liftgate is enabled. Make sure the transmission is in park (P), ensure nothing is obstructing the liftgate path and there is not excessive weight on the liftgate. If there are continued issues, the battery voltage may be low or there may be other system issues. See an authorized dealer.
Security

PASSIVE ANTI-THEFT SYSTEM

WHAT IS THE PASSIVE ANTI-THEFT SYSTEM

The passive anti-theft system prevents someone from starting the vehicle with an incorrectly coded key.

Note: The system is not compatible with non-Ford aftermarket remote start systems.

Note: Do not leave a duplicate coded key in your vehicle. Always take the keys and lock all doors when leaving your vehicle.

ARMING THE PASSIVE ANTI-THEFT SYSTEM

The passive anti-theft system arms your vehicle after a short period of time when you switch the power off.

DISARMING THE PASSIVE ANTI-THEFT SYSTEM

The passive anti-theft system disarms when you switch the power on with a correctly coded key.

Note: You could have difficulty starting the vehicle if you have metallic objects, electronic devices or a second coded key on the same key chain.

ANTI-THEFT ALARM SYSTEM

WHAT IS THE ANTI-THEFT ALARM SYSTEM

The anti-theft alarm system warns you of an unauthorized entry to your vehicle.

HOW DOES THE ANTI-THEFT ALARM SYSTEM WORK

When armed, the anti-theft alarm is triggered in any of the following ways:

- If someone opens a door, the liftgate or the hood without a correctly coded key or remote control.
- If you turn the power on without a correctly coded key.
- If the interior sensors detect movement inside your vehicle.
- If the inclination sensors detect an attempt to raise your vehicle.
- If someone disconnects the vehicle battery or the battery backup alarm.

If the anti-theft alarm is triggered, the alarm horn sounds for 30 seconds and the direction indicators flash for 5 minutes. Any further attempts to carry out one of the above sounds the alarm again.

WHAT IS THE PERIMETER ALARM

The perimeter alarm is designed to detect unauthorized access to your vehicle.

WHAT ARE THE INTERIOR SENSORS

The interior sensors are designed to detect any movement inside your vehicle. The interior sensors are in the overhead console.

Note: Do not cover the interior sensors.

WHAT ARE THE INCLINATION SENSORS

The inclination sensor is designed to detect an attempt to raise your vehicle, for example to remove a wheel or to tow it away.
WHAT IS THE BATTERY BACKUP ALARM

The battery backup alarm is an additional alarm sounder that has its own battery. It can detect if the vehicle battery is disconnected to overcome the alarm system.

ARMING THE ANTI-THEFT ALARM SYSTEM

The alarm is ready to arm when your vehicle is switched off.
Lock your vehicle with your remote control to arm the alarm.

DISARMING THE ANTI-THEFT ALARM SYSTEM

Disarm the alarm by performing any of the following actions:
• Unlock the doors or luggage compartment with the remote control.
• Switch your vehicle on or start your vehicle.

ANTI-THEFT ALARM SYSTEM SETTINGS

WHAT ARE THE ALARM SECURITY LEVELS

You can select two levels of alarm security, full guard and reduced guard.

Full Guard
Full guard is the standard setting.
In full guard, all equipped sensors are on when you arm the alarm.

Reduced Guard
In reduced guard, only the perimeter sensors are on when you arm the alarm.

Note: The alarm security level will switch back to full guard once the power is turned on.

SETTING THE ALARM SECURITY LEVEL - VEHICLES WITH: SYNC 2.5

1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Vehicle settings.
3. Select Alarm system.
4. Select Alarm settings.
5. Select a setting and press the OK button.

SETTING THE ALARM SECURITY LEVEL - VEHICLES WITH: SYNC 3

1. Press Settings on the touchscreen.
2. Press Vehicle.
4. Press Motion Sensors.
5. Press a setting.

WHAT IS ASK ON EXIT - VEHICLES WITH: 4.2 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

You can choose which level of security you require after you switch the ignition off.
After you switch the ignition off, use the information display controls on the steering wheel to select the following:

<table>
<thead>
<tr>
<th>Menu Item</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full guard</td>
<td>Press the toggle button upward or downward to choose your required setting. Press the OK button.</td>
</tr>
<tr>
<td>Reduced guard</td>
<td>Have to do with full guard.</td>
</tr>
</tbody>
</table>

**Note:** If you do not choose a setting, the system defaults to full guard.

**WHAT IS ASK ON EXIT - VEHICLES WITH: 12.3 INCH INSTRUMENT CLUSTER DISPLAY SCREEN**

You can choose which level of security you require after you switch the ignition off.

After you switch the ignition off, use the information display controls on the steering wheel to select the following:

<table>
<thead>
<tr>
<th>Menu Item</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full guard</td>
<td>Press the toggle button upward or downward to choose your required setting. Press the OK button.</td>
</tr>
<tr>
<td>Reduced guard</td>
<td>Have to do with full guard.</td>
</tr>
</tbody>
</table>

**Note:** If you do not choose a setting, the system defaults to full guard.

**SWITCHING ASK ON EXIT ON AND OFF - VEHICLES WITH: SYNC 2.5**

1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Vehicle settings.
3. Select Alarm system.
4. Select Ask on exit.
5. Switch Ask on exit on or off.

**SWITCHING ASK ON EXIT ON AND OFF - VEHICLES WITH: SYNC 3**

1. Press Settings on the touchscreen.
2. Press Vehicle.
4. Switch Ask on Exit on or off.

Security

SECURITY – FREQUENTLY ASKED QUESTIONS

What should I do if there is any potential alarm problem with my vehicle?

Take all remote controls to an authorized dealer if there is any potential alarm problem with your vehicle.

What should I do if the vehicle is unable to start with a correctly coded key?

Have your vehicle checked as soon as possible.
ADJUSTING THE STEERING WHEEL

**WARNING:** Do not adjust the steering wheel when your vehicle is moving.

**Note:** Make sure that you are sitting in the correct position. See *Sitting in the Correct Position* (page 160).

1. Unlock the steering column.
2. Adjust the steering wheel to the desired position.
3. Lock the steering column.

LOCKING THE STEERING WHEEL - VEHICLES WITH: KEYED IGNITION

1. Remove the key from the ignition.
2. Slightly rotate the steering wheel to engage the lock.

Unlocking the Steering Wheel

**WARNING:** Always check that the steering is unlocked before attempting to move your vehicle.

1. Insert the key in the ignition.
2. Turn the key to position *I*.

**Note:** You may have to slightly rotate the steering wheel to assist unlocking it.
LOCKING THE STEERING WHEEL - VEHICLES WITH: PUSH BUTTON START

The steering wheel lock locks shortly after you have parked your vehicle and the passive key is outside it.

**Note:** The steering wheel lock does not lock when the ignition is on or when your vehicle is moving.

Unlocking the Steering Wheel

The steering wheel lock unlocks when the system detects a valid passive key inside your vehicle. If the steering wheel lock relocks, switch the ignition on to unlock it.

**Note:** You may have to slightly rotate the steering wheel to assist unlocking it.

SWITCHING THE HEATED STEERING WHEEL ON AND OFF

To switch the heated steering wheel on or off, press the button on the touchscreen near the climate controls.

**Note:** A sensor regulates the temperature of the steering wheel.
Wipers and Washers

WIPERS

WIPER PRECAUTIONS

Fully defrost the windshield before you switch the windshield wipers on.

Make sure that you switch the windshield wipers off before entering a car wash.

If streaks or smears appear on the windshield, clean the windshield and the wiper blades. See Checking the Wiper Blades (page 96). If that does not resolve the issue, install new wiper blades. See Replacing the Front Wiper Blades (page 96). See Replacing the Rear Wiper Blades (page 97).

Do not operate the wipers on a dry windshield. This may scratch the glass or damage the wiper blades. Always use the windshield washers before wiping a dry windshield.

When your vehicle speed increases, the interval between intermittent wipes may decrease.

SWITCHING WINDSHIELD WIPERS ON AND OFF

A Single wipe.
B Intermittent Wipe.
C Normal Wipe.
D High-speed Wipe
Use the rotary control to adjust the intermittent wipe interval.

**AUTOWIPERS**

**WHAT ARE AUTOWIPERS**

Autowipers turns on and controls the speed and frequency of the windshield wipers.

**AUTOWIPERS SETTINGS - VEHICLES WITH: SYNC 2.5**

1. Using the instrument cluster display controls on the steering wheel, select **Settings**.
2. Select **Vehicle settings**.
3. Select **Wipers**.
4. Switch **Rain Sensing** on or off.

**AUTOWIPERS SETTINGS - VEHICLES WITH: SYNC 3/SYNC 4**

1. Press **Settings** on the touchscreen.

**ADJUSTING THE SENSITIVITY OF THE RAIN SENSOR**

- **A** High sensitivity.
- **B** Autowipers on.
- **C** Low sensitivity.

Use the rotary control to adjust the sensitivity of the autowipers.

**Note:** Keep the outside of the windshield clean. The rain sensor is very sensitive and the wipers may operate if dirt, mist or insects hit the windshield.
**Wipers and Washers**

**SWITCHING THE REAR WINDOW WIPER ON AND OFF**

A  Intermittent wipe.
B  Continuous wipe.
C  Rear window wiper off.

**REVERSE WIPE**

**WHAT IS REVERSE WIPE**

Reverse wipe turns on the rear window wiper when you shift into reverse (R) and the windshield wipers are on.

**REVERSE WIPE SETTINGS - VEHICLES WITH: SYNC 2.5**

1. Press the menu button on the steering wheel to enter the instrument cluster display main menu.
2. Select **Settings**.
3. Select **Vehicle settings**.
4. Select **Wipers**.
5. Switch **Reverse wiper** on or off.

**REVERSE WIPE SETTINGS - VEHICLES WITH: SYNC 3/SYNC 4**

1. Press **Settings** on the touchscreen.
2. Press **Vehicle**.
3. Press **Wipers**.
4. Switch **Rear Wiper On (when in Reverse)** on or off.

**CHECKING THE WIPER BLADES**

Run the tip of your fingers over the edge of the blade to check for roughness.

**REPLACING THE FRONT WIPER BLADES**

Make sure that the ignition is switched off before beginning this procedure.

1. Fully lift the wiper arm.

**Note:** Do not hold the wiper blade to lift the wiper arm.

2. Press the wiper blade locking button.
3. Remove the wiper blade.
   **Note:** Make sure that the wiper arm does not spring back against the glass when the wiper blade is not attached.

4. To install, reverse the removal procedure.
   **Note:** Make sure that the wiper blade locks into place.

### REPLACING THE REAR WIPER BLADES

1. Lift the wiper arm.
   **Note:** Do not hold the wiper blade to lift the wiper arm.

2. Disengage the wiper blade from the wiper arm.
   **Note:** Make sure that the wiper arm does not spring back against the glass when the wiper blade is not attached.

3. To install, reverse the removal procedure.
   **Note:** Make sure that the wiper blade locks into place.

### WASHERS

#### WASHER PRECAUTIONS

Do not operate the washers when the washer reservoir is empty. This could cause the washer pump to overheat.

#### USING THE WINDSHIELD WASHER

Pull the lever toward you to operate the windshield washer.

**Note:** A courtesy wipe occurs a short time after the wipers stop to clear any remaining washer fluid when switched on.
SWITCHING THE COURTESY WIPE ON AND OFF - VEHICLES WITH: SYNC 2.5

1. Press the menu button on the steering wheel to enter the instrument cluster display main menu.
2. Select Settings.
4. Select Wipers.
5. Switch Courtesy wipe on or off.

SWITCHING THE COURTESY WIPE ON AND OFF - VEHICLES WITH: SYNC 3/SYNC 4

1. Press Settings on the touchscreen.
2. Press Vehicle.
4. Switch Courtesy Wipe on or off.

USING THE REAR WINDOW WASHER

Push the lever away from you to operate the rear window washer. When you release the lever, the wiper operates for a short time.

Note: Do not operate the washers when the washer reservoir is empty. This could cause the washer pump to overheat.

ADDING WASHER FLUID

1. Remove the washer fluid reservoir cap.
2. Add washer fluid that meets our specification. See Washer Fluid Specification (page 461).
3. Install the washer fluid reservoir cap.

Note: The reservoir supplies the front and rear washer systems.

WIPERS AND WASHERS – TROUBLESHOOTING

WIPERS AND WASHERS – WARNING LAMPS

Illuminates when the windshield washer fluid is low.

WIPERS AND WASHERS – FREQUENTLY ASKED QUESTIONS

Why are there streaks and smears on the windshield?

The wiper blades could be dirty, worn or damaged. Check the wiper blades. See Checking the Wiper Blades (page 96). If the wiper blades are dirty, clean them with washer fluid or water applied with a soft sponge or cloth. If the wiper blades are worn or damaged, install new ones. See Replacing the Front Wiper Blades (page 96). See Replacing the Rear Wiper Blades (page 97).
EXTERIOR LIGHTING CONTROL

A  Lamps off.
B  Parking lamps, instrument panel lamps and license plate lamps.
C  Headlamps.
D  Autolamps. See What Are Autolamps (page 101).

Rotate the control to make a selection.

HEADLAMPS

USING THE HIGH BEAM HEADLAMPS

Push the lever away from you to switch the high beams on.

Push the lever forward again or pull the lever toward you to switch the high beams off.

Slightly pull the lever toward you and release it to flash the headlamps.

SWITCHING HEADLAMP EXIT DELAY ON AND OFF

To switch headlamp exit delay on, pull the turn signal lever toward you after switching your vehicle off.

To switch headlamp exit delay off, pull the turn signal lever toward you again or switch your vehicle on.

Note: The headlamps turn off after three minutes with any door open or 30 seconds after the last door closes.
ADJUSTING THE LEVEL OF THE HEADLAMPS - VEHICLES WITH: AUTOMATIC HEADLAMP LEVELING

Your vehicle has a dynamic leveling system. The headlamps do not require additional aim adjustment.

ADJUSTING THE LEVEL OF THE HEADLAMPS - VEHICLES WITH: MANUAL HEADLAMP LEVELING

1. Press to release the control.
2. Rotate the control in accordance with your vehicle load to prevent you from distracting other road users when the headlamps are on.
3. Press to close the control.

HEADLAMP INDICATORS

Lamps on Indicator

It illuminates when you switch the headlamp low beam or the side and rear lamps on.

Headlamp High Beam

It illuminates when you switch the headlamp high beam on.

Headlamp Low Beam Warning Lamp

If it illuminates when the headlamp low beam is on, this indicates that a headlamp low beam has failed.

HEADLAMPS – TROUBLESHOOTING

HEADLAMPS – FREQUENTLY ASKED QUESTIONS

Why is there condensation in the headlamps?

- Headlamps have vents to accommodate normal changes in air pressure. Condensation can be a natural by-product of this design. When moist air enters the lamp assembly through the vents, there is a possibility that condensation can occur when the temperature is cold. When normal condensation occurs, a fine mist can form on the interior of the lens. The fine mist eventually clears and exits through the vents during normal operation.

How much condensation is acceptable?

- The presence of a fine mist, for example no streaks, drip marks or large droplets. A fine mist covers less than 50% of the lens.
How long may it take for the acceptable condensation to be cleared?

- Clearing time may take as long as 48 hours under dry weather conditions.

How much condensation is unacceptable?

- A water puddle inside the lamp.
- Streaks, drip marks or large droplets present on the interior of the lens.

What should I do if unacceptable condensation is present?

- Have your vehicle checked as soon as possible.

Why do my headlamps turn off when I have them switched on when I switch my vehicle off?

- The battery saver turns the headlamps off after a short period of time after you switch your vehicle off.

**AUTOLAMPS**

**WHAT ARE AUTOLAMPS**

![WARNING:](image)

**WARNING:** The system does not relieve you of your responsibility to drive with due care and attention. You may need to override the system if it does not turn the headlamps on in low visibility conditions, for example daytime fog.

Autolamps turn the headlamps on in low light situations or when the windshield wipers operate.

**AUTOLAMP SETTINGS - VEHICLES WITH: SYNC 2.5**

1. Using the instrument cluster display controls on the steering wheel, select **Settings**.
2. Select **Vehicle settings**.
3. Select **Lighting**.
4. Select **Headlamp delay**.
5. Select a setting and press the **OK** button.

**AUTOLAMP SETTINGS - VEHICLES WITH: SYNC 3/SYNC 4**

1. Press **Settings** on the touchscreen.
2. Press **Vehicle**.
3. Press **Lighting**.
4. Press **Headlamp Delay**.
5. Press a setting.

**EXTERIOR LAMPS**

**USING THE TURN SIGNAL LAMPS**

Push the lever up or down to switch the turn signal lamps on.

Set the lever to the middle position to switch the turn signal lamps off.
Note: Tap the lever up or down to make the turn signal lamps flash three times.

**Turn Signal Lamp Indicator**

It flashes when you switch the turn signal lamps on.

**Note:** An increase in the rate of flashing warns of a failed turn signal lamp.

**SWITCHING THE SIDE MARKER LAMPS ON AND OFF**

**Switching the Side Marker Lamps On**

**Both Sides**
1. Switch the ignition off.
2. Set the lighting control to the parking lamps position.

**Note:** Parking lamps could turn off to prevent the vehicle battery from running out of charge.

**One Side**
1. Switch the ignition off.
2. Push the lever up or down to switch the side marker lamps on.

**Switching the Side Marker Lamps Off**

Side marker lamps turn off if any of the following occur:
- You switch all the lamps off.
- You switch the ignition on.

**HOW DO CORNERING LAMPS WORK**

The cornering lamps illuminate the inside of a corner when you are turning the steering wheel or when you switch the turn signal lamps on.

**Note:** You cannot activate the system by switching the turn signal lamps on if your vehicle is stationary.

- **A** Headlamp beam.
- **B** Cornering lamp beam.
Using the Front Fog Lamps

To switch the lamps on or off:
1. Set the lighting control to the parking lamps, headlamps or autolamps position.

**Note:** When the lighting control is in the autolamps position, you cannot switch the fog lamps on unless the low beam headlamps are on.

2. Press the button on the lighting control to switch the front fog lamps on or off.

**Note:** Only switch the front fog lamps on during reduced visibility.

**Note:** The brightness of the daytime running lamps may decrease when the front fog lamps are switched on.

Front Fog Lamps Indicator

It illuminates when you switch the front fog lamps on.

Using the Rear Fog Lamps

The rear fog lamp button is on the lighting control.

Press the button to switch the rear fog lamps on or off.

You can switch the rear fog lamps on if any of the following occur:
- You set the lighting control to the headlamps position.
- You set the lighting control to the autolamps position and the headlamps are on.

Rear Fog Lamp Indicator

It illuminates when you switch the rear fog lamps on.

Exterior Lamp Indicators

- Front Fog Lamp Indicator
- Rear Fog Lamp Indicator
- Turn Signal Lamp Indicator

Exterior Lamps on Audible Warning

Exterior Lamps On
Sounds when you open the driver door and the exterior lamps are on.

Automatic High Beam Control

**How Does Automatic High Beam Control Work**

Automatic high beam control turns the high beams on if it is dark enough and no other traffic is present. If it detects an approaching vehicle’s headlamps or tail lamps, or street lighting ahead, the system turns the high beams off.
A camera sensor, centrally mounted behind the windshield of your vehicle, continuously monitors conditions to turn the high beams on and off.

**AUTOMATIC HIGH BEAM CONTROL PRECAUTIONS**

⚠️ **WARNING:** The system does not relieve you of your responsibility to drive with due care and attention. You may need to override the system if it does not turn the high beams on or off.

⚠️ **WARNING:** The system may not switch the high beams off if the lights of oncoming vehicles are hidden by obstacles, for example guard rails.

⚠️ **WARNING:** Do not use the system in poor visibility, for example fog, heavy rain, spray or snow.

⚠️ **WARNING:** You may need to override the system when approaching other road users.

⚠️ **WARNING:** You may need to override the system during inclement weather.

**AUTOMATIC HIGH BEAM CONTROL REQUIREMENTS**

The system turns the high beams on if all of the following occur:

- You switch the system on.
- You set the lighting control to the autolamps position.
- The ambient light level is low enough that you require high beams.
- There is no traffic in front of your vehicle.
- The vehicle speed is greater than approximately 40 km/h (25 mph).

A  Without automatic high beam control.
B  With automatic high beam control.
AUTOMATIC HIGH BEAM CONTROL LIMITATIONS

The system turns the high beams off if any of the following occur:

• You switch the system off.
• You set the lighting control to any position except autolamps.
• You switch the rear fog lamps on.
• The ambient light level is high enough that you do not require high beams.
• The system detects an approaching vehicle's headlamps or a leading vehicle's tail lamps.
• The system detects severe rain, snow or fog.
• The system detects street lighting.
• The camera has reduced visibility.
• The vehicle speed falls below approximately 30 km/h (19 mph).

SWITCHING AUTOMATIC HIGH BEAM CONTROL ON AND OFF - VEHICLES WITH: SYNC 2.5

1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Vehicle settings.
3. Select Lighting.
4. Switch Auto highbeam on or off.

SWITCHING AUTOMATIC HIGH BEAM CONTROL ON AND OFF - VEHICLES WITH: SYNC 3/SYNC 4

1. Press Settings on the touchscreen.
2. Press Vehicle.
3. Press Lighting.
4. Switch Auto Highbeam on or off.

AUTOMATIC HIGH BEAM CONTROL INDICATORS

Illuminates to confirm when the system is ready to assist.

OVERRIDING AUTOMATIC HIGH BEAM CONTROL

Push the lever away from you to switch between high beam and low beam.

GLARE FREE HIGH BEAM CONTROL

HOW DOES GLARE FREE HIGH BEAM CONTROL WORK

Glare free high beam control enhances visibility and minimizes glare for other road users.
GLARE FREE HIGH BEAM CONTROL PRECAUTIONS

**WARNING:** You are responsible for controlling your vehicle at all times. The system is designed to be an aid and does not relieve you of your responsibility to drive with due care and attention. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

**WARNING:** The system may not adapt the lighting to avoid glare if the lights of oncoming vehicles are hidden by obstacles such as guard rails.

**WARNING:** You may need to override the system when approaching other road users.

**WARNING:** You may need to override the system during inclement weather.

**WARNING:** Do not use the system in poor visibility, for example fog, heavy rain, spray or snow.

GLARE FREE HIGH BEAM CONTROL REQUIREMENTS

The system turns on if all of the following occur:

- You switch the system on.
- You set the lighting control to the autolamps position.
- The ambient light level is low enough.
- Your vehicle speed is greater than approximately 40 km/h (25 mph).

A  Without glare free high beam control.
B  With glare free high beam control.
The system adapts the lighting to avoid glare if all of the following occur:
- You switch the system on.
- You set the lighting control to the autolamps position.
- The system detects an approaching vehicle’s headlamps or rear lamps.

**GLARE FREE HIGH BEAM CONTROL LIMITATIONS**

The system turns off if any of the following occur:
- You switch the system off.
- You set the lighting control to any position except autolamps.
- The ambient light level is high enough.
- The system detects severe rain, snow or fog.
- The system detects street lighting.
- The camera has reduced visibility.
- The vehicle speed falls below approximately 30 km/h (19 mph).

**Note:** The deactivation speed is lower on curves.

**SWITCHING GLARE FREE HIGH BEAM CONTROL ON AND OFF - VEHICLES WITH: SYNC 2.5**

1. Using the instrument cluster display controls on the steering wheel, select **Settings**.
2. Select **Vehicle settings**.
3. Select **Lighting**.
4. Select **Glarefree lighting**.
5. Switch **Glarefree lighting** on or off.

**SWITCHING GLARE FREE HIGH BEAM CONTROL ON AND OFF - VEHICLES WITH: SYNC 3/SYNC 4**

1. Press **Settings** on the touchscreen.
2. Press **Vehicle**.
3. Press **Lighting**.
4. Switch **Glarefree Lighting** on or off.

**GLARE FREE HIGH BEAM CONTROL INDICATORS**

Illuminates to confirm when the system is ready to assist.

**OVER RIDING GLARE FREE HIGH BEAM CONTROL**

Push the lever away from you to switch between high beam and low beam.
## Exterior Lighting

### ADAPTIVE FRONT LIGHTING

#### HOW DOES ADAPTIVE FRONT LIGHTING WORK

Adaptive front lighting adapts when you are steering around a curve, or if the camera detects lane markings indicating a curve or traffic signs indicating an intersection or a roundabout.

**Note:** Set the lighting control to the autolamps position to use adaptive front lighting.

---

Focus (CSE) Vehicles Built From: 05-09-2022, CG3929en enGBR, Edition date: 202201, First-Printing
**Exterior Lighting**

**Steering Around a Curve**

A Without adaptive front lighting.
B With adaptive front lighting.

**Camera Detects Lane Markings**

**Camera Detects Traffic Signs**
The camera only detects traffic signs if your vehicle speed is below 50 km/h (31 mph).

**SWITCHING THE HEADLAMPS FOR DRIVING ON THE LEFT OR RIGHT-HAND SIDE OF THE ROAD - VEHICLES WITH: SYNC 2.5**

1. Using the instrument cluster display controls on the steering wheel, select **Settings**.
2. Select **Vehicle settings**.
3. Select **Lighting**.
4. Select **Adaptive headlamps**.
5. Select **Traffic setup**.
6. Select a setting and press the **OK** button.

**SWITCHING THE HEADLAMPS FOR DRIVING ON THE LEFT OR RIGHT-HAND SIDE OF THE ROAD - VEHICLES WITH: SYNC 3/SYNC 4**

1. Press **Settings** on the touchscreen.
2. Press **Vehicle**.
3. Press **Lighting**.
4. Press **Adaptive Headlamps Setup**.
5. Press a setting.

SWITCHING ALL OF THE INTERIOR LAMPS ON AND OFF

SWITCHING THE REAR INTERIOR LAMPS ON AND OFF

INTERIOR LAMP FUNCTION

WHAT IS THE INTERIOR LAMP FUNCTION

The interior lamp function switches the courtesy and door lamps on or off.

SWITCHING THE INTERIOR LAMP FUNCTION ON AND OFF

When you set the switch to the middle position, the interior lamps turn on if:

• You open any door.
• You press the unlock button on the remote control.
• You switch the ignition off.

Note: If you switch the ignition off, the interior lamps could turn off after a short time to prevent the vehicle battery from running out of charge.

ADJUSTING THE INSTRUMENT PANEL LIGHTING BRIGHTNESS

The instrument lighting dimmer buttons are on the lighting control.

Repeatedly press one of the buttons to adjust the brightness.
AMBIENT LIGHTING

SWITCHING AMBIENT LIGHTING ON AND OFF

1. Switch the ignition on.

Note: You cannot permanently switch off the ambient light.
Interior Lighting - Vehicles With: Map Reading Lamps

SWITCHING ALL OF THE INTERIOR LAMPS ON AND OFF

Note: Press the edge of the lamp lens to switch the front interior lamp off before switching the ignition off to prevent the vehicle battery from running out of charge.

INTERIOR LAMP FUNCTION

WHAT IS THE INTERIOR LAMP FUNCTION

The interior lamp function switches the courtesy and door lamps on or off.

SWITCHING THE INTERIOR LAMP FUNCTION ON AND OFF

When you set the switch to the middle position, the interior lamps turn on if:
- You open any door.
- You press the unlock button on the remote control.
- You switch the ignition off.

Note: If you switch the ignition off, the interior lamps could turn off after a short time to prevent the vehicle battery from running out of charge.

SWITCHING THE REAR INTERIOR LAMPS ON AND OFF
ADJUSTING THE INSTRUMENT PANEL LIGHTING BRIGHTNESS

The instrument lighting dimmer buttons are on the lighting control.

Repeatedly press one of the buttons to adjust the brightness.

AMBIENT LIGHTING

SWITCHING AMBIENT LIGHTING ON AND OFF

1. Switch the ignition on.

Note: You cannot permanently switch off the ambient light.
OPENING AND CLOSING THE WINDOWS

**WARNING:** Do not leave children unattended in your vehicle and do not let them play with the power windows. Failure to follow this instruction could result in personal injury.

**WARNING:** When closing the power windows, verify they are free of obstruction and make sure that children and pets are not in the proximity of the window openings.

Press the window control switch to open the window. Lift the window control switch to close the window.

**Note:** The power windows operate with the ignition on, and for several minutes after you switch the ignition off or until you open a front door.

To reduce wind noise or pulsing noise when one window is open, slightly open the opposite window.

**One-Touch Open**

Fully press the window control switch and release it. Press again or lift it to stop the window.

**One-Touch Close**

Fully lift the window control switch and release it. Press again or lift it to stop the window.

**Resetting One-Touch Close**

Carry out all steps within 30 seconds of starting the sequence.

1. Close the window.

2. Press and hold the window control switch until the window is fully open. Keep the window control switch pressed for a few seconds.

3. Lift and hold the window control switch until the window is fully closed. Keep the window control switch held for a few seconds.

4. Press and hold the window control switch until the window is fully open. Keep the window control switch pressed for a few seconds.

5. Lift and hold the window control switch until the window is fully closed. Keep the window control switch held for a few seconds.

**Note:** Repeat the procedure if the window does not close when you use one-touch.

GLOBAL OPENING AND CLOSING

**WHAT IS GLOBAL OPENING AND CLOSING**

You can use the remote control to operate the windows with the ignition off.

**USING GLOBAL OPENING**

1. Press and release the unlock button on the remote control.

2. Press and hold the unlock button on the remote control.

3. Release the button when the windows and moonroof start to open.

**Note:** The moonroof stops in the vent position.

Press the lock or the unlock button on the remote control to stop global opening.

**Note:** You can use global opening for a short period of time when you unlock your vehicle using the remote control.
SWITCHING GLOBAL OPENING ON AND OFF - VEHICLES WITH: SYNC 2.5

1. Using the information display controls on the steering wheel, select Settings.
2. Select Vehicle settings.
4. Switch Global open on or off.

SWITCHING GLOBAL CLOSING ON AND OFF - VEHICLES WITH: SYNC 2.5

1. Using the information display controls on the steering wheel, select Settings.
2. Select Vehicle settings.
4. Switch Global close on or off.

SWITCHING GLOBAL OPENING ON AND OFF - VEHICLES WITH: SYNC 3/SYNC 4

1. Press Settings on the touchscreen.
2. Press Vehicle.
4. Switch Global open on or off.

SWITCHING GLOBAL CLOSING ON AND OFF - VEHICLES WITH: SYNC 3/SYNC 4

1. Press Settings on the touchscreen.
2. Press Vehicle.
4. Switch Global close on or off.

USING GLOBAL CLOSING

WARNING: When closing the power windows, verify they are free of obstruction and make sure that children and pets are not in the proximity of the window openings.

1. Press and hold the lock button on the remote control.
2. Release the button when the windows and moonroof start to close.

Press the lock or the unlock button on the remote control to stop global closing.

Note: Bounce-back is on during global closing. See What Is Window Bounce-Back (page 117).

WINDOW BOUNCE-BACK

WHAT IS WINDOW BOUNCE-BACK

The window stops and reverses if it detects an obstruction when closing.

OVERRIDING WINDOW BOUNCE-BACK

WARNING: If you override bounce-back, the window does not reverse if it detects an obstacle. Take care when closing the windows to avoid personal injury or damage to your vehicle.

1. Close the window until it reaches the point of resistance and let it reverse.
2. Lift the control within five seconds to override bounce-back and close the window. Bounce-back is now disabled and you can close the window manually.

**Note:** The window goes past the point of resistance and you can fully close it.

**Note:** If the window does not close, have your vehicle checked as soon as possible.

### RESETTING WINDOW BOUNCE-BACK

**WARNING:** Bounce-back is off until you reset the memory. Take care when closing the windows to avoid personal injury or damage to your vehicle.

If you have disconnected the battery, you must reset the bounce-back memory separately for each window.

Carry out all steps within 30 seconds of starting the sequence.

1. Close the window.
2. Press and hold the switch until the window is fully open. Keep the switch pressed for a few seconds.
3. Lift and hold the switch until the window is fully closed. Keep the switch held for a few seconds.
4. Press and hold the switch until the window is fully open. Keep the switch pressed for a few seconds.
5. Lift and hold the switch until the window is fully closed. Keep the switch held for a few seconds.

**Note:** Repeat the procedure if the window does not close when you use one-touch.

### LOCKING THE REAR WINDOW CONTROLS

Press the window control switch to lock or unlock the rear window controls. It illuminates when you lock the rear window controls.
INTERIOR MIRROR PRECAUTIONS

**WARNING:** Do not adjust the mirrors when your vehicle is moving. This could result in the loss of control of your vehicle, serious personal injury or death.

**Note:** Do not clean the mirror housing or glass with harsh abrasives, fuel or other petroleum-based cleaning products.

MANUALLY DIMMING THE INTERIOR MIRROR

Pull the tab below the mirror toward you to reduce glare at night.

AUTO-DIMMING INTERIOR MIRROR

WHAT IS THE AUTO-DIMMING INTERIOR MIRROR

The mirror dims to reduce the effect of bright light from behind. It returns to normal when the bright light from behind is no longer present or if you shift into reverse (R).

AUTO-DIMMING INTERIOR MIRROR LIMITATIONS

Do not block the sensors on the front and back of the mirror.

**Note:** A rear center passenger or raised rear center head restraint could prevent light from reaching the sensor.
ADJUSTING THE EXTERIOR MIRRORS

**WARNING:** Do not adjust the mirrors when your vehicle is moving. This could result in the loss of control of your vehicle, serious personal injury or death.

A

Left-hand mirror position.
B

Mirror adjustment control.
C

Right-hand mirror position.

If you press the control to fold in the mirrors with auto-fold on, the mirrors do not unfold when you unlock your vehicle.

**Note:** The power folding mirrors operate with the ignition on, and for several minutes after you switch the ignition off.

**Note:** If you fold and unfold the mirrors several times within one minute, the power fold function may turn off to protect the motors from overheating.

**Switching Auto-fold On and Off**

1. Using the information display controls on the steering wheel, select *Settings*.
2. Select *Vehicle settings*.
3. Select *Mirrors*.
4. Switch *Autofold* on or off.

**FOLDING THE EXTERIOR MIRRORS - VEHICLES WITH:**
**POWER FOLD EXTERIOR MIRRORS/SYNC 2.5**

The exterior mirrors fold when you lock your vehicle and unfold when you unlock your vehicle.

For tight parking conditions, press the control to fold the mirrors.

Press the control again to unfold the mirrors.

**FOLDING THE EXTERIOR MIRRORS - VEHICLES WITH:**
**POWER FOLD EXTERIOR MIRRORS/SYNC 3/SYNC 4**

1. Press *Settings* on the touchscreen.
2. Press *Vehicle*.
3. Press *Mirrors*.
4. Switch *Autofold* on or off.
OPENING AND CLOSING THE SUNSHADE

Opening the Sun Shades

**WARNING:** Do not leave children unattended in your vehicle and do not let them play with the sun shades. Failure to follow this instruction could result in personal injury.

The sun shade operates independently of the moonroof.

The sun shade controls are on the overhead console and have one-touch open.

To stop the motion during a one-touch operation, press the control a second time.

Press and release the front of the control.

Closing the Sun Shades

**WARNING:** When closing the sun shade, verify that it is free of obstruction and make sure that children and pets are not in the proximity of the sun shade.

**WARNING:** Do not leave children unattended in your vehicle and do not let them play with the sun shades. Failure to follow this instruction could result in personal injury.

The sun shade operates independently of the moonroof.

The sun shade controls are on the overhead console and have one-touch close.

To stop the motion during a one-touch operation, press the control a second time.

Press and release the rear of the control.

OPENING AND CLOSING THE MOONROOF

Opening the Moonroof

**WARNING:** Do not leave children unattended in your vehicle and do not let them play with the moonroof. Failure to follow this instruction could result in personal injury.

The moonroof controls are on the overhead console and have one-touch open.

To stop the motion during a one-touch operation, press the control a second time.

Press and release the rear of the control to vent the moonroof.

Press and release the rear of the control again to open the moonroof.

Closing the Moonroof

**WARNING:** When closing the moonroof, verify that it is free of obstruction and make sure that children and pets are not in the proximity of the roof opening.

**WARNING:** Do not leave children unattended in your vehicle and do not let them play with the moonroof. Failure to follow this instruction could result in personal injury.

The moonroof controls are on the overhead console and have one-touch close.
To stop the motion during a one-touch operation, press the control a second time.

Press and release the front of the control.

VENTING THE MOONROOF

**WARNING:** Do not leave children unattended in your vehicle and do not let them play with the moonroof. Failure to follow this instruction could result in personal injury.

Press and release the rear of the control to vent the moonroof.

Press and release the front of the control to close the moonroof.

MOONROOF BOUNCE-BACK

**WHAT IS MOONROOF BOUNCE-BACK**

The moonroof stops and reverses some distance if it detects an obstacle when closing.

**OVERRIDING MOONROOF BOUNCE-BACK**

Press and hold the front of the switch within a few seconds to override bounce-back.
Instrument Cluster

INSTRUMENT CLUSTER OVERVIEW - VEHICLES WITH: 4.2 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

A  Tachometer.
B  Information display.
C  Speedometer.
D  Fuel gauge.
E  Automatic transmission position indicators.
F  Engine coolant temperature gauge.
Instrument Cluster

INSTRUMENT CLUSTER OVERVIEW - VEHICLES WITH: 12.3 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

Instrument Cluster Overview - Vehicles With: 12.3 Inch Instrument Cluster Display Screen

A  Speedometer.
B  Information bar.
C  Information display.
D  Tachometer.
E  Fuel gauge.
F  Driver assistance information.
G  Engine coolant temperature gauge.

TACHOMETER
Indicates the engine speed.

SPEEDOMETER
Indicates the vehicle speed.

FUEL GAUGE
WHAT IS THE FUEL GAUGE
Indicates approximately how much fuel is in the fuel tank.
**FUEL GAUGE LIMITATIONS**

The fuel gauge may not provide an accurate reading when your vehicle is on an incline.

**LOCATING THE FUEL FILLER DOOR**

The arrow adjacent to the fuel pump symbol indicates on which side of your vehicle the fuel filler door is located.

**WHAT IS THE LOW FUEL REMINDER**

A low fuel level reminder displays and sounds when the distance to empty reaches 120 km (75 mi) to empty for MyKey, and at 80 km (50 mi), 40 km (25 mi), 20 km (12 mi) and 0 km (0 mi) for all vehicle keys.

**Note:** The low fuel reminder can appear at different fuel gauge positions depending on fuel economy conditions. This variation is normal.

**WHAT IS DISTANCE TO EMPTY**

Indicates the approximate distance your vehicle can travel on the fuel remaining in the tank.

**ENGINE COOLANT TEMPERATURE GAUGE**

Indicates the engine coolant temperature.

**WHAT ARE THE INSTRUMENT CLUSTER WARNING LAMPS**

Warning lamps alert you to a vehicle condition that could become serious. Some lamps illuminate when you start your vehicle to make sure they work. If any lamps remain on after starting your vehicle, refer to the respective system warning lamp for further information.

**INSTRUMENT CLUSTER WARNING LAMPS**

**Airbag Warning Lamp**

If it does not illuminate when you switch the ignition on, continues to flash or remains on when the engine is running, this indicates a malfunction. Have your vehicle checked as soon as possible.

**Anti-Lock Brake System Warning Lamp**

If it illuminates when you are driving, this indicates a malfunction. Your vehicle continues to have normal braking without the anti-lock brake system function. Have your vehicle checked as soon as possible.

**Battery Warning Lamp**

If it illuminates when you are driving, this indicates a malfunction. Have your vehicle checked as soon as possible.

**Electric Park Brake Warning Lamp**

It flashes during operation and illuminates when the parking brake is applied. See **Electric Parking Brake** (page 250).
Engine Coolant Temperature Warning Lamp

If it illuminates when your vehicle is moving, this indicates that the engine is overheating. Stop your vehicle as soon as it is safe to do so and switch the engine off. Have your vehicle checked as soon as possible.

Engine Oil Pressure Warning Lamp

**WARNING:** If it illuminates when you are driving do not continue your journey, even if the oil level is correct. Have your vehicle checked.

It illuminates when you switch the ignition on.

If it illuminates when the engine is running this indicates a malfunction. Stop your vehicle as soon as it is safe to do so and switch the engine off. Check the engine oil level. If the oil level is sufficient, this indicates a system malfunction. Have your vehicle checked as soon as possible.

See **Checking the Engine Oil Level** (page 400).

Engine Warning Lamps

Malfunction Indicator Lamp

Check Engine

If it illuminates when the engine is running this indicates a malfunction. The on-board diagnostics system has detected a malfunction to the emissions control system.

If it flashes, engine misfire may be occurring. Increased exhaust gas temperatures could damage the diesel particulate filter or other vehicle components. Avoid heavy acceleration and deceleration and have your vehicle checked as soon as possible.

Powertrain Warning Lamp

If it illuminates when the engine is running this indicates a malfunction. If it flashes when you are driving, immediately reduce the vehicle speed. Avoid heavy acceleration and deceleration and have your vehicle checked as soon as possible.

If both lamps illuminate when the engine is running, stop your vehicle as soon as it is safe to do so. Continuing to drive your vehicle may cause reduced power or the engine to stop. Switch the ignition off and attempt to restart the engine. Have your vehicle checked as soon as possible.

Fasten Seatbelt Warning Lamp

It illuminates until you fasten your seatbelt.

Hood Ajar Warning Lamp

It illuminates when the ignition is on and the hood is not completely closed.

Lane Keeping Aid Warning Lamp

It illuminates when the system activates.

Liftgate Ajar Warning Lamp

It illuminates when the ignition is on and the liftgate is not completely closed.
Low Beam Headlamp Warning Lamp
If it illuminates when the low beam headlamps are on, this indicates that a low beam headlamp bulb has failed.

Low Fuel Level Warning Lamp
If it illuminates when you are driving, refuel as soon as possible.

Low Tire Pressure Warning Lamp
It illuminates when one or more of the tires are significantly under inflated. See Tire Pressure Monitoring System (page 437).

Selective Catalytic Reductant System Warning Lamp
It illuminates if the system detects the diesel exhaust fluid level is low or if there is a system malfunction.
If the warning lamp illuminates, the information display messages give you an indication whether the concern is fluid related or if there is a selective catalytic reductant system malfunction. If the warning lamp illuminates when your vehicle is moving, and the fluid is at a sufficient level, this indicates a system malfunction. Have your vehicle checked as soon as possible.

Stability Control and Traction Control Off Warning Lamp
It illuminates when you switch the system off.

Water-In-Fuel Warning Lamp
If it illuminates when the engine is running this indicates there is excess water in the fuel filter. Have your vehicle checked as soon as possible.

WHAT ARE THE INSTRUMENT CLUSTER INDICATORS
Indicators notify you of various features that are active on your vehicle.

INSTRUMENT CLUSTER INDICATORS
Adaptive Cruise Control
It illuminates when you switch the system on.
It illuminates white when the system is in standby mode. It illuminates green when you set the adaptive cruise speed.

Automatic High Beam
It illuminates to confirm when the system is ready to assist.

Auto Hold Active
Illuminates when the system is active.
**Auto Hold Unavailable**
Illuminates when the system is on but cannot hold your vehicle at a standstill at this particular time.

**Auto-Start-Stop**
It illuminates green when the engine stops. It flashes amber and a message appears when you need to take an action.

It illuminates grey with a strike out when the system is not available.

**Note:** You can display the reason why the system is not available in the information display.

**Blind Spot Information System Indicator**
It illuminates when you switch the system on or in conjunction with a message.

**Cruise Control**
It illuminates when you switch the system on.

**Direction Indicator**
It flashes when you switch the direction indicators on.

**Note:** An increase in the rate of flashing warns of a failed indicator bulb.

**Door Ajar**
It illuminates when the ignition is on and any door is not completely closed.

**Front Fog Lamp**
It illuminates when you switch the front fog lamps on.

**Fuel Operated Heater Operating**
It illuminates when the fuel operated heater is currently in operation.

**Glow Plug Indicator**
If it illuminates, wait until it turns off before starting the engine.

**Hazard Flasher**
It flashes when you switch the hazard flashers on.

**High Beam Headlamp**
It illuminates when you switch the high beam headlamps on.

**Lamps on Indicator**
It illuminates when you switch the low beam headlamps or the parking lamps on.

**Lane Keeping Alert**
It illuminates when you switch the system on.

**Rear Fog Lamp Indicator**
It illuminates when you switch the rear fog lamps on.
**Instrument Cluster**

**Shift Indicator**

It illuminates to advise you that shifting to a higher or lower gear may give better performance, fuel economy or lower emissions.

**Stability Control and Traction Control**

It flashes during operation. If it does not illuminate when you switch the ignition on, or remains on when the engine is running, this indicates a malfunction. Have your vehicle checked as soon as possible.
**USING THE INSTRUMENT CLUSTER DISPLAY CONTROLS**

**WARNING:** Driving while distracted can result in loss of vehicle control, crash and injury. We strongly recommend that you use extreme caution when using any device that may take your focus off the road. Your primary responsibility is the safe operation of your vehicle. We recommend against the use of any hand-held device while driving and encourage the use of voice-operated systems when possible. Make sure you are aware of all applicable local laws that may affect the use of electronic devices while driving.

---

**Return Button**

Use the return button to go back or to exit.

**OK Button**

Use the OK button to make a selection. You can also use it to scroll through a menu.

**Menu button**

Use the menu button on the main screen to display the submenu.

CUSTOMIZING THE INSTRUMENT CLUSTER DISPLAY - MILD HYBRID ELECTRIC VEHICLE (MHEV)

1. Press the menu button on the steering wheel to enter the instrument cluster display main menu.
2. Select MyView and press the menu button.
3. Select a screen.
4. Press the OK button.

Hybrid Gauge

The Hybrid Gauge displays power to the wheels when accelerating or maintaining speed.

When the available maximum power is limited the gauge shows gray lines showing the reduction in available power. During deceleration, the gauge displays the power captured by the regenerative braking system being returned to the high voltage battery.

Enabling Hybrid Gauge

1. Using the information display controls on the steering wheel, select MyView.
2. Select Hybrid gauge.

CUSTOMIZING THE INSTRUMENT CLUSTER DISPLAY - EXCLUDING: MILD HYBRID ELECTRIC VEHICLE (MHEV)

PERSONALIZED SETTINGS

CHANGING THE INSTRUMENT CLUSTER DISPLAY LANGUAGE

1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Display.
3. Select Language.
4. Choose your applicable setting.

CHANGING THE MEASUREMENT UNIT

1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Display.
3. Select Measurement unit.
4. Choose your applicable setting.
CHANGING THE TEMPERATURE UNIT
1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Display.
3. Select Temperature unit.
4. Choose your applicable setting.

CHANGING THE TIRE PRESSURE UNIT
1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Display.
3. Select Tyre pressure.
4. Choose your applicable setting.

SWITCHING THE INSTRUMENT CLUSTER DISPLAY AUDIBLE WARNINGS ON AND OFF
1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Display.
3. Select Chimes.
4. Choose your applicable setting.

FUEL ECONOMY DISPLAY
An instant fuel economy gauge is provided along with average fuel economy. Average fuel economy is continuously averaged since the last reset.

Note: Press and hold the OK button on the controls on the steering wheel to reset your average fuel economy.

TRIP SUMMARY
Displays the trip summary when you switch off your vehicle. The values are cumulative since you last started your vehicle.

TRIP SUMMARY
Displays the trip summary when you switch off your vehicle. The values are cumulative since you last started your vehicle.
**WARNING:** Driving while distracted can result in loss of vehicle control, crash and injury. FUEL ECONOMY DISPLAY

An instant fuel economy gauge is provided along with average fuel economy. Average fuel economy is continuously averaged since the last reset.

**Note:** Press and hold the OK button on the controls on the steering wheel to reset your average fuel economy.

TRIP SUMMARY

Displays the trip summary when you switch off your vehicle. The values are cumulative since you last started your vehicle.
Trip Computer - Vehicles With: 4.2 Inch Instrument Cluster Display Screen

ACCESSING THE TRIP COMPUTER

1. Navigate to the main screen.
2. Select Trip computer 1 or Trip computer 2.

RESETTING THE TRIP COMPUTER

1. Navigate to the main screen.
2. Select Trip computer 1 or Trip computer 2.
3. Press and hold the OK button for a few seconds.

RESETTING THE INDIVIDUAL TRIP VALUES

Resetting the Individual Trip Values

1. Navigate to the main screen.
2. Select Trip computer 1 or Trip computer 2.
3. Select Reset individual values.
4. Select the value to reset.
5. Press and hold the OK button for a few seconds.

CONFIGURING THE TRIP COMPUTER

1. Navigate to the main screen.
2. Select Trip computer 1 or Trip computer 2.
3. Select Configure view.
4. Select the value to display.
5. Press the OK button.

TRIP DATA

Trip data includes the following:

• Trip Odometer - Registers the total distance since you last reset the value.
• Trip Timer - Registers the total time since you last reset the value.
• Average Fuel - Indicates the average fuel consumption since you last reset the value.
• Average Speed - Indicates the average vehicle speed since you last reset the value.
• Distance to Empty - Indicates the approximate distance your vehicle could travel on the fuel remaining in the fuel tank. Changes in driving pattern may cause the value to vary.
• Instantaneous Fuel - Indicates the current fuel consumption.

Trip Data includes the following:

• Trip Odometer - Registers the total distance since you last reset the value.
• Trip Timer - Registers the total time since you last reset the value.
• Average Fuel - Indicates the average fuel consumption since you last reset the value.
• Average Speed - Indicates the average vehicle speed since you last reset the value.
• Distance to Empty - Indicates the approximate distance your vehicle could travel on the fuel remaining in the fuel tank. Changes in driving pattern may cause the value to vary.
• Instantaneous Fuel - Indicates the current fuel consumption.
ACCESSING THE TRIP COMPUTER
1. Navigate to the main screen.
2. Select Trip computer 1 or Trip computer 2.

RESETTING THE TRIP COMPUTER

2. Select Trip computer 1 or Trip computer 2.
3. Press and hold the OK button for a few seconds.

TRIP DATA
Trip data includes the following:
• Trip Odometer - Registers the total distance since you last reset the value.
• Trip Timer - Registers the total time since you last reset the value.
• Average Fuel - Indicates the average fuel consumption since you last reset the value.
Head Up Display

WHAT IS THE HEAD UP DISPLAY

The system displays information on a display screen in your field of vision, allowing you to keep your eyes on the road. You can select which information the system displays.

SWITCHING THE HEAD UP DISPLAY ON AND OFF - VEHICLES WITH: 4.2 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Head-up display (HUD).
3. Switch Head-up display (HUD) on or off.

HEAD UP DISPLAY SETTINGS - VEHICLES WITH: 4.2 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

1. Use the information display controls on the steering wheel.
2. Select Settings and press the menu button.
3. Select Head-up display (HUD).
4. Press the OK button.

Selecting Which Information the System Displays

Start the engine and switch the system on.

Note: For your safety, some features are speed-dependent. The system limits their use to when your vehicle is not moving.

Use the instrument cluster display controls on the steering wheel to select which information the system displays.

SWITCHING THE HEAD UP DISPLAY ON AND OFF - VEHICLES WITH: 12.3 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

1. Press the menu button on the steering wheel to enter the instrument cluster display main menu.
### Head Up Display

</table>
WHAT IS REMOTE START

The system allows you to remotely start your vehicle and therefore to heat or cool the interior to a predetermined temperature.

REMOTE START LIMITATIONS

Remote start does not work if:
• The alarm horn is sounding.
• The hood is open.
• The transmission is not in park (P).
• Remote start is not enabled.
• The ignition is on.

Note: Do not use remote start if your fuel level is low.

ENABLING REMOTE START - VEHICLES WITH: SYNC 2.5

1. Using the information display controls on the steering wheel, select Settings.
2. Select Vehicle settings.
3. Select Remote start.
4. Switch System on.

Note: To use remote start, make sure that the modem is enabled.

ENABLING REMOTE START - VEHICLES WITH: SYNC 3

1. Press Settings on the touchscreen.
2. Press Vehicle.
4. Switch Remote Start on or off.

Note: To use remote start, make sure that the modem is enabled.

ENABLING REMOTE START - VEHICLES WITH: SYNC 4

1. Press Settings on the touchscreen.
2. Press Vehicle.
4. Switch Remote Start on or off.

Note: To remote start with FordPass, make sure that the modem is enabled. See Connecting FordPass to the Modem (page 465).

REMOTELY STARTING AND STOPPING THE VEHICLE

WARNING: Do not start the engine in a closed garage or in other enclosed areas. Exhaust fumes are toxic. Always open the garage door before you start the engine. Failure to follow this instruction could result in personal injury or death.

Use the FordPass App to start the vehicle.

Note: The turn signal lamps flash twice.

Note: The parking lamps turn on when the vehicle is running.

Note: The horn sounds if the system fails to start.

Note: All other vehicle systems remain off when you have remotely started the vehicle.

Note: You may have to wait a short period of time before remotely starting the vehicle after the vehicle stops running.

Note: The vehicle remains secured when you have remotely started it. A valid key must be inside your vehicle to switch the ignition on and drive your vehicle.
Remote Start - Automatic Transmission

**Note:** A maximum of two remote starts are allowed. After that you need to turn the ignition on and off before you can use remote start again. Use the FordPass App to switch the vehicle off.

**REMOTE START SETTINGS - VEHICLES WITH: SYNC 2.5, VEHICLES WITHOUT: HEATED STEERING WHEEL**

**Climate Control Settings**

1. Using the information display controls on the steering wheel, select **Settings**.
2. Select **Vehicle settings**.
3. Select **Remote start**.
4. Select **Climate control**.
5. Select **Auto** or **Last settings**.

**Note:** If you select **Auto**, the system attempts to heat or cool the interior to 22°C (72°F).

**Note:** If you select **Last settings**, the system remembers the last used settings.

**Note:** You cannot adjust the climate control settings when you have remotely started the vehicle.

**Note:** When you switch the ignition on, the climate control system returns to the last used settings.

**Heated Seat Settings**

1. Using the information display controls on the steering wheel, select **Settings**.
2. Select **Vehicle settings**.
3. Select **Remote start**.
4. Select **Seats**.
5. Select **Auto** or **Off**.

**Setting the Remote Start Duration**

You can set a duration for Remote Start to run.

1. Using the information display controls on the steering wheel, select **Settings**.
2. Select **Vehicle settings**.
3. Select **Remote start**.
4. Select **Duration**.

**REMOTE START SETTINGS - VEHICLES WITH: SYNC 3/SYNC 4, VEHICLES WITHOUT: HEATED STEERING WHEEL**

**Climate Control Settings**

1. Press **Settings** on the touchscreen.
2. Press **Vehicle**.
3. Press **Remote Start Setup**.
4. Press **Climate control**.
5. Select **Auto** or **Last settings**.

**Note:** If you select **Auto**, the system attempts to heat or cool the interior to 22°C (72°F).

**Note:** If you select **Last settings**, the system remembers the last used settings.

**Note:** You cannot adjust the climate control settings when you have remotely started the vehicle.

**Note:** When you switch the ignition on, the climate control system returns to the last used settings.
Remote Start - Automatic Transmission

**Heated Seat Settings**
1. Press **Settings** on the touchscreen.
2. Press **Vehicle**.
3. Press **Remote Start Setup**.
4. Press **Seats**.
5. Select **Auto** or **Off**.

**Note:** If you switch the heated seat settings to **Auto**, the heated seats turn on during cold weather.

**Note:** You cannot adjust the heated seat settings when you have remotely started the vehicle.

**Setting the Remote Start Duration**
You can set a duration for Remote Start to run.
1. Press **Settings** on the touchscreen.
2. Press **Vehicle**.
3. Press **Remote Start Setup**.
4. Press **Duration**.

**REMOTE START SETTINGS - VEHICLES WITH: HEATED STEERING WHEEL/SYNC 2.5**

**Climate Control Settings**
1. Using the information display controls on the steering wheel, select **Settings**.
2. Select **Vehicle settings**.
3. Select **Remote start**.
4. Select **Climate control**.
5. Select **Auto** or **Last settings**.

**Note:** If you select **Auto**, the system attempts to heat or cool the interior to 22°C (72°F).

**Note:** If you select **Last settings**, the system remembers the last used settings.

**Heated Seat and Steering Wheel Settings**
1. Using the information display controls on the steering wheel, select **Settings**.
2. Select **Vehicle settings**.
3. Select **Remote start**.
4. Select **Seats and steering**.
5. Select **Auto** or **Off**.

**Note:** If you switch the heated seat and steering wheel settings to **Auto**, the heated seats and steering wheel turn on during cold weather.

**Note:** You cannot adjust the heated seat and steering wheel settings when you have remotely started the vehicle.

**Setting the Remote Start Duration**
You can set a duration for Remote Start to run.
1. Using the information display controls on the steering wheel, select **Settings**.
2. Select **Vehicle settings**.
3. Select **Remote start**.
4. Select **Duration**.

**REMOTE START SETTINGS - VEHICLES WITH: HEATED STEERING WHEEL/SYNC 3/SYNC 4**

**Climate Control Settings**
1. Press **Settings** on the touchscreen.
2. Press **Vehicle**.
3. Press **Remote Start Setup**.
4. Press **Climate control**.
5. Select **Auto** or **Last settings**.

**Note:** If you select **Auto**, the system attempts to heat or cool the interior to 22°C (72°F).

**Note:** If you select **Last settings**, the system remembers the last used settings.

**Note:** You cannot adjust the climate control settings when you have remotely started the vehicle.

**Note:** When you switch the ignition on, the climate control system returns to the last used settings.

### Heated Seat and Steering Wheel Settings

1. Press **Settings** on the touchscreen.
2. Press **Vehicle**.
3. Press **Remote Start Setup**.
4. Press **Seats and Steering Wheel**.
5. Select **Auto** or **Off**.

**Note:** If you switch the heated seat and steering wheel settings to **Auto**, the heated seats and steering wheel turn on during cold weather.

**Note:** You cannot adjust the heated seat and steering wheel settings when you have remotely started the vehicle.

### Setting the Remote Start Duration

You can set a duration for Remote Start to run.

1. Press **Settings** on the touchscreen.
2. Press **Vehicle**.
3. Press **Remote Start Setup**.
4. Press **Duration**.
Climate Control - Vehicles With: Dual Automatic Temperature Control (DATC)/SYNC 4

SWITCHING CLIMATE CONTROL ON AND OFF
Press the button to activate the selection screen.
Press the button.

SWITCHING RECIRCULATED AIR ON AND OFF
Press the button to activate the selection screen.
Press the button to recirculate air currently in the passenger compartment.
Note: Recirculated air may turn off automatically, or prevent you from switching on in all air flow modes except MAX A/C to reduce the risk of fogging. Recirculation may also turn on and off automatically in various air distribution control combinations to improve heating or cooling efficiency.

SWITCHING AIR CONDITIONING ON AND OFF
Press the button.
Note: Under certain conditions, the air conditioning compressor could continue to operate after you switch air conditioning off.
Note: To keep the system and its components fully functional, switch air conditioning on and let your vehicle idle at least once per month for a minimum of two minutes.

SWITCHING DEFROST ON AND OFF
Press the button to activate the selection screen.
Press the button.
Press the button on the touchscreen to switch the windshield air vents on.
Make sure that the instrument panel air vents are switched off.
Make sure that the footwell air vents are switched off.

SWITCHING MAXIMUM DEFROST ON AND OFF - VEHICLES WITHOUT: HEATED WINDSHIELD
Press the button on the touchscreen.
Air flows through the windshield air vents, and the blower motor adjusts to the highest speed.
You can also use this setting to defog and clear the windshield of a thin covering of ice.
Note: You can also press the button on the instrument panel to switch the maximum defrost on or off.
Note: To prevent window fogging, you cannot select recirculated air when maximum defrost is on.
Note: The heated rear window and air conditioning also turn on when you select maximum defrost.
SWITCHING MAXIMUM DEFROST ON AND OFF - VEHICLES WITH: HEATED WINDSHIELD

Press the button to activate the selection screen.
Press the button on the touchscreen.

Air flows through the windshield air vents, and the blower motor adjusts to the highest speed.
You can also use this setting to defog and clear the windshield of a thin covering of ice.

Note: You can also press the button on the instrument panel to switch the maximum defrost on or off.
Note: To prevent window fogging, you cannot select recirculated air when maximum defrost is on.
Note: The heated rear window and air conditioning also turn on when you select maximum defrost.

SWITCHING MAXIMUM COOLING ON AND OFF

Press the button to activate the selection screen.
Press the button.

Note: When you switch maximum cooling off, air conditioning remains on.
Note: In certain conditions, for example, cold weather, maximum cooling may not activate or could run slow when switched on. This helps reduce power consumption from the battery.

SWITCHING THE HEATED WINDSHIELD ON AND OFF - VEHICLES WITH: HEATED WINDSHIELD

Press the button to clear the windshield of thin ice and fog. The heated windshield turns off after a short period of time.

Note: The engine must be running or your vehicle must be ready to drive to switch the system on.

SWITCHING THE HEATED REAR WINDOW ON AND OFF

Press the button to clear the rear window of thin ice and fog. The heated rear window turns off after a short period of time.

Note: Do not use harsh chemicals, razor blades or other sharp objects to clean or remove decals from the inside of the heated rear window as this could cause damage to the heated rear window grid lines not covered by the vehicle Warranty.
Note: The engine must be running or your vehicle must be ready to drive to switch the system on.

SETTING THE BLOWER MOTOR SPEED

Press the button to set the blower motor speed.
Slide the control to set the blower motor speed.

Note: You can press + or - to set the blower motor speed.
SWITCHING THE HEATED MIRRORS ON AND OFF

When you switch the heated rear window on, the heated exterior mirrors turn on.

**Note:** Do not remove ice from the mirrors with a scraper or adjust the mirror glass when it is frozen in place.

**Note:** Do not clean the mirror housing or glass with harsh abrasives, fuel or other petroleum-based cleaning products. The vehicle warranty may not cover damage caused to the mirror housing or glass.

**Note:** The engine must be running or your vehicle must be ready to drive to switch the system on.

SETTING THE TEMPERATURE

Press the temperature controls on either side of the climate control to set the temperature for that side.

Slide the control to set the temperature.

**Note:** You can press + or - to set the temperature.

DIRECTING THE FLOW OF AIR

**Directing Air to the Windshield Air Vents**

Press the button to activate the selection screen.

**Directing Air to the Instrument Panel Air Vents**

Press the button on the touchscreen.

**Directing Air to the Footwell Air Vents**

Press the button on the touchscreen.

AUTO MODE

SWITCHING AUTO MODE ON AND OFF

Press the button to switch auto mode on. Repeatedly press the button to adjust auto mode.

Adjust the blower motor control or air distribution control to switch auto mode off.

AUTO MODE INDICATORS

The indicators are on the Auto Mode button.
**Auto Mode Indicator Status** | **Description**
---|---
One indicator illuminated. | The blower motor speed is reduced. Use this setting to minimize the amount of noise from the blower motor. This setting increases the time taken to cool the interior.
Two indicators illuminated. | The blower motor speed is moderate.
Three indicators illuminated. | The blower motor speed is increased. Use this setting to reduce the time taken to cool the interior. This setting increases the amount of noise from the blower motor.
SWITCHING DUAL MODE ON AND OFF

Press the button to activate the selection screen.

Press the button.

**Note:** When dual mode is off, setting the temperature using the driver side controls, sets the temperature for both sides.

**Note:** Setting the temperature using the passenger side controls, sets the passenger temperature and switches dual mode on.

CLIMATE CONTROL HINTS

**General Hints**

- Prolonged use of recirculated air may cause the windows to fog up.
- You may feel a small amount of air from the footwell air vents regardless of the air distribution setting.
- To reduce humidity build-up inside your vehicle, do not drive with the system switched off or with recirculated air always switched on.
- Do not place objects under the front seats as this may interfere with the airflow to the rear seats.
- Remove any snow, ice or leaves from the air intake area at the base of the windshield.
- To improve the time to reach a comfortable temperature in hot weather, drive with the windows open until you feel cold air through the air vents.

**Automatic Climate Control**

- Adjusting the settings when your vehicle interior is extremely hot or cold is not necessary. Automatic mode is best recommended to maintain set temperature.
- The system adjusts to heat or cool the interior to the temperature you select as quickly as possible.
- For the system to function efficiently, the instrument panel and side air vents should be fully open.
- If you press **AUTO** during cold outside temperatures, the system directs air flow to the windshield and side window air vents. In addition, the blower motor may run at a slower speed until the engine warms up.
- If you press **AUTO** during hot temperatures and the inside of the vehicle is hot, the system uses recirculated air to maximize interior cooling. Blower motor speed may also reduce until the air cools.

**Quickly Heating the Interior**

1. Press **AUTO**.
2. Adjust the temperature function to the setting you prefer.

**Recommended Settings for Heating**

1. Press **AUTO**.
2. Adjust the temperature function to the setting you prefer. Use 22°C (72°F) as a starting point, then adjust the setting as necessary.

**Quickly Cooling the Interior**

1. Press **MAX A/C**.
2. Drive with the windows open for a short period of time.
Recommended Settings for Cooling

1. Press AUTO.
2. Adjust the temperature function to the setting you prefer. Use 22°C (72°F) as a starting point, then adjust the setting as necessary.

Defogging the Side Windows in Cold Weather

1. Press and release defrost or maximum defrost.
2. Adjust the temperature control to the setting you prefer. Use 22°C (72°F) as a starting point, then adjust the setting as necessary.
SWITCHING CLIMATE CONTROL ON AND OFF
Press the button.

SWITCHING RECIRCULATED AIR ON AND OFF
Press the button to recirculate air currently in the passenger compartment.
Note: Recirculated air may turn off automatically, or prevent you from switching on in all air flow modes except MAX A/C to reduce the risk of fogging. Recirculation may also turn on and off automatically in various air distribution control combinations to improve heating or cooling efficiency.

SWITCHING AIR CONDITIONING ON AND OFF
Press the button.
Note: Under certain conditions, the air conditioning compressor could continue to operate after you switch air conditioning off.
Note: To keep the system and its components fully functional, switch air conditioning on and let your vehicle idle at least once per month for a minimum of two minutes.

SWITCHING MAXIMUM DEFROST ON AND OFF
Press the button.
Air flows through the windshield air vents, and the blower motor adjusts to the highest speed.
You can also use this setting to defog and clear the windshield of a thin covering of ice.
Note: To prevent window fogging, you cannot select recirculated air when maximum defrost is on.
Note: The heated rear window also turns on when you select maximum defrost.
Note: When maximum defrost is on, the air conditioning compressor may continue to operate even though you switch off the air conditioning.

SWITCHING MAXIMUM COOLING ON AND OFF
Press the button.
Note: When you switch maximum cooling off, air conditioning remains on.

SWITCHING THE HEATED WINDSHIELD ON AND OFF - VEHICLES WITH: HEATED WINDSHIELD
Press the button to clear the windshield of thin ice and fog. The heated windshield turns off after a short period of time.
Note: Make sure that the engine is running before switching the heated windshield on.
Note: The system does not operate if the battery charge level is low.
SWITCHING THE HEATED REAR WINDOW ON AND OFF

Press the button to clear the rear window of thin ice and fog. The heated rear window turns off after a short period of time.

**Note:** Do not use harsh chemicals, razor blades or other sharp objects to clean or remove decals from the inside of the heated rear window as this could cause damage to the heated rear window grid lines not covered by the vehicle Warranty.

SETTING THE BLOWER MOTOR SPEED

**Note:** Lights on the control illuminate to indicate the blower motor speed.

**Note:** When you switch the blower motor off, air conditioning turns off and the windows could fog up.

SWITCHING THE HEATED MIRRORS ON AND OFF

When you switch the heated rear window on, the heated exterior mirrors turn on.

**Note:** Do not remove ice from the mirrors with a scraper or adjust the mirror glass when it is frozen in place.

**Note:** Do not clean the mirror housing or glass with harsh abrasives, fuel or other petroleum-based cleaning products. The vehicle warranty may not cover damage caused to the mirror housing or glass.

SETTING THE TEMPERATURE

Turn the control on the left-hand side of the climate control to set the left-hand temperature.

**Note:** This control also sets the right-hand side temperature when you switch off dual zone mode.

Turn the control on the right-hand side of the climate control to set the right-hand temperature.

AUTO MODE

SWITCHING AUTO MODE ON AND OFF

Press the button to switch auto mode on. Repeatedly press the button to adjust auto mode.

**Note:** When you switch auto mode on, lights on the blower motor control do not illuminate to indicate the blower motor speed.

Adjust the blower motor control or air distribution control to switch auto mode off.
**AUTO MODE INDICATORS**

The indicators are on the Auto Mode button.

<table>

SWITCHING DUAL MODE ON AND OFF

Press the button.

DUAL

CLIMATE CONTROL – TROUBLESHOOTING

CLIMATE CONTROL – FREQUENTLY ASKED QUESTIONS

Why is the volume of air to the rear passenger compartment limited?

Objects may obstruct the air direction to the rear passenger compartment. Make sure objects have not been placed under the front seats.

Why is the volume of air from the air vents reduced?

The air intake area at the base of the windshield could be obstructed. Make sure the air intake area is free from any snow, ice or leaves.

What are the recommended settings for heating the interior?

Auto mode on and instrument panel and side air vents fully open.

How can I quickly heat the interior?

Select the highest blower motor speed, highest temperature and direct the air to the footwell air vents.

What are the recommended settings for cooling the interior?

Auto mode on.

How can I quickly cool the interior?

Switch maximum cooling on, switch recirculated air on and drive with the windows open until you feel cold air through the air vents.

How can I reduce the humidity build-up inside my vehicle?

Do not drive with the system off or with recirculated air on.

How can I defog the side windows?

Switch maximum defrost on.

How can I defog or clear the windshield of thin ice?

Switch maximum defrost on.

Why do I feel air from the footwell air vents regardless of the air distribution?

This is normal operation. You may feel a small amount of air from the footwell air vents regardless of the air distribution.

What happens if I switch auto mode on when the outside temperature and in-vehicle temperature is high?

The system temporarily selects recirculated air to maximize cooling.

What happens if I switch auto mode on when the outside temperature is low and the engine is cold?

Air is directed to the windshield and the outer instrument panel air vents.
IDENTIFYING THE CLIMATE CONTROL UNIT

Note: Depending on your vehicle options, the controls may look different from what you see here.

SWITCHING CLIMATE CONTROL ON AND OFF

Press the button.

SWITCHING RECIRCULATED AIR ON AND OFF

Press the button to recirculate air currently in the passenger compartment.

Note: Recirculated air may turn off automatically, or prevent you from switching on in all air flow modes except MAX A/C to reduce the risk of fogging. Recirculation may also turn on and off automatically in various air distribution control combinations to improve heating or cooling efficiency.

SWITCHING AIR CONDITIONING ON AND OFF

Press the button.

Note: Under certain conditions, the air conditioning compressor could continue to operate after you switch air conditioning off.

Note: To keep the system and its components fully functional, switch air conditioning on and let your vehicle idle at least once per month for a minimum of two minutes.

SWITCHING MAXIMUM DEFROST ON AND OFF

Turn the temperature control clockwise past the highest setting to maximize defrosting.

Note: The temperature control springs back to the highest setting.

Air flows through the windshield air vents, and the blower motor adjusts to the highest speed.

Note: To prevent window fogging, you cannot select recirculated air when maximum defrost is on.

Note: The heated rear window also turns on when you select maximum defrost.

SWITCHING MAXIMUM COOLING ON AND OFF

Turn the temperature control counterclockwise past the lowest setting to maximize cooling.

Note: The temperature control springs back to the lowest setting.

Note: When you switch maximum cooling off, air conditioning remains on.
SWITCHING THE HEATED WINDSHIELD ON AND OFF - VEHICLES WITH: HEATED WINDSHIELD

Press the button to clear the windshield of thin ice and fog. The heated windshield turns off after a short period of time.

**Note:** Make sure that the engine is running before switching the heated windshield on.

**Note:** The system does not operate if the battery charge level is low.

SWITCHING THE HEATED REAR WINDOW ON AND OFF

Press the button to clear the rear window of thin ice and fog. The heated rear window turns off after a short period of time.

**Note:** Do not use harsh chemicals, razor blades or other sharp objects to clean or remove decals from the inside of the heated rear window as this could cause damage to the heated rear window grid lines not covered by the vehicle Warranty.

SETTING THE BLOWER MOTOR SPEED

Turn the control.

**Note:** Lights on the control illuminate to indicate the blower motor speed.

**Note:** When you switch the blower motor off, air conditioning turns off and the windows could fog up.

SWITCHING THE HEATED MIRRORS ON AND OFF

When you switch the heated rear window on, the heated exterior mirrors turn on.

**Note:** Do not remove ice from the mirrors with a scraper or adjust the mirror glass when it is frozen in place.

**Note:** Do not clean the mirror housing or glass with harsh abrasives, fuel or other petroleum-based cleaning products. The vehicle warranty may not cover damage caused to the mirror housing or glass.
Climate Control - Vehicles With: Manual Temperature Control

**SETTING THE TEMPERATURE**

Turn the temperature control counterclockwise for cooler temperature settings.

Turn the temperature control clockwise for warmer temperature settings.

**DIRECTING THE FLOW OF AIR**

**Directing Air to the Windshield Air Vents**

Press the button.

**Directing Air to the Instrument Panel Air Vents**

Press the button.

**Directing Air to the Footwell Air Vents**

Press the button.

**CLIMATE CONTROL – TROUBLESHOOTING**

**CLIMATE CONTROL – FREQUENTLY ASKED QUESTIONS**

*Why is the volume of air to the rear passenger compartment limited?*

Objects may obstruct the air direction to the rear passenger compartment. Make sure objects have not been placed under the front seats.

*Why is the volume of air from the air vents reduced?*

The air intake area at the base of the windshield could be obstructed. Make sure the air intake area is free from any snow, ice or leaves.

*What are the recommended settings for heating the interior?*

A medium blower motor speed selected and the air directed to the footwell and windshield air vents.

*How can I quickly heat the interior?*

Select the highest blower motor speed, highest temperature and direct the air to the footwell air vents.

*What are the recommended settings for cooling the interior?*

Air conditioning on, a medium blower motor speed selected and air directed to the footwell and windshield air vents.

*How can I quickly cool the interior?*

Switch maximum cooling on, switch recirculated air on and drive with the windows open until you feel cold air through the air vents.
Climate Control - Vehicles With: Manual Temperature Control

How can I reduce the humidity build-up inside my vehicle?
Do not drive with the system off or with recirculated air on.

How can I defog the side windows?
Switch maximum defrost on.

How can I defog or clear the windshield of thin ice?
Switch maximum defrost on.

Why do I feel air from the footwell air vents regardless of the air distribution?
This is normal operation. You may feel a small amount of air from the footwell air vents regardless of the air distribution.
Auxiliary Heater

WHAT IS THE AUXILIARY HEATER

The system is designed to reduce the time needed to heat the engine when it is running. It turns on or off depending on the outside air temperature and the coolant temperature.

The system warms the engine and the vehicle interior. It uses fuel from the vehicle fuel tank.

AUXILIARY HEATER PRECAUTIONS

⚠️ WARNING: We recommend that you have a qualified technician check and repair the heater system after a crash. Failure to follow this instruction could result in personal injury or death.

⚠️ WARNING: Do not use the auxiliary heater at fuel filling stations or near sources of combustible vapors, dust or in enclosed spaces. Failure to follow this instruction could result in personal injury or death.

Note: The system does not operate if the battery charge level is low.

Note: Make sure the heater exhaust outlet, in front of the right-hand front tire, is free from snow, ice, mud and any other blockages to avoid issues with the heater operation.

Note: When the system is on, exhaust fumes come from under your vehicle. This is normal.

Note: If the heater is in the process of stopping, excess fuel in the heater burns out and there is some heat, exhaust and noise.

SWITCHING THE AUXILIARY HEATER ON AND OFF

1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Vehicle settings.
3. Select Aux heater.

SWITCHING THE AUXILIARY HEATER ON AND OFF

1. Press Settings on the touchscreen.
2. Press Vehicle.
3. Switch Aux heater on or off.

AUXILIARY HEATER INDICATORS

Secondary Interior Heating System Active Indicator

It illuminates when you switch the system on.
FRONT SEAT PRECAUTIONS

**WARNING:** Sitting improperly, out of position or with the seatback reclined too far can take weight off the seat cushion and affect the decision of the passenger sensing system, resulting in serious injury or death in the event of a crash. Always sit upright against your seatback, with your feet on the floor.

**WARNING:** Do not recline the seatbackrest too far as this can cause the occupant to slide under the seatbelt, resulting in personal injury in the event of a crash.

**WARNING:** Do not place objects higher than the top of the seatbackrest. Failure to follow this instruction could result in personal injury or death in the event of a sudden stop or crash.

**WARNING:** Do not adjust the driver seat or seatbackrest when your vehicle is moving. This may result in sudden seat movement, causing the loss of control of your vehicle.

SITTING IN THE CORRECT POSITION

**WARNING:** Always sit upright against your seatback with your feet on the floor.

When you use them properly, the seat, head restraint, seatbelt and airbags will provide optimum protection in the event of a crash.

We recommend that you follow these guidelines:

- Sit in an upright position with the base of your spine as far back as possible.
- Do not recline the seatbackrest so that your torso is more than 30 degree from the upright position.
- Adjust the head restraint so that the top of it is level with the top of your head and as far forward as possible. Make sure that you remain comfortable.
- Keep sufficient distance between yourself and the steering wheel. We recommend a minimum of 25 cm (10 in) between your breastbone and the airbag cover.
- Hold the steering wheel with your arms slightly bent.
- Bend your legs slightly so that you can press the pedals fully.
- Position the shoulder strap of the seatbelt over the center of your shoulder and position the lap strap tightly across your hips.
Make sure that your driving position is comfortable and that you can maintain full control of your vehicle.

**MANUAL SEATS - VEHICLES WITH: 2-WAY MANUAL SEAT**

**ADJUSTING THE HEAD RESTRAINT**

**WARNING:** Fully adjust the head restraint before you sit in or operate your vehicle. This will help minimize the risk of neck injury in the event of a crash. Do not adjust the head restraint when your vehicle is moving.

**WARNING:** The head restraint is a safety device. Whenever possible it should be installed and properly adjusted when the seat is occupied. Failure to adjust the head restraint properly could reduce its effectiveness during certain impacts.

**WARNING:** Adjust the head restraints for all passengers before you drive your vehicle. This will help minimize the risk of neck injury in the event of a crash. Do not adjust the head restraints when your vehicle is moving.

Adjust the head restraint so that the top of it is level with the top of your head.

**Raising the Head Restraints**

1. Pull the head restraint upward.
2. Make sure that the head restraint locks into place.

**Lowering the Head Restraints**

1. Press and hold the locking button.
2. Push the head restraint downward.

3. Make sure that the head restraint locks into place.

**REMOVING THE HEAD RESTRAINT**

**WARNING:** Do not remove the head restraint from an occupied seat.

1. Recline the seat backrest so that there is enough room for you to remove the head restraint.

2. Press the locking button and remove the head restraint.

**MOVING THE SEAT BACKWARD AND FORWARD**

**WARNING:** Make sure the seat fully locks into place by rocking it backward and forward. Not securing the seat into the locked position can be dangerous in a crash and could cause serious personal injury or death.
WARNING: Fully adjust the head restraint before you sit in or operate your vehicle. This will help minimize the risk of neck injury in the event of a crash. Do not adjust the head restraint when your vehicle is moving.

WARNING: The head restraint is a safety device. Whenever possible it should be installed and properly adjusted when the seat is occupied. Failure to adjust the head restraint properly could reduce its effectiveness during certain impacts.

WARNING: Adjust the head restraints for all passengers before you drive your vehicle. This will help minimize the risk of neck injury in the event of a crash. Do not adjust the head restraints when your vehicle is moving.

Adjust the head restraint so that the top of it is level with the top of your head.

Raising the Head Restraints
1. Pull the head restraint upward.
2. Make sure that the head restraint locks into place.

Lowering the Head Restraints
1. Press and hold the locking button.
2. Push the head restraint downward.
3. Make sure that the head restraint locks into place.
REMOVING THE HEAD RESTRAINT

**WARNING:** Do not remove the head restraint from an occupied seat.

1. Recline the seat backrest so that there is enough room for you to remove the head restraint.

2. Press the locking button and remove the head restraint.

MOVING THE SEAT BACKWARD AND FORWARD

**WARNING:** Make sure the seat fully locks into place by rocking it backward and forward. Not securing the seat into the locked position can be dangerous in a crash and could cause serious personal injury or death.

**WARNING:** Do not adjust the driver seat or seat backrest when your vehicle is moving. This may result in sudden seat movement, causing the loss of control of your vehicle.
ADJUSTING THE SEAT HEIGHT

MANUAL SEATS - VEHICLES WITH: 6-WAY MANUAL SEAT

ADJUSTING THE HEAD RESTRAINT

**WARNING:** Fully adjust the head restraint before you sit in or operate your vehicle. This will help minimize the risk of neck injury in the event of a crash. Do not adjust the head restraint when your vehicle is moving.

**WARNING:** The head restraint is a safety device. Whenever possible it should be installed and properly adjusted when the seat is occupied. Failure to adjust the head restraint properly could reduce its effectiveness during certain impacts.

**WARNING:** Adjust the head restraints for all passengers before you drive your vehicle. This will help minimize the risk of neck injury in the event of a crash. Do not adjust the head restraints when your vehicle is moving.

Adjust the head restraint so that the top of it is level with the top of your head.

**Raising the Head Restraints**

1. Pull the head restraint upward.
2. Make sure that the head restraint locks into place.

**Lowering the Head Restraints**

1. Press and hold the locking button.
2. Push the head restraint downward.
3. Make sure that the head restraint locks into place.
REMOVING THE HEAD RESTRAINT

**WARNING:** Do not remove the head restraint from an occupied seat.

1. Recline the seat backrest so that there is enough room for you to remove the head restraint.

2. Press the locking button and remove the head restraint.

MOVING THE SEAT BACKWARD AND FORWARD

**WARNING:** Do not adjust the driver seat or seat backrest when your vehicle is moving. This may result in sudden seat movement, causing the loss of control of your vehicle.

**WARNING:** Make sure the seat fully locks into place by rocking it backward and forward. Not securing the seat into the locked position can be dangerous in a crash and could cause serious personal injury or death.
**WARNING:** Fully adjust the head restraint before you sit in or operate your vehicle. This will help minimize the risk of neck injury in the event of a crash. Do not adjust the head restraint when your vehicle is moving.

**WARNING:** The head restraint is a safety device. Whenever possible it should be installed and properly adjusted when the seat is occupied. Failure to adjust the head restraint properly could reduce its effectiveness during certain impacts.

**WARNING:** Adjust the head restraints for all passengers before you drive your vehicle. This will help minimize the risk of neck injury in the event of a crash. Do not adjust the head restraints when your vehicle is moving.
Adjust the head restraint so that the top of it is level with the top of your head.

**Raising the Head Restraints**
1. Pull the head restraint upward.
2. Make sure that the head restraint locks into place.

**Lowering the Head Restraints**
1. Press and hold the locking button.
2. Push the head restraint downward.
3. Make sure that the head restraint locks into place.

**REMOVING THE HEAD RESTRAINT**

**WARNING:** Do not remove the head restraint from an occupied seat.

1. Do not remove the head restraint from an occupied seat.
2. Press the locking button and remove the head restraint.
ADJUSTING THE SEAT HEIGHT

HEATED SEATS

HEATED SEAT PRECAUTIONS

**WARNING:** Use caution when using the heated seat if you are unable to feel pain to your skin because of advanced age, chronic illness, diabetes, spinal cord injury, medication, alcohol use, exhaustion or other physical conditions. The heated seat could cause burns even at low temperatures, especially if used for long periods of time. Failure to follow this instruction could result in personal injury.

**WARNING:** Do not poke sharp objects into the seat cushion or seat backrest. This could damage the heated seat element and cause it to overheat. Failure to follow this instruction could result in personal injury.

**WARNING:** Do not place anything on the seat that blocks the heat, for example a seat cover or a cushion. This could cause the seat to overheat. Failure to follow this instruction could result in personal injury.

Do not:
- Place heavy objects on the seat.
- Operate the heated seat if water or any other liquid spills on the seat. Allow the seat to dry.

SWITCHING THE HEATED SEATS ON AND OFF

The heated seat button is on the climate control assembly.
The vehicle must be on to use this feature.
Repeatedly press the button to adjust the temperature. The more indicators that display, the warmer the temperature of the seat.

**Note:** The heated seats may turn on when you start your vehicle if they were on when you switched your vehicle off.
REAR SEAT PRECAUTIONS

**WARNING:** Raise the rear head restraints when passengers occupy the rear seats.

MANUAL SEATS

**ADJUSTING THE HEAD RESTRAINT**

**WARNING:** Raise the rear head restraints when passengers occupy the rear seats.

### Raising the Head Restraints
1. Pull the head restraint upward.
2. Make sure that the head restraint locks into place.

### Lowering the Head Restraints
1. Press and hold the locking button.
2. Push the head restraint downward.
3. Make sure that the head restraint locks into place.

### REMOVING THE HEAD RESTRAINT

**WARNING:** Do not remove the head restraint from an occupied seat.

1. Fold the seat backrest so that there is enough room for you to remove the head restraint.

FOLDING THE SEAT BACKREST - WAGON

**WARNING:** Do not fold a seat if it is occupied. Failure to follow this instruction could result in personal injury.

**WARNING:** When folding the seat backrest down, take care not to get your fingers caught in the mechanism.

**WARNING:** Do not use the bench seats as a bed when your vehicle is moving. Failure to follow this warning could result in serious personal injury or death.

**WARNING:** Do not place any objects on a folded seat. Hard objects may become projectiles in a crash or sudden stop, which may increase the risk of serious personal injury.

1. Lower the head restraints.
2. Press and hold the unlock button on the top of the seat or pull the lever on the rear quarter trim panel.
3. Push the seat backrest forward.

**Note:** Do not attempt to fold the rear seat cushion forward.

---

**FOLDING THE SEAT BACKREST - 4-DOOR/5-DOOR**

<table>

</tr>
</tbody>
</table>

1. Lower the head restraints.
2. Press and hold the unlock button.
3. Push the seat backrest forward.

---

4. Place the seatbelts in the clips on the trim.

**Note:** Make sure that the seatbelt is fully retracted.
Rear Seats

**Note:** Do not attempt to fold the rear seat cushion forward.

4. Place the seatbelts in the clips on the trim.
   **Note:** Make sure that the seatbelt is fully retracted.

**UNFOLDING THE SEAT BACKREST**

⚠️ **WARNING:** When unfolding the seat backrests, make sure that the seatbelts are not trapped behind the seat.

⚠️ **WARNING:** Make sure that the seats and the seat backrests are secure and fully locked in their catches.

Lift the seat backrest until it latches in the upright position.
WHAT IS THE REAR OCCUPANT ALERT SYSTEM

The rear occupant alert system monitors vehicle conditions and notifies you to check for rear seat occupants when you switch the ignition off.

HOW DOES THE REAR OCCUPANT ALERT SYSTEM WORK

The system monitors when rear doors have been opened and closed to indicate the potential presence of an occupant in the rear seat.

A message displays in the information and entertainment display screen and an audible warning sounds when you switch the ignition off after any of the following conditions have been met:

- A rear door is opened or closed while the ignition is on.
- You switch the ignition on within 15 minutes of a rear door opening and closing.
- You switch the ignition on within 15 minutes of the alert having displayed or sounded.

WARNING: Do not leave children or pets unattended in your vehicle. Failure to follow this instruction could result in personal injury or death.

REAR OCCUPANT ALERT SYSTEM LIMITATIONS

The system does not detect the presence of objects or passengers in the rear seat. It monitors when rear doors are opened and closed.

Note: It is possible to receive an alert when there is no rear seat occupant, but alert conditions are met.

Note: It is possible to receive no alert when there is an occupant in the rear seat, if alert conditions are not met. For example, if a rear seat occupant does not enter the vehicle through a rear door.

Note: The audible warning does not sound when the front door is opened before you switch the ignition off.

SWITCHING REAR OCCUPANT ALERT SYSTEM ON AND OFF

1. Press Settings on the touchscreen.
2. Press Vehicle.
3. Switch Rear Occupant Alert on or off.

Note: The default setting is on.

Note: Performing a master reset causes the system to switch on again.

Semiannual Reminder (If Equipped)

When you switch the system off, a message appears every six months as a reminder that the system is off. You can switch the system back on or leave it off.

REAR OCCUPANT ALERT SYSTEM PRECAUTIONS

WARNING: On hot days, the temperature inside the vehicle can rise very quickly. Exposure of people or animals to these high temperatures for even a short time can cause death or serious heat related injuries, including brain damage. Small children are particularly at risk.
## Rear Occupant Alert System

### Rear Occupant Alert System Indicators

<table>

<tr>
<th>Message</th>
</tr>
</thead>
<tbody>
<tr>
<td>Check rear seats for occupants.</td>
</tr>
</tbody>
</table>

Displays when you switch your vehicle off after the alert conditions are met. The message displays for a short period of time. Press **Close** to acknowledge and remove the message.

**Note:** Depending on your SYNC version, the graphic may look different from what you see here.

### Rear Occupant Alert System Audible Warnings

Sounds when you switch your vehicle off after the alert conditions are met. The warning sounds for a short period of time.
LOCATING THE USB PORTS

Data Transfer USB Ports

The USB ports could be in the following locations:

• On the lower instrument panel.
• Inside the center console.

Note: These USB ports can also charge devices.

Note: Not all USB ports in your vehicle have data transfer capabilities.

Note: We recommend using only USB-IF certified cables and adapters. Non-certified cables and adapters may not work.

Charge Only USB Ports

The USB ports could be in the following locations:

• On the lower instrument panel.
• On the upper instrument panel.
• Inside the media bin.
• Inside the center console.
• On the rear of the center console.
• In the cargo area.
• In the trunk.

PLAYING MEDIA USING THE USB PORT - VEHICLES WITH: SYNC 3

WARNING: Driving while distracted can result in loss of vehicle control, crash and injury. We strongly recommend that you use extreme caution when using any device that may take your focus off the road. Your primary responsibility is the safe operation of your vehicle. We recommend against the use of any hand-held device while driving and encourage the use of voice-operated systems when possible. Make sure you are aware of all applicable local laws that may affect the use of electronic devices while driving.

Connect your device to a data transfer USB port.

Press the audio button on the feature bar.

Select Sources.

Select the USB option.

Press to play a track. Press again to pause the track.

Press to skip to the next track.

Press and hold to fast forward through the track.

Press once to return to the beginning of a track. Repeatedly press to return to previous tracks.

Press and hold to fast rewind.
PLAYING MEDIA USING THE USB PORT - VEHICLES WITH: SYNC 4

**WARNING:** Driving while distracted can result in loss of vehicle control, crash and injury. We strongly recommend that you use extreme caution when using any device that may take your focus off the road. Your primary responsibility is the safe operation of your vehicle. We recommend against the use of any hand-held device while driving and encourage the use of voice-operated systems when possible. Make sure you are aware of all applicable local laws that may affect the use of electronic devices while driving.

1. Connect your device to a data transfer USB port.
2. Press the audio system tile on the touchscreen.
3. Press **Sources**. Press the USB option.

**Press to play a track. Press again to pause the track.**

**Press to skip to the next track.**

**Press and hold to fast forward through the track.**

**Press once to return to the beginning of a track. Repeatedly press to return to previous tracks.**

**Press and hold to fast rewind through the track.**

CHARGING A DEVICE

Connect your device to the USB port.

**Data Transfer USB Ports**

You can charge your device through the data transfer USB port when SYNC is on.

**Charge Only USB Ports**

You can charge your device through the charge only USB port when the vehicle is in accessory mode or when the vehicle is running.
Power Outlet

**WHAT IS THE POWER OUTLET**

The power outlet can power devices using a 12 V outlet adapter.

**POWER OUTLET PRECAUTIONS**

**WARNING:** Do not use a power point for operating a cigar lighter. Incorrect use of the power points can cause damage not covered by the vehicle warranty, and can result in fire or serious injury.

When you switch the vehicle on, you can use the socket to power 12 V appliances with a maximum current rating of 15 A. Do not use the power point over the vehicle capacity of 12 V DC 180 W or a fuse could blow. Do not plug in any device that supplies power to the vehicle through the power points. This could result in damage to vehicle systems. Do not hang any accessory from the accessory plug. Always keep the power point caps closed when not in use. Do not insert objects other than an accessory plug into the power point.

To prevent the battery from running out of charge:

- Do not use the power point longer than necessary when the vehicle is off.
- Do not leave devices plugged in overnight or when you park your vehicle for extended periods.

**LOCATING THE POWER OUTLETS**

Power outlets could be in the following locations:

- Inside the center console.
- On the rear of the center console.
- Inside the luggage compartment.
CIGAR LIGHTER PRECAUTIONS

**WARNING:** Do not plug optional electrical accessories into the cigar lighter socket. Incorrect use of the cigar lighter can cause damage not covered by the vehicle warranty, and can result in fire or serious injury.

**Note:** If the power supply does not work after you switch the ignition off, switch the ignition on.

**Note:** If you use the socket when the engine is not running, the battery may run out of charge.

**Note:** When you switch the ignition on, you can use the socket to power 12 V appliances with a maximum current rating of 15 A.

USING THE CIGAR LIGHTER

Press the element in to use the cigar lighter. It pops out after a short period of time.

Do not hold the cigar lighter element pressed in.
LOCATING THE WIRELESS ACCESSORY CHARGER

The charging area is below the climate control.

The system supports one wireless charging compatible device on the charging area. You can use the charger when the vehicle is in accessory mode, when the vehicle is running, or when SYNC is on.

**Note:** Placing the device outside the area shown could affect the charging process.

**Note:** Charging time and temperature are dependent on the device used. The system stops charging the device if it reaches a high temperature.

**Note:** Devices without built-in Qi standards for wireless charging require an additional Qi receiver or sleeve.

**Note:** For compatible devices with built-in Qi wireless charging capability, the charging performance may be affected if your device is in a case. It may be necessary to remove the case to wirelessly charge your device.

**Note:** Software and firmware updates to your device could affect the charging operation.

Do not place items with a magnetic strip, for example passports, parking tickets or credit cards near the charging area when charging a device. This could damage the magnetic strip.

Do not place metal objects, for example remote controls, coins or keys on or near the charging area when charging a device. Metal objects may heat up and degrade the charging performance.

CHARGING A WIRELESS DEVICE

**WARNING:** Wireless charging devices can affect the operation of implanted medical devices, including cardiac pacemakers. If you have any implanted medical devices, we recommend that you consult with your physician.

Place the device within the area shown and with the charging side down to begin charging. The charging stops after your device reaches a full charge.

Make sure the charging area is clean and free from obstruction before charging a device to allow the device to lay flat on the charging area.

The system stops charging the device if it reaches a high temperature.

**Note:** Devices without built-in Qi standards for wireless charging require an additional Qi receiver or sleeve.

**Note:** For compatible devices with built-in Qi wireless charging capability, the charging performance may be affected if your device is in a case. It may be necessary to remove the case to wirelessly charge your device.

**Note:** Software and firmware updates to your device could affect the charging operation.

Do not place items with a magnetic strip, for example passports, parking tickets or credit cards near the charging area when charging a device. This could damage the magnetic strip.

Do not place metal objects, for example remote controls, coins or keys on or near the charging area when charging a device. Metal objects may heat up and degrade the charging performance.

WIRELESS ACCESSORY CHARGER INDICATORS

Displays on the SYNC status bar when a device is charging.
### Wireless Accessory Charger

CUP HOLDERS

CUP HOLDER PRECAUTIONS

**WARNING:** Use only soft cups in the cup holders. Hard objects can injure you in a crash.

Stow items in the cup holder carefully as items may become loose during hard braking, acceleration or crashes, including hot drinks which may spill.

UNDER FLOOR STORAGE

LOCATING THE LUGGAGE COMPARTMENT UNDER FLOOR STORAGE

Space is available below the loadspace floor to stow items.

ADJUSTING THE LUGGAGE COMPARTMENT FLOOR

You can fold or remove the loadspace floor to increase the available loadspace height.

**Note:** We recommend you fold the loadspace floor before you remove it.

1. Fold the center section of the loadspace floor toward the front of your vehicle.

2. Fold the loadspace floor upward toward the front of your vehicle.

**Note:** You can use the under floor storage divider bar in different positions, and to fix the load floor in storage position behind the rear seat.

3. To install, reverse the removal procedure.

**Note:** There is only one divider bar per vehicle.
STARTING AND STOPPING THE ENGINE – PRECAUTIONS

**WARNING:** Do not use starting fluid, for example ether, in the air intake system. Such fluid could cause immediate explosive damage to the engine and possible personal injury.

**WARNING:** Exhaust leaks may result in entry of harmful and potentially lethal fumes into the passenger compartment. If you smell exhaust fumes inside your vehicle, have your vehicle inspected immediately. Do not drive if you smell exhaust fumes.

**WARNING:** Extended idling at high engine speeds can produce very high temperatures in the engine and exhaust system, creating the risk of fire or other damage.

**WARNING:** Do not park, idle or drive your vehicle on dry grass or other dry ground cover. The emission system heats up the engine compartment and exhaust system, creating the risk of fire.

**WARNING:** Do not start the engine in a closed garage or in other enclosed areas. Exhaust fumes are toxic. Always open the garage door before you start the engine. Failure to follow this instruction could result in personal injury or death.

If you stop your vehicle and then leave the engine idling for long periods, we recommend that you do one of the following:

- Open the windows at least 3 cm (1 in).
- Set your climate control to outside air.

**IGNITION SWITCH**

**E247596**

**Note:** Make sure the key is clean before inserting it into any lock cylinder.

**Note:** Do not leave the key in the ignition for an extended period of time when the engine is not running. This is to prevent the vehicle battery from losing charge.

**Switching the Ignition Off**

Turn the key to position 0.

**Switching the Ignition to Accessory Mode**

Turn the key to position I. Electrical accessories, for example the radio, operate without the engine running.

**Switching the Ignition On**

Turn the key to position II. All electrical circuits and accessories are operational and the warning lamps and indicators illuminate.
Starting the Engine

Turn the key to position III. Release the key when the engine starts.

**PUSH BUTTON IGNITION SWITCH**

Switching the Ignition Off

When the ignition is on or in accessory mode, press the push button ignition switch once without your foot on the brake or clutch pedal.

Switching the Ignition to Accessory Mode

When the ignition is off, press the push button ignition switch once without your foot on the brake or clutch pedal.

All electrical circuits and accessories are operational and the warning lamps and indicators illuminate.

**Note:** Your vehicle has a battery saver feature that shuts your vehicle off when it detects a certain amount of battery drain or inactivity in accessory mode.

Starting the Engine

Press the brake or clutch pedal and press the push button ignition switch.

**Note:** The system may not function if the passive key is close to metal objects or electronic devices, for example keys or a cell phone.

**Note:** A valid key must be inside your vehicle to switch the ignition on and start the engine.
Starting the Engine

2. Press the push button ignition switch.

**Note:** The engine may continue cranking for up to 15 seconds or until it starts.

**Note:** The engine takes longer to start at lower temperatures. It may crank for several seconds when very cold.

**STARTING A GASOLINE ENGINE - MANUAL TRANSMISSION, VEHICLES WITH: PUSH BUTTON START**

Before starting your vehicle, check the following:

- Make sure that the headlamps and electrical accessories are off.
- Make sure that the parking brake is on.
- Make sure that the transmission is in neutral.

1. Fully press the clutch pedal.

**Note:** Do not touch the accelerator pedal.

2. Press the push button ignition switch.

**Note:** The engine may continue cranking for up to 15 seconds or until it starts.

**Note:** The engine takes longer to start at lower temperatures. It may crank for several seconds when very cold.

**STARTING A GASOLINE ENGINE - MANUAL TRANSMISSION, VEHICLES WITH: KEYED IGNITION**

Before starting your vehicle, check the following:

- Make sure that the headlamps and electrical accessories are off.
- Make sure that the parking brake is on.
- Make sure that the transmission is in neutral.

1. Fully press the clutch pedal.

**Note:** Do not touch the accelerator pedal.

2. Turn the key to position III.

**Note:** The engine may continue cranking for up to 15 seconds or until it starts.

**Note:** The engine takes longer to start at lower temperatures. It may crank for several seconds when very cold.

**STARTING A DIESEL ENGINE - AUTOMATIC TRANSMISSION, VEHICLES WITH: KEYED IGNITION**

Before starting your vehicle, check the following:

- Make sure that the headlamps and electrical accessories are off.
- Make sure that the parking brake is on.
- Make sure that the transmission is in park (P).
1. Turn the key to position **II**.
   **Note:** Wait until the glow plug indicator turns off.

2. Fully press the brake pedal.
   **Note:** Do not touch the accelerator pedal.

3. Turn the key to position **III**.
   **Note:** The engine may continue cranking for up to 15 seconds or until it starts.
   **Note:** The engine takes longer to start at lower temperatures. It may crank for several seconds when very cold.

**Glow Plug Indicator**

If it illuminates, wait until the glow plug indicator turns off before starting the engine.

**STARTING A DIESEL ENGINE - AUTOMATIC TRANSMISSION, VEHICLES WITH: PUSH BUTTON START**

Before starting your vehicle, check the following:

- Make sure that the headlamps and electrical accessories are off.
- Make sure that the parking brake is on.
- Make sure that the transmission is in park (P).

1. Fully press the brake pedal.

2. Press the push button ignition switch.
   **Note:** The engine may continue cranking for up to 15 seconds or until it starts.
   **Note:** The engine takes longer to start at lower temperatures. It may crank for several seconds when very cold.

**Glow Plug Indicator**

The engine does not start until the glow plug indicator turns off. This may take several seconds in extremely cold conditions.

**STARTING A DIESEL ENGINE - MANUAL TRANSMISSION, VEHICLES WITH: KEYED IGNITION**

Before starting your vehicle, check the following:

- Make sure that the headlamps and electrical accessories are off.
- Make sure that the parking brake is on.
- Make sure that the transmission is in neutral.

1. Turn the key to position **II**.
   **Note:** Wait until the glow plug indicator turns off.

2. Fully press the clutch pedal.
   **Note:** Do not touch the accelerator pedal.
Starting and Stopping the Engine

3. Turn the key to position III.

**Note:** The engine may continue cranking for up to 15 seconds or until it starts.

**Note:** The engine takes longer to start at lower temperatures. It may crank for several seconds when very cold.

### Glow Plug Indicator

If it illuminates, wait until the glow plug indicator turns off before starting the engine.

### Starting a Diesel Engine - Manual Transmission, Vehicles with: Push Button Start

Before starting your vehicle, check the following:

- Make sure that the headlamps and electrical accessories are off.
- Make sure that the parking brake is on.
- Make sure that the transmission is in neutral.

1. Fully press the clutch pedal.

**Note:** Do not touch the accelerator pedal.

2. Press the push button ignition switch.

**Note:** The engine may continue cranking for up to 15 seconds or until it starts.

**Note:** The engine takes longer to start at lower temperatures. It may crank for several seconds when very cold.

### Glow Plug Indicator

The engine does not start until the glow plug indicator turns off. This may take several seconds in extremely cold conditions.

### Restarting the Engine After Stopping It - Vehicles with: Push Button Start

The system allows you to start the engine within 10 seconds of switching it off, even if it does not detect a valid passive key.

Within 10 seconds of switching the engine off, fully press the brake or clutch pedal and press the push button ignition switch. After 10 seconds, you can no longer start the engine if the system does not detect a valid passive key.

When you start the engine, it remains running until you press the push button ignition switch, even if your vehicle does not detect a valid passive key. If you open and close a door when the engine is running, the system searches for a valid passive key.

### Starting a Flooded Engine - Gasoline, Vehicles with: Keyed Ignition

If you cannot start the engine after 3 attempts, wait 10 seconds and do the following:

1. Fully press the brake pedal or the clutch pedal.

**Note:** Make sure that the parking brake is applied.

**Note:** Make sure that the transmission is in park (P) or neutral (N).
Starting and Stopping the Engine

2. Fully press the accelerator pedal and hold it there.

3. Turn the key to position III and wait until the engine stops cranking.
4. Release the accelerator pedal.
5. Turn the key to position III.

STARTING A FLOODED ENGINE - GASOLINE, VEHICLES WITH: PUSH BUTTON START

If you cannot start the engine after 3 attempts, wait 10 seconds and do the following:
1. Fully press the brake pedal or the clutch pedal.
   **Note:** Make sure that the parking brake is applied.
   **Note:** Make sure that the transmission is in park (P) or neutral (N).
2. Fully press the accelerator pedal and hold it there.
3. Press the push button ignition switch.
   **Note:** The engine cranks for a short period of time and then it stops.
4. Release the accelerator pedal.
5. Press the push button ignition switch.

STARTING A FLOODED ENGINE - DIESEL, VEHICLES WITH: KEYED IGNITION

1. Fully press the brake pedal or the clutch pedal.
   **Note:** Make sure that the parking brake is applied.
   **Note:** Make sure that the transmission is in park (P) or neutral (N).
2. Turn the key to position III until the engine starts.

STARTING A FLOODED ENGINE - DIESEL, VEHICLES WITH: PUSH BUTTON START

1. Fully press the brake pedal or the clutch pedal.
   **Note:** Make sure that the parking brake is applied.
   **Note:** Make sure that the transmission is in park (P) or neutral (N).
2. Press the push button ignition switch until the engine starts.
Stopping the Engine

Stopping the Engine When Your Vehicle is Stationary - Automatic Transmission, Vehicles with: Keyed Ignition

1. Shift into park (P).
2. Apply the parking brake.
3. Wait until the engine reaches idle speed.
4. Turn the key to position 0.

Stopping the Engine When Your Vehicle is Stationary - Automatic Transmission, Vehicles with: Push Button Start

1. Shift into park (P).
2. Apply the parking brake.
3. Wait until the engine reaches idle speed.
4. Press the push button ignition switch.

Stopping the Engine When Your Vehicle is Stationary - Manual Transmission, Vehicles with: Keyed Ignition

1. Shift into neutral.
2. Apply the parking brake.
3. Wait until the engine reaches idle speed.

Stopping the Engine When Your Vehicle is Moving - Automatic Transmission, Vehicles with: Keyed Ignition

**WARNING:** Switching off the engine when your vehicle is still moving results in a significant decrease in braking assistance. Higher effort is required to apply the brakes and to stop your vehicle. A significant decrease in steering assistance could also occur. The steering does not lock, but higher effort

**Starting and Stopping the Engine**

---

**STOPPING THE ENGINE WHEN YOUR VEHICLE IS MOVING - AUTOMATIC TRANSMISSION, VEHICLES WITH: PUSH BUTTON START**

1. Press and hold the push button ignition switch until the engine stops, or press it three times within two seconds.
2. Shift into neutral and use the brakes to bring your vehicle to a safe stop.
3. Shift into park (P).
4. Apply the parking brake.

---

**WARNING:** Switching off the engine when your vehicle is still moving results in a significant decrease in braking assistance. Higher effort is required to apply the brakes and to stop your vehicle. A significant decrease in steering assistance could also occur. The steering does not lock, but higher effort could be required to steer your vehicle. When you switch the ignition off, some electrical circuits, for example airbags, also turn off. If you unintentionally switch the ignition off, shift into neutral (N) and restart the engine.

---

**STOPPING THE ENGINE WHEN YOUR VEHICLE IS MOVING - MANUAL TRANSMISSION, VEHICLES WITH: KEYED IGNITION**

1. Turn the key to position 0.
2. Shift into neutral and use the brakes to bring your vehicle to a safe stop.

---

**WARNING:** Switching off the engine when your vehicle is still moving results in a significant decrease in braking assistance. Higher effort is required to apply the brakes and to stop your vehicle. A significant decrease in steering assistance could also occur. The steering does not lock, but higher effort could be required to steer your vehicle. When you switch the ignition off, some electrical circuits, for example airbags, also turn off. If you unintentionally switch the ignition off, shift into neutral (N) and restart the engine.

---

**1.** Turn the key to position 0.
2. Shift into neutral and use the brakes to bring your vehicle to a safe stop.
Starting and Stopping the Engine

3. Apply the parking brake.

**STOPPING THE ENGINE WHEN YOUR VEHICLE IS MOVING - MANUAL TRANSMISSION, VEHICLES WITH: PUSH BUTTON START**

**WARNING:** Switching off the engine when your vehicle is still moving results in a significant decrease in braking assistance. Higher effort is required to apply the brakes and to stop your vehicle. A significant decrease in steering assistance could also occur. The steering does not lock, but higher effort could be required to steer your vehicle. When you switch the ignition off, some electrical circuits, for example airbags, also turn off. If you unintentionally switch the ignition off, shift into neutral (N) and restart the engine.

1. Press and hold the push button ignition switch until the engine stops, or press it three times within two seconds.
2. Shift into neutral and use the brakes to bring your vehicle to a safe stop.
3. Apply the parking brake.

**AUTOMATIC ENGINE STOP - VEHICLES WITH: PUSH BUTTON START**

**HOW DOES AUTOMATIC ENGINE STOP WORK**

Automatic engine stop automatically shuts down the vehicle if it has been idling for an extended period. The ignition also turns off to save battery power. Before your vehicle shuts down, a message appears in the information display showing a timer counting down. If you do not intervene within 30 seconds, your vehicle shuts down. Another message appears in the information display to inform you that your vehicle has shut down to save fuel. Start your vehicle as normal.

**SWITCHING AUTOMATIC ENGINE STOP ON AND OFF - VEHICLES WITH: SYNC 2.5**

1. Using the information display controls on the steering wheel, select **Settings**.
2. Select **Vehicle settings**.
3. Switch **30min max idle** on or off.

**Note:** You cannot permanently switch off the automatic shutdown. If you switch it off, it turns on each time you switch the ignition on.

**SWITCHING AUTOMATIC ENGINE STOP ON AND OFF - VEHICLES WITH: SYNC 3/SYNC 4**

1. Press **Settings** on the touchscreen.
2. Press **Vehicle**.
3. Switch **30min Max Idle** on or off.

**Note:** You cannot permanently switch off the automatic shutdown. If you switch it off, it turns on each time you switch the ignition on.
Starting and Stopping the Engine

OVERRIDING AUTOMATIC ENGINE STOP

You can stop the shutdown, or reset the timer, at any point before the 30-second countdown has expired by doing any of the following:

- Pressing the brake or accelerator pedal.
- Pressing the OK or RESET button during the 30-second countdown.

ACCESSING THE PASSIVE KEY BACKUP POSITION

1. Remove the rubber mat.
2. Place the passive key in the position shown, with the buttons facing upward.

STARTING AND STopping THE ENGINE – TROUBLESHOOTING

STARTING AND STopping THE ENGINE – WARNING LAMPS

Malfunction Indicator Lamp
Check Engine

If it illuminates when the engine is running, this indicates a malfunction. The On Board Diagnostics system has detected a malfunction of the vehicle emission control system.

If it flashes, engine misfire may be occurring. Increased exhaust gas temperatures could damage the catalytic converter or other vehicle components. Avoid heavy acceleration and deceleration and have your vehicle immediately serviced.

Powertrain Warning Lamp

If it illuminates when the engine is running, this indicates a malfunction. If it flashes when you are driving, immediately reduce the vehicle speed. Avoid heavy acceleration and deceleration and have your vehicle immediately serviced.

If both lamps illuminate when the engine is running, stop your vehicle as soon as it is safe to do so. Continuing to drive your vehicle may cause reduced power or the engine to stop. Switch the ignition off and attempt to restart the engine. Have your vehicle immediately checked.

Starting and Stopping the Engine

**STARTING AND STOPPING THE ENGINE – FREQUENTLY ASKED QUESTIONS - GASOLINE, VEHICLES WITH: PUSH BUTTON START**

Why is the engine idle speed high when I am starting the engine?

The speed at which the engine idles immediately after starting is optimized to minimize vehicle emissions and maximize cabin comfort and fuel economy.

Why does the engine not crank?

You can only attempt to start the engine for a limited amount of time before the starting system temporarily disables. If you exceed the starting time limit, a message may appear and you cannot attempt to start the engine for at least 15 minutes.

Why do I experience different driving characteristics?

If you disconnect the battery, your vehicle may exhibit some unusual driving characteristics for approximately 8 km (5 mi) after you reconnect it. This is because the engine management system must realign itself with the engine. You can disregard any unusual driving characteristics during this period.

Why can I not start the engine?

If you cannot start the engine after 3 attempts, wait 10 seconds and do the following:

1. Fully press the brake pedal or the clutch pedal.

   **Note:** Make sure that the parking brake is applied.

   **Note:** Make sure that the transmission is in park (P) or neutral (N).

2. Fully press the accelerator pedal and hold it there.

3. Press the push button ignition switch.

   **Note:** The engine cranks for a short period of time and then it stops.

4. Release the accelerator pedal.

5. Press the push button ignition switch.

**Why does the system not detect a passive key?**

If the system does not detect a passive key and you are unable to start the engine, insert the passive key into the backup position and press the push button ignition switch to start the engine. See Accessing the Passive Key Backup Position (page 191).

**STARTING AND STOPPING THE ENGINE – FREQUENTLY ASKED QUESTIONS - GASOLINE, VEHICLES WITH: KEYED IGNITION**

Why is the engine idle speed high when I am starting the engine?

The speed at which the engine idles immediately after starting is optimized to minimize vehicle emissions and maximize cabin comfort and fuel economy.

Why does the engine not crank?

You can only attempt to start the engine for a limited amount of time before the starting system temporarily disables. If you exceed the starting time limit, a message may appear and you cannot attempt to start the engine for at least 15 minutes.

Why can I not start the engine?

If you cannot start the engine after 3 attempts, wait 10 seconds and do the following:

1. Fully press the brake pedal or the clutch pedal.

   **Note:** Make sure that the transmission is in park (P) or neutral (N).

Note: Make sure that the transmission is in park (P) or neutral (N).

2. Turn the key to position III until the engine starts.
WHAT IS A HYBRID ELECTRIC VEHICLE

Your vehicle has a 48 volt mild hybrid system.
It is designed to help reduce fuel consumption and CO₂ emissions.

HOW DOES A HYBRID ELECTRIC VEHICLE WORK

The system uses regenerative charging during engine braking.
It switches the engine off when your vehicle is coasting at a speed less than the engine stop speed that you have set.

HYBRID ELECTRIC VEHICLE DRIVING CHARACTERISTICS

Regenerative charging results in a greater degree of engine braking.
Engine braking further increases following a brake pedal press. This is normal.

HYBRID ELECTRIC VEHICLE INDICATORS

Illuminates in the information display when the mild hybrid system is charging the battery.

Illuminates in the information display when the battery is assisting the powertrain in driving the vehicle.

Illuminates in the information display when the battery is providing a large amount of energy to the powertrain to support a higher rate of acceleration.
WHAT IS AUTO-START-STOP

The system is designed to help reduce fuel consumption and CO₂ emissions by stopping the engine when it is idling, for example at traffic lights or when your vehicle is coasting at a speed less than the engine stop speed that you have set. The system is designed to stop the engine when the transmission is in gear or in neutral.

AUTO-START-STOP PRECAUTIONS

**WARNING:** Apply the parking brake, shift into neutral, switch the ignition off and remove the key before you leave your vehicle. Failure to follow this instruction could result in personal injury or death.

**WARNING:** Apply the parking brake, shift into neutral, switch the ignition off and remove the key before you open the hood or have any service or repair work completed. If you do not switch the ignition off, the engine could restart at any time. Failure to follow this instruction could result in personal injury or death.

AUTO-START-STOP SETTINGS

SETTING THE ENGINE STOP SPEED - VEHICLES WITH: SYNC 2.5

1. Using the information display controls on the steering wheel, select Settings.
2. Select Vehicle settings.
3. Select Rolling StartStop.
4. Select a setting and press the OK button.

SETTING THE ENGINE STOP SPEED - VEHICLES WITH: SYNC 3

1. Press Settings on the touchscreen.
2. Press Driver Assistance.
4. Press a setting.

SETTING THE ENGINE STOP SPEED - VEHICLES WITH: SYNC 4

1. Press Features on the touchscreen.
2. Press Driver Assistance.
3. Press Rolling StartStop: Speed Threshold.
4. Press a setting.

SWITCHING AUTO-START-STOP ON AND OFF

The system turns on when you switch the ignition on.

Press the switch to switch the system off.

**Note:** OFF illuminates in the switch.

Press the switch again to switch the system back on.

**Note:** The system is designed to turn off if it detects a malfunction. If the system malfunctions, have your vehicle checked as soon as possible.
STOPPING THE ENGINE

Stopping the Engine in Gear

1. Press the brake pedal and slow your vehicle down to 15 km/h (9 mph) or less.

   **Note:** You can set the speed at which the system stops the engine through the information display.

2. Fully press the clutch pedal.

   **Note:** Power assist steering remains on when the engine stops.

Stopping the Engine in Neutral

1. Press the brake pedal and slow your vehicle down to 15 km/h (9 mph) or less.

   **Note:** You can set the speed at which the system stops the engine through the information display.

2. Press the clutch pedal and shift into neutral.

3. Release the clutch pedal.

   **Note:** Power assist steering remains on when the engine stops.

RESTARTING THE ENGINE

Restarting the Engine in Gear

Release the brake pedal.

Restarting the Engine in Neutral

1. Fully press the clutch pedal.

2. Select a gear.

AUTO-START-STOP INDICATORS

**WARNING:** The system may require the engine to automatically restart when the auto-start-stop indicator illuminates green or flashes amber. Failure to follow this instruction could result in personal injury.

The Auto-Start-Stop indicator illuminates green when the engine stops. It flashes amber and a message appears when you need to take action.

The Auto-Start-Stop indicator illuminates gray with a strikethrough when the system is not available.

**Note:** You can display the reason why the system is not available in the information display.

AUTO-START-STOP AUDIBLE WARNING

The Auto-Start-Stop audible warning sounds if you open the driver door when the system has stopped the engine.
## AUTO-START-STOP – TROUBLESHOOTING

Why does the engine not always stop when I expect it to?

The system is designed to work in a way that complements other vehicle systems, allowing them to operate at optimum performance.

The system does not stop the engine if:
- The driver door is open.
- The driver seatbelt is unfastened.
- The engine is warming up.
- The outside temperature is too low or too high.
- The battery charge is low.
- The battery temperature is outside the optimal operating range.
- The engine is required to run to maintain interior climate and reduce fogging.

Can I permanently switch the system off?

No. The system plays an important role in reducing the fuel consumption and the CO₂ emissions.

Will the frequent engine starts cause parts to wear out?

Your vehicle has an enhanced battery and starter generator that are designed for the increased number of engine starts.

Why does the engine sometimes restart when I do not expect it to?

The system is designed to work in a way that complements other vehicle systems, allowing them to operate at optimum performance.

The system restarts the engine if:
- You switch MAX A/C on.
- You switch maximum defrost on.
- Your vehicle starts to roll downhill in neutral.
- The engine is required to run to maintain adequate brake system assistance.
- The engine is required to run to maintain interior climate and reduce fogging.
WHAT IS AUTO-START-STOP

The system is designed to help reduce fuel consumption and CO₂ emissions by stopping the engine when it is idling, for example at traffic lights. The system is designed to stop the engine when the transmission is in gear or in neutral.

AUTO-START-STOP PRECAUTIONS

⚠️ WARNING: Apply the parking brake, shift into neutral, switch the ignition off and remove the key before you leave your vehicle. Failure to follow this instruction could result in personal injury or death.

⚠️ WARNING: Apply the parking brake, shift into neutral, switch the ignition off and remove the key before you open the hood or have any service or repair work completed. If you do not switch the ignition off, the engine could restart at any time. Failure to follow this instruction could result in personal injury or death.

SWITCHING AUTO-START-STOP ON AND OFF

The system turns on when you switch the ignition on.

Press the switch to switch the system off.

Note: OFF illuminates in the switch.

Press the switch again to switch the system back on.

Note: The system is designed to turn off if it detects a malfunction. If the system malfunctions, have your vehicle checked as soon as possible.

STOPPING THE ENGINE

Stopping the Engine in Gear

1. Press the brake pedal and slow your vehicle down to 12 km/h (7 mph) or less.

Note: Power assist steering remains on when the engine stops.

RESTARTING THE ENGINE

Restarting the Engine in Gear

Release the brake pedal.

AUTO-START-STOP INDICATORS

⚠️ WARNING: The system may require the engine to automatically restart when the auto-start-stop indicator illuminates green or flashes amber. Failure to follow this instruction could result in personal injury.

The Auto-Start-Stop indicator illuminates green when the engine stops. It flashes amber and a message appears when you need to take action.

The Auto-Start-Stop indicator illuminates gray with a strikethrough when the system is not available.

Note: You can display the reason why the system is not available in the information display.
The Auto-Start-Stop audible warning sounds if you open the driver door when the system has stopped the engine.

**AUTO-START-STOP – FREQUENTLY ASKED QUESTIONS**

**Why does the engine not always stop when I expect it to?**

The system is designed to work in a way that complements other vehicle systems, allowing them to operate at optimum performance. The system does not stop the engine if:

- The driver door is open.
- The driver seatbelt is unfastened.
- The engine is warming up.
- The outside temperature is too low or too high.
- The battery charge is low.
- The battery temperature is outside the optimal operating range.
- The engine is required to run to maintain interior climate and reduce fogging.

**Why does the engine sometimes restart when I do not expect it to?**

The system is designed to work in a way that complements other vehicle systems, allowing them to operate at optimum performance. The system restarts the engine if:

- You switch *MAX A/C* on.
- You switch maximum defrost on.
- Your vehicle starts to roll downhill in neutral.
- The engine is required to run to maintain adequate brake system assistance.
- The engine is required to run to maintain interior climate and reduce fogging.

**Can I permanently switch the system off?**

No. The system plays an important role in reducing the fuel consumption and the CO₂ emissions.

**Will the frequent engine starts cause parts to wear out?**

Your vehicle has an enhanced battery and starter generator that are designed for the increased number of engine starts.
WHAT IS AUTO-START-STOP

The system is designed to help reduce fuel consumption and CO₂ emissions by stopping the engine when it is idling, for example at traffic lights.

AUTO-START-STOP PRECAUTIONS

**WARNING:** Apply the parking brake, shift into neutral, switch the ignition off and remove the key before you leave your vehicle. Failure to follow this instruction could result in personal injury or death.

**WARNING:** Apply the parking brake, shift into neutral, switch the ignition off and remove the key before you open the hood or have any service or repair work completed. If you do not switch the ignition off, the engine could restart at any time. Failure to follow this instruction could result in personal injury or death.

SWITCHING AUTO-START-STOP ON AND OFF

The system turns on when you switch the ignition on.

- Press the switch to switch the system off.
  - **Note:** OFF illuminates in the switch.
- Press the switch again to switch the system back on.
  - **Note:** The system is designed to turn off if it detects a malfunction. If the system malfunctions, have your vehicle checked as soon as possible.

STopping THE ENGINE

1. Stop your vehicle.
2. Shift into neutral.
3. Release the clutch pedal and the accelerator pedal.

**Note:** To obtain maximum benefit from the system, shift into neutral and release the clutch pedal whenever you stop your vehicle for more than three seconds.

**Note:** Power assist steering turns off when the engine stops.

RESTARTING THE ENGINE

Press the clutch pedal.

A message appears in the instrument cluster display if the system requires you to take action.

<table>
<thead>
<tr>
<th>Message</th>
<th>Condition</th>
<th>Action</th>

Auto-Start-Stop - Automatic Transmission, Excluding: Mild Hybrid Electric Vehicle (MHEV)

Auto-Start-Stop – Frequently Asked Questions

Why does the engine not always stop when I expect it to?

The system is designed to work in a way that complements other vehicle systems, allowing them to operate at optimum performance.

The system does not stop the engine if:

• The driver door is open.
• The driver seatbelt is unfastened.
• Your vehicle is at high altitude.
• The heated windshield is on.
• The transmission is in manual (M).
• Your vehicle is on a steep grade.
• The engine is warming up.
• The outside temperature is too low or too high.
• The battery charge is low.
• The battery temperature is outside the optimal operating range.
• The engine is required to run to maintain interior climate and reduce fogging.

Why does the engine sometimes restart when I do not expect it to?

The system is designed to work in a way that complements other vehicle systems, allowing them to operate at optimum performance.

The system restarts the engine if:

• You switch the heated windshield on.
• You switch maximum defrost on.
• Your vehicle starts to roll downhill in neutral.

• The engine is required to run to maintain adequate brake system assistance.
• The engine is required to run to maintain interior climate and reduce fogging.

Can I permanently switch the system off?

No. The system plays an important role in reducing the fuel consumption and the CO₂ emissions.

Will the frequent engine starts cause parts to wear out?

Your vehicle has an enhanced battery and starter motor that are designed for the increased number of engine starts.
Fuel and Refueling

FUEL AND REFUELING PRECAUTIONS

**WARNING:** Do not overfill the fuel tank. The pressure in an overfilled tank may cause leakage and lead to fuel spray and fire.

**WARNING:** The fuel system may be under pressure. If you hear a hissing sound near the fuel filler inlet, do not refuel until the sound stops. Otherwise, fuel may spray out, which could cause serious personal injury.

**WARNING:** Fuels can cause serious injury or death if misused or mishandled.

**WARNING:** Fuel may contain benzene, which is a cancer-causing agent.

**WARNING:** When refueling always shut the engine off and never allow sparks or open flames near the fuel tank filler valve. Never smoke or use a cell phone while refueling. Fuel vapor is extremely hazardous under certain conditions. Avoid inhaling excess fumes.

**WARNING:** Read and follow all the instructions on the pump island.

Follow these guidelines when refueling:

- Extinguish all smoking materials and any open flames before refueling your vehicle.
- Switch the engine off before refueling.
- Automotive fuels can be harmful or fatal if swallowed. Fuel is highly toxic and if swallowed can cause death or permanent injury. If fuel is swallowed immediately call a physician, even if no symptoms are immediately apparent. The toxic effects of fuel may not be apparent for hours.
- Avoid inhaling fuel vapors. Inhaling fuel vapor can lead to eye and respiratory tract irritation. In severe cases, excessive or prolonged breathing of fuel vapor can cause serious illness and permanent injury.
- Avoid getting fuel in your eyes. If you splash fuel in your eyes, immediately remove contact lenses, if worn, flush with water for 15 minutes and seek medical attention. Failure to seek proper medical attention could lead to permanent injury.
- Fuels can be harmful if absorbed through the skin. If you splash fuel on your skin, clothing or both, promptly remove contaminated clothing and thoroughly wash your skin with soap and water. Repeated or prolonged skin contact causes skin irritation.
- Be particularly careful if you are taking Antabuse or other forms of Disulfiram for the treatment of alcoholism. Breathing fuel vapors could cause an adverse reaction, serious personal injury or sickness. Immediately call a physician if you experience any adverse reactions.
Fuel and Refueling

FUEL QUALITY

SELECTING THE CORRECT FUEL - GASOLINE

⚠️ WARNING: Do not mix diesel with gasoline, gasohol or alcohol. This could cause an explosion.

⚠️ WARNING: Do not use leaded gasoline or gasoline with additives containing other metallic compounds, for example manganese-based. They could damage the emission system.

Use minimum 95 octane unleaded gasoline that meets the specification defined by EN 228 or the equivalent national specification.

Your vehicle is suitable for use with ethanol blends up to 10% (E5 and E10).

Note: We recommend that you only use high quality fuel. We do not recommend the use of aftermarket fuel additives or other engine treatments.

SELECTING THE CORRECT FUEL - DIESEL

⚠️ WARNING: Do not mix diesel with gasoline, gasohol or alcohol. This could cause an explosion.

Use diesel that meets the specification defined by EN 590 or the relevant national specification.

Your vehicle is suitable for use with biodiesel blends up to 7% (B7).

Note: We recommend that you only use high quality fuel. We do not recommend the use of aftermarket fuel additives or other engine treatments.

Selecting the correct fuel - E85

Do not modify the fuel system configuration or the components in the system. Do not replace the fuel system or the components with parts not specially designed to be used with E85.

Use minimum 95 octane unleaded gasoline that meets the specification defined by EN 228 or the equivalent national specification, or regular unleaded gasoline blended with a maximum of 85% ethanol (E85).
Do not use any fuel other than those recommended because they could lead to engine damage that may not be covered by the vehicle Warranty.

**Note:** We recommend that you use only high quality fuel. Use of any fuel other than those recommended can impair the emission control system and cause a loss of vehicle performance.

**Note:** When using E85, your vehicle may have higher fuel consumption.

### SWITCHING BETWEEN E85 AND GASOLINE

We do not recommend repeatedly alternating between E85 and gasoline. If you switch from using E85 to gasoline, or from gasoline to E85, add as much fuel as possible, at least half a tank.

Drive your vehicle immediately for a minimum of 8 km (5 mi) to allow it to adapt to the change in ethanol concentration. If you do not follow this procedure, you may experience a minor degradation in engine starting performance and slight fluctuations in engine speed at idle.

If you use E85 exclusively, we recommend that you fill the fuel tank with minimum 95 octane unleaded gasoline defined by EN 228 or the equivalent national specification at each scheduled oil change.

### LOCATING THE FUEL FILLER FUNNEL

The fuel filler funnel is in the glove compartment or in the spare wheel storage tray.

---

### RUNNING OUT OF FUEL

#### FILLING A PORTABLE FUEL CONTAINER

**WARNING:** Flow of fuel through a fuel pump nozzle can produce static electricity. This can cause a fire if you are filling an ungrounded fuel container.

Use the following guidelines to avoid electrostatic charge build-up, which can produce a spark, when filling an ungrounded fuel container:

- Only use an approved fuel container to transfer fuel to your vehicle. Place the container on the ground when filling it.
- Do not fill a fuel container when it is inside your vehicle (including the cargo area).
- Keep the fuel pump nozzle in contact with the fuel container when filling it.
- Do not use a device that holds the fuel pump nozzle lever in the fill position.

### ADDING FUEL FROM A PORTABLE FUEL CONTAINER

**WARNING:** Do not insert the nozzle of a fuel container or an aftermarket funnel into the fuel filler neck. This may damage the fuel system filler neck or its seal and cause fuel to run onto the ground.

**WARNING:** Do not pry open the fuel tank filler valve. This could damage the fuel system. Failure to follow this instruction could result in fire, personal injury or death.
**WARNING:** Do not dispose of fuel in the household refuse or the public sewage system. Use an authorized waste disposal facility.

When refueling the vehicle fuel tank from a fuel container, use the fuel filler funnel included with your vehicle. See **Locating the Fuel Filler Funnel** (page 212).

**Note:** Do not use aftermarket funnels as they may not work with the capless fuel system and can damage it.

When refueling the vehicle fuel tank from a fuel container, do the following:

1. Fully open the fuel filler door.

2. Fully insert the fuel filler funnel into the fuel filler inlet.

3. Add fuel to your vehicle from the fuel container.

4. Remove the fuel filler funnel.

5. Fully close the fuel filler door.

6. Clean the fuel filler funnel and place it back in your vehicle or correctly dispose of it.

**Note:** If your vehicle runs out of fuel add a minimum of 5 L (1.1 gal) of fuel to restart the engine.

**Note:** You may need to switch the ignition from off to on several times after refueling to allow the fuel system to pump the fuel from the tank to the engine. When restarting, cranking time takes a few seconds longer than normal.

**Note:** Extra funnels can be purchased from an authorized dealer if you choose to dispose of the funnel.

---

**REFUELLING**

**REFUELLING SYSTEM OVERVIEW**

![Diagram of fuel filler system]

A: Fuel filler door.
B: Fuel filler inlet.
C: Fuel tank filler pipe.
REFUELING YOUR VEHICLE

**WARNING:** When refueling always shut the engine off and never allow sparks or open flames near the fuel tank filler valve. Never smoke or use a cell phone while refueling. Fuel vapor is extremely hazardous under certain conditions. Avoid inhaling excess fumes.

**WARNING:** The fuel system may be under pressure. If you hear a hissing sound near the fuel filler inlet, do not refuel until the sound stops. Otherwise, fuel may spray out, which could cause serious personal injury.

**WARNING:** Do not pry open the fuel tank filler valve. This could damage the fuel system. Failure to follow this instruction could result in fire, personal injury or death.

**WARNING:** Do not remove the fuel pump nozzle from its fully inserted position when refueling.

**WARNING:** Stop refueling when the fuel pump nozzle automatically shuts off for the first time. Failure to follow this will fill the expansion space in the fuel tank and could lead to fuel overflowing.

**WARNING:** Do not overfill the fuel tank. The pressure in an overfilled tank may cause leakage and lead to fuel spray and fire.

**WARNING:** Wait at least five seconds before removing the fuel pump nozzle to allow any residual fuel to drain into the fuel tank.

**WARNING:** Read and follow all the instructions on the pump island.

1. Fully open the fuel filler door.
2. Select the correct fuel pump nozzle for your vehicle.

3. Insert the fuel pump nozzle up to the first notch on the nozzle A. Keep the fuel pump nozzle resting on the fuel tank filler pipe.

4. Hold the fuel pump nozzle in position B when refueling. Holding the fuel pump nozzle in position A can affect the flow of fuel and shut off the fuel pump nozzle before the fuel tank is full.
5. Operate the fuel pump nozzle within the area shown.

6. When the nozzle shuts off, wait at least 5 seconds, then slightly raise the fuel pump nozzle and slowly remove it.

7. Fully close the fuel filler door.

Do not attempt to start the engine if you have filled the fuel tank with incorrect fuel. Incorrect fuel use could cause damage not covered by the vehicle Warranty. Have your vehicle immediately checked.

FUEL CONSUMPTION REGULATIONS

Energy Consumption (Off-Vehicle Charging) Fuel Economy (Internal Combustion Engine and Not Off-Vehicle Charging) and CO2 Emissions

The declared WLTP fuel/energy consumptions, CO2 emissions and electric range are determined according to the technical requirements and specifications of the European Regulations (EC) 715/2007 and (EU) 2017/1151 as last amended. The applied standard test procedures enable comparison between different vehicle types and different manufacturers.

European Directive 1999/94/EC

In addition to the fuel/energy efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel/energy consumption, CO2 emissions and electric range. CO2 is the main greenhouse gas responsible for global warming. A guide on fuel economy and CO2 emissions which contains data for all new passenger car models is available at any point of sale free of charge.

WHAT IS THE DIESEL PARTICULATE FILTER

The diesel particulate filter is part of your vehicle’s emissions system and filters harmful diesel particulates from the exhaust gas.

HOW DOES THE DIESEL PARTICULATE FILTER WORK

The diesel particulate filter reduces emissions by trapping exhaust particles before they reach the tailpipe. The system must periodically clean the exhaust particles that gather inside the filter. This is carried out in three ways, passive regeneration, active regeneration and manual regeneration.

Passive Regeneration

In passive regeneration, the normal exhaust system temperature cleans the filter by oxidizing the soot. Cleaning occurs during normal vehicle operating conditions due to driving patterns.

Active Regeneration

Once the diesel particulate filter is full, active regeneration raises the exhaust temperature to eliminate the particles. When the engine control module detects that the diesel particulate filter is nearly full of particulates, and you are not operating your vehicle in a manner to allow effective regeneration, messages appear in the information display as a reminder for you to drive your vehicle in order to clean the diesel particulate filter. If you drive your vehicle in a manner to allow effective regeneration, the information display shows a cleaning exhaust filter message.

DIESEL PARTICULATE FILTER PRECAUTIONS

WARNING: Do not park or idle your vehicle over dry leaves, dry grass or other combustible materials. The regeneration process creates very high exhaust gas temperatures and the exhaust will radiate a considerable amount of heat during and after regeneration and after you have switched the engine off. This is a potential fire hazard.

WARNING: When the Exhaust filter cleaning message appears in the information display, do not park near flammable materials, vapors or structures until filter cleaning is complete.

WARNING: The normal operating temperature of the exhaust system is very high. Never work around or attempt to repair any part of the exhaust system until it has cooled. Use special care when working around the diesel oxidation catalytic converter or the diesel particulate filter. The diesel oxidation catalytic converter and the diesel particulate filter heat up to very high temperatures after only a short period of engine operation and remain hot after you switch the engine off.

Note: Avoid running out of fuel.

Note: During regeneration at low speed or engine idle, you may smell a hot metallic odor and could notice a clicking metallic sound. This is due to high temperatures reached during regeneration and is normal.

Note: Changes in the engine or exhaust sound may be heard during the regeneration process.
Failure to perform active or manual regeneration when instructed could result in a clogged diesel particulate filter. If the diesel particulate filter fills beyond the regeneration threshold, your vehicle disables the ability for active and manual regeneration. This could result in irreversible damage your vehicle Warranty may not cover.

**DIESEL PARTICULATE FILTER REQUIREMENTS**

The diesel particulate filter on your vehicle requires periodic regeneration to maintain its correct function.

If your journeys meet one of the following conditions:

- You drive only short distances.
- You frequently switch the ignition on and off.
- Your journeys contain a high level of acceleration and deceleration.

You must carry out occasional trips with the following conditions to assist the regeneration process:

- Drive your vehicle in more favorable conditions, which you will find at higher vehicle speeds in normal driving, on a main road or freeway for a minimum of 20 minutes. This drive may include short stops that will not affect the regeneration process.
- Avoid prolonged idling and observe speed limits and road conditions.

- Do not switch the ignition off.
- Select a suitable gear to ideally maintain engine speed between 1500 and 3000 RPM.

**DIESEL PARTICULATE FILTER – TROUBLESHOOTING**

**DIESEL PARTICULATE FILTER – WARNING LAMPS**

- If filter service is required, the engine control system warning lamp illuminates in the information display.
- If there are any issues with the diesel particulate filter system, the engine control system warning lamp and a service engine soon warning lamp illuminate to inform you that your vehicle requires service. Have your vehicle checked as soon as possible.
### DIESEL PARTICULATE FILTER – INFORMATION MESSAGES

<table>
<thead>
<tr>
<th>Message</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exhaust filter cleaning</td>
<td>Your vehicle has entered the cleaning mode. Various engine actions will raise the exhaust temperature in the Diesel Particulate Filter system to burn off the particles (exhaust soot). After the vehicle burns the particles off, the exhaust temperature will return to normal levels. This message is NORMAL.</td>
</tr>
<tr>
<td>Exhaust filter overloaded</td>
<td>The diesel particulate filter is full of particles (exhaust soot) and you are not operating the vehicle in a manner that allows normal cleaning. Drive the vehicle above 48 km/h (30 mph) until the message turns off.</td>
</tr>
<tr>
<td>Drive to clean</td>
<td></td>

WHAT IS THE SELECTIVE CATALYTIC REDUCTION SYSTEM

Selective catalytic reduction is an engine emission control system that reduces exhaust emission levels by injecting AdBlue® into the exhaust system.

SELECTIVE CATALYTIC REDUCTION SYSTEM PRECAUTIONS

⚠️ WARNING: Keep AdBlue® out of reach of children. Avoid contact with skin, eyes or clothing. In case of contact with your eyes, immediately flush with water and get prompt medical attention. In case of contact with your skin, immediately clean with soap and water. If you swallow any AdBlue®, drink plenty of water and immediately seek medical attention.

⚠️ WARNING: Only refill the AdBlue® tank in a well-ventilated area. When you remove the AdBlue® tank filler cap or an AdBlue® container cap, ammonia vapors may escape. Ammonia vapors can be irritating to skin, eyes and mucous membranes. Inhaling ammonia vapors can cause burning to the eyes, throat and nose and cause coughing and watery eyes.

⚠️ WARNING: Tampering with or disabling the selective catalytic reduction system results in severe vehicle performance limitation, eventually your vehicle not starting.

⚠️ WARNING: Immediately refill the AdBlue® fluid when low and replace when contaminated. Drive with caution and be careful where you stop because you cannot restart your vehicle until you refill or replace the fluid.

Do not dilute the AdBlue® with water or any other liquid.

Do not put AdBlue® in the vehicle fuel tank. This can cause engine damage not covered by the vehicle Warranty.

Do not put fuel or any additives in the AdBlue® tank. This can cause damage not covered by the vehicle Warranty.

Do not overfill the AdBlue® tank.

Immediately remove any residue on painted surfaces when filling with AdBlue®.

SELECTIVE CATALYTIC REDUCTION SYSTEM REQUIREMENTS

Only use AdBlue® certified to ISO-22241.

Note: The use and refilling of AdBlue® is mandatory for the vehicle to comply with the legal emission requirements.

SELECTIVE CATALYTIC REDUCTION SYSTEM GUIDELINES

- Do not re-use an empty fluid container.
- Do not store the AdBlue® container in direct sunlight.
- Store the AdBlue® at temperatures between -5°C (23°F) and 20°C (68°F).
Selective Catalytic Reduction System

- Do not store AdBlue® containers in your vehicle.
- AdBlue® is non-flammable, non-toxic, colorless and water-soluble.

Note: It may not be possible to fully fill the AdBlue® tank when the temperature is below -11°C (12°F).

Note: If the AdBlue® tank is frozen, it could not correctly display the fluid level or recognize when you fill the tank. The AdBlue® level updates when the tank completely thaws out.

FILLING THE SELECTIVE CATALYTIC REDUCTION SYSTEM TANK USING A FUEL STATION PUMP

Filling the AdBlue® tank using a fuel station pump is similar to refueling your vehicle.

1. Fully open the fuel filler door.

2. Remove the AdBlue® tank filler cap.

3. Fully insert the AdBlue® pump nozzle.

The AdBlue® tank filler pipe is next to the fuel tank filler pipe and has a blue cap. Fill the tank using a fluid pump at an AdBlue® filling station or an AdBlue® container.

FILLING THE SELECTIVE CATALYTIC REDUCTION SYSTEM TANK IN COLD WEATHER

AdBlue® may freeze when the temperature is below -11°C (12°F). Your vehicle has a preheating system which allows the fluid to operate below -11°C (12°F). If you overfill the AdBlue® tank and the fluid freezes, it may cause damage not covered by the vehicle Warranty.
4. Operate the AdBlue® pump nozzle within the area shown.

**Note:** The pump nozzle shuts off when the tank is full.

5. Slightly raise the AdBlue® pump nozzle and then slowly remove it.

6. Replace the AdBlue® tank filler cap.
   Turn it clockwise until you feel a strong resistance and it clicks.

Do not attempt to start the engine if you have filled the AdBlue® tank with incorrect fluid. Incorrect fluid use could cause damage not covered by the vehicle Warranty. Have your vehicle checked as soon as possible.

**FILLING THE SELECTIVE CATALYTIC REDUCTION SYSTEM TANK USING A PORTABLE CONTAINER**

Use containers that have a seal on the spout.
Always follow the manufacturer’s instructions.

1. Remove the fluid container cap.

2. Place the spout on to the container and tighten it until you feel a strong resistance.

3. Remove the AdBlue® tank filler cap.
4. Insert the spout into the AdBlue® tank filler pipe until the seal on the spout fully seats.

5. Pour the fluid into the tank.

**Note:** The fluid stops flowing when the tank is full.

6. Return the container to the vertical position slightly below the AdBlue® tank filler pipe.

7. Allow any fluid remaining in the spout to drain back into the container.

8. Remove the spout from the AdBlue® tank filler pipe.

9. Remove the spout from the AdBlue® container and replace the cap.

10. Replace the AdBlue® tank filler cap.
    Turn it clockwise until you feel a strong resistance and it clicks.

Do not attempt to start the engine if you have filled the AdBlue® tank with incorrect fluid. Incorrect fluid use could cause damage not covered by the vehicle Warranty. Have your vehicle checked as soon as possible.
CHECKING THE SELECTIVE CATALYTIC REDUCTION FLUID LEVEL - VEHICLES WITH: 4.2 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

1. Using the information display controls on the steering wheel, select Settings.
2. Select Information.
3. Select AdBlue® info.

CHECKING THE SELECTIVE CATALYTIC REDUCTION FLUID LEVEL - VEHICLES WITH: 12.3 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

1. Press the menu button on the steering wheel to enter the information display main menu.

SELECTIVE CATALYTIC REDUCTION FLUID CONSUMPTION

AdBlue® consumption is directly related to fuel consumption and is governed by many factors, for example driving style, high speed driving, stop-start driving, air conditioning usage, add-on accessories, payload and towing. The AdBlue® consumption may vary between 1% and 6% of the fuel consumption but could be more under extreme conditions such as heavy towing.

AdBlue® consumption is specified for a vehicle variant and not for a single car.

ADBLUE® CAPACITY AND SPECIFICATION

<table>
<thead>
<tr>
<th>Capacities</th>

<tr>
<td>Name</td>
</tr>
<tr>
<td>AdBlue® HAMJ-M99C130-xx</td>
</tr>
</tbody>
</table>
The warning lamp illuminates if the system detects the fluid level is low or if there is a system malfunction.

If the warning lamp illuminates, the information display messages give you an indication whether the concern is fluid related or if there is a selective catalytic reductant system malfunction. If the warning lamp illuminates when your vehicle is moving, and the fluid is at a sufficient level, this indicates a system malfunction. Have your vehicle checked as soon as possible.

### Selective Catalytic Reduction System – Information Messages

#### AdBlue® Level

SELECTIVE CATALYTIC REDUCTION SYSTEM – FREQUENTLY ASKED QUESTIONS

What is that noise after switching off the engine?

- When you switch off the engine the selective catalytic reduction system pump runs for a short period of time. This is normal.
Catalytic Converter

WHAT IS THE CATALYTIC CONVERTER

The catalytic converter is part of your vehicle’s emissions system and filters harmful pollutants from the exhaust gas.

CATALYTIC CONVERTER PRECAUTIONS

**WARNING:** Do not park, idle or drive your vehicle on dry grass or other dry ground cover. The emission system heats up the engine compartment and exhaust system, creating the risk of fire.

**WARNING:** The normal operating temperature of the exhaust system is very high. Never work around or attempt to repair any part of the exhaust system until it has cooled. Use special care when working around the catalytic converter. The catalytic converter heats up to a very high temperature after only a short period of engine operation and stays hot after the engine is switched off.

**WARNING:** Exhaust leaks may result in entry of harmful and potentially lethal fumes into the passenger compartment. If you smell exhaust fumes inside your vehicle, have your vehicle inspected immediately. Do not drive if you smell exhaust fumes.

To avoid damaging the catalytic converter:

- Do not crank the engine for more than 10 seconds at a time.
- Do not run the engine with a spark plug lead disconnected.
- Do not push–start or tow–start your vehicle. Use booster cables. See Jump Starting the Vehicle (page 370).
- Use the correct fuel. See Fuel and Refueling (page 210).
- Do not switch the ignition off when your vehicle is moving.
- Avoid running out of fuel.
- Have the items listed in scheduled maintenance information performed according to the specified schedule.

**Note:** Do not make any unauthorized changes to your vehicle or engine. By law, vehicle owners and anyone who manufactures, repairs, or services a fleet of vehicles are not permitted to intentionally remove an emission control device or prevent it from working.

CATALYTIC CONVERTER – TROUBLESHOOTING

CATALYTIC CONVERTER – WARNING LAMPS

Your vehicle has an on-board diagnostics system that monitors the emission control system. If any of the following warning lamps illuminate, this may indicate that the on-board diagnostics system has detected an emission control system malfunction.

Continuing to drive your vehicle may cause reduced power or the engine to stop. Failure to respond to a warning lamp may cause damage that your vehicle Warranty may not cover. Have your vehicle checked as soon as possible.
WHAT IS THE GASOLINE PARTICULATE FILTER

The gasoline particulate filter is part of your vehicle’s emissions system and filters harmful particulates from the exhaust emissions.

HOW DOES THE GASOLINE PARTICULATE FILTER WORK

Particles in the exhaust emissions collect in the gasoline particulate filter causing a gradual restriction over time. This restriction is removed through a regeneration process controlled by the engine control system. The regeneration process converts the particles captured by the filter into harmless gases.

GASOLINE PARTICULATE FILTER PRECAUTIONS

⚠️ WARNING: Do not park or idle your vehicle over dry leaves, dry grass or other combustible materials. The regeneration process creates very high exhaust gas temperatures and the exhaust will radiate a considerable amount of heat during and after regeneration and after you have switched the engine off. This is a potential fire hazard.

- Do not crank the engine for more than 10 seconds at a time.
- Do not push-start or tow-start your vehicle. Use booster cables.
- Do not switch the ignition off when your vehicle is moving.
- Do not ignore warning lamps, indicators or information messages.

If the filter is saturated or is approaching saturation, a warning lamp could illuminate or a message could appear in the instrument cluster display.

If you do not take action when a warning lamp illuminates or a message appears in the information display, you could cause damage not covered by the vehicle Warranty.

GASOLINE PARTICULATE FILTER REQUIREMENTS

Regeneration occurs during normal driving, to varying degrees depending on how you drive. Regeneration occurs when you drive at moderate to high speed but if you generally drive short distances at low speed, the engine control system could actively raise the exhaust emissions temperature to remove the particles that have collected in the filter to make sure that it continues to correctly operate.

To assist regeneration, we recommend that you make occasional journeys that allow you to:

- Drive at a varied range of conditions, including highway conditions for a minimum of 20 minutes.
- Avoid prolonged engine idling.
- Select a suitable gear to maintain engine speed between 1500 and 4000 RPM.

GASOLINE PARTICULATE FILTER – TROUBLESHOOTING

GASOLINE PARTICULATE FILTER – WARNING LAMPS

Malfunction indicator lamp.
### GASOLINE PARTICULATE FILTER – INFORMATION MESSAGES

<table>
<thead>
<tr>
<th>Message</th>
<th>Action</th>
</tr>
</thead>
</table>
| Exhaust filter at limit Drive to clean now | • Drive at a varied range of conditions, including highway conditions for 20 minutes or until the message disappears.  
• Avoid prolonged engine idling.  
• Select a suitable gear to maintain engine speed between 1500 and 4000 RPM. |
| Exhaust filter over limit Service now | • Drive at a moderate speed.  
• Avoid heavy acceleration and deceleration.  
• Have your vehicle checked as soon as possible. |
MANUAL TRANSMISSION PRECAUTIONS

Do not rest your hand on the gearshift lever or use the gearshift lever to hang and support objects. This could cause damage to the transmission not covered by the vehicle Warranty.

Do not rest your foot on the clutch pedal or use the clutch pedal to keep your vehicle stationary when waiting on a hill. This could cause damage to the clutch not covered by the vehicle Warranty.

Failure to fully press the clutch pedal could cause increased shift efforts, prematurely wear transmission components or damage to the transmission.

SHifting INTO REVERSE

Do not shift into reverse when your vehicle is moving. This could cause damage to the transmission not covered by the vehicle Warranty.

1. Fully press the brake pedal.
2. Fully press the clutch pedal and shift into neutral.

3. Raise the collar and shift into reverse.

MANUAL TRANSMISSION SHIFT INDICATORS

It illuminates to advise you that shifting gear may give better fuel economy or lower emissions.

CHECKING THE CLUTCH FLUID LEVEL

The clutch and brake systems share the same fluid reservoir. See Checking the Brake Fluid (page 246).

CLUTCH FLUID SPECIFICATION

Only use fluid that meets Ford specifications.
**Manual Transmission**

**MANUAL TRANSMISSION – TROUBLESHOOTING**

**MANUAL TRANSMISSION – FREQUENTLY ASKED QUESTIONS**

What should I do if any gear is not fully engaged?

Fully press the clutch pedal and shift into neutral. Release the clutch pedal for a moment, fully press the clutch pedal again and shift into gear.
AUTOMATIC TRANSMISSION PRECAUTIONS

WARNING: Do not apply the brake pedal and accelerator pedal simultaneously. Applying both pedals simultaneously for more than a few seconds will limit engine performance, which may result in difficulty maintaining speed in traffic and could lead to serious injury.

WARNING: When your vehicle is stationary, keep the brake pedal fully pressed when shifting gears. Failure to follow this instruction could result in personal injury, death or property damage.

WARNING: Apply the parking brake, shift into park (P), switch the ignition off and remove the key before you leave your vehicle. Failure to follow this instruction could result in personal injury or death.

AUTOMATIC TRANSMISSION POSITIONS

PARK (P)

WARNING: Shift into park (P) only when your vehicle is stationary.

In park (P), power is not transmitted to the driven wheels.

Note: A tone sounds if you attempt to exit your vehicle without the transmission in park (P).

Note: Your vehicle may not shift out of park (P) if the vehicle battery has run out of charge. See Jump Starting the Vehicle (page 370).

Note: You may not be able to shift out of park (P) if a fuse is blown. See Fuses (page 380).

Note: Your vehicle may not shift out of park (P) unless the key or remote control is inside your vehicle.

REVERSE (R)

WARNING: Shift into reverse (R) only when your vehicle is stationary.

In reverse (R) power is transmitted to the driven wheels.

NEUTRAL (N)

WARNING: In neutral (N) your vehicle is free to roll.

In neutral (N), power is not transmitted to the driven wheels.

DRIVE (D)

In drive (D) power is transmitted to the driven wheels.

LOW (L)

In low (L) your vehicle holds low gears.

Note: We recommend using this mode for driving on hilly or mountainous roads or when towing a trailer. See Towing a Trailer (page 362).
**MANUAL (M)**

In manual (M) you can select a specific gear. See *Manually Shifting Gears* (page 241).

**Note:** We recommend using this mode for driving on hilly or mountainous roads or when towing a trailer. See *Towing a Trailer* (page 362).

**SHIFTING YOUR VEHICLE INTO GEAR - 8-SPEED AUTOMATIC TRANSMISSION**

1. Press and hold the brake pedal.
2. Rotate the outer ring to select a position.
3. Press the low (L) or manual (M) button when your vehicle is in drive (D) to enter or exit mode.

**Note:** Your vehicle cannot shift from drive (D) to park (P) with a clockwise rotation. Your vehicle cannot shift from park (P) to drive (D) with a counter-clockwise rotation.

**AUTOMATIC TRANSMISSION POSITION INDICATORS - VEHICLES WITHOUT: PADDLE SHIFTERS**

![PRNDL]

The instrument cluster displays the current position.

**AUTOMATIC TRANSMISSION POSITION INDICATORS - VEHICLES WITH: PADDLE SHIFTERS**

![PRNDM]

The instrument cluster displays the current position.

**AUTOMATIC TRANSMISSION SHIFT INDICATORS - VEHICLES WITH: PADDLE SHIFTERS**

![Shift indicators illuminate when shifting gear is recommended.]
MANUALLY SHIFTING GEARS - VEHICLES WITH: PADDLE SHIFTERS

SHIFTING USING THE PADDLE SHIFTERS

The instrument cluster displays the current gear.

The current gear flashes when your vehicle cannot shift into the requested gear.

Your vehicle will not shift if the requested gear raises or lowers the engine speed beyond the limit.

Your vehicle could shift when you fully press the accelerator or brake pedal.

Note: Prolonged driving with high engine speed could cause vehicle damage not covered by vehicle warranty.

Note: Drive modes could affect when the vehicle shifts into the requested gear.

Manually Shifting Gears in Drive (D)

Use this feature to temporarily change gear.

Note: We recommend using this feature for engine braking or driving on hilly or mountainous roads.

Pull any paddle to switch the feature on.

• Pull the right paddle (↑) to upshift.
• Pull the left paddle (↓) to downshift.

Note: Hold the right paddle for a few seconds to turn off the feature manually.

Note: The feature switches off if neither paddle is pulled within a short period of time.

Manually Shifting Gears in Manual (M)

Use this feature to select a specific gear.

Note: We recommend using this feature for engine braking, driving on hilly or mountainous roads or when towing a trailer. See Towing a Trailer (page 362).

Shift to manual (M) to switch the feature on.

• Pull the right paddle (↑) to upshift.
• Pull the left paddle (↓) to downshift.

Shift into drive (D) to switch the feature off.

STAY IN NEUTRAL MODE - 8-SPEED AUTOMATIC TRANSMISSION

WHAT IS STAY IN NEUTRAL MODE

This mode keeps your vehicle in neutral (N), for a limited time, when you exit your vehicle or switch your vehicle off.

For example, if you exit your vehicle before an automatic car wash.
Note: You do not need to use this mode at an automatic car wash if you stay in your vehicle with power on.

Note: Do not tow your vehicle in this mode.

Note: Automatic Return to Park is delayed when your vehicle is in this mode.

STAY IN NEUTRAL MODE PRECAUTIONS

Do not tow your vehicle in this mode. Failure to follow these instructions could result in vehicle damage not covered by the vehicle warranty.

Your vehicle could shift to park (P) after 30 minutes, or when the vehicle battery charge level is low. Prolonged use of this mode can cause the vehicle battery to run out of charge.

ENTERING STAY IN NEUTRAL MODE

1. Power your vehicle on.
2. Bring your vehicle to a complete stop.
3. Press and hold the brake pedal.
4. Shift into neutral (N).
   Note: An instructional message appears.
5. Press the low (L) or manual (M) button.
   Note: A confirmation message appears when your vehicle enters this mode.
6. Release the brake pedal.
   Note: Your vehicle is free to roll.
7. Switch your vehicle off.
   Note: Do not tow your vehicle in this mode.
   Note: The neutral (N) indicator on the transmission selector may flash in this mode.

EXITING STAY IN NEUTRAL MODE

1. Press the brake pedal.
2. Shift into park (P), or power the vehicle on and shift to drive (D) or reverse (R).

AUTOMATIC RETURN TO PARK (P) - 8-SPEED AUTOMATIC TRANSMISSION

WHAT IS AUTOMATIC RETURN TO PARK (P)

Your vehicle shifts into park (P) if you attempt to exit your vehicle without the transmission in park (P).

HOW DOES AUTOMATIC RETURN TO PARK (P) WORK

Your vehicle shifts to park (P) when your vehicle is stationary and any of the following occur:
• You switch the vehicle off.
• You open the driver door with the driver seatbelt unfastened.
• You unfasten the driver seatbelt with the driver door open.

Note: Do not use Automatic Return to Park when your vehicle is moving, except in an emergency.

AUTOMATIC RETURN TO PARK (P) LIMITATIONS

Automatic return to park (P) may not work if the door ajar sensor or seatbelt sensor are malfunctioning.

See an authorized dealer if any of the following occur:
Automatic Transmission

- Seatbelt indicator illuminates or tone sounds with the seatbelt fastened.
- Door ajar indicator does not illuminate with the driver door open.
- Door ajar indicator illuminates with the driver door closed.
- Transmission not in park message appears with the driver door closed, after you shift out of park (P).

BRAKE SHIFT INTERLOCK - 6-SPEED AUTOMATIC TRANSMISSION/7-SPEED AUTOMATIC TRANSMISSION

WHAT IS BRAKE SHIFT INTERLOCK

Brake shift interlock allows you to shift your vehicle out of park (P) in the event of an electrical malfunction or emergency.

BRAKE SHIFT INTERLOCK PRECAUTIONS

**WARNING:** Do not drive your vehicle until you verify that the stoplamps are working.

**WARNING:** When doing this procedure, you need to take the transmission out of park (P) which means your vehicle can roll freely. To avoid unwanted vehicle movement, apply the parking brake prior to doing this procedure. Use wheel chocks if appropriate.

**WARNING:** If the parking brake is fully released, but the brake warning lamp remains illuminated, the brakes may not be working properly. Have your vehicle checked as soon as possible.

USING BRAKE SHIFT INTERLOCK

Use the brake shift interlock lever to move the selector lever out of park (P) if you cannot start the engine.

1. Remove the panel.
2. Locate the access hole.
3. Using a flat-bladed screwdriver, push the brake shift interlock lever toward the front of your vehicle and hold it there.
4. Move the selector lever from park (P) to neutral (N).
5. Install the panel.

6. Press the brake pedal, start the engine and release the parking brake.

**SHIFTING YOUR IMMOBILE VEHICLE OUT OF PARK (P) - 8-SPEED AUTOMATIC TRANSMISSION**

**WARNING:** When doing this procedure, you need to take the transmission out of park (P) which means your vehicle can roll freely. To avoid unwanted vehicle movement, apply the parking brake prior to doing this procedure. Use wheel chocks if appropriate.

Use this procedure to shift your vehicle out of park (P) if you cannot start the engine.

**Note:** If the battery is out of charge, use an external power source.

**Note:** Do not tow your vehicle in this mode. See *Stay in Neutral Mode Precautions* (page 242).

### Shifting Your Vehicle Out of Park (P)

1. Apply the parking brake. See *Applying the Electric Parking Brake* (page 250).

   **Note:** If the battery is out of charge, use an external power source to apply the parking brake.

2. Power your vehicle on without your foot on the brake pedal.

3. Fully press and hold the brake pedal.

4. Fully press and hold the accelerator pedal.

5. Shift into neutral (N).

6. Press the manual (M) or low (L) button.

7. Attempt to start your vehicle.

   **Note:** A confirmation message appears when your vehicle enters the mode.

   **Note:** You must complete this procedure within 20 seconds. If your vehicle shifts into park (P) attempt the procedure again.

9. Release the parking brake.

**Note:** Your vehicle is free to roll.

10. Switch your vehicle off.

   **Note:** Do not tow your vehicle in this mode.

### Returning Your Vehicle to Normal Mode

1. Press the brake pedal.

2. Shift into park (P).

---

**AUTOMATIC TRANSMISSION AUDIBLE WARNINGS - 6-SPEED AUTOMATIC TRANSMISSION/7-SPEED AUTOMATIC TRANSMISSION**

Transmission Not in Park (P) Audible Warning

Sounds if any of the following occur:

- You switch your vehicle off before shifting into park (P).
- You open the driver door before shifting into park (P).
## Automatic Transmission

### Automatic Transmission Audible Warnings - 8-Speed Automatic Transmission

- **Transmission Not in Park (P) Audible Warning**
  Sounds if you open the driver door before shifting into park (P).

- **Park Selection Audible Warning**
  Sounds when you shift into park (P).

</table>
**BRAKE PRECAUTIONS**

Wet brakes result in reduced braking efficiency. Gently press the brake pedal a few times when leaving a car wash or driving from standing water to dry the brakes.

**Note:** Depending on applicable laws and regulations in the country where your vehicle was originally built, the stoplamps could flash during heavy braking. The hazard warning flashers could also turn on when your vehicle comes to a stop.

**ANTI-LOCK BRAKING SYSTEM**

**ANTI-LOCK BRAKING SYSTEM LIMITATIONS**

The anti-lock braking system does not eliminate the risk of crash when:

- You drive too closely to the vehicle in front of you.
- Your vehicle is hydroplaning.
- You take corners too fast.
- The road surface is poor.

**Note:** If the system activates, the brake pedal could pulse and travel further. Maintain pressure on the brake pedal.

**CHECKING THE BRAKE FLUID**

**WARNING:** Do not use any fluid other than the recommended brake fluid as this will reduce brake efficiency. Use of incorrect fluid could result in the loss of vehicle control, serious personal injury or death.

**WARNING:** Only use brake fluid from a sealed container. Contamination with dirt, water, petroleum products or other materials may result in brake system damage or failure. Failure to adhere to this warning could result in the loss of vehicle control, serious personal injury or death.

**WARNING:** Do not allow the fluid to touch your skin or eyes. If this happens, rinse the affected areas immediately with plenty of water and contact your physician.

**WARNING:** The brake system could be affected if the brake fluid level is below the MIN mark or above the MAX mark on the brake fluid reservoir.

**BRAKE OVER ACCELERATOR**

In the event the accelerator pedal becomes stuck or entrapped, apply steady and firm pressure to the brake pedal to slow the vehicle and reduce engine power. If you experience this condition, apply the brakes and bring your vehicle to a safe stop. Move the transmission to park (P), switch the engine off and apply the parking brake. Inspect the accelerator pedal for any interference. If none are found and the condition persists, have your vehicle towed to the nearest authorized dealer.
1. Park your vehicle on a level surface.
2. Look at the brake fluid reservoir to see where the brake fluid level is relative to the MIN and the MAX marks on the reservoir.

**Note:** To avoid fluid contamination, the reservoir cap must remain in place and fully tight, unless you are adding fluid.

Only use fluid that meets our specifications.

**BRAKE FLUID SPECIFICATION**

See *Brake Fluid Specification* (page 461).

---

**WARNING:** Driving your vehicle with the warning lamp on is dangerous. A significant decrease in braking performance may occur. It may take you longer to stop your vehicle. Have your vehicle checked as soon as possible. Driving extended distances with the parking brake engaged can cause brake failure and the risk of personal injury.

---

If the ABS indicator illuminates when you are driving, this indicates a malfunction. Your vehicle continues to have normal braking without the anti-lock braking system function. See an authorized dealer.

It also momentarily illuminates when you switch the ignition on to confirm the lamp is functional. If it does not illuminate when you switch the ignition on, or begins to flash at any time, have the system checked by an authorized dealer.

**BRAKE INDICATOR**

The brake indicator momentarily illuminates when you switch the ignition on to confirm the lamp is functional. It may also illuminate when you apply the parking brake and the ignition is on. If it illuminates when your vehicle is moving, make sure the parking brake is disengaged. If the parking brake is disengaged, this indicates low brake fluid level or a brake system fault. See an authorized dealer.
### BRAKES – INFORMATION MESSAGES

<table>
<thead>

</table>
BRAKES – FREQUENTLY ASKED QUESTIONS

Is it normal for my brakes to make noise?

Occasional brake noise is normal. If a metal-to-metal, continuous grinding, or continuous squeal sound is present, the brake lining could be worn-out. Have the system checked by an authorized dealer.

There is an electrical motor sound when I press on the brake pedal or activate the park brake switch. Is this normal?

Yes, those sounds are the electronic brake booster or the electronic park brake operating.

Note: Brake dust could accumulate on the wheels, even under normal driving conditions. Some dust is normal as the brakes wear and does not contribute to brake noise. See Cleaning Wheels (page 418).
Electric Parking Brake

WHAT IS THE ELECTRIC PARKING BRAKE

The electric parking brake is used to hold your vehicle on slopes and flat roads.

APPLYING THE ELECTRIC PARKING BRAKE - AUTOMATIC TRANSMISSION

**WARNING:** Apply the parking brake and make sure your vehicle is in park (P). Power the vehicle off and remove the keys or remote control whenever you leave your vehicle. Failure to follow this instruction could result in personal injury or death.

**WARNING:** If you drive extended distances with the parking brake applied, you could cause damage to the brake system.

The switch is on the center console.

1. Pull the switch up.

The red warning lamp flashes during operation and illuminates when the parking brake is applied.

**Note:** You can apply the electric parking brake when the ignition is off.

**Note:** If you park your vehicle on a hill and facing uphill, select first gear and turn the steering wheel away from the curb.

**Note:** If you park your vehicle on a hill and facing downhill, select reverse gear and turn the steering wheel toward the curb.

APPLYING THE ELECTRIC PARKING BRAKE IN AN EMERGENCY

You can use the electric parking brake to slow or stop your vehicle in an emergency. Pull the switch up and hold it.

The red warning lamp illuminates, a tone sounds and the stoplamps turn on when you use the electric parking brake in an emergency.
The electric parking brake continues to slow your vehicle down unless you release the switch.

**Note:** Do not apply the electric parking brake when your vehicle is moving, except in an emergency. If you repeatedly use the electric parking brake to slow or stop your vehicle, you could cause damage to the brake system.

### Manually Releasing the Electric Parking Brake

1. Switch the ignition on.
2. Press and hold the brake pedal.
3. Push the switch down.
   The red warning lamp turns off.

### Pulling Away on a Hill When Towing a Trailer

1. Press and hold the brake pedal.
2. Pull the switch upward and hold it.
3. Shift into gear.
4. Press the accelerator pedal until engine has developed sufficient torque to prevent your vehicle from rolling down the hill.
5. Release the switch and pull away in a normal manner.

### Automatically Releasing the Electric Parking Brake - Manual Transmission

1. Close the driver door.
2. Shift into gear.
3. Press the accelerator pedal and pull away in a normal manner.
   **Note:** The electric parking brake also automatically releases if you shift into a gear and release the clutch pedal without pressing the accelerator pedal.

### Electric Parking Brake Audible Warning

Sounds when the parking brake is on and your vehicle is moving. If the warning tone continues after you have released the parking brake, this indicates a malfunction. Have your vehicle checked as soon as possible.

### Releasing the Electric Parking Brake If the Vehicle Battery Has Run Out of Charge

**WARNING:** The electric parking brake does not operate if the vehicle battery has run out of charge.

Connect a booster battery to the vehicle battery to release the electric parking brake if the vehicle battery has run out of charge. See Jump Starting the Vehicle (page 370).
ELECTRIC PARKING BRAKE – TROUBLESHOOTING

**ELECTRIC PARKING BRAKE – WARNING LAMPS**

**Brake System**

It illuminates red when you apply the parking brake and your vehicle is on. If the lamp flashes when the parking brake has been released, this indicates the parking brake system requires service. Have your vehicle checked as soon as possible.

**Note:** Lamps may vary depending on region.

**Electric Parking Brake**

When the lamp illuminates yellow, it indicates a malfunction in the electric parking brake. Have your vehicle checked as soon as possible.

WHAT IS HILL START ASSIST

Hill Start Assist makes it easier for you to pull away when your vehicle is on a slope without using the parking brake.

HOW DOES HILL START ASSIST WORK

When the system activates, your vehicle remains stationary for a few seconds after you release the brake pedal. This gives you time to move your foot from the brake pedal to the accelerator pedal. The brakes release when you apply the accelerator pedal and the vehicle begins to move forward, or the vehicle is stationary beyond hill start assist hold time.

The system activates when your vehicle is in any forward gear and facing uphill, or when your vehicle is in reverse (R) and facing downhill.

HILL START ASSIST PRECAUTIONS

**WARNING:** The system does not replace the parking brake. When you leave your vehicle, always apply the parking brake.

**WARNING:** You must remain in your vehicle when the system turns on. At all times you are responsible for controlling your vehicle, supervising the system, and intervening if required. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

SWITCHING HILL START ASSIST ON AND OFF - MANUAL TRANSMISSION, VEHICLES WITH: SYNC 2.5

To switch hill start assist on or off, use the information display controls on the steering wheel to select the following:

<table>
<thead>
<tr>
<th>Menu Item</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Driver assist.</td>
<td>Press the menu button.</td>
</tr>
<tr>
<td>Hill Start Assist</td>
<td>Press the OK button.</td>
</tr>
</tbody>
</table>

The system remembers the last setting when you start your vehicle.

**Note:** There is no indicator to indicate whether the system is on or off.

SWITCHING HILL START ASSIST ON AND OFF - MANUAL TRANSMISSION, VEHICLES WITH: SYNC 3

1. Press **Settings** on the touchscreen.
2. Press **Driver Assistance**.
3. Switch **Hill Start Assist** on or off.
The system remembers the last setting when you start your vehicle.

**Note:** There is no indicator to indicate whether the system is on or off.

**SWITCHING HILL START ASSIST ON AND OFF - MANUAL TRANSMISSION, VEHICLES WITH: SYNC 4**

1. Press *Features* on the touchscreen.

**HILL START ASSIST – TROUBLESHOOTING**

**HILL START ASSIST – INFORMATION MESSAGES**

<table>
<thead>

<th>Message</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hill start assist not available</td>
<td>Displays when the system is not available. Have your vehicle checked as soon as possible.</td>
</tr>
</tbody>
</table>
Auto Hold

HOW DOES AUTO HOLD WORK

Auto hold applies the brakes to hold your vehicle after you bring the vehicle to a stop. This can help when waiting on a hill or in traffic.

SWITCHING AUTO HOLD ON AND OFF

WARNING: The system does not replace the parking brake. When you leave your vehicle, always apply the parking brake.

WARNING: You must remain in your vehicle when the system turns on. At all times, you are responsible for controlling your vehicle, supervising the system and intervening, if required. Failure to take care may result in the loss of control of your vehicle, serious personal injury or death.

WARNING: The system will turn off if a malfunction is apparent. Failure to take care may result in the loss of control of your vehicle, serious personal injury or death.

Close the driver door and fasten your seatbelt before you switch the system on.

Press the button on the center console.

Note: The system remembers the last setting when you start your vehicle.

Note: Make sure you switch the system off before using an automatic car wash.

USING AUTO HOLD - 6-SPEED AUTOMATIC TRANSMISSION/6-SPEED MANUAL TRANSMISSION

1. Bring your vehicle to a complete stop. The auto hold active indicator illuminates in the information display.

2. Release the brake pedal. The system holds your vehicle at a standstill. The auto hold active indicator remains illuminated in the information display.

3. Apply the accelerator and drive off in a normal manner. The system releases the brakes and the auto hold active indicator switches off.

Note: The system only activates if you apply enough brake pressure on the brake pedal to bring the vehicle to a standstill.

Note: Under certain conditions, the system could apply the electric parking brake. The brake system warning lamp illuminates. The electric parking brake releases when you press the accelerator pedal.

Note: The system switches off if you shift into reverse (R) or neutral (N) while pressing the brake pedal.

There could be actions that can cause the auto hold system not to work when the following occur:

• When you use active park assist.
• Your vehicle is in stay in neutral mode.
• The driver door is open.
• You shift into reverse (R) or neutral (N) before the system is active.
USING AUTO HOLD - 7-SPEED AUTOMATIC TRANSMISSION/8-SPEED AUTOMATIC TRANSMISSION

1. Bring your vehicle to a complete stop. The auto hold active indicator illuminates in the information display.

2. Release the brake pedal. The system holds your vehicle at a standstill. The auto hold active indicator remains illuminated in the information display.

3. Pull away in the normal manner. The system releases the brakes and the auto hold active indicator switches off.

Note: The system only activates if you apply enough brake pressure on the brake pedal.

Note: Under certain conditions, the system could apply the electric parking brake. The brake system warning lamp illuminates. The electric parking brake releases when you press the accelerator pedal. See Automatically Releasing the Electric Parking Brake (page 251).

Note: The system switches off if you shift into reverse (R) and press the brake pedal.

There could be actions that can cause the auto hold system not to work when the following occur:

- When you use active park assist.
- Your vehicle is in stay in neutral mode.
- The driver door is open.
- You shift into reverse (R) before the system is active.

AUTO HOLD INDICATORS

- Illuminates when the system is active. Your vehicle remains stationary after you release the brake pedal.

- Illuminates when the system is on but unavailable to hold your vehicle at a standstill.
Traction Control

WHAT IS TRACTION CONTROL

The traction control system helps to avoid drive wheel spin and loss of traction.

HOW DOES TRACTION CONTROL WORK

If your vehicle begins to slide, the system applies the brakes to individual wheels and, when needed, reduces power at the same time. If the wheels spin when accelerating on slippery or loose surfaces, the system reduces power in order to increase traction.

SWITCHING TRACTION CONTROL ON AND OFF - VEHICLES WITH: SYNC 3, EXCLUDING: ST

WARNING: Operating your vehicle with the traction control disabled could lead to an increased risk of loss of vehicle control, vehicle rollover, personal injury and death.

The traction control system turns on each time you switch the power on.

If your vehicle is stuck in mud or snow, switching traction control off may be beneficial as this allows the wheels to spin.

1. Press Settings on the touchscreen.
2. Press Driver Assistance.
3. Switch Traction Control on or off.

Note: When you switch traction control off, stability control remains fully active.

Note: Your vehicle could have MyKey restrictions regarding this feature. See What Is MyKey (page 62).

TRACTION CONTROL INDICATOR

Flashes during operation.

If it does not illuminate when you switch the ignition on, or remains on when the engine is running, this indicates a malfunction. Have your vehicle checked as soon as possible.
### Traction Control - Troubleshooting - Excluding: ST

#### Traction Control - Warning Lamps
- It illuminates when you switch the system off.

#### Traction Control - Information Messages

<tr>
<td>Turn off traction control to aid in getting unstuck?</td>
<td>You can switch off traction control on the steering wheel to allow the wheels to spin. If you switched traction control off, the system turns on when your vehicle speed is greater than 25 km/h (15 mph).</td>
</tr>
</tbody>
</table>
**WHAT IS STABILITY CONTROL**

The system is designed to support stability when your vehicle starts to slide away from your intended path.

---

**SWITCHING STABILITY CONTROL ON AND OFF - ST**

**WARNING:** Operating your vehicle with the traction control disabled could lead to an increased risk of loss of vehicle control, vehicle rollover, personal injury and death.

**WARNING:** Do not switch off stability control or use Sport, Track or Drift mode when using a temporary spare wheel or after inflating a tire using the temporary mobility kit.

The system turns on each time you switch the ignition on.

**Reducing Stability Control**

Press the button on the instrument panel. A warning lamp illuminates and a message appears in the information display. Press the button again to switch the system on.

**Note:** Stability control only reduces and is not fully switched off.

**Note:** If you switch stability control to reduced mode, traction control turns off.

**Note:** Pre-collision assist is disabled when you select this mode.

**Note:** Adaptive cruise control is disabled when you select this mode.

**Note:** Your vehicle could have MyKey restrictions regarding this feature. See What Is MyKey (page 62).

---

**HOW DOES STABILITY CONTROL WORK**

The system works by braking individual wheels and reducing engine speed.

---

**SWITCHING STABILITY CONTROL ON AND OFF - EXCLUDING: ST**

The system turns on when you switch the power on and you cannot switch the system off.

**Note:** The system is disabled when you shift into reverse (R).
**Stability Control**

**Switching the System Off**

Press and hold the button on the instrument panel for a few seconds to switch the system off. A warning lamp illuminates and a message appears in the information display. Press the button again to switch the system on.

**Note:** If you switch stability control off, traction control also turns off.

**Note:** Pre-collision assist is disabled when you select this mode.

**Note:** Adaptive cruise control is disabled when you select this mode.

**Note:** Your vehicle could have MyKey restrictions regarding this feature. See *What Is MyKey* (page 62).

---

**STABILITY CONTROL INDICATOR - ST**

Flashes during operation.

If it does not illuminate when you switch the ignition on, or remains on when the engine is running, this indicates a malfunction. Have your vehicle checked as soon as possible.

**Note:** The system turns off if there is a malfunction.

---

**STABILITY CONTROL – TROUBLESHOOTING - ST**

**STABILITY CONTROL – WARNING LAMPS**

Illuminates when you switch the system to reduced mode or off. It also illuminates if you select track mode.

---

Focus (CSE) Vehicles Built From: 05-09-2022, CG3929en enGBR, Edition date: 202201, First-Printing
PARKING AID PRECAUTIONS

WARNING: To help avoid personal injury, always use caution when in reverse (R) and when using the sensing system.

WARNING: The system may not detect objects with surfaces that absorb reflection. Always drive with due care and attention. Failure to take care may result in a crash.

WARNING: Traffic control systems, fluorescent lamps, inclement weather, air brakes, external motors and fans may affect the correct operation of the sensing system. This may cause reduced performance or false alerts.

WARNING: The system may not detect small or moving objects, particularly those close to the ground.

WARNING: The parking aid system can only assist you to detect objects when your vehicle is moving at parking speeds. To help avoid personal injury you must take care when using the parking aid system.

WARNING: The system may not function if the sensor is blocked.

WARNING: In cold and severe weather conditions the system may not function. Rain, snow and spray can all limit sensor performance.

WARNING: If damage occurs in the immediate area surrounding the sensor, have your vehicle checked as soon as possible.

Note: If your vehicle sustains damage leaving the sensors misaligned, this will cause inaccurate measurements or false alerts.

When you connect a trailer to your vehicle, the rear parking aid detects the trailer and provides an alert. Disable the parking aid when you connect a trailer to prevent the alert.

Note: Connected trailers might be detected by the vehicle and parking aid turns off automatically in those instances.

Note: Certain add-on devices installed around the bumper or fascia may create false alerts, for example, large trailer hitches, bike or surfboard racks, license plate brackets, bumper covers or any other device that could block the normal detection zone of the parking aid system. Aftermarket spare tires or spare tire covers mounted to the rear tailgate could cause false alerts from the park aid system. Remove the add-on device to prevent false alerts.

Note: Keep the sensors free from snow, ice and large accumulations of dirt. If the sensors are covered, the system’s accuracy can be affected.

Do not clean the sensors with sharp objects.

Note: When using a programmed MyKey, you cannot switch the parking aids off. See MyKey™ (page 62).

SWITCHING PARKING AID ON AND OFF - VEHICLES WITH: SYNC 4

Press the parking aid button and use the menu to turn the system on and off.

The system can also be turned off using the pop-up message that appears when you are in reverse (R).
SWITCHING PARKING AID ON AND OFF - VEHICLES WITH: SYNC 3/SYNC 2.5

You can turn the system on or off by pressing the parking aid button. If your vehicle does not have a parking aid button, the system can be switched off through the information display menu or from the pop-up message that appears once you shift the transmission into reverse (R).

REAR PARKING AID

WHAT IS THE REAR PARKING AID

Rear parking sensors detect objects behind your vehicle when in reverse (R).

REAR PARKING AID LIMITATIONS

There is a decreased coverage area at the outer corners.

When using a programmed MyKey, you cannot switch the rear parking aid off.

The rear parking aid sensors are active when your vehicle is in reverse (R) and the vehicle speed is less than 8 km/h (5 mph).

The sensor coverage area is up to 180 cm (71 in) from the rear bumper.

The rear parking aid detects large objects when you shift into reverse (R) and any of the following occur:

- Your vehicle is moving backward at a low speed.
- Your vehicle is stationary but an object is approaching the rear of your vehicle at a low speed.
- Your vehicle is moving backward at a low speed and an object is moving towards your vehicle, for example another vehicle at a low speed.

The system shall provide no audible warning for the object behind the vehicle when in neutral (N) gear.

LOCATING THE REAR PARKING AID SENSORS

The rear parking aids sensors are in the rear bumper.
**Parking Aids**

**REAR PARKING AID AUDIBLE WARNINGS**

A warning tone sounds when your vehicle approaches an object. As your vehicle moves closer to an object, the rate of the tone increases. The warning tone continuously sounds when an object is 30 cm (12 in) or less from the rear bumper.

If your vehicle remains stationary for a few seconds, the audible warning turns off. If your vehicle moves backward the tone sounds again.

*Note:* When the parking aid system sounds a tone, the audio system could reduce the set volume.

**FRONT PARKING AID**

**WHAT IS THE FRONT PARKING AID**

Front parking sensors detect objects in front of your vehicle.

**FRONT PARKING AID LIMITATIONS**

The front parking aid sensors are active when your vehicle is in any position other than park (P) and the vehicle speed is less than 8 km/h (5 mph).

The sensor coverage area is up to 70 cm (28 in) from the bumper.

If your vehicle is in reverse (R), the front parking aid detects objects when your vehicle is moving at a low speed or an object is moving toward your vehicle and provides an audible warning, for example another vehicle at a low speed. If your vehicle remains stationary for a few seconds, the audible warning turns off. Visual indication is always active in reverse (R).

If your vehicle is in any forward gear, the front parking aid provides audible warnings and visual indication when your vehicle is moving at a speed of 8 km/h (5 mph) or below and the system detects an object within the detection zone. If your vehicle remains stationary for a few seconds, the visual indication and audible warning turns off.

If your vehicle is in neutral (N), the front and rear sensors provide visual indication only when your vehicle is moving below a speed of 8 km/h (5 mph) and obstacles are detected inside the detection areas. Once your vehicle stops, the visual indication and audible warning stops after a few seconds.

**LOCATING THE FRONT PARKING AID SENSORS**

The front parking aid sensors are in the front bumper.

**FRONT PARKING AID AUDIBLE WARNINGS**

A warning tone sounds when there is an object within 70 cm (28 in) from the front bumper. As your vehicle moves closer to an object, the rate of the tone increases.
Parking Aids

The warning tone continuously sounds when an object is 30 cm (12 in) or less from the front bumper.

**Note:** If the detected object is 30 cm (12 in) or less from your vehicle, visual indication remains on.

**SIDE PARKING AID**

**WHAT IS THE SIDE PARKING AID**

The front and rear outermost parking aid sensors map objects that are near to the sides of your vehicle.

**SIDE PARKING AID LIMITATIONS**

The sensor coverage is up to 60 cm (24 in) from the sides of your vehicle.

The side parking aid may not function if:

- Your vehicle remains stationary for over two minutes.
- The anti-lock brake system activates.
- The traction control system activates.
- Your vehicle is in park (P).
- The steering wheel angle information is not available. You must drive at least 150 m (492 ft) above 30 km/h (19 mph) to reset the steering wheel angle information.

**Note:** If you switch traction control off, the side sensing system also turns off.

To reinitialize the system, drive the length of your vehicle.

The side parking aid does not detect an object that is moving toward the side of your vehicle, for example another vehicle moving at a low speed, if it does not pass a front or rear parking aid sensor.

If the transmission is in reverse (R), the side sensing system provides audible warnings. When your vehicle is moving slowly, obstacles are detected within 60 cm (24 in) and are inside the driving path of your vehicle. If your vehicle remains stationary for a few seconds, the audible warning turns off. Visual indication is always present in reverse (R).

If your vehicle is in neutral (N), the side sensing system provides visual indication only when your vehicle is moving slowly and there is a front or rear parking aid obstacle detected, and the side obstacle is within 60 cm (24 in) from the side of your vehicle. If your vehicle remains stationary for a few seconds, the visual indication turns off.

If the transmission is in drive (D) or any other forward gear, the side sensing system provides audible and visual warnings. When your vehicle is moving slowly, obstacles are detected within 60 cm (24 in) and are inside the driving path of your vehicle. If your vehicle remains stationary for a few seconds, the visual indication and audible warning turns off.

**LOCATING THE SIDE PARKING AID SENSORS**
The side parking sensors are in the front and rear bumpers.

**SIDE PARKING AID AUDIBLE WARNINGS**

When the side parking aid detects an object within the coverage area and the driving path of your vehicle, an audible warning sounds. As your vehicle moves closer to the object, the rate of the tone increases.

**PARKING AID INDICATORS**

The system provides object distance indication through the information display.

- As the distance to the object decreases, the indicator blocks illuminate and move toward the vehicle icon.
- If there is no object detected, the distance indicator blocks are grey.

Visual indication remains on when the transmission is in reverse (R). When you stop your vehicle, visual indication turns off after four seconds.

If the parking aids are not available, the side distance indicator blocks do not display.

**PARKING AIDS – TROUBLESHOOTING**

**PARKING AIDS – INFORMATION MESSAGES**

If a fault is present in the parking aids, a warning message appears in the instrument cluster or the information display.

WHAT IS THE REAR VIEW CAMERA

The rear view camera provides a video image of the area behind your vehicle when the transmission is in reverse (R). During operation, guide lines appear in the display that represents the path of your vehicle and proximity to objects behind it.

REAR VIEW CAMERA PRECAUTIONS

⚠️ WARNING: The rear view camera system is a reverse aid supplement device that still requires the driver to use it in conjunction with the interior and exterior mirrors for maximum coverage.

⚠️ WARNING: Objects that are close to either corner of the bumper or under the bumper, might not be seen on the screen due to the limited coverage of the camera system.

⚠️ WARNING: Reverse your vehicle slowly. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

⚠️ WARNING: Use caution when the rear cargo door is ajar. If the rear cargo door is ajar, the camera will be out of position and the video image could be incorrect. All guide lines disappear when the rear cargo door is ajar. Failure to follow this instruction could result in personal injury.

⚠️ WARNING: Do not switch the camera features on or off when your vehicle is moving.

Note: When towing, the camera only sees what you are towing. This might not provide adequate coverage and you might not see some objects. In some vehicles, the guide lines may disappear when you connect the trailer tow connector.

REAR VIEW CAMERA LIMITATIONS

The system may not correctly operate in any of the following conditions:

- Nighttime or dark areas if the reverse lamps are not operating.
- If the camera is obstructed. Clean the lens with a soft, lint-free cloth and non-abrasive cleaner.
- The camera is misaligned due to damage to the rear of your vehicle.

LOCATING THE REAR VIEW CAMERA

The rear view camera is on the liftgate.

REAR VIEW CAMERA GUIDE LINES

⚠️ WARNING: Objects above the camera may not be visible. Check the area behind your vehicle when necessary.

Note: Active guide lines are only available when the transmission is in reverse (R).
The fixed and active guide lines fade in and out depending on the steering wheel position. The active guide lines do not display when the steering wheel position is straight.

Use caution while reversing. Objects in the red zone are closest to your vehicle and objects in the green zone are farther away. Objects get closer to your vehicle as they move from the green zone to the yellow or red zones. Use the side view mirrors and rear view mirror to get better coverage on both sides and rear of your vehicle.

If the vehicle battery is disconnected, the guidelines are not fully functional directly after the battery is reconnected. The guidelines become fully functional after you drive your vehicle forward as straight as possible for five minutes at a minimum speed of 50 km/h (31 mph).

**REAR VIEW CAMERA SETTINGS**

**ZOOMING THE REAR VIEW CAMERA IN AND OUT**

- **WARNING:** When manual zoom is on, the full area behind your vehicle may not show. Be aware of your surroundings when using the manual zoom feature.

Selectable settings for this feature are zoom in (+) and zoom out (-). Press the symbol on the camera screen to change the view. The default setting is zoom off. This allows you to get a closer view of an object behind your vehicle. The zoomed image keeps the bumper in the image to provide a reference. The zoom is only active while the transmission is in reverse (R).
Rear View Camera

**Note:** Manual zoom is only available when the transmission is in reverse (R).

**Note:** Only the centerline shows when you enable manual zoom.

**SWITCHING REAR VIEW CAMERA OBJECT DISTANCE INDICATOR ON AND OFF**

You can switch this feature on or off in the settings.

When the system detects an object, it displays red, yellow and green distance indicators on the information display.

**SWITCHING REAR VIEW CAMERA DELAY ON AND OFF - VEHICLES WITH: SYNC 3/SYNC 2.5**

You can switch this feature on or off using the touchscreen. The default setting is off. See Settings (page 497).

If you switch this feature on, the image continues to display when you shift from reverse (R) until:

- You shift to a forward gear and the vehicle speed sufficiently increases.
- You shift in to park (P).

**SWITCHING REAR VIEW CAMERA DELAY ON AND OFF - VEHICLES WITH: SYNC 4**

1. Press **Features** on the touchscreen.
2. Press **Driver Assistance**.
3. Press **Rear View Camera**.
4. Switch **Rear View Camera Delay** on or off.
WHAT IS THE 180 DEGREE CAMERA

The 180 degree camera provides an extended image of the area behind your vehicle.

HOW DOES THE 180 DEGREE CAMERA WORK

When you switch the 180 degree view on, the view splits into three images. You can use the right and left outer images when reversing to check for cross traffic and pedestrians.

When you use the 180 degree camera view, objects behind your vehicle are shown extremely stretched and do not appear as actual ratio.

180 DEGREE CAMERA PRECAUTIONS

**WARNING:** The rear view camera system is a reverse aid supplement device that still requires the driver to use it in conjunction with the interior and exterior mirrors for maximum coverage.

**WARNING:** Objects that are close to either corner of the bumper or under the bumper, might not be seen on the screen due to the limited coverage of the camera system.

**WARNING:** Reverse your vehicle slowly. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

**WARNING:** Use caution when the rear cargo door is ajar. If the rear cargo door is ajar, the camera will be out of position and the video image could be incorrect. All guide lines disappear when the rear cargo door is ajar. Failure to follow this instruction could result in personal injury.

**WARNING:** Use caution when turning camera features on or off when the transmission is not in park (P). Make sure your vehicle is not moving.

**Note:** If the image comes on while the transmission is not in reverse (R), have the system inspected by your authorized dealer.

**Note:** When towing, the camera only sees what you are towing. This might not provide adequate coverage and you might not see some objects.

**Note:** Guide lines do not appear when you switch the 180 degree view on.

SWITCHING THE 180 DEGREE CAMERA ON AND OFF

When you shift to reverse (R) and the rear view camera image appears, press the button in the upper left corner of the touch screen to switch the 180 degree view on. Press the button again to switch it off.

The 180 degree view turns off when you shift into park (P) or into any forward gear and the vehicle speed sufficiently increases.

**Note:** Whenever you shift to reverse (R) the standard rear view camera image with guidelines is the default view.
Automatic Camera View Change *(If Equipped)*

When you shift to reverse (R) and the system detects an approaching vehicle, it automatically activates the 180 degree camera view.

When the intended path is free of cross traffic, the camera automatically switches back to the view before.

Press the button in the upper left corner of the touch screen during a cross traffic event to temporarily switch the automatic camera view change off.

**Note:** *When you shift to reverse (R) again the automatic camera view change is reactivated.*
Active Park Assist

WHAT IS ACTIVE PARK ASSIST

Assists you with parking in and out of parking spaces.

ACTIVE PARK ASSIST PRECAUTIONS

⚠️ WARNING: You must remain in your vehicle when the system turns on. At all times, you are responsible for controlling your vehicle, supervising the system and intervening, if required. Failure to take care may result in the loss of control of your vehicle, serious personal injury or death.

⚠️ WARNING: The sensors may not detect objects in heavy rain or other conditions that cause interference.

⚠️ WARNING: You are responsible for controlling your vehicle at all times. The system is designed to be an aid and does not relieve you of your responsibility to drive with due care and attention. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

⚠️ WARNING: Do not use the system with accessories that extend beyond the front or rear of your vehicle, for example a trailer hitch or bike rack. The system is not able to make corrections for the additional length of the accessories.

SWITCHING ACTIVE PARK ASSIST ON AND OFF - VEHICLES WITH: SYNC 4

Press the parking aid button, then press the active park assist icon on the touchscreen to bring up full screen notifications.

Press the soft keys on the touchscreen to switch between the parallel park in, perpendicular park in, or parallel park out parking modes.

Cancelling Active Park Assist

To cancel parking assistance at any time, shift out of neutral (N).

Pausing Active Park Assist

To pause parking assistance at any time, release the parking aid button.

If you open the passenger or rear doors, active park assist pauses.

To resume parking, press and hold the parking aid button again.

SWITCHING ACTIVE PARK ASSIST ON AND OFF - VEHICLES WITH: SYNC 3/SYNC 2.5

The active park assist button is next to the gearshift lever.

Press the button to activate active park assist. Press again to switch between parking modes.

Press the soft keys on the touchscreen to switch between the parallel park in, perpendicular park in, or parallel park out parking modes.
Cancelling Active Park Assist

To cancel parking assistance at any time, press the active park assist button or turn the steering wheel.

**Note:** It also cancels when your vehicle exceeds 9 km/h (6 mph).

**Brake System Intervention**

When active park assist is controlling the steering, it may under certain conditions apply the brakes to slow or stop your vehicle.

**Note:** This could cause the parking assistance to cancel.

**ENTERING A PARALLEL PARKING SPACE - VEHICLES WITH: FULLY ACTIVE PARK ASSIST/SYNC 4**

1. Press the parking aid button.  
   **Note:** The system detects other vehicles and curbs to find a parking space.

2. Press the active park assist icon on the touchscreen.

3. Use the turn signal lever to search for a parking space on the driver or passenger side of your vehicle.  
   **Note:** If you do not use the turn signal lever, the system searches for a parking space on the passenger side of your vehicle.

4. Drive your vehicle approximately 1 m (3 ft) away from and parallel to the other parked vehicles when searching for a parking space.  
   **Note:** A tone sounds and a message appears in the information and entertainment display when active park assist finds a suitable parking space.

5. Press and hold the brake pedal.

6. Release the steering wheel and shift into neutral (N).

7. Press and hold the parking aid button.

8. Release the brake pedal to allow your vehicle to park.

**Note:** You can slow down your vehicle at any time by pressing the brake pedal.

**Note:** When parallel parking between objects, the system parks closer to the object in front of your vehicle to allow easier access to the luggage compartment.

**Note:** When parking is complete, your vehicle shifts into park (P).

**ENTERING A PARALLEL PARKING SPACE - VEHICLES WITH: FULLY ACTIVE PARK ASSIST/SYNC 3/SYNC 2.5**

1. Press the active park assist button.  
   **Note:** The system searches for parallel parking spaces on the passenger side. Press the active park assist button again to make the system search for perpendicular spaces.

2. Use the turn signal lever to search for a parking space on the driver or passenger side of your vehicle.

3. Drive your vehicle approximately 1 m (3 ft) away from and parallel to the other parked vehicles when searching for a parking space.  
   **Note:** A tone sounds and a message appears in the information display when active park assist finds a suitable parking space.

4. Press and hold the brake pedal.

5. Release the steering wheel and shift into neutral (N).
Active Park Assist

6. Press and hold the active park assist button.
7. Release the brake pedal to allow the vehicle to park.

**Note:** You can slow down your vehicle at any time by pressing the brake pedal.
**Note:** When parking is complete, a tone sounds and an information message appears.

**Note:** When parallel parking between objects, the system will park closer to the object in front of your vehicle to allow easier access to the luggage compartment.

ENTERING A PARALLEL PARKING SPACE - VEHICLES WITH: SEMI ACTIVE PARK ASSIST

1. Press the active park assist button.

**Note:** The system searches for parallel parking spaces on the passenger side. Press the active park assist button again to make the system search for perpendicular spaces.

2. Use the direction indicator lever to search for a parking space on the driver or passenger side of your vehicle.

3. Drive your vehicle approximately 1 m (3 ft) away from and parallel to the other parked vehicles when searching for a parking space.

**Note:** A tone sounds and a message appears in the information display when active park assist finds a suitable parking space.

4. Bring your vehicle to a complete standstill.
5. Release the steering wheel and shift into reverse (R).
6. Drive backward and your vehicle steers itself into the parking space.

**Note:** You can slow down your vehicle at any time by pressing the brake pedal.
7. Follow the instructions on the information display.

**Note:** When parking is complete, a tone sounds and an information message appears.

ENTERING A PERPENDICULAR PARKING SPACE - VEHICLES WITH: FULLY ACTIVE PARK ASSIST/SYNC 4

1. Press the parking aid button.

**Note:** Active park assist does not recognize parking space lines and centers your vehicle between objects.

2. Press the active park assist icon on the touchscreen.
3. Select perpendicular parking.
4. Use the turn signal lever to search for a parking space on the driver or passenger side of your vehicle.

**Note:** If you do not use the turn signal lever, the system searches for a parking space on the passenger side of your vehicle.

5. Drive your vehicle approximately 1 m (3 ft) away from and perpendicular to the other parked vehicles when searching for a parking space.

**Note:** A tone sounds and a message appears in the information and entertainment display when active park assist finds a parking space.

6. Press and hold the brake pedal.
7. Release the steering wheel and shift into neutral (N).
8. Press and hold the parking aid button.
9. Release the brake pedal to allow the vehicle to park.
Active Park Assist

**Note:** Active park assist backs your vehicle into parking spaces.

**Note:** Active park assist aligns the front end of your vehicle with the lane side of the object next to it.

**Note:** When the system detects only one object, it allows enough distance to open the door on either side.

**Note:** You can slow down your vehicle at any time by pressing the brake pedal.

**Note:** When parking is complete, your vehicle shifts into park (P).

**Note:** Active park assist does not recognize parking space lines and centers your vehicle between objects.

**Note:** Active park assist backs your vehicle into parking spaces.

1. Press the active park assist button twice.
2. Use the turn signal lever to search for a parking space on the driver or passenger side of your vehicle.
3. Drive your vehicle approximately 1 m (3 ft) away from and perpendicular to the other parked vehicles when searching for a parking space.

**Note:** A tone sounds and a message appears in the instrument cluster when active park assist finds a parking space.

4. Press and hold the brake pedal.
5. Release the steering wheel and shift into neutral (N).
6. Press and hold the active park assist button.
7. Release the brake pedal to allow the vehicle to park.

**Note:** You can slow down your vehicle at any time by pressing the brake pedal.

**Note:** When parking is complete, a tone sounds and an information message appears.

**Note:** Active park assist aligns the front end of your vehicle with the lane side of the object next to it.

**Note:** When only one object is detected, the system allows enough distance to open the door on either side.

---

**ENTERING A PERPENDICULAR PARKING SPACE - VEHICLES WITH: FULLY ACTIVE PARK ASSIST/SYNC 3/SYNC 2.5**

**Note:** Active park assist does not recognize parking space lines and centers your vehicle between objects.

**Note:** You can slow down your vehicle at any time by pressing the brake pedal.

**Note:** When parking is complete, your vehicle shifts into park (P).

**Note:** A tone sounds and a message appears in the information display when active park assist finds a suitable parking space.

1. Press the active park assist button twice.
2. Use the direction indicator lever to search for a parking space on the driver or passenger side of your vehicle.
3. Drive your vehicle approximately 1 m (3 ft) away from and parallel to the other parked vehicles when searching for a parking space.
4. Bring your vehicle to a complete standstill.
5. Release the steering wheel and shift into reverse (R).
6. Drive backward and your vehicle steers itself into the parking space.

**Note:** You can slow down your vehicle at any time by pressing the brake pedal.
7. Follow the instructions on the information display.

**Note:** When parking is complete, a tone sounds and an information message appears.

**Note:** Active park assist does not recognize parking space lines and centers your vehicle between objects.

**Note:** When the system detects only one object, it allows enough distance to open the door on either side.

**EXITING A PARKING SPACE - VEHICLES WITH: FULLY ACTIVE PARK ASSIST/SYNC 4**

Active park assist only assists leaving parallel parking spaces.

1. Press the parking aid button.
2. Press the active park assist icon on the touchscreen.
3. Select parallel park exit.
4. Use the turn signal to choose the direction to exit the parking space.
5. Press and hold the brake pedal.
6. Release the steering wheel and shift into neutral (N).
7. Release the parking brake.
8. Press and hold the active park assist button.
9. Release the brake pedal to allow your vehicle to move.

**Note:** After active park assist drives your vehicle to a position where you can exit the parking space in a forward movement, a message appears instructing you to take full control of your vehicle.

10. Take control of your vehicle.

**Note:** You can slow down your vehicle at any time by pressing the brake pedal.

**EXITING A PARKING SPACE - VEHICLES WITH: FULLY ACTIVE PARK ASSIST/SYNC 3/SYNC 2.5**

The system assists leaving only parallel parking spaces.

1. Press the active park assist button.
2. Use the turn signal lever to choose the direction to leave.
3. Press and hold the brake pedal.
4. Release the steering wheel and shift into neutral (N).
5. Release the parking brake.
6. Press and hold the active park assist button.
7. Release the brake pedal to allow the vehicle to move.

**Note:** You can slow down your vehicle at any time by pressing the brake pedal.

**Note:** After the system drives your vehicle to a position where you can exit the parking space in a forward movement, a message appears instructing you to take full control of your vehicle.

**EXITING A PARKING SPACE - VEHICLES WITH: SEMI ACTIVE PARK ASSIST**

The system assists leaving only parallel parking spaces.

1. Press the active park assist button.
2. Use the turn signal lever to choose the direction to leave.
3. Release the steering wheel and shift into reverse (R).
4. Follow the instructions on the information display.

**Note:** After active park assist drives your vehicle to a position where you can exit the parking space in a forward movement, a message appears instructing you to take full control of your vehicle.

**Note:** You can slow down your vehicle at any time by pressing the brake pedal.
Active Park Assist

**Note:** You can slow down your vehicle at any time by pressing the brake pedal.

**Note:** After the system drives your vehicle to a position where you can exit the parking space in a forward movement, a message appears instructing you to take full control of your vehicle.

**ACTIVE PARK ASSIST – FREQUENTLY ASKED QUESTIONS**

**Why does active park assist not operate correctly?**

The system is unable to detect a vehicle, curb or object to park next to or in between. The system needs boundary objects to operate correctly.

**Why does active park assist not search for a parking space?**

You have switched traction control off.

**Why does active park assist not search for a parking space?**

The transmission is in reverse (R). Your vehicle must be moving forward to be able to detect a parking space.

**Why does active park assist not offer a parking space?**

The sensors could be blocked. For example, snow, ice or large accumulations of dirt. Blocked sensors can affect how the system functions.

**Why does active park assist not offer a parking space?**

There is not enough room in the parking space for your vehicle to safely park.

**Why does active park assist not offer a parking space?**

The sensors in the front or rear bumper could be damaged.

**Why does active park assist not offer a parking space?**

There is not enough space for the parking maneuver on the opposite side of the parking space.

**Why does active park assist not offer a parking space?**

The parking space is more than 1.5 m (5 ft) or less than 0.5 m (2 ft) away from your vehicle.

**Why does active park assist not offer a parking space?**

Your vehicle's speed is greater than 35 km/h (22 mph) for parallel parking or greater than 30 km/h (19 mph) for perpendicular parking.

**Why does active park assist not offer a parking space?**

You recently disconnected or replaced the battery. After you reconnect the battery you must drive your vehicle on a straight road for a short period of time.
**Active Park Assist**

Why does active park assist not correctly position the vehicle into a parking space?

An irregular curb along the parking space prevents the system from correctly aligning your vehicle.

Why does active park assist not correctly position the vehicle into a parking space?

Vehicles or objects bordering the space could not be correctly parked.

Why does active park assist not correctly position the vehicle into a parking space?

Your vehicle stopped too far past the parking space.

Why does active park assist not correctly position the vehicle into a parking space?

The temperature around your vehicle quickly changes. For example, driving from a heated garage into a cold outside temperature, or after leaving a car wash.

Why does active park assist not correctly position the vehicle into a parking space?

The tires are not correctly installed or maintained. For example, using a spare tire, not inflated correctly, improper size, or of different sizes.

Why does active park assist not correctly position the vehicle into a parking space?

A repair or alteration changed the detection capabilities.

Why does active park assist not correctly position the vehicle into a parking space?

A parked vehicle has a high attachment. For example, a salt sprayer, snowplow or moving truck bed.

Why does active park assist not correctly position the vehicle into a parking space?

The parking space length, or position of parked objects, changes after your vehicle passes the space.
**WHAT IS CRUISE CONTROL**

Cruise control lets you maintain a set speed without keeping your foot on the accelerator pedal.

**Requirements**

Use cruise control when the vehicle speed is greater than 30 km/h (20 mph).

**SWITCHING CRUISE CONTROL ON AND OFF**

**WARNING:** Do not use cruise control on winding roads, in heavy traffic or when the road surface is slippery. This could result in loss of vehicle control, serious injury or death.

The cruise controls are on the steering wheel.

**Switching Cruise Control On**

Press the button to put the system in standby mode.

**Switching Cruise Control Off**

Press the button when in standby mode or switch the ignition off.

**Note:** When you switch cruise control off the set speed clears.

**SETTING THE CRUISE CONTROL SPEED**

**WARNING:** When you are going downhill, your vehicle speed could increase above the set speed. The system does not apply the brakes.

Drive to the speed you prefer.

**SET+** Press either the SET+ or SET- buttons to set the current speed.

**SET-**

Take your foot off the accelerator pedal.

**Note:** The indicator changes color in the information display.

**Changing the Set Speed**

**SET+** Press the SET+ button to increase the set speed in small increments. Press and hold the SET+ button to accelerate. Release the button when you have reached your preferred speed.

**SET-** Press the SET- button to decrease the set speed in small increments. Press and hold the SET- button to decelerate. Release the button when you have reached your preferred speed.

**Note:** If you accelerate by pressing the accelerator pedal, the set speed does not change. When you release the accelerator pedal, your vehicle returns to the speed that you previously set.
Cruise Control

CANCELING THE SET SPEED

Press the button, or tap the brake pedal to cancel the set speed.

Note: The system remembers the set speed.

Note: The system cancels if the vehicle speed drops below 16 km/h (10 mph) under the set speed when driving uphill.

RESUMING THE SET SPEED

Press the button.

CRUISE CONTROL INDICATORS

Illuminates when you switch the system on.
Adaptive Cruise Control

HOW DOES ADAPTIVE CRUISE CONTROL WORK - VEHICLES WITH: ADAPTIVE CRUISE CONTROL

Adaptive cruise control uses radar and camera sensors to maintain a set gap between your vehicle and the vehicle in front of you.

HOW DOES ADAPTIVE CRUISE CONTROL WITH STOP AND GO WORK - VEHICLES WITH: ADAPTIVE CRUISE CONTROL WITH LANE CENTERING

Adaptive cruise control with stop and go uses radar and camera sensors to maintain a set gap between your vehicle and the vehicle in front of you while following it to a complete stop. Stop and go can also be set to follow a vehicle directly in front of you and adjust the set speed, while you are at a complete stop.

ADAPTIVE CRUISE CONTROL PRECAUTIONS

⚠️ WARNING: You are responsible for controlling your vehicle at all times. The system is designed to be an aid and does not relieve you of your responsibility to drive with due care and attention. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

⚠️ WARNING: Do not use adaptive cruise control on winding roads, in heavy traffic or when the road surface is slippery. This could result in loss of vehicle control, serious injury or death.

⚠️ WARNING: Pay close attention to changing road conditions such as entering or leaving a highway, on roads with intersections or roundabouts, roads without visible lanes of travel, roads that are unpaved, or steep slopes. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

⚠️ WARNING: The system is not a crash warning or avoidance system.

⚠️ WARNING: Do not use the system when towing a trailer that has aftermarket electronic trailer brake controls. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

⚠️ WARNING: Do not use tire sizes other than those recommended because this can affect the normal operation of the system. Failure to do so may result in a loss of vehicle control, which could result in serious injury.

⚠️ WARNING: Do not use the system with a snow plow blade installed.

⚠️ WARNING: Do not use the system in poor visibility, for example fog, heavy rain, spray or snow.

When Following a Vehicle

⚠️ WARNING: When following a vehicle that is braking, your vehicle does not always decelerate quickly enough to avoid a crash without driver intervention. Apply the brakes when necessary. Failure to follow this instruction could result in personal injury or death.
Adaptive Cruise Control

Hilly Condition Usage
Select a lower gear when the system is active in situations such as prolonged downhill driving on steep slopes, for example in mountainous areas.

ADAPTIVE CRUISE CONTROL LIMITATIONS

Sensor Limitations

WARNING: On rare occasions, detection issues can occur due to the road infrastructures, for example bridges, tunnels and safety barriers. In these cases, the system may brake late or unexpectedly. At all times, you are responsible for controlling your vehicle, supervising the system and intervening, if required.

WARNING: If the system malfunctions, have your vehicle checked as soon as possible.

WARNING: Large contrasts in outside lighting can limit sensor performance.

WARNING: The system only warns of vehicles detected by the radar sensor. In some cases there may be no warning or a delayed warning. Apply the brakes when necessary. Failure to follow this instruction could result in personal injury or death.

WARNING: The system may not detect stationary or slow moving vehicles below 10 km/h (6 mph).

WARNING: The system does not detect pedestrians or objects in the road.

WARNING: The system does not detect oncoming vehicles in the same lane.

WARNING: The system may not operate properly if the sensor is blocked. Keep the windshield free from obstruction.

WARNING: The sensor may incorrectly track lane markings as other structures or objects. This can result in a false or missed warning.

The camera is mounted behind the interior mirror.

The radar is behind the front grille below the license plate.

Note: You cannot see the sensor. It is behind a fascia panel.
Adaptive Cruise Control

**Note:** Keep the front of your vehicle free of dirt, metal badges or objects. Vehicle front protectors, aftermarket lights, additional paint or plastic coatings could also degrade sensor performance.

A message displays if something obstructs the camera or the sensor. When something blocks the sensor, the system cannot detect a vehicle ahead and does not function. See Adaptive Cruise Control – Information Messages (page 295).

The radar sensor has a limited field of view. It may not detect vehicles at all or detect a vehicle later than expected in some situations. The lead vehicle image does not illuminate if the system does not detect a vehicle in front of you.

**Detection Issues Can Occur:**

A. When driving on a different lane than the vehicle in front.

B. With vehicles that edge into your lane. The system can only detect these vehicles once they move fully into your lane.

C. There may be issues with the detection of vehicles in front when driving into and coming out of a bend or curve in the road.

In these cases, the system may brake late or unexpectedly.

If something hits the front end of your vehicle or damage occurs, the radar-sensing zone may change. This could cause missed or false vehicle detection.
Optimal system performance requires a clear view of the road by the windshield camera.

Optimal performance may not occur if:
- The camera is blocked.
- There is poor visibility or lighting conditions.
- There are bad weather conditions.

**SWITCHING ADAPTIVE CRUISE CONTROL ON AND OFF**

The cruise controls are on the steering wheel.

**Switching Adaptive Cruise Control On**

Press the button to set the system in standby mode.

The indicator, current gap setting and set speed appear in the information display.

**Switching Adaptive Cruise Control Off**

Press the button when the system is in standby mode, or switch the ignition off.

*Note: You erase the set speed when you switch the system off.*

**ADAPTIVE CRUISE CONTROL AUTOMATIC CANCELLATION - VEHICLES WITH: ADAPTIVE CRUISE CONTROL**

The system does not operate if the vehicle speed is below 15 mph when in imperial units or 20 km/h when in metric units. A tone sounds and adaptive braking releases if the vehicle speed falls below 15 mph when in imperial units or 20 km/h when in metric units.

Automatic cancellation can also occur when:
- The tires lose traction.
- You apply the parking brake.

*Note: If the engine speed drops too low, the instrument cluster display advises you to shift to a lower gear.*

The system could deactivate or prevent activating when requested if:
- The vehicle has a blocked sensor.
- The brake temperature is too high.
- There is a failure in the system.

**ADAPTIVE CRUISE CONTROL AUTOMATIC CANCELLATION - VEHICLES WITH: ADAPTIVE CRUISE CONTROL WITH LANE CENTERING**

The system could cancel if any of the following occur:
- The tires lose traction.
- You apply the parking brake.
Automatic parking brake application and cancellation occurs if any of the following occur:

- You unfasten the seatbelt and open the door after you stop your vehicle.
- Your vehicle remains stationary for longer than three minutes.

**SETTING THE ADAPTIVE CRUISE CONTROL SPEED - VEHICLES WITH: ADAPTIVE CRUISE CONTROL**

Drive to the speed you prefer.

**SET+** Press the toggle button upward or downward to set the current speed.

**SET-**

Take your foot off the accelerator pedal. The indicator, current gap setting and set speed appear in the information display.

A vehicle image illuminates if there is a vehicle detected in front of you.

**Note:** When adaptive cruise control is active, the speedometer may vary slightly from the set speed displayed in the information display.

**Manually Changing the Set Speed**

**SET+** Press and release the toggle button upward to increase the set speed in small increments.

Press and hold the toggle button upward to increase the set speed in large increments. Release the button when you reach the speed you prefer.

**SET-** Press and release the toggle button downward to decrease the set speed in small increments.

Press and hold the toggle button downward to decrease the set speed in large increments. Release the button when you reach the speed you prefer.

Press the accelerator or brake pedal until you reach the speed you prefer. Press the toggle button upward or downward to select the current speed as the set speed.

The system may apply the brakes to slow the vehicle to the new set speed. The set speed displays continuously in the information display when the system is active.

**SETTING THE ADAPTIVE CRUISE CONTROL SPEED - VEHICLES WITH: ADAPTIVE CRUISE CONTROL WITH LANE CENTERING**

Drive to the required speed.

**SET+** Press the toggle button upward to set the current speed.

Take your foot off the accelerator pedal. The indicator, current gap setting and set speed appear in the instrument cluster display.
Adaptive Cruise Control

A vehicle graphic appears in the instrument cluster display if the system detects a vehicle in front of you.

**Note:** When adaptive cruise control is active, the speedometer could vary slightly from the set speed displayed in the instrument cluster display.

### Setting the Adaptive Cruise Speed When Your Vehicle is Stationary

1. Follow a vehicle to a complete stop.
2. Keep the brake pedal fully pressed.
3. Press and release **SET+** or **SET-**.

The set speed adjusts to 30 km/h (20 mph).

The indicator, current gap setting and set speed appear in the instrument cluster display.

### Changing the Set Speed

**SET+** Press the toggle button upward to increase the set speed.

**SET-** Press the toggle button downward to decrease the set speed.

You can adjust the set speed in small or large increments. Press the toggle button upward or downward once to adjust the set speed in small increments. Press and hold the toggle button upward or downward to adjust the set speed in large increments.

The system could apply the brakes to slow your vehicle to the new set speed. The set speed continuously displays in the instrument cluster display when the system is active.

### Setting the Adaptive Cruise Control Gap - Vehicles with: Adaptive Cruise Control

Press the button to cycle through the four gap settings.

The selected gap appears in the instrument cluster display as shown by the bars in the image.

**Note:** The gap setting is time dependent and therefore, the distance adjusts with your vehicle speed.

**Note:** It is your responsibility to select a gap appropriate to the driving conditions.
Adaptive Cruise Control

Adaptive Cruise Control Gap Settings

<table>
<thead>
<tr>
<th>Graphic Display, Bars Indicated Between Vehicles</th>

<td>Comfort.</td>
</tr>
</tbody>
</table>

Each time you switch the system on, it selects the last chosen gap setting.

Following a Vehicle

When a vehicle ahead of you enters the same lane or a slower vehicle is ahead in the same lane, the vehicle speed adjusts to maintain the gap setting.

Note: When you are following a vehicle and you switch on a turn signal lamp, adaptive cruise control may provide a small, temporary acceleration to help you pass.

Your vehicle maintains a consistent gap from the vehicle ahead until:

- The vehicle in front of you accelerates to a speed above the set speed.
- The vehicle in front of you moves out of the lane you are in.
- You set a new gap distance.

The system applies the brakes to slow down your vehicle to maintain a safe gap distance from the vehicle in front of you. The system only applies limited braking. You can override the system by applying the brakes.

Note: The brakes may emit noise when applied by the system.

If the system determines that its maximum braking level is not sufficient, an audible warning sounds, a message appears in the instrument cluster display and an indicator flashes when the system continues to brake. Take immediate action.

SETTING THE ADAPTIVE CRUISE CONTROL GAP - VEHICLES WITH: ADAPTIVE CRUISE CONTROL WITH LANE CENTERING

You can decrease or increase the distance between your vehicle and the vehicle in front by pressing the gap control.

Note: It is your responsibility to select a gap appropriate to the driving conditions.

The selected gap appears in the instrument cluster display as shown by the bars in the image. You can select four gap settings.

</tr>
</tbody>
</table>

When you switch the ignition on, the system automatically selects the last chosen gap setting.

### Following a Vehicle

When a vehicle ahead of you enters the same lane or a slower vehicle is ahead in the same lane, the vehicle speed adjusts to maintain a preset gap distance. A vehicle graphic appears in the instrument cluster display.

**Note:** When you are following a vehicle and you switch on a direction indicator, adaptive cruise control may provide a small temporary acceleration to help you pass.

Your vehicle maintains a consistent gap from the vehicle ahead until:

- The vehicle in front of you accelerates to a speed above the set speed.
- The vehicle in front of you moves out of the lane you are in.
- You set a new gap distance.

The system applies the brakes to slow your vehicle to maintain a safe gap distance from the vehicle in front. The system only applies limited braking. You can override the system by applying the brakes.

If the system determines that its maximum braking level will not be sufficient, an audible warning sounds when the system continues to brake. Take immediate action.

### Following a Vehicle to a Complete Stop

If your vehicle follows a vehicle to a complete stop and remains stationary for less than three seconds, your vehicle accelerates from a stationary position to follow the vehicle ahead.

**Note:** The brakes may emit noise when applied by the system.

### CANCELING THE SET SPEED

**CAN** Press the button, or tap the brake pedal.

The last set speed displays with a strikethrough and the last gap setting appears but does not erase.

**Note:** The set speed also cancels if you press the clutch pedal for an extended period.

### RESUMING THE SET SPEED

**RES** Press the button.

Your vehicle speed returns to the previously set speed and gap setting. The set speed displays continuously in the information display when the system is active.
Adaptive Cruise Control

**Note:** Only use resume if you are aware of the set speed and intend to return to it.

**OVERRIDDING THE SET SPEED**

**WARNING:** If you override the system by pressing the accelerator pedal, it does not automatically apply the brakes to maintain a gap from any vehicle ahead.

When you press the accelerator pedal, you override the set speed and gap distance. Use the accelerator pedal to intentionally exceed the set speed limit.

When you override the system, the green indicator illuminates and the vehicle icon does not appear in the instrument cluster display.

The system resumes operation when you release the accelerator pedal. The vehicle speed decreases to the set speed, or a lower speed if following a slower vehicle.

**ADAPTIVE CRUISE CONTROL INDICATORS**

Illuminates when you switch adaptive cruise control on. The color of the indicator changes to indicate the system status.

White indicates the system is on but inactive.

Green indicates that you set the speed and the system is active.

**SWITCHING FROM ADAPTIVE CRUISE CONTROL TO CRUISE CONTROL - VEHICLES WITH: SYNC 3**

**WARNING:** Normal cruise control will not brake when your vehicle is approaching slower vehicles. Always be aware of which mode you have selected and apply the brakes when necessary.

1. Press **Settings** on the touchscreen.
2. Press **Driver Assistance**.
3. Press **Cruise Control**.
4. Press **Normal**.

**SWITCHING FROM ADAPTIVE CRUISE CONTROL TO CRUISE CONTROL - VEHICLES WITH: SYNC 4**

**WARNING:** Normal cruise control will not brake when your vehicle is approaching slower vehicles. Always be aware of which mode you have selected and apply the brakes when necessary.

1. Press **Features** on the touchscreen.
2. Press **Driver Assistance**.
3. Press **Cruise Control**.
4. Press **Normal**.
Adaptive Cruise Control

SWITCHING FROM ADAPTIVE CRUISE CONTROL TO CRUISE CONTROL - VEHICLES WITH: SYNC 2.5

**WARNING:** Normal cruise control will not brake when your vehicle is approaching slower vehicles. Always be aware of which mode you have selected and apply the brakes when necessary.

1. Using the instrument cluster display controls on the steering wheel, select **Settings**.
2. Select **Driver assistance**.
3. Select **Cruise control**.
4. Select **Mode**.
5. Select a setting and press the **OK** button.

The cruise control indicator replaces the adaptive cruise control indicator if you select normal cruise control. The gap setting does not display, and the system does not respond to lead vehicles. Automatic braking remains active to maintain the set speed. The system remembers the last setting when you start your vehicle.

LANE CENTERING

**HOW DOES LANE CENTERING WORK**

Adaptive cruise control with lane centering uses radar and camera sensors to help keep your vehicle in the middle of the lane by applying continuous assistance steering torque input toward the lane center on highways.

**Note:** The adaptive cruise control gap setting operates normally.

If you drive off-center within the lane, the system sets and maintains that preferred lane position. The system provides continuous assistance steering torque input toward the preferred position.

**Note:** The system can only set preferred lane positions within the lane.

**Note:** If the system cancels, the preferred position erases. On the next activation, the system provides continuous assistance steering torque input toward the lane center.

LANE CENTERING PRECAUTIONS

**WARNING:** Do not use the system when towing a trailer. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

**WARNING:** Do not use the system if any changes or modifications to the steering wheel have been made. Any changes or modifications to the steering wheel could affect the functionality or performance of the system. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

Adaptive cruise control precautions apply to lane centering unless stated otherwise or contradicted by a lane centering precaution. See **Adaptive Cruise Control Precautions** (page 282).

LANE CENTERING REQUIREMENTS

You must keep your hands on the steering wheel at all times.
Adaptive Cruise Control

The system only activates when all of the following occur:

- You have adaptive cruise control with stop and go on.
- You have your hands on the steering wheel at all times.
- The system detects both lane markings.
- The vehicle is centered in the lane.

**Note:** If it does not detect valid lane markings, the system stays inactive until valid markings are available.

**LANE CENTERING LIMITATIONS**

Adaptive cruise control limitations apply to lane centering unless stated otherwise or contradicted by a lane centering limitation. See **Adaptive Cruise Control Limitations** (page 283).

Lane Centering may not correctly operate in any of the following conditions:

- The lane is too narrow or wide.
- The system does not detect at least one lane marking or when lanes merge or split.
- Limited steering torque input is applied.
- Areas under construction or new infrastructure.
- When modifications to the steering system have been made.
- When using a spare tire.
- In high wind conditions.

**Note:** The driving assistance torque is limited and may not be sufficient for all driving situations such as driving through tight curves or driving through curves at high speeds.

**Note:** In exceptional conditions, such as inclement weather or direct sunlight, the system could deviate from the center line or could cancel.

**SWITCHING LANE CENTERING ON AND OFF**

You must keep your hands on the steering wheel at all times.

The controls are on the steering wheel.

[Press the button.]

The indicator appears in the instrument cluster display. When the system is on, the color of the indicator changes to indicate the system status.

You can override the system at any time by steering your vehicle.

**Note:** The correct requirements must be met before you can switch the system on. See **Lane Centering Requirements** (page 291).

**LANE CENTERING ALERTS**

You must keep your hands on the steering wheel at all times.

When the system is active and detects no steering activity for a period of time, the system alerts you to put your hands on the steering wheel. If you do not react to the warnings the system cancels and slows your vehicle down to idle speeds while maintaining steering control. See **Lane Centering Automatic Cancellation** (page 293).

The system also alerts you if your vehicle crosses lane markings without detected steering activity.

**Note:** The system could detect a light grip or touch on the steering wheel as hands-off driving.
LANE CENTERING AUTOMATIC CANCELLATION

You must keep your hands on the steering wheel at all times.

When an external condition cancels the system, for example, no lane markings are available and your hands are on the steering wheel, a tone sounds and a message appears in the instrument cluster display.

When an external condition cancels the system, for example, no lane markings are available and your hands are not on the steering wheel, the system immediately alerts you to take control of the vehicle. If this alert is ignored, the system slows the vehicle while maintaining steering control.

If your vehicle starts to slow down, you must contribute to the steering control and press and release the button or briefly press the accelerator pedal to regain full system performance.

Automatic cancellation can also occur if:

- The lane becomes too wide or narrow.
- The system cannot detect valid lane markings.
- Lane markings are crossed.
- The curve of the road is too sharp.

Note: The system disables until the next key cycle if your vehicle slows down due to driver inactivity twice within a key cycle.

You initiate a cancellation when the system is active and you switch the turn signal lamp on. The system immediately cancels. The system remains in standby mode as long as the turn signal lamp is engaged. The system automatically re-activates once the vehicle is centered in a lane and the turn signal lamp is switched off.

LANE CENTERING INDICATORS

The indicator appears in the instrument cluster display when you switch lane centering on.

When the system is on, the color of the indicator changes to indicate the system status.

Gray indicates the system is on but inactive.

Green indicates the system is active and applying steering torque assistance input to keep your vehicle in the center of the lane.

Amber with an audible tone and then gray indicates a system automatic cancellation.

INTELLIGENT ADAPTIVE CRUISE CONTROL - VEHICLES WITH: INTELLIGENT ADAPTIVE CRUISE CONTROL

HOW DOES INTELLIGENT ADAPTIVE CRUISE CONTROL WORK

Intelligent adaptive cruise control combines speed sign recognition and navigation map data with adaptive cruise control to adjust the cruise set speed to the speed limit detected by the speed sign recognition system. As the system detects new speed signs, the set speed updates.

There are limitations that affect the accuracy of the speed sign recognition system and its ability to determine the current speed limit. The intelligent adaptive cruise control system and its ability to determine the current speed limit shares these limitations. See Speed Sign Recognition (page 340).
Adaptive Cruise Control

Note: The adaptive cruise control gap setting operates normally when the feature is enabled.

INTELLIGENT ADAPTIVE CRUISE CONTROL PRECAUTIONS

WARNING: You are responsible for controlling your vehicle at all times. The system is designed to be an aid and does not relieve you of your responsibility to drive with due care and attention. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

INTELLIGENT ADAPTIVE CRUISE CONTROL LIMITATIONS

The speed limit information provided by the navigation map data could be inaccurate or out of date.

The system may not detect and read speed limit signs with conditional information, for example, when a sign is flashing, during specific time ranges, or when children are present.

Note: The system does not set the vehicle speed to speed limits shown with a supplementary traffic sign.

Under certain conditions, the system may not adjust the vehicle speed until after your vehicle passes the speed limit.

SWITCHING INTELLIGENT MODE ON AND OFF - VEHICLES WITH: SYNC 3

1. Press Settings on the touchscreen.
2. Press Driver Assistance.
3. Press Cruise Control.
4. Press Intelligent.

SWITCHING INTELLIGENT MODE ON AND OFF - VEHICLES WITH: SYNC 4

1. Press Features on the touchscreen.
2. Press Driver Assistance.
3. Press Cruise Control.
4. Press Intelligent.

SWITCHING INTELLIGENT MODE ON AND OFF - VEHICLES WITH: SYNC 2.5

1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Driver assistance.
3. Select Cruise control.
4. Select Mode.
5. Select a setting and press the OK button.

INTELLIGENT ADAPTIVE CRUISE CONTROL ALERTS

If the speed sign recognition system detects a speed limit below the minimum adaptive cruise control set speed, a tone sounds and the system returns to standby mode.

INTELLIGENT ADAPTIVE CRUISE CONTROL INDICATORS

E265663
If you select this mode, a bracket appears around the set speed and the detected speed limit sign in the instrument cluster display.

WHAT IS DRIVE MODE CONTROL

Your vehicle has various drive modes that you can select for different driving conditions. Depending on the drive mode that you select, the system adjusts various vehicle settings, for example steering, gear shifting, handling and powertrain response.

SELECTING A DRIVE MODE - VEHICLES WITH: SYNC 4, EXCLUDING: ST

Press the button on the instrument panel to directly access the drive modes on the touchscreen.

As a secondary option:
1. Press Features on the touchscreen.
2. Press DRIVE MODES.
3. Select a setting.

SELECTING A DRIVE MODE - VEHICLES WITH: SYNC 3/SYNC 2.5, EXCLUDING: ST

The button is on the center console.

Repeatedly press the button to scroll through the available drive modes.

SELECTING A DRIVE MODE - ST
1. Press Features on the touchscreen.
2. Press DRIVE MODES.
3. Select a setting.

DRIVE MODES

ECO

Vehicle settings suited for economical driving.

NORMAL

Vehicle settings suited for balanced driving.

Note: This is the default mode each time you switch the ignition on.

SLIPPERY

Vehicle settings suited for driving on slippery roads.

SPORT - EXCLUDING: ST

Vehicle settings suited for sportier driving.

Note: Auto-start-stop could switch off when you select this mode.

SPORT - ST, MANUAL TRANSMISSION

Vehicle settings suited for sportier driving.

You can press the button on the steering wheel to directly access the drive modes on the touchscreen.

Press the button on the steering wheel to directly turn sport mode on and off.
**Drive Mode Control**

**SPORT - ST, AUTOMATIC TRANSMISSION**

Vehicle settings suited for sportier driving.

*Note:* Press the button on the steering wheel to directly select this mode.

*Note:* Auto-start-stop switches off when you select this mode.

*Note:* The seventh gear is disabled when you select this mode.

**TRACK - ST, AUTOMATIC TRANSMISSION**

Vehicle settings suited for track driving.

*Note:* Press the button on the steering wheel to directly select this mode.

*Note:* Auto-start-stop switches off when you select this mode.

*Note:* Pre-collision assist is disabled when you select this mode.

*Note:* Lane keeping system is disabled when you select this mode.

*Note:* Track mode is not intended for use on public roads.

*Note:* Stability control is switched to reduced mode when you select this mode.

**TRAIL - ACTIVE**

Vehicle settings suited for driving on unpaved roads.

*Note:* Auto-start-stop is disabled when you select this mode.

**DRIVE MODE CONTROL – TROUBLESHOOTING**

**DRIVE MODE CONTROL – INFORMATION MESSAGES**

</tbody>
</table>
Eco coach is designed to monitor certain driving characteristics to help you drive more efficiently.

Eco coach provides feedback through the instrument cluster display about your driving behaviour.

**Note:** The efficiency levels do not result in a defined fuel consumption figure.
**Note:** The system only indicates the efficiency level for the current trip. The system resets each time you switch the ignition on.

The display ring increases as the instantaneous efficiency level increases and illuminates when it reaches maximum efficiency. The level continuously updates to indicate the efficiency level for the current trip.

The calculated trip summary is shown as four colored bars. The bars travel from left to right as the calculated efficiency levels increase. The bars indicate the average efficiency level for acceleration, deceleration, speed and gear shifting during the total distance traveled by your vehicle for the current trip.

**Note:** Vehicles with an automatic transmission do not have a bar for gear shifting.

1. Using the information display controls on the steering wheel, select **MyView**.
2. Select **Eco coach**.

1. Press the menu button on the steering wheel to enter the instrument cluster display main menu.
2. Select **Display settings**.
3. Select **Eco coach**.
4. Select a setting and press the **OK** button.

Focus (CGE) Vehicles Built From: 05-09-2022, CG3929en enGBR, Edition date: 202201, First-Printing
HOW DOES TRIP SUMMARY WORK - VEHICLES WITH: 12.3 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

The calculated trip summary is shown as four percentage values. The percentage values increase as the calculated efficiency levels increase. The percentage values indicate the average efficiency level for acceleration, deceleration, speed and gear shifting during the total distance traveled by your vehicle for the current trip.

Note: Vehicles with an automatic transmission do not have a percentage value for gear shifting.

VIEWING THE TRIP SUMMARY - VEHICLES WITH: 4.2 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

1. Using the information display controls on the steering wheel, select MyView.
2. Select Eco coach.

VIEWING THE TRIP SUMMARY - VEHICLES WITH: 12.3 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

1. Press the menu button on the steering wheel to enter the instrument cluster display main menu.
2. Select Select screens.
3. Select Eco behaviour.
4. Select the screen on your main screen.
   See Instrument Cluster Display Main Menu (page 133).
WHAT IS EFFICIENT DRIVE MODE

Efficient drive mode is a predictive coach that uses the vehicle navigation data. It provides predictive route information to help you drive more efficiently by indicating when you can release the accelerator pedal.

SWITCHING EFFICIENT DRIVE MODE ON AND OFF - VEHICLES WITH: 4.2 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

1. Using the information display controls on the steering wheel, select Driver assist.
2. Select Eco coach.
3. Switch Eco advice on or off.

SWITCHING EFFICIENT DRIVE MODE ON AND OFF - VEHICLES WITH: 12.3 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

1. Press the menu button on the steering wheel to enter the information display main menu.
2. Select Display settings.
3. Select Eco coach.
4. Switch Eco advice on or off.

DISPLAYING THE EFFICIENT DRIVE MODE - VEHICLES WITH: 4.2 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

1. Using the information display controls on the steering wheel, select Driver assist.

TRIP SUMMARY

HOW DOES TRIP SUMMARY WORK

The calculated trip summary is shown as five colored bars. The bars travel from left to right as the calculated efficiency levels increase. The bars indicate the average efficiency level for your driving behavior, acceleration, deceleration, speed, gear shifting and compliance score during the total distance traveled by your vehicle for the current trip.

Note: The compliance score assesses how well you follow the efficient drive mode indicator.

Note: Vehicles with an automatic transmission do not have a bar for gear shifting.

VIEWING THE TRIP SUMMARY - VEHICLES WITH: 4.2 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

1. Using the information display controls on the steering wheel, select MyView.
2. Select Eco coach.
3. Switch the engine off.
4. Press the OK button.
**Efficient Drive Mode**

**VIEWING THE TRIP SUMMARY - VEHICLES WITH: 12.3 INCH INSTRUMENT CLUSTER DISPLAY SCREEN**

Repeatedly press the button to scroll through the available drive modes.

The button is on the center console.

1. Select **ECO**.
2. Press the menu button on the steering wheel to enter the information display main menu.
3. Select **Display settings**.
4. Select **Eco coach**.
5. Switch **Eco advice** on.
6. Switch the engine off.

**EFFICIENT DRIVE MODE INDICATORS**

It illuminates grey when the system recommends you to decelerate.

It changes color when you start to decelerate.

The additional display ring next to the efficient drive mode indicator can provide information about speed limit, intersection, freeway ramp, roundabout, stop sign, slope, curve or crosswalk.
Local Hazard Information

WHAT IS LOCAL HAZARD INFORMATION

The system is designed to provide near real-time information about the road in front of you.

LOCAL HAZARD INFORMATION PRECAUTIONS

WARNING: You are responsible for controlling your vehicle at all times. The system is designed to be an aid and does not relieve you of your responsibility to drive with due care and attention. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

LOCAL HAZARD INFORMATION INDICATORS

- Animals on the road.

People on the road.
Road works.
Traffic jam.

Note: Depending on your vehicle options and instrument cluster type, not all indicators shown are available.

ENABLING LOCAL HAZARD INFORMATION - VEHICLES WITH: SYNC 3

Note: Make sure that the modem is enabled. See Enabling and Disabling the Modem (page 465).
1. Select Settings.
2. Select FordPass Connect.
3. Select Connectivity settings.
4. Switch Vehicle connectivity on.
5. Switch Location on.
7. Switch Live Traffic on.
8. Switch Local hazard information on.

ENABLING LOCAL HAZARD INFORMATION - VEHICLES WITH: SYNC 4

Note: Make sure that the modem is enabled. See Enabling and Disabling the Modem (page 465).
1. Press Settings on the touchscreen.
2. Press Connectivity.
3. Press *Connected Vehicle Features*.
4. Switch *Local hazard information* on.

**CHECKING LOCAL HAZARD INFORMATION STATUS - VEHICLES WITH: 4.2 INCH INSTRUMENT CLUSTER DISPLAY SCREEN**

1. Using the information display controls on the steering wheel, select *Settings*.
2. Select *Information*.
3. Select *Local hazard information*.

**CHECKING LOCAL HAZARD INFORMATION STATUS - VEHICLES WITH: 12.3 INCH INSTRUMENT CLUSTER DISPLAY SCREEN**

1. Press the menu button on the steering wheel to enter the information display main menu.
2. Select *Settings*.
3. Select *Local hazard information*. 
How Does the Speed Limiter Work

The system allows you to set a speed to which your vehicle becomes limited. The set speed sets the effective maximum speed of your vehicle. You can temporarily exceed the set speed if required, for example to overtake.

The controls are on the steering wheel.

Switching the Speed Limiter On and Off - Vehicles Without: Lane Centering

Press to switch the system on. The system activates with the current vehicle speed as the set speed. Press again to switch the system off.

Switching the Speed Limiter On and Off - Vehicles With: Lane Centering

Press to switch the system on. The system activates with the current vehicle speed as the set speed. Press again with the system in standby mode to switch the system off.

Setting the Speed Limit

Press the toggle button upward or downward with the system in standby mode to set the speed limiter to the current vehicle speed. The set speed is stored and displayed in the instrument cluster display.

Changing the Set Speed Limit

You can adjust the set speed in small or large increments. Press the toggle button upward or downward once to adjust the set speed in small increments. Press and hold the toggle button upward or downward to adjust the set speed in large increments.

Canceling the Set Speed Limit - Vehicles Without: Lane Centering

Press to cancel the set speed limiter. The system returns to standby mode.

Note: The system does not limit the vehicle speed in standby mode.
**Speed Limiter**

**CANCELING THE SET SPEED LIMIT - VEHICLES WITH: LANE CENTERING**

Press to cancel the set speed limiter. The system returns to standby mode.

*Note: The system does not limit the vehicle speed in standby mode.*

**RESUMING THE SET SPEED LIMIT**

Press to resume the set speed limiter.

**INTENTIONALLY EXCEEDING THE SET SPEED LIMIT**

Firmly press the accelerator pedal to temporarily exceed the set speed limit. The system resumes when the vehicle speed drops below the set speed limit, or when you press the `RES` button.

If you intentionally exceed the set speed, a warning appears in the instrument cluster display.

**SPEED LIMITER INDICATORS**

It illuminates in the instrument cluster display when you switch the system on.

It illuminates grey if the system is in standby mode.

**SPEED LIMITER AUDIBLE WARNINGS**

If you unintentionally exceed the set speed, for example when you are going downhill, a warning appears in the instrument cluster display and a tone sounds.
WHAT IS THE INTELLIGENT SPEED LIMITER

Intelligent speed limiter is a driving aid that limits the vehicle speed to the maximum speed limit detected by the speed sign recognition system.

HOW DOES THE INTELLIGENT SPEED LIMITER WORK

The system allows you to limit the vehicle speed to the maximum speed limit detected by the speed sign recognition system. For example, if the speed sign recognition system detects a 80 km/h (50 mph) speed limit, the vehicle speed is limited to 80 km/h (50 mph). You can temporarily exceed the set speed if required, for example to overtake.

The controls are on the steering wheel.

A warning appears in the instrument cluster display if any of the following occur:

- The vehicle speed exceeds the current set speed.
- The system detects a maximum speed limit that is lower than the current vehicle speed.
- You intentionally exceed the set speed.
- You unintentionally exceed the set speed, for example when you are going downhill.

Note: The system does not limit the vehicle speed to speed limits shown with a supplementary traffic sign in the instrument cluster display.

INTELLIGENT SPEED LIMITER PRECAUTIONS

⚠️ WARNING: When you are going downhill, your vehicle speed could increase above the set speed. The system does not apply the brakes.

⚠️ WARNING: You are responsible for controlling your vehicle at all times. The system is designed to be an aid and does not relieve you of your responsibility to drive with due care and attention. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

SWITCHING THE INTELLIGENT SPEED LIMITER ON AND OFF - VEHICLES WITHOUT: LANE CENTERING

Press to switch the system on. The system activates with the detected speed-limit or, if no speed-limit is detected, the current vehicle speed as the set speed. Press again to switch the system off.

SWITCHING THE INTELLIGENT SPEED LIMITER ON AND OFF - VEHICLES WITH: LANE CENTERING

Press to switch the system on. The system activates with the detected speed-limit or, if no speed-limit is detected, the current vehicle speed as the set speed. Press again with the system in standby mode to switch the system off.
Intelligent Speed Limiter

SETTING THE SPEED LIMIT

Press the toggle button upward or downward with the system in standby mode to set the speed limiter to the current vehicle speed. The set speed is stored and displayed in the instrument cluster display.

Note: The set speed limiter adjusts when the system detects a different maximum speed limit.

Note: If the system cannot detect a maximum speed limit, the system returns to standby mode.

CHANGING THE SET SPEED LIMIT

You can adjust the set speed in small or large increments. Press the toggle button upward or downward once to adjust the set speed in small increments. Press and hold the toggle button upward or downward to adjust the set speed in large increments.

ADJUSTING THE SPEED LIMIT TOLERANCE - VEHICLES WITH: SYNC 2.5

You can set a permanent speed tolerance that is in addition to the detected speed limit.

1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Driver assistance.
3. Select Speed limiter.
4. Select Intelligent.
5. Select Tolerance.
6. Select a setting and press the OK button.

ADJUSTING THE SPEED LIMIT TOLERANCE - VEHICLES WITH: SYNC 3

You can set a permanent speed tolerance that is in addition to the detected speed limit.

1. Press Settings on the touchscreen.
2. Press Driver Assistance.
3. Press Speed Limiter.
4. Press Intelligent.
5. Press Tolerance.
6. Select a setting and press the OK button.

ADJUSTING THE SPEED LIMIT TOLERANCE - VEHICLES WITH: SYNC 4

You can set a permanent speed tolerance that is in addition to the detected speed limit.

1. Press Features on the touchscreen.
2. Press Driver Assistance.
3. Press Speed Limiter.
4. Press Intelligent Speed Limiter.
5. Press Tolerance.
6. Select a setting and press the OK button.
**Intelligent Speed Limiter**

**CANCELING THE SET SPEED LIMIT - VEHICLES WITHOUT: LANE CENTERING**

**CAN** Press to cancel the set speed limiter. The system returns to standby mode.

**Note:** The system does not limit the vehicle speed in standby mode.

**CANCELING THE SET SPEED LIMIT - VEHICLES WITH: LANE CENTERING**

**LIM** Press to cancel the set speed limiter. The system returns to standby mode.

**Note:** The system does not limit the vehicle speed in standby mode.

**RESUMING THE SET SPEED LIMIT**

**RES** Press to resume the set speed limiter. The system sets the speed limiter to the detected maximum speed limit at the time it resumes.

**INTENTIONALLY EXCEEDING THE SET SPEED LIMIT**

Firmly press the accelerator pedal to temporarily exceed the set speed limit. The system resumes when the vehicle speed drops below the set speed limit, or when you press the **RES** button.

If you intentionally exceed the set speed, a warning appears in the instrument cluster display.

**INTELLIGENT SPEED LIMITER INDICATORS**

**LIM** It illuminates in the instrument cluster display when you switch the system on.

It illuminates grey if the system is in standby mode.

**INTELLIGENT SPEED LIMITER AUDIBLE WARNINGS**

A tone sounds if:

- You unintentionally exceed the set speed, for example when you are going downhill.
- You continue to exceed the set speed.
- The speed sign recognition system detects a speed limit outside the operational speed range, a tone sounds and the system returns to standby mode.

**SWITCHING FROM INTELLIGENT SPEED LIMITER TO SPEED LIMITER - VEHICLES WITH: SYNC 2.5**

You can change between intelligent speed limiter and normal speed limiter using the instrument cluster display. Intelligent speed limiter allows you to limit the vehicle speed to the maximum speed limit detected by the speed sign recognition system. Normal speed limiter allows you to manually limit the vehicle speed using controls on the steering wheel.

1. Using the instrument cluster display controls on the steering wheel, select **Settings**.
2. Select **Driver assistance**.
3. Select **Speed limiter**.
4. Switch *Intelligent* off.

**Note:** If you switch intelligent speed limiter off, the system defaults to manual speed limiter. You can manually set the speed limiter using the controls on the steering wheel.

**SWITCHING FROM INTELLIGENT SPEED LIMITER TO SPEED LIMITER - VEHICLES WITH: SYNC 3**

You can change between intelligent speed limiter and normal speed limiter using the center display. Intelligent speed limiter allows you to limit the vehicle speed to the maximum speed limit detected by the speed sign recognition system. Normal speed limiter allows you to manually limit the vehicle speed using controls on the steering wheel.

1. Press *Settings* on the touchscreen.
2. Press *Driver Assistance*.
3. Press *Speed Limiter*.
4. Switch *Intelligent* off.

**Note:** If you switch intelligent speed limiter off, the system defaults to manual speed limiter. You can manually set the speed limiter using the controls on the steering wheel.

**SWITCHING FROM INTELLIGENT SPEED LIMITER TO SPEED LIMITER - VEHICLES WITH: SYNC 4**

You can change between intelligent speed limiter and normal speed limiter using the center display. Intelligent speed limiter allows you to limit the vehicle speed to the maximum speed limit detected by the speed sign recognition system. Normal speed limiter allows you to manually limit the vehicle speed using controls on the steering wheel.

1. Press *Features* on the touchscreen.
2. Press *Driver Assistance*.
3. Press *Speed Limiter*.
4. Switch *Intelligent Speed Limiter* off.

**Note:** If you switch intelligent speed limiter off, the system defaults to manual speed limiter. You can manually set the speed limiter using the controls on the steering wheel.

**INTELLIGENT SPEED LIMITER – TROUBLESHOOTING**

**INTELLIGENT SPEED LIMITER – FREQUENTLY ASKED QUESTIONS**

Why does a warning appear in the instrument cluster display?

- The vehicle speed exceeds the current set speed.
- The system detects a maximum speed limit that is lower than the current vehicle speed.
- You intentionally exceed the set speed.
WHAT IS THE LANE KEEPING SYSTEM

The lane keeping system is a driving aid designed to provide temporary steering assistance or steering wheel vibration when it detects an unintended lane departure.

HOW DOES THE LANE KEEPING SYSTEM WORK

The system is designed to alert you by providing temporary steering assistance or steering wheel vibration when it detects an unintended lane departure. The system detects and tracks the road lane markings using a camera mounted behind the interior mirror. When you switch the system on, a graphic of lane markings appears in the instrument cluster display.

Note: The system works when the camera can detect at least one lane marking or the edge of the road.

LANE KEEPING SYSTEM PRECAUTIONS

⚠️ WARNING: You are responsible for controlling your vehicle at all times. The system is designed to be an aid and does not relieve you of your responsibility to drive with due care and attention. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

⚠️ WARNING: The system may not function if the sensor is blocked.

⚠️ WARNING: The sensor may incorrectly track lane markings as other structures or objects. This can result in a false or missed warning.

⚠️ WARNING: In cold and severe weather conditions the system may not function. Rain, snow and spray can all limit sensor performance.

⚠️ WARNING: Large contrasts in outside lighting can limit sensor performance.

⚠️ WARNING: The system will not operate if the sensor cannot track the road lane markings.

⚠️ WARNING: If damage occurs in the immediate area surrounding the sensor, have your vehicle checked as soon as possible.

⚠️ WARNING: The system may not correctly operate if your vehicle is fitted with a suspension kit not approved by us.
LANE KEEPING SYSTEM LIMITATIONS

The system only operates when the vehicle speed is greater than approximately 65 km/h (40 mph).

The system may not correctly operate in any of the following conditions:

- The system does not detect at least one lane marking or the edge of the road.
- You switch the turn signals on.
- You apply direct steering, accelerate fast or brake hard.
- The vehicle speed is less than 65 km/h (40 mph).
- The anti-lock brake, stability control or traction control system activates.
- Narrow lane width.

The system may not correct lane positioning in any of the following conditions:

- High winds.
- Uneven road surfaces.
- Heavy or uneven loads.
- Incorrect tire pressure.

SWITCHING THE LANE KEEPING SYSTEM ON AND OFF

Press the button on the turn signal stalk.

SWITCHING THE LANE KEEPING SYSTEM MODE - VEHICLES WITH: SYNC 3

1. Press Settings on the touchscreen.
2. Press Driver Assistance.
3. Press Lane-Keeping System.
4. Press Lane-Keeping Mode.
5. Select a setting.

SWITCHING THE LANE KEEPING SYSTEM MODE - VEHICLES WITH: SYNC 4

1. Press Features on the touchscreen.
2. Press Driver Assistance.
3. Press Lane-Keeping System.
4. Press Lane-Keeping Mode.
5. Select a setting and press the OK button.
SWITCHING THE LANE KEEPING SYSTEM MODE - VEHICLES WITH: SYNC 2.5

1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Driver assistance.
3. Select Lane keeping system.
4. Select Mode.
5. Select a setting and press the OK button.

LANE KEEPING SYSTEM SETTINGS - VEHICLES WITH: SYNC 2.5

You can select one of the three modes in the instrument cluster display:
• Alert mode.
• Aid mode.
• Alert and aid mode.

Note: The system remembers the last mode when you start your vehicle. If the system detects a MyKey, the mode is set to alert.

LANE KEEPING SYSTEM SETTINGS - VEHICLES WITH: SYNC 3/SYNC 4

You can select one of the three modes on the touchscreen:
• Alert mode.
• Aid mode.
• Alert and aid mode.

Note: The system remembers the last mode when you start your vehicle. If the system detects a MyKey, the mode is set to alert.

ALERT MODE

WHAT IS ALERT MODE

Alert mode provides steering wheel vibration when it detects an unintended lane departure.

HOW DOES ALERT MODE WORK

When in alert mode, the lane keeping system alerts you by vibrating the steering wheel if it detects an unintended lane departure.

ADJUSTING THE STEERING WHEEL VIBRATION INTENSITY

1. Press Features on the touchscreen.
2. Press Driver Assistance.
3. Press Lane-Keeping System.
4. Press Lane-Keeping Intensity.
5. Select a setting and press the OK button.

Note: This setting does not affect the aid mode.
AID MODE

WHAT IS AID MODE
Aid mode provides temporary steering assistance toward the center of the lane.

HOW DOES AID MODE WORK

The lane keeping system aids you when an unintentional lane departure occurs. The system provides a small steering input to move your vehicle towards the center of the lane.

Note: When aid mode is on and the system does not detect any steering activity for a short period of time, for example lightly holding the steering wheel, the system alerts you to put your hands on the steering wheel.

Note: The aid mode becomes active again after you have returned your vehicle to the center of the lane.

ALERT AND AID MODE

WHAT IS ALERT AND AID MODE
Alert and aid mode combines both, alert mode and aid mode.

HOW DOES ALERT AND AID MODE WORK
Alert and aid mode provides temporary steering assistance toward the lane center when the system detects an unintended lane departure. If your vehicle continues drifting out of the lane, the steering wheel vibrates.

Note: The diagram illustrates general zone coverage. It does not provide exact zone parameters.

LANE KEEPING SYSTEM INDICATORS - VEHICLES WITH: 4.2 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

It illuminates in the instrument cluster display when you switch the system on and aid mode or alert and aid mode are selected.

It illuminates in the instrument cluster display when you switch the system on and alert mode is selected.
**LANE KEEPING SYSTEM INDICATORS - VEHICLES WITH: 12.3 INCH INSTRUMENT CLUSTER DISPLAY SCREEN**

When you switch the system on, a graphic of lane markings appears in the instrument cluster display.

The lane markings illuminate green or white if the system is available.

The lane markings illuminate grey if the system is unavailable.

The lane markings do not display if the system is off.

**BLIND SPOT ASSIST - VEHICLES WITH: BLIND SPOT INFORMATION SYSTEM, VEHICLES WITHOUT: TRAILER TOW**

**WHAT IS BLIND SPOT ASSIST**

Blind spot assist is an extension of the lane keeping system that provides a blind spot warning and steering assistance during lane changes if it detects adjacent vehicles.

**HOW DOES BLIND SPOT ASSIST WORK**

Activate and deactivate the system using the lane keeping system button on the turn signal stalk.

During lane changes, the design of the blind spot assist detects vehicles in, or approaching, your blind spot and provides a warning, plus steering assistance to direct your vehicle back into your lane.

When active, this system functions with or without the use of turn signals and hazard flashers.

You must keep your hands on the steering wheel at all times.
BLIND SPOT ASSIST LIMITATIONS

All system limitations present in the basic lane keeping system also apply to blind spot assist.

Blind spot assist does not function under the following conditions:

- When none or only one of the two lane markings are detected.
- One or both rear radar sensors become blocked or faulty.
- A trailer is attached to your vehicle.

Note: Bike carriers and cargo racks could cause false alerts due to obstruction of the sensor. We recommend switching the feature off when using a bike carrier or a cargo rack.

BLIND SPOT ASSIST INDICATORS

The lane keeping aid warning lamp or yellow lane marking in your instrument cluster indicate blind spot assist activation. In addition, the blind spot information system alert indicator flashes on the exterior mirror on the same side as the detection. For more information See Blind Spot Information System (page 321).

Note: The system does not recognize the trailer, if you attach a trailer without electrical connectors. We recommend to switch off blind spot assist if you attach a trailer without electrical connectors.

Blind spot assist could have difficulty detecting hazards under the following conditions:

- If a vehicle is approaching in an adjacent lane at a relative speed much higher than your vehicle.
- Bad weather conditions are present that obstruct the sensors.

BLIND SPOT ASSIST WITH TRAILER COVERAGE - VEHICLES WITH: BLIND SPOT INFORMATION SYSTEM/ TRAILER TOW

WHAT IS BLIND SPOT ASSIST WITH TRAILER COVERAGE

Blind spot assist with trailer coverage is an extension of the lane keeping system that provides a blind spot warning and steering assistance during lane changes if it detects adjacent vehicles.

Note: When attaching a trailer you must configure it so the system can recognize it. See Blind Spot Information System With Trailer Coverage (page 323).

HOW DOES BLIND SPOT ASSIST WITH TRAILER COVERAGE WORK

Activate and deactivate the system using the lane keeping system button on the turn signal stalk.

During lane changes, the design of the blind spot assist with trailer coverage detects vehicles in, or approaching, your blind spot and provides a warning, plus steering assistance to direct your vehicle back into your lane.

If a supported trailer is connected, the function is reduced to only detecting vehicles on both sides of the vehicle and trailer, extending rearward from the exterior mirrors to the end of the trailer. See Blind Spot Information System With Trailer Coverage (page 323).
When active, this system functions with or without the use of turn signals and hazard flashers.

You must keep your hands on the steering wheel at all times.

**BLIND SPOT ASSIST WITH TRAILER COVERAGE LIMITATIONS**

All system limitations present in the basic lane keeping system also apply to blind spot assist with trailer coverage.

Blind spot assist with trailer coverage does not function under the following conditions:

- When none or only one of the two lane markings are detected.
- One or both rear radar sensors become blocked or faulty.
- The attached trailer is not correctly configured or it is not supported by the system. See **Blind Spot Information System With Trailer Coverage** (page 323).

**Note:** Blind spot assist with trailer coverage could have reduced performance if you attach a trailer to your vehicle.

**Note:** The system does not recognize the trailer, if you attach a trailer without electrical connectors. We recommend to switch off blind spot assist with trailer coverage if you attach a trailer without electrical connectors.

Blind spot assist with trailer coverage could have difficulty detecting hazards under the following conditions:

- If a vehicle is approaching in an adjacent lane at a relative speed much higher than your vehicle.
- Bad weather conditions are present that obstruct the sensors.
- Attaching bike carriers or cargo racks could cause false alerts due to obstruction of the sensor.

WHAT IS BLIND SPOT INFORMATION SYSTEM

Blind spot information system is designed to detect vehicles that may have entered the blind spot zone.

HOW DOES BLIND SPOT INFORMATION SYSTEM WORK

The system is designed to detect vehicles that may have entered the blind spot zone. The detection area is on both sides of your vehicle, extending rearward from the exterior mirrors to approximately 4 m (13 ft) beyond the rear bumper. The detection area extends to approximately 18 m (59 ft) beyond the rear bumper when the vehicle speed is greater than 48 km/h (30 mph) to alert you of faster approaching vehicles.

WARNING: Do not use the blind spot information system as a replacement for using the interior and exterior mirrors or looking over your shoulder before changing lanes. The blind spot information system is not a replacement for careful driving.

WARNING: The system may not operate properly during severe weather conditions, for example snow, ice, heavy rain and spray. Always drive with due care and attention. Failure to take care may result in a crash.

BLIND SPOT INFORMATION SYSTEM LIMITATIONS

The system does not operate in park (P) or reverse (R).

Note: The system does not prevent contact with other vehicles. It is not designed to detect parked vehicles, pedestrians, animals or other infrastructures.

Note: The system could not alert you if a vehicle quickly passes through the detection zone.

Note: Blocked sensors could affect system performance.

Note: The system may not correctly operate when towing a trailer. For vehicles with a trailer tow module and tow bar approved by us, the system turns off when you attach a trailer. For vehicles with an aftermarket trailer tow module or tow bar, we recommend that you switch the system off when you attach a trailer.
**BLIND SPOT INFORMATION SYSTEM REQUIREMENTS - AUTOMATIC TRANSMISSION**

The system turns on when all of the following occur:

- You start your vehicle.
- You shift into drive (D).
- The vehicle speed is greater than 10 km/h (6 mph).

*Note: The system does not operate in park (P) or reverse (R).*

---

**BLIND SPOT INFORMATION SYSTEM REQUIREMENTS - MANUAL TRANSMISSION**

The system turns on when all of the following occur:

- You start your vehicle.
- The vehicle speed is greater than 10 km/h (6 mph).

*Note: The system does not operate in reverse (R).*

---

**SWITCHING BLIND SPOT INFORMATION SYSTEM ON AND OFF**

1. Press **Features** on the touchscreen.
2. Press **Driver Assistance**.
3. Switch **Blind Spot Information System** on or off.

When you switch blind spot information system off, a warning lamp illuminates and a message displays. When you switch the system on or off, the alert indicators flash twice.

*Note: The system remembers the last setting when you start your vehicle.*

---

To permanently switch the system off, contact an authorized dealer.

---

**LOCATING THE BLIND SPOT INFORMATION SYSTEM SENSORS**

The sensors are behind the rear bumper on both sides of your vehicle.

*Note: Keep the sensors free from snow, ice and large accumulations of dirt.*

*Note: Do not cover the sensors with bumper stickers, repair compound or other objects.*

*Note: Blocked sensors could affect system performance.*

If the sensors are blocked, a message may appear in the instrument cluster display. The alert indicators remain illuminated but the system does not alert you.
The blind spot information system with trailer coverage is designed to detect vehicles that could have entered the blind spot zone.

The blind spot information system with trailer coverage is designed to detect vehicles that could have entered the blind spot zone. The detection area is on both sides of your vehicle and trailer, extending rearward from the exterior mirrors to the end of your trailer. When you attach a trailer and have set up a trailer, the blind spot information system with trailer tow becomes active when driving forward above 10 km/h (6 mph).

You can set up the trailer length, select a trailer or switch blind spot information system with trailer tow off.

Blind Spot Information System

BLIND SPOT INFORMATION SYSTEM WITH TRAILER COVERAGE

WHAT IS BLIND SPOT INFORMATION SYSTEM WITH TRAILER COVERAGE

The system remembers the last trailer setting when you start your vehicle.

BLIND SPOT INFORMATION SYSTEM WITH TRAILER COVERAGE LIMITATIONS

Some trailers may cause a slight change in system performance:

- Wide box trailers, especially those wider than the towing vehicle, may cause false alerts to occur when driving next to infrastructure or near parked cars. A false alert may also occur while making a 90-degree turn or driving through a roundabout.
- Wide trailers that have a total length greater than 6 m (20 ft) may cause delayed alerts when a vehicle is passing at high speed.
- Box trailers that have a width greater than 2.4 m (7.9 ft) may cause early alerts when you pass a vehicle.
- Clam shell or V-Nose box trailers with a width greater than 2.4 m (7.9 ft) may cause delayed alerts when a vehicle traveling the same speed as your vehicle merges lanes.
### SETTING A TRAILER LENGTH - VEHICLES WITH: SYNC 3

1. Press **Settings** on the touchscreen.
2. Press **Driver Assistance**.
3. Press **Blind Spot Information System**.
4. Press **Trailer BLIS**.
5. Press **Set Trailer Lengths**.
6. Press **Trailer A**, **Trailer B** or **Trailer C**.
7. Select the trailer length at the closest available value.

**Note:** Proper measurement and measurement entry are required for the system to function as designed.

**Note:** If you attach load carriers such as bike racks or cargo racks with electrical lighting, enter a length of 1 m (3 ft). Cross Traffic Alert remains on.

### SETTING A TRAILER LENGTH - VEHICLES WITH: SYNC 4

1. Press **Features** on the touchscreen.
2. Press **Towing**.
3. Press **Add trailer** and follow the instructions on the screen.
4. Press **Trailer BLIS** and follow the instructions on the screen.

**Note:** Proper measurement and measurement entry are required for the system to function as designed.

**Note:** If you attach load carriers such as bike racks or cargo racks with electrical lighting, enter a length of 1 m (3 ft). Cross Traffic Alert remains on.

### SELECTING A TRAILER - VEHICLES WITH: SYNC 3

If you select a trailer in the center display prior to connecting a trailer, the system loads that configuration and an information message appears in the instrument cluster display when you connect the trailer.
1. Press **Settings** on the touchscreen.
2. Press **Driver Assistance**.
3. Press **Blind Spot Information System**.
4. Press **Trailer BLIS**.
5. Press **Select Trailer**.
6. Select a setting and press the **OK** button.

**SELECTING A TRAILER - VEHICLES WITH: SYNC 4**

If you select a trailer in the center display prior to connecting a trailer, the system loads that configuration and an information message appears in the instrument cluster display when you connect the trailer.

1. Press **Features** on the touchscreen.
2. Press **Towing**.
3. Press **Select Active Trailer**.
4. Select an available trailer.

**BLIND SPOT INFORMATION SYSTEM INDICATORS**

When the system detects a vehicle, an alert indicator illuminates in the exterior mirror on the side the approaching vehicle is coming from. If you turn the turn signals on for that side of your vehicle, the alert indicator flashes.

**Note:** The system could not alert you if a vehicle quickly passes through the detection zone.

**BLIND SPOT INFORMATION SYSTEM – TROUBLESHOOTING**

**BLIND SPOT INFORMATION SYSTEM – WARNING LAMPS**

If the system detects a fault, it illuminates in the instrument cluster and a message appears in the instrument cluster display. Have your vehicle checked as soon as possible.

**BLIND SPOT INFORMATION SYSTEM – INFORMATION MESSAGES**

WHAT IS CROSS TRAFFIC ALERT

The system is designed to alert you of vehicles approaching from the sides behind your vehicle when you shift into reverse (R). If you continue to reverse after the system alerts you, the system is designed to apply the brakes if it still detects an approaching vehicle. If the system applies the brakes, a message appears in the instrument cluster display.

Note: The system does not apply the brakes if you override it by firmly pressing the accelerator pedal.

HOW DOES CROSS TRAFFIC ALERT WORK

The system is designed to detect vehicles that approach at a speed between 6 km/h (4 mph) and 60 km/h (37 mph). Coverage decreases when the sensors are partially, mostly or fully obstructed. Slowly reversing helps increase the coverage area and effectiveness.

The system turns on when you start the engine and you shift into reverse (R). The system turns off when you shift out of reverse (R).

The sensor on the left-hand side is only partially obstructed and zone coverage on the right-hand side is maximized.

Zone coverage also decreases when parking at narrow angles. The sensor on the left-hand side is mostly obstructed and zone coverage on that side is severely reduced.

CROSS TRAFFIC ALERT PRECAUTIONS

WARNING: Do not use the cross traffic alert system as a replacement for using the interior and exterior mirrors or looking over your shoulder before reversing out of a parking space. The cross traffic alert system is not a replacement for careful driving.

WARNING: The system may not operate properly during severe weather conditions, for example snow, ice, heavy rain and spray. Always drive with due care and attention. Failure to take care may result in a crash.

CROSS TRAFFIC ALERT LIMITATIONS

The system may not correctly operate when any of the following occur:

- The sensors are blocked.
- Adjacently parked vehicles or objects are obstructing the sensors.
Cross Traffic Alert

- Vehicles approach at speeds less than 6 km/h (4 mph) or greater than 60 km/h (37 mph).
- The vehicle speed is greater than 12 km/h (7 mph).
- You reverse out of an angled parking space.

**Note:** The system may not correctly operate when towing a trailer. For vehicles with a trailer tow module and tow bar approved by us, the system turns off when you attach a trailer. For vehicles with an aftermarket trailer tow module or tow bar, we recommend that you switch the system off when you attach a trailer.

**SWITCHING CROSS TRAFFIC ALERT ON AND OFF**

1. Press *Features* on the touchscreen.
2. Press *Driver Assistance*.
3. Switch *Cross Traffic Alert* on or off.

**Note:** The system switches on every time you switch the ignition on. To permanently switch the system off, contact an authorized dealer.

**LOCATING THE CROSS TRAFFIC ALERT SENSORS**

The sensors are behind the rear bumper on both sides of your vehicle.

**Note:** Keep the sensors free from snow, ice and large accumulations of dirt.

**Note:** Do not cover the sensors with bumper stickers, repair compound or other objects.

**Note:** Blocked sensors could affect system performance.

If the sensors are blocked, a message may appear in the instrument cluster display when you shift into reverse (R).

**CROSS TRAFFIC ALERT WITH TRAILER COVERAGE**

**WHAT IS CROSS TRAFFIC ALERT WITH TRAILER COVERAGE**

Cross traffic alert with trailer coverage allows the system to continue operating with a trailer or trailer hitch attachment.

**CROSS TRAFFIC ALERT WITH TRAILER COVERAGE LIMITATIONS**

Cross traffic alert remains on when you attach a trailer in vehicles that come with blind spot information system with trailer coverage under the following conditions:

- You connect a trailer.
- The trailer is a bike rack or cargo rack with a maximum length of 1 m (3 ft).
- You set the trailer length to 1 m (3 ft) in the center display.

**Note:** The system may not correctly operate when towing a trailer. For vehicles with an approved trailer tow module and tow bar, the system turns off when you attach a trailer. For vehicles with an aftermarket trailer tow module or tow bar, we recommend that you switch the system off when you attach a trailer.
CROSS TRAFFIC ALERT INDICATORS

When the system detects an approaching vehicle, a tone sounds, an indicator illuminates in the relevant exterior mirror and arrows appear in the center display to show which side the approaching vehicle is coming from.

Note: If the arrows do not display, a message appears in the instrument cluster display.

Note: In exceptional conditions, the system could alert you or apply the brakes, even when there is nothing in the detection zone, for example a vehicle passing further away from your vehicle.

CROSS TRAFFIC ALERT – TROUBLESHOOTING

CROSS TRAFFIC ALERT – WARNING LAMPS

If the system malfunctions, it illuminates in the instrument cluster and a message appears in the instrument cluster display. Have your vehicle checked as soon as possible.

Pre-Collision Assist

**WHAT IS PRE-COLLISION ASSIST**

Pre-collision assist detects other road users and warns you of their presence. If you do not respond, the system automatically applies the brakes.

**HOW DOES PRE-COLLISION ASSIST WORK**

The system is active at 5 km/h (3 mph) and above. Pedestrian and cyclist detection is active at speeds up to 80 km/h (50 mph).

<table>
<thead>
<tr>
<th>Level of Functionality</th>

<td>The system is designed to apply the brakes if it detects a crash is imminent. This may help reduce impact or avoid the crash.</td>
</tr>
</tbody>
</table>
**Pre-Collision Assist**

**HOW DOES PRE-COLLISION ASSIST WITH INTERSECTION ASSIST WORK**

The pre-collision assist system could apply brakes if you are turning across an oncoming vehicle’s path. Detection of vehicles driving in an oncoming direction is active if your vehicle is driving at speeds up to 30 km/h (18.6 mph).

**PRE-COLLISION ASSIST PRECAUTIONS**

**WARNING:** You are responsible for controlling your vehicle at all times. The system is designed to be an aid and does not relieve you of your responsibility to drive with due care and attention. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

**WARNING:** The system may operate with reduced function during cold and inclement weather conditions. Snow, ice, rain, spray and fog can adversely affect the system. Keep the front camera and radar free of snow and ice. Failure to follow this instruction may result in the loss of control of your vehicle, serious personal injury or death.

**WARNING:** The system does not operate properly if your vehicle has a non-Ford windshield. Do not carry out windshield repairs in the area around the sensor.

**WARNING:** System performance could be reduced in situations where the vehicle camera has limited detection capability. These situations include but are not limited to direct or low sunlight, vehicles at night without tail lights, unconventional vehicle types, pedestrians or cyclists with complex backgrounds, running pedestrians or fast moving cyclists, partly obscured pedestrians or cyclists, pedestrians or cyclists that the system cannot distinguish from a group. Failure to take care may result in the loss of control of your vehicle, personal injury or death.

**WARNING:** The Pre-Collision Assist system with brake support cannot help prevent all collisions. Do not rely on this system to replace your judgment and the need to maintain correct distance and speed.

**PRE-COLLISION ASSIST LIMITATIONS**

The system is not designed to detect animals.
The system is not designed to detect vehicles that are traveling in a different direction.

LOCATING THE PRE-COLLISION ASSIST SENSORS - VEHICLES WITHOUT: ADAPTIVE CRUISE CONTROL

The camera is mounted behind the interior mirror.

**Note:** Keep the sensors free from snow, ice and large accumulations of dirt.

**Note:** Do not clean the sensors with sharp objects.

**Note:** If your vehicle sustains damage leaving the sensors misaligned, this may cause inaccurate measurements or false alerts.

Blocked sensors could affect system accuracy. A message could appear in the instrument cluster display.

LOCATING THE PRE-COLLISION ASSIST SENSORS - VEHICLES WITH: ADAPTIVE CRUISE CONTROL

The camera is mounted behind the interior mirror.

The radar sensor is behind the front grille below the license plate.

**Note:** Keep the sensors free from snow, ice and large accumulations of dirt.

**Note:** Do not clean the sensors with sharp objects.

**Note:** If your vehicle sustains damage leaving the sensors misaligned, this may cause inaccurate measurements or false alerts.

Blocked sensors could affect system accuracy. A message could appear in the instrument cluster display.
Pre-Collision Assist

DISTANCE INDICATION

WHAT IS DISTANCE INDICATION

Distance indication displays in the instrument cluster display the time gap to vehicles ahead of you traveling in the same direction.

Note: The graphic does not display if you switch on cruise control or adaptive cruise control.

SWITCHING DISTANCE INDICATION ON AND OFF - VEHICLES WITH: SYNC 2.5

1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Driver assistance.
3. Select Pre-collision Assist.
4. Switch Distance indication on or off.

DISTANCE ALERT

WHAT IS DISTANCE ALERT

A warning lamp illuminates if the distance to the vehicle ahead is small.

Note: The warning lamp does not illuminate if cruise control or adaptive cruise control is active.
Pre-Collision Assist

ADJUSTING THE SENSITIVITY OF DISTANCE ALERT - VEHICLES WITH: SYNC 2.5

1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Driver assistance.
3. Select Pre-collision Assist.
4. Select Alert sensitivity.
5. Select a setting and press the OK button.

ADJUSTING THE SENSITIVITY OF DISTANCE ALERT - VEHICLES WITH: SYNC 3

1. Press Settings on the touchscreen.
2. Press Driver Assistance.
3. Press Pre-Collision Assist.
5. Select a setting and press the OK button.

ADJUSTING THE SENSITIVITY OF DISTANCE ALERT - VEHICLES WITH: SYNC 4

1. Press Features on the touchscreen.
2. Press Driver Assistance.
3. Press Pre-Collision Assist.
5. Select a setting and press the OK button.

AUTOMATIC EMERGENCY BRAKING

WHAT IS AUTOMATIC EMERGENCY BRAKING

Automatic emergency braking is an active safety system that activates the vehicle brakes when a potential crash is detected.

SWITCHING AUTOMATIC EMERGENCY BRAKING ON AND OFF - VEHICLES WITH: SYNC 2.5

1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Driver assistance.
3. Select Pre-collision Assist.
4. Switch Active braking on or off.

SWITCHING AUTOMATIC EMERGENCY BRAKING ON AND OFF - VEHICLES WITH: SYNC 3

1. Press Settings on the touchscreen.
2. Press Driver Assistance.
3. Press Pre-Collision Assist.
4. Switch Active Braking on or off.

SWITCHING AUTOMATIC EMERGENCY BRAKING ON AND OFF - VEHICLES WITH: SYNC 4

1. Press Features on the touchscreen.
2. Press Driver Assistance.
3. Press Pre-Collision Assist.
4. Switch Automatic Emergency Braking on or off.
EVASIVE STEERING ASSIST

WHAT IS EVASIVE STEERING ASSIST

If your vehicle is rapidly approaching a road user, evasive steering assist helps you steer around the road user.

After you turn the steering wheel in an attempt to avoid a crash with the road user, the system applies additional steering torque to help you steer around the road user. After you pass the road user, the system applies steering torque when you turn the steering wheel to steer back into the lane. The system deactivates after you fully pass the road user.

Note: Road users are defined as pedestrians or bicyclists in your vehicle’s path or another stationary vehicle in the same lane or a vehicle traveling in the same lane in the same direction as you. See Pre-Collision Assist Precautions (page 331).

EVASIVE STEERING ASSIST LIMITATIONS

Evasive steering assist only activates when all the following occur:

- Automatic emergency braking and evasive steering assist are on.
- The system detects a road user ahead and starts to apply the brakes.
- You significantly turn the steering wheel to steer around a road user.

Note: Evasive steering assist does not automatically steer around a road user. If you do not turn the steering wheel, evasive steering assist does not activate.

Note: Evasive steering assist does not activate if the distance to the road user ahead is too small and the system cannot avoid a crash.

SWITCHING EVASIVE STEERING ASSIST ON AND OFF - VEHICLES WITH: SYNC 2.5

1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Driver assistance.
3. Select Pre-collision Assist.
4. Switch Evasive steering on or off.

Note: Automatic emergency braking and evasive steering assist turn on each time you switch the ignition on.

Note: If you turn automatic emergency braking off, evasive steering assist also turns off.

SWITCHING EVASIVE STEERING ASSIST ON AND OFF - VEHICLES WITH: SYNC 3

1. Press Settings on the touchscreen.
2. Press Driver Assistance.
3. Press Pre-Collision Assist.
4. Switch Evasive Steering on or off.

Note: Automatic emergency braking and evasive steering assist turn on every time you switch the ignition on.

Note: If you turn automatic emergency braking off, evasive steering assist turns off.

SWITCHING EVASIVE STEERING ASSIST ON AND OFF - VEHICLES WITH: SYNC 4

1. Press Features on the touchscreen.
2. Press Driver Assistance.
3. Press Pre-Collision Assist.
4. Switch Evasive Steering Assist on or off.
Pre-Collision Assist

**Note:** Automatic emergency braking and evasive steering assist turn on each time you switch the ignition on.

**Note:** If you turn automatic emergency braking off, evasive steering assist also turns off.

### PRE-COLLISION ASSIST – TROUBLESHOOTING

#### PRE-COLLISION ASSIST – WARNING LAMPS

- It illuminates if your vehicle rapidly approaches another vehicle, to warn you of the risk of a crash with the vehicle in front of you.
- It could illuminate red if the distance to the vehicle ahead is small.
- It illuminates when the system is not available.

### PRE-COLLISION ASSIST – INFORMATION MESSAGES

</tr>
<tr>
<td>Excessive heat around the camera.</td>
<td>Wait for a short period of time. The message should clear when the temperature around the camera decreases.</td>
</tr>
</tbody>
</table>
Driver Alert

WHAT IS DRIVER ALERT

The system is designed to alert you if it calculates that you are becoming drowsy or if your driving deteriorates.

HOW DOES DRIVER ALERT WORK

The system calculates your alertness level based upon your driving behavior in relation to the lane markings and other factors when the vehicle speed is greater than approximately 65 km/h (40 mph).

The warning system has two stages:
1. A temporary warning is issued to advise you to take a rest. This message only appears for a short time.
2. If you do not rest and the system continues to detect that your driving deteriorates, it issues a further warning. This remains in the instrument cluster display until you cancel it.

DRIVER ALERT PRECAUTIONS

- **WARNING:** You are responsible for controlling your vehicle at all times. The system is designed to be an aid and does not relieve you of your responsibility to drive with due care and attention. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

- **WARNING:** The system may not operate properly if the sensor is blocked. Keep the windshield free from obstruction.

- **WARNING:** Take regular rest breaks if you feel tired. Do not wait for the system to warn you.

WARNING: Certain driving styles may result in the system warning you even if you are not feeling tired.

WARNING: In cold and severe weather conditions the system may not function. Rain, snow and spray can all limit sensor performance.

WARNING: The system will not operate if the sensor cannot track the road lane markings.

WARNING: If damage occurs in the immediate area surrounding the sensor, have your vehicle checked as soon as possible.

WARNING: The system may not correctly operate if your vehicle is fitted with a suspension kit not approved by us.

SWITCHING DRIVER ALERT ON AND OFF - VEHICLES WITH: SYNC 3

1. Press **Settings** on the touchscreen.
2. Press **Driver Assistance**.
3. Switch **Driver Alert** on or off.

*Note: The system remains on or off depending on how it was last set.*

SWITCHING DRIVER ALERT ON AND OFF - VEHICLES WITH: SYNC 4

1. Press **Features** on the touchscreen.
2. Press **Driver Assistance**.
3. Switch **Driver Alert** on or off.
Driver Alert

**Note:** The system remains on or off depending on how it was last set.

**SWITCHING DRIVER ALERT ON AND OFF - VEHICLES WITH: SYNC 2.5**

1. Using the instrument cluster display controls on the steering wheel, select *Settings*.
2. Select *Driver assistance*.
3. Switch *Driver Alert* on or off.

**Note:** The system remains on or off depending on how it was last set.

**RESETTING DRIVER ALERT**

You can reset driver alert by:
- Switching the ignition off and on when your vehicle is stationary.
- Opening and closing the driver door when your vehicle is stationary.

WHAT IS SPEED SIGN RECOGNITION

The system is designed to detect speed limit signs to inform you of the current speed limit.

HOW DOES SPEED SIGN RECOGNITION WORK

Detected speed signs appear in the instrument cluster display. The sensor is behind the interior mirror.

The system turns on when you switch the ignition on and you cannot switch the system off.

Note: Speed sign data provided by the navigation system contains information integrated to the data carrier release.

SPEED SIGN RECOGNITION PRECAUTIONS

WARNING: You are responsible for controlling your vehicle at all times. The system is designed to be an aid and does not relieve you of your responsibility to drive with due care and attention. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

WARNING: The system may not operate properly if the sensor is blocked. Keep the windshield free from obstruction.

Note: Do not carry out windshield repairs in the immediate area surrounding the sensor.

Note: Always fit Ford approved parts when replacing headlamp bulbs. Other bulbs could reduce system performance.

SPEED SIGN RECOGNITION LIMITATIONS

The system could not detect all speed signs and could incorrectly read signs.

In cold and severe weather conditions the system could not function. Rain, snow, spray and large contrasts in lighting can all prevent the sensor from correctly functioning.

If your vehicle has a suspension kit not approved by us, the system could not correctly function.

SPEED SIGN RECOGNITION INDICATORS

When the system detects a speed limit sign, the speed limit appears in the instrument cluster display.

Note: If your vehicle has a navigation system, stored speed sign data could influence the indicated speed limit value.
**Speed Sign Recognition**

**SETTING THE SPEED SIGN RECOGNITION SPEED WARNING - VEHICLES WITH: SYNC 3**

1. Press *Settings* on the touchscreen.
2. Press *Driver Assistance*.
3. Press *Speed Sign Recognition*.
4. Switch *Speed Warning* on or off.

*Note:* The system remembers the last setting when you start your vehicle.

**SETTING THE SPEED SIGN RECOGNITION SPEED WARNING - VEHICLES WITH: SYNC 4**

1. Press *Features* on the touchscreen.
2. Press *Driver Assistance*.
3. Press *Speed Limit Assist*.
4. Switch *Speed Warning* on or off.

*Note:* The system remembers the last setting when you start your vehicle.

**SETTING THE SPEED SIGN RECOGNITION SPEED WARNING - VEHICLES WITH: SYNC 2.5**

1. Using the instrument cluster display controls on the steering wheel, select *Settings*.
2. Select *Driver assistance*.
5. Select *Activate speed warning*.
6. Switch *Overspeed chime* on or off.

**SETTING THE SPEED SIGN RECOGNITION SPEED TOLERANCE - VEHICLES WITH: SYNC 3**

You can set the system speed warning to alert you when the vehicle speed exceeds the speed limit recognized by the system by a certain speed tolerance.

1. Press *Settings* on the touchscreen.
2. Press *Driver Assistance*.
3. Press *Speed Sign Recognition*.
4. Press *Speed Warning*.
5. Press *Tolerance*.
6. Select a setting and press the OK button.

*Note:* The system remembers the last setting when you start your vehicle.

**SETTING THE SPEED SIGN RECOGNITION SPEED TOLERANCE - VEHICLES WITH: SYNC 4**

You can set the system speed warning to alert you when the vehicle speed exceeds the speed limit recognized by the system by a certain speed tolerance.

1. Press *Features* on the touchscreen.
2. Press *Driver Assistance*.
3. Press *Speed Sign Recognition*.
4. Press *Speed Warning*.
5. Select a setting and press the OK button.
**Speed Sign Recognition**

**SETTING THE SPEED SIGN RECOGNITION SPEED TOLERANCE - VEHICLES WITH: SYNC 2.5**

You can set the system speed warning to alert you when the vehicle speed exceeds the speed limit recognized by the system by a certain speed tolerance.

1. Using the instrument cluster display controls on the steering wheel, select **Settings**.
2. Select **Driver assistance**.
3. Select **Traffic sign recognition**.
4. Select **Activate Traff. Sign Recog.**.
5. Select **Activate speed warning**.
6. Select **Speed warning**.
7. Select a setting and press the **OK** button.

**Note:** The system remembers the last setting when you start your vehicle.

What is Traffic Sign Recognition

The system is designed to detect traffic signs to inform you of the current speed limit and overtaking regulations.

How Does Traffic Sign Recognition Work

Detected traffic signs appear in the instrument cluster display. The sensor is behind the interior mirror.

The system turns on when you switch the ignition on and you cannot switch the system off.

The system detects recognizable traffic signs, for example:

- Speed limit signs.
- No overtaking signs.
- Speed limit cancellation signs.
- No overtaking cancellation signs.

Note: Traffic sign data provided by the navigation system contains information integrated to the data carrier release.

Traffic Sign Recognition Precautions

WARNING: You are responsible for controlling your vehicle at all times. The system is designed to be an aid and does not relieve you of your responsibility to drive with due care and attention. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

WARNING: The system may not operate properly if the sensor is blocked. Keep the windshield free from obstruction.

Note: Do not carry out windshield repairs in the immediate area surrounding the sensor.

Note: Always fit Ford approved parts when replacing headlamp bulbs. Other bulbs could reduce system performance.

Traffic Sign Recognition Limitations

The system could not detect all speed signs and could incorrectly read signs.

In cold and severe weather conditions the system could not function. Rain, snow, spray and large contrasts in lighting can all prevent the sensor from correctly functioning.

If your vehicle has a suspension kit not approved by us, the system could not correctly function.

Traffic Sign Recognition Indicators

The system can display two traffic signs in parallel.

You can view the status at any time using the instrument cluster display.
Traffic Sign Recognition

The system displays recognizable traffic signs in four stages as follows:
1. All new traffic signs appear brighter than the others in the display.
2. After a predetermined time they display normally.
3. After a predetermined distance they are grayed out.
4. After another predetermined distance they are deleted.

If the system detects a supplementary traffic sign, it displays below the respective traffic sign. For example, when passing a reduced speed limit in wet road conditions sign.

**Note:** If your vehicle has a navigation system, stored traffic sign data may influence the indicated speed limit value.

**SETTING THE TRAFFIC SIGN RECOGNITION SPEED WARNING - VEHICLES WITH: SYNC 2.5**

1. Using the instrument cluster display controls on the steering wheel, select Settings.
2. Select Driver assistance.
5. Select Activate speed warning.
6. Switch Overspeed chime on or off.

**SETTING THE TRAFFIC SIGN RECOGNITION SPEED TOLERANCE - VEHICLES WITH: SYNC 3**

You can set the system speed warning to alert you when the vehicle speed exceeds the speed limit recognized by the system by a certain speed tolerance.

1. Press Settings on the touchscreen.
2. Press Driver Assistance.
4. Press Speed Warning.
5. Press Tolerance.
6. Select a setting and press the OK button.

**Note:** The system remembers the last setting when you start your vehicle.

**SETTING THE TRAFFIC SIGN RECOGNITION SPEED WARNING - VEHICLES WITH: SYNC 4**

1. Press Features on the touchscreen.
2. Press Driver Assistance.
4. Switch Speed Warning on or off.
Traffic Sign Recognition

SETTING THE TRAFFIC SIGN RECOGNITION SPEED TOLERANCE - VEHICLES WITH: SYNC 4

You can set the system speed warning to alert you when the vehicle speed exceeds the speed limit recognized by the system by a certain speed tolerance.

1. Press Features on the touchscreen.
2. Press Driver Assistance.
4. Press Speed Warning.
5. Select a setting and press the OK button.

Wrong Way Alert

WHAT IS WRONG WAY ALERT

The system is designed to alert you if it detects that you are driving the wrong way on a freeway exit road.

HOW DOES WRONG WAY ALERT WORK

The system uses a sensor behind the interior mirror to detect no entry signs and uses information from the navigation system.

If the system detects that you are driving the wrong way on a freeway exit road, a message appears in the instrument cluster display and a tone sounds. The audio system volume mutes and navigation system guidance pauses.

Note: Traffic sign data provided by the navigation system contains information integrated to the data carrier release.

Note: The system is designed to detect traffic signs meeting the Vienna convention.

WRONG WAY ALERT PRECAUTIONS

WARNING: You are responsible for controlling your vehicle at all times. The system is designed to be an aid and does not relieve you of your responsibility to drive with due care and attention. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

WARNING: The system may not operate properly if the sensor is blocked. Keep the windshield free from obstruction.

Note: Do not carry out windshield repairs in the immediate area surrounding the sensor.

Note: Always fit Ford approved parts when replacing headlamp bulbs. Other bulbs could reduce system performance.

Note: In exceptional conditions, the system could alert you even if you are not driving the wrong way on a freeway exit road.

WRONG WAY ALERT LIMITATIONS

The system could not detect all traffic signs and could incorrectly read signs.

If your vehicle has a suspension kit not approved by us, the system could not correctly function.

The system does not operate in some countries. We recommend that you check system availability before use.

In cold and severe weather conditions the system could not function. Rain, snow, spray and large contrasts in lighting can all prevent the sensor from functioning correctly.

The system could not correctly operate in areas under construction or new infrastructure.

SWITCHING WRONG WAY ALERT ON AND OFF

1. Press Features on the touchscreen.
2. Press Driver Assistance.
3. Switch Wrong Way Alert on or off.

LOAD CARRYING PRECAUTIONS

Keep your loaded vehicle weight within its design rating capability, with or without a trailer. Properly loading your vehicle provides maximum return of vehicle design performance. Before you load your vehicle, become familiar with the following terms for determining your vehicle's weight rating, with or without a trailer, from the vehicle's Tire and Loading Information label or Safety Compliance Certification label.

**WARNING:** The appropriate loading capacity of your vehicle can be limited either by volume capacity (how much space is available) or by payload capacity (how much weight the vehicle should carry). Once you have reached the maximum payload of your vehicle, do not add more cargo, even if there is space available. Overloading or improperly loading your vehicle can contribute to loss of vehicle control and vehicle rollover.

**WARNING:** Exceeding the Safety Compliance Certification label vehicle weight limits can adversely affect the performance and handling of your vehicle, cause vehicle damage and can result in the loss of control of your vehicle, serious personal injury or death.

**WARNING:** When loading the roof racks, we recommend you evenly distribute the load, as well as maintain a low center of gravity. Loaded vehicles, with higher centers of gravity, may handle differently than unloaded vehicles. Take extra precautions, such as slower speeds and increased stopping distance, when driving a heavily loaded vehicle.

The gross combined weight must never exceed the Gross Combined Weight Rating.

ROOF RACK

**ROOF RACK PRECAUTIONS - 4-DOOR/5-DOOR, VEHICLES WITH: PANORAMIC ROOF OPENING PANEL**

**WARNING:** Your vehicle is not approved for roof racks. Never install a roof rack to your vehicle.
ROOF RACK PRECAUTIONS - 4-DOOR/5-DOOR/WAGON, VEHICLES WITHOUT: PANORAMIC ROOF OPENING PANEL

**WARNING:** Read and follow the manufacturer's instructions when you are fitting a roof rack.

**WARNING:** When loading the roof racks, we recommend you evenly distribute the load, as well as maintain a low center of gravity. Loaded vehicles, with higher centers of gravity, may handle differently than unloaded vehicles. Take extra precautions, such as slower speeds and increased stopping distance, when driving a heavily loaded vehicle.

**WARNING:** Do not switch off stability control or use Sport or Track mode when carrying a roof load. This could lead to an increased risk of loss of vehicle control, vehicle rollover, personal injury or death.

**Note:** If you use a roof rack, the fuel consumption of your vehicle will be higher and you may experience different driving characteristics.

**Note:** Never place loads directly on the roof panel. The roof panel is not designed to directly carry a load.

You must place loads directly on the crossbars fitted to the roof rack side rails. When using the roof rack system, we recommend that you use genuine Ford accessory crossbars specifically designed for your vehicle.

Make sure that you securely fasten the load. Check the tightness of the load before driving and at each fuel stop.

---

ROOF RACK PRECAUTIONS - WAGON, VEHICLES WITH: PANORAMIC ROOF OPENING PANEL

**WARNING:** Read and follow the manufacturer's instructions when you are fitting a roof rack.

**WARNING:** When loading the roof racks, we recommend you evenly distribute the load, as well as maintain a low center of gravity. Loaded vehicles, with higher centers of gravity, may handle differently than unloaded vehicles. Take extra precautions, such as slower speeds and increased stopping distance, when driving a heavily loaded vehicle.

**WARNING:** Do not switch off stability control or use Sport or Track mode when carrying a roof load. This could lead to an increased risk of loss of vehicle control, vehicle rollover, personal injury or death.

Make sure the moonroof is closed before fitting the cross bars and it remains closed.

You must place loads directly on the crossbars fitted to the roof rack side rails. When using the roof rack system, we recommend that you use genuine Ford accessory crossbars specifically designed for your vehicle.

Make sure that you securely fasten the load. Check the tightness of the load before driving and at each fuel stop.

**Note:** If you use a roof rack, the fuel consumption of your vehicle will be higher and you may experience different driving characteristics.

**Note:** Never place loads directly on the roof panel. The roof panel is not designed to directly carry a load.
Load Carrying

REMOVING AND INSTALLING ROOF RACK CROSSBARS

Fix the cross bars on the rail markings.

ROOF RACK LOAD CAPACITIES - 4-DOOR/5-DOOR/WAGON, VEHICLES WITHOUT: PANORAMIC ROOF OPENING PANEL

The maximum recommended load, evenly distributed on the roof rack is 75 kg (165 lb).

ROOF RACK LOAD CAPACITIES - WAGON, VEHICLES WITH: PANORAMIC ROOF OPENING PANEL

The maximum recommended load, evenly distributed on the roof rack is 75 kg (165 lb).

TOW BAR MOUNTED CARRIER

TOW BAR MOUNTED LOAD CAPACITIES - 5-DOOR

Do not exceed the maximum vertical load on the tow ball. This is the weight of the carrier plus the weight of the load. See Towing Weight Capacities (page 363).

Pay attention to the carrier manufacturer's specifications.

If you are using a bike carrier, the maximum number of allowed bikes is three, with a maximum allowed weight of 60 kg (130 lb).

Load the heaviest item closest to your vehicle.

TOW BAR MOUNTED LOAD CAPACITIES - WAGON

Do not exceed the maximum vertical load on the tow ball. This is the weight of the carrier plus the weight of the load. See Towing Weight Capacities (page 364).

Pay attention to the carrier manufacturer's specifications.

If you are using a bike carrier, the maximum number of allowed bikes is three, with a maximum allowed weight of 60 kg (130 lb).

Load the heaviest item closest to your vehicle.
LUGGAGE COMPARTMENT PRECAUTIONS

⚠️ WARNING: Make sure that you properly secure objects in the luggage compartment. Failure to follow this instruction could result in personal injury in the event of a sudden stop or crash.

⚠️ WARNING: Do not place objects on the luggage cover. Failure to follow this instruction could result in personal injury or death in the event of a sudden stop or crash.

⚠️ WARNING: The appropriate loading capacity of your vehicle can be limited either by volume capacity (how much space is available) or by payload capacity (how much weight the vehicle should carry). Once you have reached the maximum payload of your vehicle, do not add more cargo, even if there is space available. Overloading or improperly loading your vehicle can contribute to loss of vehicle control and vehicle rollover.

⚠️ WARNING: Make sure that you fully close the liftgate to prevent exhaust fumes from entering your vehicle. If you are unable to fully close the liftgate, open the air vents or the windows to allow fresh air to enter your vehicle. Failure to follow this instruction could result in personal injury or death.

⚠️ WARNING: Do not exceed the maximum front and rear axle loads for your vehicle.

Note: When loading long objects into your vehicle, for example pipes, timber or furniture, be careful not to damage the interior trim.

INSTALLING AND REMOVING THE LUGGAGE COMPARTMENT CARGO NET

Luggage retention net anchor points are fitted behind the second row seats.

To install the luggage retention net cassette:

1. Remove the luggage cover.
2. Push the sliders on the cassette toward each other and insert the telescopic bar into the holes on the sidewall behind the rear seat backrests.

Note: Make sure that the end caps with the anti-rotation pin are correctly fitted in the side trim.

3. Pull up the net and insert the ends of the bar into the retainers on the roof.

E78834
Note: Make sure that the bar is pushed forward into the narrow section of the retainers.

4. Reinstall the luggage cover.

INSTALLING AND REMOVING THE LUGGAGE COMPARTMENT COVER - 5-DOOR

To remove the luggage cover:

1. Gently push the retaining clip up and remove it.
2. Raise the luggage cover.
3. Pull the luggage cover backward.

OPENING THE LUGGAGE COVER - WAGON

1. Fully pull the luggage cover out.
2. Securely place the retaining pins in the trim panels on both sides.
Closing the Luggage Cover

1. Slightly pull the luggage cover backward to release the retaining pins from the trim panels on both sides.
2. Slowly roll the luggage cover into the casing.

Removing the Luggage Cover

1. Fully close the luggage cover.
2. Pull the strap toward the rear of your vehicle.

Note: Support the center of the luggage cover when you pull the strap.

Stowing the Luggage Cover

You can stow the luggage cover under the loadspace floor.
LUGGAGE COMPARTMENT ANCHOR POINTS

LUGGAGE COMPARTMENT ANCHOR POINT PRECAUTIONS

**WARNING:** Make sure that you properly secure objects in the luggage compartment. Failure to follow this instruction could result in personal injury in the event of a sudden stop or crash.

**WARNING:** Do not place objects on the luggage cover. Failure to follow this instruction could result in personal injury or death in the event of a sudden stop or crash.

LOCATING THE LUGGAGE COMPARTMENT ANCHOR POINTS - WAGON

LOCATING THE LUGGAGE COMPARTMENT ANCHOR POINTS - 5-DOOR
TOW BALL - VEHICLES WITH: DETACHABLE TOW BALL

TOW BALL PRECAUTIONS

**WARNING:** Do not exceed the lowest rating capacity for your vehicle or trailer hitch. Overloading your vehicle or trailer hitch can impair your vehicle stability and handling. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

**WARNING:** Do not cut, drill, weld or modify the trailer hitch. Modifying the trailer hitch could reduce the hitch rating.

**WARNING:** Always place the tow ball arm in a secure location in your vehicle so it does not become a projectile in a crash. Failure to follow this instruction could result in personal injury or death.

You must detach the tow ball arm when not in use. Securely stow the tow ball arm in the luggage compartment. Never unlock or detach the tow ball arm with a trailer attached.

Do not use any tools to detach or attach the tow ball arm.

**Note:** You can only attach the tow ball arm if it is unlocked.

Tow Ball Arm Safety Checks

After you attach the tow ball arm, check the following:

1. The green mark on the handwheel is within the green line on the tow ball arm.
2. You have locked the handwheel.
3. You have removed the key.

Do not use the tow ball arm if any of these cannot be met. Have your vehicle checked as soon as possible.

TOW BALL ARM GUIDELINES

- Replacement keys are available. We recommend that you record the key number on the lock cylinder.
- Keep the system clean. Periodically lubricate bearings, sliding surfaces and locking balls with resin-free grease or oil. Lubricate the lock with graphite.
Connecting a Trailer

- Remove the trailer wiring plug from the trailer wiring connection socket when not in use. Failure to do so may result in corrosion of the trailer wiring connection socket. Regularly clean the trailer wiring connection socket and make sure the socket cover is fully closed.

- If you use a high pressure water jet to clean your vehicle, disconnect the trailer wiring plug. Do not aim the water jet directly at the trailer wiring connection socket. We recommend that you detach the tow ball arm before washing your vehicle.

TOW BALL COMPONENTS

A  Trailer safety cable attachment point.
B  Tow ball arm in tow position.
C  Handwheel.
D  Key.
E  Protective cap.
F  Trailer wiring connection socket.

Do not disassemble or repair the tow ball arm.
DETACHING THE TOW BALL ARM

1. Remove the protective cap.
2. Insert the key and turn it clockwise to unlock the handwheel.
3. Hold the tow ball arm. Pull the handwheel outward and turn it fully clockwise until it clicks.
   **Note:** The red mark on the handwheel must be within the green line on the tow ball arm.
4. Release the handwheel.
5. Pull the tow ball arm downward to remove it.
6. Turn the trailer wiring connection socket upward through 90 degrees until it engages in the end position.

ATTACHING THE TOW BALL ARM

7. Insert the blanking plug.

1. Remove the blanking plug.
2. Fully insert the tow ball arm until it engages. Do not hold the handwheel. **Note:** The green mark on the handwheel must be within the green line on the tow ball arm.

3. Insert the key and turn it counterclockwise to lock the handwheel.

4. Fit the protective cap. Fully push it back over the lock.

5. Turn the trailer wiring connection socket downward through 90 degrees until it engages in the end position.

### TOW BALL - VEHICLES WITH: RETRACTABLE TOW BALL

#### TOW BALL PRECAUTIONS

**WARNING:** Do not exceed the lowest rating capacity for your vehicle or trailer hitch. Overloading your vehicle or trailer hitch can impair your vehicle stability and handling. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

**WARNING:** Do not cut, drill, weld or modify the trailer hitch. Modifying the trailer hitch could reduce the hitch rating.

You must retract the tow ball arm when not in use.

Do not use your foot or any tools to deploy or retract the tow ball arm.

Do not touch the tow ball arm when it is deploying or retracting to the released position.

Do not use the tow ball arm if no tones sound when deploying the tow ball arm or when you lock it into position. Have your vehicle checked as soon as possible.

Never retract the tow ball arm with a trailer attached. This can cause damage not covered by the vehicle Warranty.

#### Tow Ball Arm Safety Checks

After you deploy the tow ball arm, check the following:

- Make sure the tow ball arm is fully locked. It must not move if jerked or when you attach a trailer.
- The LED is not flashing and no warning tones sound.
Connecting a Trailer

Do not use the tow ball arm if any of these cannot be met. Have your vehicle checked as soon as possible.

**TOW BALL LIMITATIONS**

The tow ball arm does not retract if any of the following occur:

- Your vehicle is moving.
- The trailer wiring connection socket has a trailer wiring plug attached to it.
- The vehicle battery is not fully charged.

**TOW BALL ARM GUIDELINES**

- The tow ball arm mechanism is maintenance free. Do not grease or oil the mechanism.
- Remove the trailer wiring plug from the trailer wiring connection socket when not in use. Failure to do so may result in corrosion of the trailer wiring connection socket. Clean the trailer wiring connection socket regularly and make sure the socket cover is fully closed.
- If you use a high pressure water jet to clean your vehicle, disconnect the trailer wiring plug. Do not aim the water jet directly at the trailer wiring connection socket. We recommend that you retract the tow ball arm before washing your vehicle.

**TOW BALL COMPONENTS**

A  Trailer safety cable attachment point.
B  Trailer wiring connection socket.
C  Tow ball arm in tow position.
D  Tow ball arm in stowed position.
**Connecting a Trailer**

Do not disassemble or repair the tow ball arm or mechanism.

**DEPLOYING THE TOW BALL ARM**

The tow ball arm does not deploy if any of the following occur:
- Your vehicle is moving.
- The trailer wiring connection socket has a trailer wiring plug attached to it.
- The vehicle battery is not fully charged.

1. Press the button. It is on the right hand side of the luggage compartment.
   **Note:** The LED on the button illuminates and a double tone sounds.

2. Press the button again within four seconds to deploy the tow ball arm to the released position.
   **Note:** The LED on the button flashes and a series of tones sound when the tow ball arm deploys and reaches the released position.

3. Manually move the tow ball arm into the tow position. Make sure the tow ball arm locks into position.
   **Note:** The LED on the button stops flashing and a double tone sounds when the tow ball arm locks into position.
   **Note:** A warning tone sounds for up to 30 seconds if the tow ball arm remains in an unlocked position.

If the deploy process is interrupted, for example tow ball arm movement is obstructed or the power supply is lost, the system must be reset. To reset the system fully repeat the process.

**RETRACTING THE TOW BALL ARM**

1. Disconnect the trailer wiring plug and unhitch the trailer or load carrier.

2. Press the button. It is on the right hand side of the luggage compartment.
   **Note:** The LED on the button illuminates and a double tone sounds.
3. Press the button again within four seconds to retract the tow ball arm to the released position.

**Note:** The LED on the button flashes and a series of tones sound when the tow ball arm retracts and reaches the released position.

**Note:** If you do not press the button again within four seconds, the system signals completion without retracting the tow ball arm. If the LED rapidly flashes and a high pitch tone sounds, repeat the process.

4. Manually move the tow ball arm into the stowed position. Make sure the tow ball arm locks into position.

**Note:** The LED on the button stops flashing and a double tone sounds when the tow ball arm locks into position.

**Note:** A warning tone sounds for up to 30 seconds if the tow ball arm remains in an unlocked position.
Towing a Trailer

**TOWING A TRAILER PRECAUTIONS - 4-DOOR**

**WARNING:** Your vehicle is not approved for trailer towing. Never tow a trailer with your vehicle.

**TOWING A TRAILER PRECAUTIONS - 5-DOOR/ WAGON**

**WARNING:** Do not exceed 100 km/h (60 mph). Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

**WARNING:** Make sure that the vertical load on the tow ball is between the minimum and maximum recommended weight at all times. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

**WARNING:** Do not exceed the maximum gross vehicle weight stated on the vehicle identification plate. Failure to follow this instruction could result in personal injury.

**WARNING:** The anti-lock brake system does not control the trailer brakes.

Obey country specific regulations for towing a trailer.

The trailer vertical weight on the tow ball is essential for the driving stability of your vehicle and trailer.

Reduce speed immediately if the trailer shows any sign of swaying.

Towing a trailer changes the vehicle handling characteristics and increases stopping distances. Adapt your speed and driving behavior to the load of the trailer.

**TOWING A TRAILER LIMITATIONS - 5-DOOR/ WAGON**

Do not exceed 100 km/h (60 mph) even if a country allows higher speeds under certain conditions.

The gross train weight stated on the vehicle identification plate applies for road gradients up to 12% and altitudes up to 1,000 m (3,281 ft) when towing a trailer. In mountainous regions the engine performance decreases due to lower air density with increasing altitude. In high altitude regions above 1,000 m (3,281 ft), you should reduce the stipulated maximum permitted gross train weight by 10% for every additional 1,000 m (3,281 ft). See **Vehicle Identification Plate** (page 463).

**Note:** Not all vehicles are suitable or approved to have a tow bar fitted. Ask an authorized dealer for more information.

**LOADING YOUR TRAILER - 5- DOOR/WAGON**

Place loads as low as possible and central to the axle of your trailer. If you are towing with an unladen vehicle, you should place the load in your trailer toward the front, within the maximum vertical load, as this gives the best stability. See **Towing Weight Capacities** (page 363). See **Towing Weight Capacities** (page 364).

The vertical weight on the tow ball should be at least 4% of the trailer weight and not exceed the maximum permissible weight.
Towing a Trailer

**Note:** The maximum permissible trailer vertical weight on the trailer identification plate is the trailer manufacturer's testing value. The vehicle maximum permissible trailer vertical weight could be lower.

**TRAILER TOWING HINTS - 5-DOOR/WAGON**

Use a low gear when descending a steep downhill gradient.

The stability of your vehicle to trailer combination is very much dependent on the quality of the trailer.

The electrical system on your vehicle is suitable for towing trailers with LED lamps.

**TOWING WEIGHTS AND DIMENSIONS**

**TOWING WEIGHT CAPACITIES - 5-DOOR**

**Maximum Permissible Trailer Vertical Weight**

Driving Hints

COLD WEATHER PRECAUTIONS

The functional operation of some components and systems can be affected at temperatures below approximately -25°C (-13°F).

BREAKING-IN

Tires

You need to break in new tires for approximately 480 km (300 mi). During this time, your vehicle may exhibit some unusual driving characteristics.

Brakes and Clutch

Avoid heavy use of the brakes and clutch if possible for the first 160 km (100 mi) in town and for the first 1,600 km (1,000 mi) on freeways.

DRIVING ECONOMICALLY

The following helps to improve fuel consumption:

- Drive smoothly, accelerate gently and anticipate the road ahead to avoid heavy braking.
- Regularly check your tire pressures and make sure that they are inflated to the correct pressure.
- Follow the recommended maintenance schedule and carry out the recommended checks.
- Plan your journey and check the traffic before you set off. It is more efficient to combine errands into a single trip whenever possible.
- Avoid idling the engine in cold weather or for extended periods. Start the engine only when you are ready to set off.
- Do not carry unnecessary weight in your vehicle as extra weight wastes fuel.
- Do not add unnecessary accessories to the exterior of your vehicle, for example running boards. If you use a roof rack, remember to fold it down or remove it when not in use.
- Do not shift into neutral when you are braking or when your vehicle is slowing down.
- Shut all windows when driving at high speeds.
- Switch off all electric systems when not in use, for example air conditioning. Make sure that you unplug any accessories from the auxiliary power points when not in use.

DRIVING THROUGH SHALLOW WATER

WARNING: Do not attempt to cross a deep or flowing body of water. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

Note: Driving through standing water can cause vehicle damage.

Note: Engine damage can occur if water enters the air filter.

Before driving through standing water, check the depth. Never drive through water that is higher than the bottom of the front rocker area of your vehicle.
When driving through standing water, drive very slowly and do not stop your vehicle. Your brake performance and traction could be limited. After driving through water and as soon as it is safe to do so:

- Lightly press the brake pedal to dry the brakes and to check that they work.
- Turn the steering wheel to check that the steering power assist works.

Check the function of the following:

- Horn
- Exterior lights

**FLOOR MATS**

**WARNING:** Use a floor mat designed to fit the footwell of your vehicle that does not obstruct the pedal area. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

**WARNING:** Pedals that cannot move freely can cause loss of vehicle control and increase the risk of serious personal injury.

To install floor mats that have eyelets, position the floor mat eyelet over the retention post and press down to lock in position. Repeat for all eyelets on the floor mat.

To remove the floor mats, reverse the installation procedure.

**WARNING:** Secure the floor mat to both retention devices so that it cannot slip out of position and interfere with the pedals. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

**WARNING:** Do not place additional floor mats or any other covering on top of the original floor mats. This could result in the floor mat interfering with the operation of the pedals. Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

**WARNING:** Always make sure that objects cannot fall into the driver foot well while your vehicle is moving. Objects that are loose can become trapped under the pedals causing a loss of vehicle control.
Driving Hints

**Note:** Regularly check the floor mats to make sure they are secure.
SWITCHING THE HAZARD FLASHERS ON AND OFF

The hazard flasher button is on the instrument panel. Press the button to switch the hazard flashers on if your vehicle is creating a safety hazard for other road users.

When you switch the hazard flashers on, all front and rear direction indicators flash.

Note: The hazard flashers operate when the ignition is in any position, or if the key is not in the ignition. The battery loses charge and could have insufficient power to restart your vehicle.

Press the button again to switch them off.

JUMP STARTING THE VEHICLE

JUMP STARTING PRECAUTIONS

WARNING: Batteries normally produce explosive gases which can cause personal injury. Therefore, do not allow flames, sparks or lighted substances to come near the battery. When working near the battery, always shield your face and protect your eyes. Always provide correct ventilation.

WARNING: Keep batteries out of reach of children. Batteries contain sulfuric acid. Avoid contact with skin, eyes or clothing. Shield your eyes when working near the battery to protect against possible splashing of acid solution. In case of acid contact with skin or eyes, flush immediately with water for a minimum of 15 minutes and get prompt medical attention. If acid is swallowed, call a physician immediately.

WARNING: Use only adequately sized cables with insulated clamps.

WARNING: Make sure that the cables are clear of any moving parts and fuel delivery system parts.

WARNING: Connect batteries with only the same nominal voltage.

WARNING: If the engine is running while the hood is open, stay clear of moving engine components. Failure to follow this warning could result in serious personal injury or death.

Do not attempt to push-start an automatic transmission vehicle. This could cause transmission damage.

Do not disconnect the battery of the disabled vehicle. This could damage your vehicle's electrical system.

PREPARING THE VEHICLE

Use only a 12 volt supply to start your vehicle.

Park the booster vehicle close to the hood of the disabled vehicle, making sure the two vehicles do not touch.

JUMP STARTING THE VEHICLE

WARNING: Make sure that the cables are clear of any moving parts and fuel delivery system parts.

Note: In the illustration, the bottom vehicle represents the booster vehicle.
Switch off the engine and any electrical equipment.

1. Connect the positive jumper cable to the positive terminal of the discharged battery.
2. Connect the other end of the positive jumper cable to the positive terminal of the assisting battery.
3. Connect the negative jumper cable to the negative terminal of the assisting battery.
4. Make the final connection of the negative jumper cable to the ground point.

5. Start the engine of the booster vehicle and press the accelerator gently to keep the engine speed between 2000 and 3000 RPM.
6. Start the engine of the disabled vehicle.
7. Once the disabled vehicle has been started, run both vehicle engines for an additional three minutes before disconnecting the jumper cables.

Remove the jumper cables in the reverse order that they were connected.

**Note:** Do not switch the headlamps on when disconnecting the cables. The peak voltage could blow the bulbs.

**POST-CRASH ALERT SYSTEM**

**WHAT IS THE POST-CRASH ALERT SYSTEM**

The system helps draw attention to your vehicle in the event of a serious impact.
HOW DOES THE POST-CRASH ALERT SYSTEM WORK

The system is designed to turn the hazard flashers on, turn the courtesy lamps on, intermittently sound the horn and unlock all doors in the event of a serious impact that deploys an airbag or the seatbelt pretensioners.

POST-CRASH ALERT SYSTEM LIMITATIONS

Depending on applicable laws in the country your vehicle was built for, the horn does not sound in the event of a serious impact.

SWITCHING THE POST-CRASH ALERT SYSTEM OFF

Press the hazard flasher switch, the unlock button on the remote control, the panic button on the remote control or cycle the ignition to switch the system off.

Note: The alert turns off when the vehicle battery runs out of charge.

OVERRIDING POST IMPACT BRAKING

You can override post impact braking by pressing the brake or accelerator pedal.

POST IMPACT BRAKING INDICATORS

It flashes when a post impact braking event is occurring.

AUTOMATIC CRASH SHUTOFF

WHAT IS AUTOMATIC CRASH SHUTOFF

The automatic crash shutoff is designed to stop the fuel going to the engine in the event of a moderate or severe crash.

Note: Not every impact causes a shutoff.

AUTOMATIC CRASH SHUTOFF PRECAUTIONS

WARNING: If your vehicle has been involved in a crash, have the fuel system checked. Failure to follow this instruction could result in fire, personal injury or death.

RE-ENABLING YOUR VEHICLE

1. Switch the ignition off.
2. Attempt to start your vehicle.
3. Switch the ignition off.
4. Attempt to start your vehicle.

**Note:** If your vehicle does not start after the third attempt, have your vehicle checked as soon as possible.

### RECOVERY TOWING

#### ACCESSING THE FRONT TOWING POINT

1. Gently press and release the towing eye attachment point cover at the position indicated.
2. Gently pull it straight out.

**Note:** The towing eye attachment point cover has a small lanyard to keep it attached to the bumper.

#### ACCESSING THE REAR TOWING POINT

1. Gently press the top of the towing eye attachment point cover inward.
2. Gently lift it upward and then pull it straight out.

**Note:** The towing eye attachment point cover has a small lanyard to keep it attached to the bumper.

#### LOCATING THE TOWING EYE

The towing eye is in the spare wheel storage tray.

**Note:** You must carry the towing eye in your vehicle at all times.
INSTALLING THE TOWING EYE

**WARNING:** Make sure that the towing eye is fully tightened. Failure to follow this instruction could result in personal injury.

**WARNING:** You must switch the ignition on when your vehicle is being towed.

---

1. The towing eye attachment point cover has a small lanyard to keep it attached to the bumper.
2. Install the towing eye.

**Note:** It has a left-hand thread. Turn it counterclockwise to install it.

---

HOW DOES FAIL-SAFE COOLING WORK

If the engine reaches a preset over-temperature condition, the engine automatically switches to alternating cylinder operation. Each disabled cylinder acts as an air pump and cools the engine.

When this occurs, your vehicle still operates, however:

- Engine power is limited.
- The air conditioning system turns off.

Continued operation increases the engine temperature, causing the engine to completely shut down. Your steering and braking effort increases in this situation.

When the engine temperature cools, you can re-start the engine.

**Note:** Have your vehicle checked as soon as possible to minimize engine damage.

---

FAIL-SAFE COOLING

WHAT IS FAIL-SAFE COOLING

Fail-safe cooling allows you to temporarily drive your vehicle before any incremental component damage occurs due to overheating.

The fail-safe distance depends on outside temperature, vehicle load and terrain.

---

WARNING: Fail-safe mode is for use during emergencies only. Operate your vehicle in fail-safe mode only as long as necessary to bring your vehicle to rest in a safe location and seek immediate repairs. When in fail-safe mode, your vehicle will have limited power, will not be able to maintain high-speed operation, and may completely shut down without warning, potentially losing engine power, power steering assist, and power brake assist, which may increase the possibility of a crash resulting in serious injury.
WARNING: Do not remove the coolant reservoir cap when the engine is on or the cooling system is hot. Wait 10 minutes for the cooling system to cool down. Cover the coolant reservoir cap with a thick cloth to prevent the possibility of scalding and slowly remove the cap. Failure to follow this instruction could result in personal injury.

Continued operation increases the engine temperature, causing the engine to completely shut down. Your steering and braking effort increases in this situation.

When the engine temperature cools, you can re-start the engine. Have your vehicle checked as soon as possible to minimize engine damage.

Your vehicle has limited engine power when in the fail-safe mode, drive your vehicle with caution. Your vehicle does not maintain high-speed operation and the engine may operate poorly.

Remember that the engine is capable of automatically shutting down to prevent engine damage. In this situation:

1. Pull off the road as soon as safely possible and switch the engine off.
2. If you are a member of a roadside assistance program, we recommend that you contact your roadside assistance service provider.
3. If this is not possible, wait for a short period of time for the engine to cool.
4. Check the coolant level. If the coolant level is at or below the minimum mark, add prediluted coolant immediately.
5. When the engine temperature cools, you can re-start the engine. Have your vehicle checked as soon as possible to minimize engine damage.

Note: Driving your vehicle without repair increases the chance of engine damage.

FAIL-SAFE COOLING INDICATORS

If the engine begins to overheat, the coolant temperature gauge moves toward the red zone.

A warning lamp illuminates and a message may appear in the information display.
TOWING YOUR VEHICLE PRECAUTIONS

**WARNING:** You must switch the ignition on when your vehicle is being towed.

**WARNING:** Always check that the steering wheel lock is deactivated before attempting to move your vehicle. Failure to deactivate the steering wheel lock could result in a crash.

**WARNING:** The brake and steering assistance will not operate unless the engine is running. Press the brake pedal harder and be aware of increased stopping distances and heavier steering.

**WARNING:** Too much tension in the tow rope could cause damage to your vehicle or the vehicle that is towing.

**Note:** Make sure the transmission is in neutral (N) when towing your vehicle.

**Note:** Do not tow your vehicle backward.

**Note:** Do not tow your vehicle if the ambient temperature is below 0°C (32°F).

EMERGENCY TOWING

If your vehicle is disabled without access to wheel dollies, a car-hauling trailer, or a flatbed transport vehicle it can be flat-towed with all wheels on the ground. You may do this under the following conditions:

- Your vehicle is facing forward so that it is towed in a forward direction.
- The transmission selector lever is placed in neutral (N). If the transmission gear shift lever cannot be moved to neutral (N), it may need to be overridden.

- Maximum speed is 50 km/h (30 mph).
- Maximum distance is 80 km (50 mi).

In the event of a mechanical failure of the transmission, do not use individual axle carriers. All wheels must be lifted clear of the ground on a level platform.

Drive off slowly and smoothly without jerking the vehicle you are towing.

You must only use the towing eye that was delivered with your vehicle.

Tow ropes or rigid towing bars must be placed on the same side. For example, right hand rear towing point to right hand front towing point.

You must use a tow rope or rigid towing bar that is of the correct strength for the weight of the towing vehicle and the vehicle that is being towed.

The weight of the vehicle that is being towed must not exceed the weight of the towing vehicle.

**Note:** If you need to exceed a speed of 50 km/h (30 mph) and a distance of 80 km (50 mi) while towing, you must lift the drive wheels clear of the ground.

**Note:** We recommend you do not tow with the drive wheels on the ground. However, if it is required to move the vehicle from a dangerous location, do not tow your vehicle faster than 50 km/h (30 mph) or farther than 80 km (50 mi).
**TOWING YOUR VEHICLE PRECAUTIONS**

**WARNING:** You must switch the ignition on when your vehicle is being towed.

**WARNING:** Always check that the steering wheel lock is deactivated before attempting to move your vehicle. Failure to deactivate the steering wheel lock could result in a crash.

**WARNING:** The brake and steering assistance will not operate unless the engine is running. Press the brake pedal harder and be aware of increased stopping distances and heavier steering.

**WARNING:** Too much tension in the tow rope could cause damage to your vehicle or the vehicle that is towing.

**Note:** Make sure the transmission is in neutral when towing your vehicle.

**Note:** Do not tow your vehicle backward.

**Note:** Do not tow your vehicle if the ambient temperature is below 0°C (32°F).

**EMERGENCY TOWING**

If your vehicle is disabled without access to wheel dollies, a car-hauling trailer, or a flatbed transport vehicle it can be flat-towed with all wheels on the ground. You may do this under the following conditions:

- Your vehicle is facing forward so that it is towed in a forward direction.
- The transmission selector lever is placed in neutral position.
- Maximum speed is 50 km/h (30 mph).
- Maximum distance is 80 km (50 mi).

Drive off slowly and smoothly without jerking the vehicle you are towing.

You must only use the towing eye that was delivered with your vehicle.

Tow ropes or rigid towing bars must be placed on the same side. For example, right hand rear towing point to right hand front towing point.

You must use a tow rope or rigid towing bar that is of the correct strength for the weight of the towing vehicle and the vehicle that is being towed.

The weight of the vehicle that is being towed must not exceed the weight of the towing vehicle.
TOWING YOUR VEHICLE PRECAUTIONS

If you need to tow your vehicle, contact a professional towing service or, if you are a member of a roadside assistance program, your roadside assistance service provider.
Emergency Equipment

STORING A FIRST AID KIT
You can store the first aid kit in the luggage compartment.

STORING A WARNING TRIANGLE
You can store the warning triangle in the luggage compartment.
Fuses

FUSE PRECAUTIONS

WARNING: Always replace a fuse with one that has the specified amperage rating. Using a fuse with a higher amperage rating can cause severe wire damage and could start a fire.

WARNING: To reduce risk of electrical shock, always replace the cover to the power distribution box before reconnecting the battery or refilling fluid reservoirs.

UNDER HOOD FUSE BOX

LOCATING THE UNDER HOOD FUSE BOX

1. Pull the latch toward you and remove the top cover.

2. Pull the connector lever upward.

3. Pull the connector upward to remove it.

ACCESSING THE UNDER HOOD FUSE BOX

E253689
4. Pull both latches toward you and remove the fuse box.
5. Turn the fuse box over and open the lid.

IDENTIFYING THE FUSES IN THE UNDER HOOD FUSE BOX

### INTERIOR FUSE BOX

#### LOCATING THE INTERIOR FUSE BOX

**Passenger Compartment Fuse Box**

The fuse box is below the glove compartment.
**Fuses**

**Trailer Tow Module Fuse Box - 5-Door and Wagon**

The fuse box is in the luggage compartment on the right-hand side.

**ACCESSING THE INTERIOR FUSE BOX**

1. Fold back the carpet under the glove compartment.
2. Carefully remove the cover.

**IDENTIFYING THE FUSES IN THE INTERIOR FUSE BOX**

**Passenger Compartment Fuse Box**

### Fuses – Troubleshooting

### Fuses – Frequently Asked Questions

**When do I need to check a fuse?**
If electrical components in the vehicle are not working.

**When do I need to replace a fuse?**
If a fuse has blown.

**How do I identify a blown fuse?**
You can identify a blown fuse by a broken wire within the fuse.
MAINTENANCE PRECAUTIONS

Have your vehicle serviced regularly to help maintain its roadworthiness and resale value. There is a large network of authorized dealers that are there to help you with their professional servicing expertise. We believe that their specially trained technicians are best qualified to service your vehicle properly and expertly. They are supported by a wide range of highly specialized tools developed specifically for servicing your vehicle.

If your vehicle requires professional service, an authorized dealer can provide the necessary parts and service. Check your warranty information to find out which parts and services are covered.

Use only recommended fluids and service parts conforming to specifications. See Capacities and Specifications (page 446).

If you do not use oil and fluid that meets the defined specification and viscosity grade, it could result in:

- Component damage not covered by the vehicle Warranty.
- Longer engine cranking periods.
- Increased emission levels.
- Reduced engine performance.
- Reduced fuel economy.
- Reduced brake performance.

OPENING AND CLOSING THE HOOD - LHD

Opening the Hood

1. Open the left-hand front door.
2. Fully pull the hood release lever and let it completely retract.

*Note: This action releases the hood latch.*

3. Fully pull the hood release lever for a second time.

*Note: This action fully releases the hood.*

4. Open the hood.

*Note: There is no secondary latch under the hood.*
5. Support the hood with the strut.

**Closing the Hood**

1. Remove the strut from the catch and secure it correctly in the clip.
2. Lower the hood and allow it to drop under its own weight for the last 25–35 cm (10–14 in).

**Note:** Make sure that the hood is correctly closed.

**Warning Lamps and Indicators**

It illuminates when you switch the ignition on and remains on if any door or the hood is open.

---

**OPENING AND CLOSING THE HOOD - RHD**

**Opening the Hood**

1. Open the left-hand front door.
2. Fully pull the hood release lever and let it completely retract.

**Note:** This action releases the hood latch.

3. Fully pull the hood release lever for a second time.

**Note:** This action fully releases the hood.

4. Open the hood.

**Note:** There is no secondary latch under the hood.
5. Support the hood with the strut. 
Note: Hold the yellow section of the hood strut.

Opening the Hood if the Passenger Door cannot be Opened

1. Unlock the right-hand front door using the key and access the left-hand front footwell. See Unlocking and Locking the Doors Using the Key Blade (page 69).

2. Insert a suitable tool, for example a screwdriver, in the position shown.

3. Gently pry the hood release lever securing clip upward.

4. Use a suitable tool, for example a hexagonal socket, and turn the hood release mechanism clockwise until you feel a strong resistance.

5. Let the hood release mechanism completely retract. 
Note: This action releases the hood latch.

6. Turn the hood release mechanism clockwise until you feel a strong resistance for a second time. 
Note: This action fully releases the hood.
7. Open the hood.
   **Note:** There is no secondary latch under the hood.

8. Support the hood with the strut.

   **Note:** Hold the yellow section of the hood strut.

9. Reinstall the hood release lever. To install, reverse the removal procedure.
   **Note:** Make sure the hood release lever securing clip is fully engaged.

**Closing the Hood**

1. Remove the strut from the catch and secure it correctly in the clip.
2. Lower the hood and allow it to drop under its own weight for the last 25–35 cm (10–14 in).
   **Note:** Make sure that the hood is correctly closed.

**Warning Lamps and Indicators**

It illuminates when you switch the ignition on and remains on if any door or the hood is open.

A Minimum.
B Maximum.

ENGINE OIL DIPSTICK OVERVIEW
- 1.5L ECOBLUE

A Minimum.
B Maximum.

ENGINE OIL DIPSTICK OVERVIEW
- 2.3L ECOBOOST™

A Minimum.
B Nominal.
C Maximum.

CHECKING THE ENGINE OIL LEVEL

1. Make sure that your vehicle is on level ground.
2. Check the oil level before starting the engine, or switch the engine off after warming up and wait 10 minutes for the oil to drain into the oil pan.
3. Remove the dipstick and wipe it with a clean, lint-free cloth.
4. Reinstall the dipstick and make sure it is fully seated.
5. Remove the dipstick again to check the oil level.

Note: If the oil level is between the maximum and minimum marks, the oil level is acceptable. Do not add oil.
6. If the oil level is at the minimum mark, immediately add oil.
7. Reinstall the dipstick. Make sure it is fully seated.
Note: The oil consumption of new engines reaches its normal level after approximately 5,000 km (3,000 mi).

ADDING ENGINE OIL

**WARNING:** Do not remove the filler cap when the engine is running.

**WARNING:** Do not add engine oil when the engine is hot. Failure to follow this instruction could result in personal injury.

Do not use supplemental engine oil additives because they are unnecessary and could lead to engine damage that the vehicle warranty may not cover.

1. Clean the area surrounding the engine oil filler cap before you remove it.
2. Remove the engine oil filler cap.
3. Add engine oil that meets our specifications. See Capacities and Specifications (page 446).
4. Reinstall the engine oil filler cap. Turn it clockwise until you feel a strong resistance.

**Note:** Do not add oil further than the maximum mark. Oil levels above the maximum mark may cause engine damage.

**Note:** Immediately soak up any oil spillage with an absorbent cloth.

**RESETTING THE INTELLIGENT OIL LIFE MONITOR - VEHICLES WITH: 12.3 INCH INSTRUMENT CLUSTER DISPLAY SCREEN**

Only reset the oil life monitoring system after changing the engine oil and oil filter.

1. Press the menu button on the steering wheel to enter the instrument cluster display main menu.
2. Select Settings.
3. Select Oil life.
4. Press and hold the OK button until the system reset confirmation appears.

**ENGINE COOLING FAN - GASOLINE**

**WARNING:** Keep your hands and clothing clear of the engine cooling fan.

Under certain conditions, the engine cooling fan may continue to run for several minutes after you switch your vehicle off.

**ENGINE COOLING FAN - DIESEL**

**WARNING:** Keep your hands and clothing clear of the engine cooling fan.
Under certain conditions, the engine cooling fan may continue to run for several minutes after you switch your vehicle off. This could happen in low ambient temperatures and independent of the engine coolant temperature, for example short journeys or low coolant temperature. See What Is the Diesel Particulate Filter (page 224).

**COOLANT**

**COOLANT PRECAUTIONS**

**WARNING:** Do not remove the coolant reservoir cap when the engine is on or the cooling system is hot. Wait 10 minutes for the cooling system to cool down. Cover the coolant reservoir cap with a thick cloth to prevent the possibility of scalding and slowly remove the cap. Failure to follow this instruction could result in personal injury.

**WARNING:** Do not put coolant in the windshield washer reservoir. If sprayed on the windshield, coolant could make it difficult to see through the windshield.

**WARNING:** To reduce the risk of personal injury, make sure the engine is cool before unscrewing the coolant pressure relief cap. The cooling system is under pressure. Steam and hot liquid can come out forcefully when you loosen the cap slightly.

**WARNING:** Do not add coolant further than the MAX mark.

---

**CHECKING THE COOLANT LEVEL**

**WARNING:** Do not remove the coolant reservoir cap when the engine is on or the cooling system is hot. Wait 10 minutes for the cooling system to cool down. Cover the coolant reservoir cap with a thick cloth to prevent the possibility of scalding and slowly remove the cap. Failure to follow this instruction could result in personal injury.

**WARNING:** To reduce the risk of personal injury, make sure the engine is cool before unscrewing the coolant pressure relief cap. The cooling system is under pressure. Steam and hot liquid can come out forcefully when you loosen the cap slightly.

When the engine is cold, check the concentration and level of the coolant at the intervals listed in the scheduled maintenance information.

**Note:** Make sure that the coolant level is between the MIN and the MAX marks on the coolant reservoir.

**Note:** Coolant expands when it is hot. The level may extend beyond the MAX mark. This is normal.

Maintain coolant concentration within 48% to 50%, which equates to a freeze point between -34°C (-29°F) and -37°C (-35°F). Coolant concentration should be checked using a refractometer. We do not recommend the use of hydrometers or coolant test strips for measuring coolant concentration.
ADDING COOLANT

**WARNING:** Do not add coolant when the vehicle is on or the cooling system is hot. Failure to follow this instruction could result in personal injury.

**WARNING:** Do not remove the coolant reservoir cap when the engine is on or the cooling system is hot. Wait 10 minutes for the cooling system to cool down. Cover the coolant reservoir cap with a thick cloth to prevent the possibility of scalding and slowly remove the cap. Failure to follow this instruction could result in personal injury.

**WARNING:** Do not allow the fluid to touch your skin or eyes. If this happens, rinse the affected areas immediately with plenty of water and contact your physician.

**WARNING:** Do not put coolant in the windshield washer reservoir. If sprayed on the windshield, coolant could make it difficult to see through the windshield.

**WARNING:** Do not add coolant further than the MAX mark.

**Note:** Do not use stop leak pellets, cooling system sealants, or non-specified additives as they can cause damage to the engine cooling or heating systems. Resulting component damage may not be covered by the vehicle Warranty.

**Note:** Automotive fluids are not interchangeable.

It is very important to use prediluted coolant approved to the correct specification in order to avoid plugging the small passageways in the engine cooling system. See **Capacities and Specifications** (page 446). Do not mix different colors or types of coolant in your vehicle. Mixing of engine coolants or using an incorrect coolant may harm the engine or cooling system components and may not be covered by the vehicle Warranty.

**Note:** If prediluted coolant is not available, use the approved concentrated coolant diluting it to 50/50 with deionised or distilled water. See **Capacities and Specifications** (page 446). Using water that has not been deionised may contribute to deposit formation, corrosion and plugging of the small cooling system passageways.

**Note:** Coolants marketed for all makes and models may not be approved to our specifications and may cause damage to the cooling system. Resulting component damage may not be covered by the vehicle Warranty.

If the coolant level is at or below the minimum mark, add prediluted coolant immediately.

To top up the coolant level do the following:

1. Unscrew the cap slowly. Any pressure escapes as you unscrew the cap.
2. Add prediluted coolant approved to the correct specification. See **Capacities and Specifications** (page 446).
3. Add enough prediluted coolant to reach the correct level.
4. Replace the coolant reservoir cap. Turn the cap clockwise until it contacts the hard stop.
5. Check the coolant level in the coolant reservoir the next few times you drive your vehicle. If necessary, add enough prediluted engine coolant to bring the coolant level to the correct level.

If you have to add more than 1 L (1.1 qt) of engine coolant per month, have your vehicle checked as soon as possible. Operating an engine with a low level of coolant can result in engine overheating and possible engine damage.

In case of emergency, you can add a large amount of water without engine coolant in order to reach a vehicle service location.

Water alone, without engine coolant, can cause engine damage from corrosion, overheating or freezing.

Do not use the following as a coolant substitute:
- Alcohol.
- Methanol.
- Brine.
- Any coolant mixed with alcohol or methanol antifreeze.

Alcohol and other liquids can cause engine damage from overheating or freezing.

Do not add extra inhibitors or additives to the coolant. These can be harmful and compromise the corrosion protection of the coolant.

**CHANGING THE COOLANT**

For coolant change, see your authorized dealer.

Changing the coolant is necessary at specific mileage intervals listed in the scheduled maintenance information.

**MANAGING THE COOLANT TEMPERATURE**

If you tow a trailer with your vehicle, the engine may temporarily reach a higher temperature during severe operating conditions, for example ascending a long or steep grade in high ambient temperatures.

At this time, you may notice the coolant temperature gauge moves toward the red zone and a message may appear in the information display.

⚠️ **WARNING:** To reduce the risk of crash and injury, be prepared that the vehicle speed may reduce and the vehicle may not be able to accelerate with full power until the coolant temperature reduces.

⚠️ **WARNING:** If you continue to drive your vehicle when the engine is overheating, the engine could stop without warning. Failure to follow this instruction could result in the loss of control of your vehicle.

You may notice a reduction in vehicle speed caused by reduced engine power in order to manage the engine coolant temperature. Your vehicle may enter this mode if certain high-temperature and high-load conditions take place. The amount of speed reduction depends on vehicle loading, grade and outside temperature. If this occurs, there is no need to stop your vehicle. You can continue to drive. See **Fail-Safe Cooling** (page 374).
The air conditioning may automatically turn on and off during severe operating conditions to protect the engine from overheating. When the coolant temperature decreases to the normal operating temperature, the air conditioning turns on. If the coolant temperature gauge moves fully into the red zone, or if the coolant temperature warning or service engine soon messages appear in your information display, do the following:

1. Stop your vehicle as soon as it is safe to do so. Fully apply the parking brake, shift into park (P) or neutral (N).
2. Leave the engine running until the coolant temperature gauge needle returns to the normal position. If the temperature does not drop after several minutes, follow the remaining steps.
3. Switch the engine off and wait for it to cool. Check the coolant level.
4. If the coolant level is at or below the minimum mark, add prediluted coolant immediately.
5. If the coolant level is normal, restart the engine and continue.

**COOLANT – WARNING LAMPS**

- If the engine begins to overheat, the coolant temperature gauge moves toward the red zone.
- A warning lamp illuminates and a message may appear in the information display.

**COOLANT – INFORMATION MESSAGES**

<table>
<thead>
<tr>

**12V BATTERY**

**12V BATTERY PRECAUTIONS**

**WARNING:** Batteries normally produce explosive gases which can cause personal injury. Therefore, do not allow flames, sparks or lighted substances to come near the battery. When working near the battery, always shield your face and protect your eyes. Always provide correct ventilation.

**WARNING:** When lifting a plastic-cased battery, excessive pressure on the end walls could cause acid to flow through the vent caps, resulting in personal injury and damage to the vehicle or battery. Lift the battery with a battery carrier or with your hands on opposite corners.

**WARNING:** Keep batteries out of reach of children. Batteries contain sulfuric acid. Avoid contact with skin, eyes or clothing. Shield your eyes when working near the battery to protect against possible splashing of acid solution. In case of acid contact with skin or eyes, flush immediately with water for a minimum of 15 minutes and get prompt medical attention. If acid is swallowed, call a physician immediately.

**WARNING:** Battery posts, terminals and related accessories contain lead and lead compounds, chemicals known to the State of California to cause cancer and reproductive harm. Wash your hands after handling.

**WARNING:** This vehicle may have more than one battery. Removing the battery cables from only one battery does not disconnect your vehicle electrical system. Make sure you disconnect the battery cables from all batteries when disconnecting power. Failure to do so may cause serious personal injury or property damage.

**WARNING:** For vehicles with Auto-Start-Stop the battery requirement is different. You must replace the battery with one of exactly the same specification.

**WHAT IS THE BATTERY MANAGEMENT SYSTEM**

The battery management system monitors battery conditions and takes actions to extend battery life.

**HOW DOES THE BATTERY MANAGEMENT SYSTEM WORK**

If excessive battery drain is detected, the system temporarily disables some electrical systems to protect the battery. Systems included are:

- Heated rear window.
- Heated seats.
- Climate control.
- Heated steering wheel.
- Audio unit.
- Navigation system.

A message could appear in the information display to alert you that battery protection actions are active. This message is only for notification that an action is taking place, and not intended to indicate an electrical problem or that the battery requires replacement.
BATTERY MANAGEMENT SYSTEM LIMITATIONS

After battery replacement, or in some cases after charging the battery with an external charger, the battery management system requires eight hours of vehicle sleep time to relearn the battery state of charge. During this time, your vehicle must remain fully locked with the ignition switched off.

Note: Prior to relearning the battery state of charge, the battery management system could temporarily disable some electrical systems.

Electrical Accessory Installation

To make sure the battery management system works correctly, do not connect an electrical device ground connection directly to the battery negative post. This can cause inaccurate measurements of the battery condition and potential incorrect system operation.

Note: If you add electrical accessories or components to the vehicle, it could adversely affect battery performance and durability. This could also affect the performance of other electrical systems in the vehicle.

CHANGING THE 12V BATTERY

The battery is in the engine compartment. See Maintenance (page 388).

Your vehicle has a maintenance-free battery. It does not require additional water during service.

If the vehicle battery has a cover, make sure you correctly install it after cleaning or replacing the battery.

For longer, trouble-free operation, keep the top of the battery clean and dry and the battery cables tightly fastened to the battery terminals. If any corrosion is present on the battery or terminals, remove the cables from the terminals and clean with a wire brush. You can neutralize the acid with a solution of baking soda and water.

We recommend that you disconnect the negative battery cable terminal from the battery if you plan to store your vehicle for an extended period.

Note: If you only disconnect the negative battery cable terminal, make sure it is isolated or placed away from the battery terminal to avoid unintended connection or arcing.

If you disconnect or replace the battery and your vehicle has an automatic transmission, it must relearn its adaptive strategy. Because of this, the transmission may shift firmly when first driven. This is normal operation while the transmission fully updates its operation to optimum shift feel.

Removing the Battery

1. Apply the parking brake and switch the ignition off.
2. Switch all electrical equipment off, for example lights and radio.
3. Wait a minimum of two minutes before disconnecting the battery.

Note: The engine management system has a power hold function and remains powered for a period of time after you switch the ignition off. This is to allow diagnostic and adaptive tables to be stored. Disconnecting the battery without waiting can cause damage not covered by the vehicle Warranty.

4. Disconnect and isolate the negative battery cable terminal.
5. Disconnect and isolate the positive battery cable terminal.

6. Remove the battery securing clamp.

7. Remove the battery.

If you disconnect or replace the vehicle battery, you must reset the following features:

- Window bounce-back. See **Window Bounce-Back** (page 117).
- Clock Settings.
- Pre-set radio stations.

**Replacing the Battery**

**Note:** Before reconnecting the battery, make sure the ignition remains switched off.

You must replace the battery with one of exactly the same specification.

To install, reverse the removal procedure.

**Note:** Make sure that you correctly install the battery terminal covers, battery cover and battery cable terminals.

**RESETTING THE BATTERY SENSOR**

When you install a new battery, reset the battery sensor by doing the following:

1. Switch the ignition on, and leave the engine off.

**2.** Flash the high beam headlamps five times, ending with the high beams off.

3. Press and release the brake pedal three times.

The battery warning lamp flashes three times to confirm that the reset is successful.

**RECYCLING AND DISPOSING OF THE 12V BATTERY**

Make sure that you dispose of old batteries in an environmentally friendly way. Seek advice from your local authority about recycling old batteries.

**12V BATTERY – TROUBLESHOOTING**

If it illuminates while driving, it indicates a charging system error. Switch off all unnecessary electrical equipment and have your vehicle immediately checked.
## 12V BATTERY – INFORMATION MESSAGES

<table>
<thead>
<tr>
<th>Message</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Check Charging system</td>
<td>The charging system needs servicing. If the warning stays on or continues to come on, have your vehicle checked as soon as possible.</td>
</tr>
<tr>
<td>Charging system Service soon</td>
<td>The charging system needs servicing. If the warning stays on or continues to come on, have your vehicle checked as soon as possible.</td>
</tr>
<tr>
<td>Charging system Service now</td>
<td>The charging system needs servicing. Have your vehicle immediately checked.</td>
</tr>
<tr>
<td>Battery state of charge low</td>
<td>The battery management system determines that the 12V battery is at a low state of charge. Start the engine to charge the battery or charge the battery using an aftermarket battery charger. Always use the vehicle ground point when connecting the negative cable of the external battery charger. See Jump Starting the Vehicle (page 370). This message clears once you restart your vehicle and the battery state of charge has recovered. Do not switch on the ignition when a battery charger is in use to charge the battery.</td>
</tr>
<tr>
<td>Turn power off to save battery</td>
<td>The battery management system determines that the battery is at a low state of charge. Turn the ignition off as soon as possible to protect the battery. This message will clear once the vehicle has been started and the battery state of charge has recovered. Turning off unnecessary electrical loads will allow faster battery state-of-charge recovery.</td>
</tr>
<tr>
<td>Electrical power saver active</td>
<td>Displayed when the battery management system detects an extended low-voltage condition. Various vehicle features will be disabled to help preserve the battery. Turn off as many of the electrical loads as soon as possible to improve system voltage. If the system voltage has recovered, the disabled features will operate again as normal.</td>
</tr>

¹ Rear lamps are also available as LED lamps.
² Halogen rear lamps.
³ LED rear lamps.

**Note:** *LED lamps are not serviceable. See an authorized dealer if they fail.*
REMOMING A REAR LAMP ASSEMBLY - 5-DOOR/WAGON

**WARNING:** Switch the lamps and the ignition off. Failure to follow this warning could result in serious personal injury.

**Stoplamp, Rear Lamp and Rear Turn Signal Lamp**

1. Carefully remove the luggage compartment trim panel.
2. Disconnect the electrical connector.
3. Remove the wing nuts that secure the lamp assembly.
4. Remove the lamp.
5. To install, reverse the removal procedure.

**Reversing Lamp and Rear Lamp**

1. Open the liftgate.
2. Carefully remove the cover.
3. Turn the wing nut counterclockwise and remove it.
4. Remove the lamp.
5. Disconnect the electrical connector.
6. To install, reverse the removal procedure.
REMOVING A REAR LAMP ASSEMBLY - 4-DOOR

**WARNING:** Switch the lamps and the ignition off. Failure to follow this warning could result in serious personal injury.

**Stoplamp, Rear Lamp and Rear Turn Signal Lamp**

1. Press the panel as indicated.
2. Carefully remove the panel.
3. Remove the bolt that secures the lamp assembly.
4. Gently pull the lamp assembly away from the vehicle.
5. Disconnect the electrical connector.

6. To install, reverse the removal procedure.

**Reversing Lamp and Rear Lamp**

1. Open the liftgate.
2. Firmly pull the soft trim panel at the ten fixing points to unclip the soft trim panel.

**Note:** Use a screwdriver to gently lift the panel.

3. Turn the wing nut counterclockwise and remove it.
4. Disconnect the electrical connector.

5. Remove the lamp.
6. To install, reverse the removal procedure.

**CHANGING A REAR LAMP BULB**

**WARNING:** Switch the lamps and the ignition off. Failure to follow this warning could result in serious personal injury.

**WARNING:** Make sure the bulbs have cooled down before removing them. Failure to follow this warning could result in serious personal injury.

Use the correct specification bulb. See [Exterior Bulb Specification Chart](page 410).

You must remove the rear lamp assembly prior to replacing any bulb. See [Removing a Rear Lamp Assembly](page 411). See [Removing a Rear Lamp Assembly](page 412).

**Note:** Rear lamps are also available as LED lamps.

**Note:** LED lamps are not serviceable. See an authorized dealer if they fail.
Replacing a Rear Lamp Bulb

1. Turn the bulb holder counterclockwise and remove it.
2. Press the bulb in and turn the bulb counterclockwise to remove it.
3. To install, reverse the removal procedure.

**Note:** LED lamps are not serviceable. See an authorized dealer if they fail.

**CHANGING A STOPLAMP BULB**

1. **WARNING:** Switch the lamps and the ignition off. Failure to follow this warning could result in serious personal injury.
2. **WARNING:** Make sure the bulbs have cooled down before removing them. Failure to follow this warning could result in serious personal injury.

Use the correct specification bulb. See Exterior Bulb Specification Chart (page 410).

You must remove the rear lamp assembly prior to replacing any bulb. See Removing a Rear Lamp Assembly (page 411). See Removing a Rear Lamp Assembly (page 412).

**CHANGING A REAR TURN SIGNAL LAMP BULB**

1. Turn the bulb holder counterclockwise and remove it.
2. Press the bulb in and turn the bulb counterclockwise to remove it.
3. To install, reverse the removal procedure.
Note: LED lamps are not serviceable. See an authorized dealer if they fail.

1. Turn the bulb holder counterclockwise and remove it.
2. Press the bulb in and turn the bulb counterclockwise to remove it.
3. To install, reverse the removal procedure.
Track Use - ST

TRACK USE PRECAUTIONS

Before using your vehicle on a track, check the engine oil level. See Checking the Engine Oil Level (page 400).

Maintain the engine oil level at or near the maximum mark on the engine oil dipstick when using your vehicle on a track.
WHAT IS LAUNCH CONTROL

Launch control is an electronic driving aid that helps to deliver a fast acceleration when you pull away from a standstill.

LAUNCH CONTROL PRECAUTIONS

Make sure that there are no pedestrians, objects or traffic in front of your vehicle.

LAUNCH CONTROL LIMITATIONS

Launch control does not operate when the transmission is in reverse or if the engine has not reached normal operating temperature.

SWITCHING LAUNCH CONTROL ON AND OFF

1. Press the menu button on the steering wheel to enter the information display main menu.
2. Select Settings.
3. Switch Launch control on or off.

Note: The system remains on until you switch it off or you switch the ignition off.

USING LAUNCH CONTROL

1. Bring your vehicle to a stop with the wheels pointing straight ahead.
2. Switch Launch control on. See Switching Launch Control On and Off (page 417).
3. Fully press the clutch pedal and shift into first gear.
4. Fully press the accelerator pedal.

Note: The system brings the engine to the optimum speed.
5. Quickly and fully release the clutch pedal in a single movement.

LAUNCH CONTROL INDICATORS

Illuminates in the information bar when you switch the system on.
CLEANING THE EXTERIOR

CLEANING THE EXTERIOR PRECAUTIONS

Immediately remove fuel spillages, additive residuals, bird droppings, insect deposits and road tar. These may cause damage to your vehicle’s paintwork or trim over time. Remove any exterior accessories, for example antennas, before entering a car wash.

CLEANING HEADLAMPS AND REAR LAMPS

We recommend that you only use cold or lukewarm water containing car shampoo to clean the headlamps and the rear lamps.
Do not scrape the lamps.
Do not wipe lamps when they are dry.

CLEANING WINDOWS AND WIPER BLADES

To clean the windshield and wiper blades:
• Clean the windshield with a non-abrasive glass cleaner.

Note: When cleaning the interior of the windshield, avoid getting any glass cleaner on the instrument panel or door panels. Wipe any glass cleaner off these surfaces immediately.

• Clean the wiper blades with washer fluid or water applied with a soft sponge or cloth.

Note: Do not use razor blades or other sharp objects to clean or remove decals from the inside of the heated rear window. This can cause damage not covered by the vehicle Warranty.

CLEANING CHROME, ALUMINIUM OR STAINLESS STEEL

We recommend that you only use a car shampoo, a soft cloth and water on bumpers and other chrome, aluminium or stainless steel parts.

Note: For additional information and assistance, we recommend that you contact an authorized dealer.

Note: Rinse the area well after cleaning.

Note: Do not use abrasive materials, for example steel wool or plastic pads, as they can scratch these surfaces.

Note: Do not use chrome cleaner, metal cleaner or polish on wheels or wheel covers.

CLEANING WHEELS

Only use a recommended wheel and tire cleaner to clean the wheels weekly. For additional information and assistance, we recommend that you contact an authorized dealer.

1. Use a sponge to remove heavy deposits of dirt and brake dust.
2. Rinse well after cleaning.

Note: Do not apply a cleaning chemical to warm or hot wheel rims and covers.

If you intend on parking your vehicle for an extended period after cleaning the wheels with a wheel cleaner, drive your vehicle for a few minutes before parking your vehicle. This reduces the risk of corrosion of the brake discs, brake pads and linings.

Do not clean the wheels when they are hot.

Note: Some car washes could damage wheel rims and covers.

Note: Using non-recommended cleaners, harsh cleaning products, chrome wheel cleaners or abrasive materials could damage wheel rims and covers.
CLEANING THE ENGINE COMPARTMENT

Use a vacuum cleaner to remove debris from the screen area below windshield.

**Note:** If you are not familiar with the parts around the engine do not wash the engine compartment. Avoid frequent engine washes.

When washing the engine compartment:
- Never wash or rinse the engine while it is hot or running.
- Never wash or rinse any ignition coil, spark plug wire or spark plug well.
- Cover the battery, power distribution box, and air filter assembly to prevent water damage.

**Note:** If your vehicle has an engine cover remove the cover before application of shampoo and degreaser.

- Spray an approved engine shampoo and degreaser on all parts that require cleaning and rinse with water.

CLEANING STRIPES OR GRAPHICS

It is recommended to wash your vehicle by hand however, pressure washing may be used under the following conditions:
- Use a spray with a 40° wide spray angle pattern.
- Keep the nozzle at a 305 mm (12 in) distance and 90° angle to your vehicle’s surface.
- Do not use water pressure higher than 14,000 kPa (2,000 psi).
- Do not use water hotter than 82°C (179°F).

**Note:** Holding the pressure washer nozzle at an angle to the vehicle’s surface may damage graphics and cause the edges to peel away from the vehicle’s surface.

CLEANING CAMERA LENSES AND SENSORS

We recommend that you only use lukewarm or cold water and a soft cloth to clean the camera lens and sensors.

**Note:** Do not pressure wash camera lens and sensors.

CLEANING THE UNDERBODY

Flush the complete underside of your vehicle frequently. Keep body and door drain holes free from packed dirt.

Rear suspension components may require regular cleaning with a power washer or a thorough rinse with a strong stream of water if the vehicle is operated in dusty or muddy environments. Rear leaf springs or other suspension components may emit squeaking or popping noises while operating the vehicle if particles, such as dirt, rocks, or other debris, are present in the components.

CLEANING THE INTERIOR

CLEANING THE INSTRUMENT PANEL

**WARNING:** Do not use chemical solvents or strong detergents when cleaning the steering wheel or instrument panel to avoid contamination of the airbag system.

We recommend that you only clean the instrument panel and cluster lens with a damp soft cloth. Dry the area with a clean, soft cloth.

For additional information and assistance, we recommend that you contact an authorized dealer.
**Vehicle Care**

**Note:** Avoid cleaners or polishes that increase the gloss of the upper portion of the instrument panel. The dull finish in this area helps protect you from undesirable windshield reflection.

**CLEANING PLASTIC**

We recommend that you only use a mild soap and water solution on a soft cloth. Dry the area with a clean, soft cloth.

**CLEANING DISPLAYS AND SCREENS**

We recommend that you only use a microfiber cloth in a circular motion to clean off the fingerprint or dust. If dirt or fingerprints are still on the screen, apply a small amount of alcohol to the cloth and try to clean it again.

**Note:** Do not pour or spray alcohol onto the touchscreen.

**Note:** Do not use detergent or any type of solvent to clean the touchscreen.

**CLEANING FABRIC**

**WARNING:** On vehicles equipped with seat-mounted airbags, do not use chemical solvents or strong detergents. Such products could contaminate the side airbag system and affect performance of the side airbag in a crash.

We recommend that you only clean fabric in the following way:

1. Remove dust and loose dirt with a vacuum cleaner.
2. Wipe the surface with a soft, damp cloth and a mild soap and water solution. Dry the area with a clean, soft cloth.
3. For additional information and assistance, we recommend that you contact an authorized dealer.

For heavy stains, spot clean the area. If a ring forms on the fabric, clean the entire area immediately, but do not oversaturate or the ring could set.

**CLEANING LEATHER**

**WARNING:** On vehicles equipped with seat-mounted airbags, do not use chemical solvents or strong detergents. Such products could contaminate the side airbag system and affect performance of the side airbag in a crash.

We recommend that you only clean the leather surfaces in the following way:

1. Remove dust and loose dirt with a vacuum cleaner.
2. Wipe the surface with a soft, damp cloth and a mild soap and water solution. Dry the area with a clean, soft cloth.
3. Make sure the leather is dry, then apply a small amount of conditioner to a clean, dry cloth.
4. Rub the conditioner into the leather until it disappears. Allow the conditioner to dry, then repeat the process for the entire interior. If a film appears, wipe it off with a dry, clean cloth.
5. For additional information and assistance, we recommend that you contact an authorized dealer.
Vehicle Care

CLEANING VINYL

**WARNING:** On vehicles equipped with seat-mounted airbags, do not use chemical solvents or strong detergents. Such products could contaminate the side airbag system and affect performance of the side airbag in a crash.

We recommend that you only clean vinyl surfaces in the following way:
1. Remove dust and loose dirt with a vacuum cleaner.
2. Wipe the surface with a soft, damp cloth and a mild soap and water solution. Dry the area with a clean, soft cloth.
3. For additional information and assistance, we recommend that you contact an authorized dealer.

CLEANING CARPETS AND FLOOR MATS

We recommend that you only clean your carpets in the following way:
1. Remove dust and loose dirt with a vacuum cleaner.
2. Wipe the surface with a soft, damp cloth and a mild soap and water solution. Dry the area with a clean, soft cloth.
3. For additional information and assistance, we recommend that you contact an authorized dealer.

For heavy stains, spot clean the area. If a ring forms on the fabric, clean the entire area immediately, but do not oversaturate or the ring could set.

We recommend that you only clean your floor mats in the following way:
1. Remove dust and loose dirt with a vacuum cleaner.
2. Wash rubber floor mats using mild soap and lukewarm or cold water.
3. Completely dry the floor mat before placing them back in your vehicle.

CLEANING SEATBELTS

**WARNING:** Do not use cleaning solvents, bleach or dye on the vehicle's seatbelts, as these actions may weaken the belt webbing.

1. Wipe the surface with a soft, damp cloth and a mild soap and water solution. Dry the area with a clean, soft cloth.

CLEANING STORAGE COMPARTMENTS

1. Remove dust and loose dirt with a vacuum cleaner.
2. Wipe the surface with a soft, damp cloth and a mild soap and water solution. Dry the area with a clean, soft cloth.

CLEANING MOONROOF TRACKS

1. Remove debris from the tracks with a vacuum cleaner.
2. Wipe the bulb seal and mating painted roof metal surface with a soft, damp cloth and a mild soap and water solution.

**Note:** The moonroof rail tracks are greased to maintain proper functionality. Do not wipe off the grease.
REPAIRING MINOR PAINT DAMAGE

We recommend that you contact an authorized dealer to identify your vehicle color code. Authorized dealers have touch-up paint to match your vehicle's color.

Before repairing minor paint damage, use a cleaner to remove particles such as bird droppings, tree sap, insect deposits, tar spots, road salt and industrial fallout.

Read the instructions before using cleaning products.

WAXING YOUR VEHICLE

Wax the high-gloss painted surface of your prewashed vehicle once or twice a year.

We recommend that you only use an approved quality wax that does not contain abrasives. Follow the manufacturer’s instructions to apply and remove the wax. For additional information and assistance, we recommend that you contact an authorized dealer.

When washing and waxing, park your vehicle in a shaded area out of direct sunlight.

**Note:** Avoid waxing unpainted or low-gloss black colored parts, they discolor over time.
**USING SUMMER TIRES**

The original equipment tires on your vehicle are designed to optimize its performance in dry or wet summer road conditions. They are not designed for winter use.

**USING WINTER TIRES**

We recommend that you use winter or all-season tires carrying this symbol when the temperature is 7°C (45°F) or lower, or in snow and ice conditions.

Inflate the winter tires to the same tire pressures as those listed in the tire pressures table. See **Tire Pressure Specifications** (page 425). See **Tire Pressure Specifications** (page 427). See **Tire Pressure Specifications** (page 428).

**USING SNOW CHAINS - EXCLUDING: ACTIVE/ST**

**WARNING:** Do not exceed 50 km/h (30 mph). Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

**WARNING:** Do not use snow chains on snow-free roads.

**WARNING:** Only fit snow chains to specified tires.

**WARNING:** If your vehicle is fitted with wheel trims, remove them before fitting snow chains.

Only use snow chains on the front wheels.

Only use snow chains on the following specified tire sizes:

- 205/60R16.
  - Do not use snow chains greater than 10 mm (0.4 in).
  - Do not use snow chains greater than 8 mm (0.3 in) for five spoke steel wheels.

Maintain correct tire pressures. See **Tire Pressure Specifications** (page 425).

**Vehicles with Stability Control**

When stability control is on, your vehicle may exhibit some unusual driving characteristics. To reduce this, switch traction control off.

**Note:** The anti-lock brake system continues to correctly operate.

**USING SNOW CHAINS - ACTIVE**

**WARNING:** Do not exceed 50 km/h (30 mph). Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

**WARNING:** Do not use snow chains on snow-free roads.
WARNING: Only fit snow chains to specified tires.

WARNING: If your vehicle is fitted with wheel trims, remove them before fitting snow chains.

Only use snow chains on the front wheels. Only use snow chains on the following specified tire sizes:

• 215/55R17.
• Do not use snow chains greater than 10 mm (0.4 in).

Maintain correct tire pressures. See Tire Pressure Specifications (page 427).

Vehicles with Stability Control

When stability control is on, your vehicle may exhibit some unusual driving characteristics. To reduce this, switch traction control off.

Note: The anti-lock brake system continues to correctly operate.

USING SNOW CHAINS - ST

WARNING: Do not exceed 50 km/h (30 mph). Failure to follow this instruction could result in the loss of control of your vehicle, personal injury or death.

WARNING: Do not use snow chains on snow-free roads.

WARNING: Only fit snow chains to specified tires.

WARNING: If your vehicle is fitted with wheel trims, remove them before fitting snow chains.
CHECKING THE TIRE PRESSURES

Safe operation of your vehicle requires that your tires are properly inflated. Every day before you drive, check your tires.

At least once a month and before long trips, inspect each tire and check the tire pressure with a tire gauge. Inflate all tires to the recommended inflation pressure. See Inflating the Tires (page 425).

INFLATING THE TIRES

⚠️ WARNING: Under-inflation is the most common cause of tire failures and may result in severe tire cracking, tread separation or blowout, with unexpected loss of vehicle control and increased risk of injury. Under-inflation increases sidewall flexing and rolling resistance, resulting in heat buildup and internal damage to the tire. It also may result in unnecessary tire stress, irregular wear, loss of vehicle control and accidents. A tire can lose up to half of its air pressure and not appear to be flat!

⚠️ WARNING: Do not use the tire pressure displayed in the information display as a tire pressure gauge. Failure to follow this instruction could result in personal injury or death.

Use the recommended cold inflation pressure for optimum tire performance and wear. Under-inflation or over-inflation may cause uneven treadwear patterns.

Inflate your tires to the recommended inflation pressure even if it is less than the maximum inflation pressure information found on the tire. You can find the tire label with the recommended tire inflation pressure next to the tire size on the B-Piller or the edge of the driver door.

TIRE PRESSURE SPECIFICATIONS - EXCLUDING: ACTIVE/ST

The recommended tire inflation pressures are on the tire information label on the driver side B-pillar.

Check all tire pressures, including the spare, when they are cold, at least once every two weeks.

Note: You may need to remove the spare wheel from the spare wheel well to check the tire pressure.

</tr>
</tbody>
</table>

Do not exceed the maximum speed stated on the label attached to the temporary spare wheel.
TIRE PRESSURE SPECIFICATIONS - ACTIVE

The recommended tire inflation pressures are on the tire information label on the driver side B-pillar.

Check all tire pressures, including the spare, when they are cold, at least once every two weeks.

**Note:** You probably need to remove the spare wheel from the spare wheel well to check the tire pressure.

---

### Up to 160 km/h (100 mph)

<td>T125/70R17</td>
<td>4.2 (60)</td>
</tr>
</tbody>
</table>

Do not exceed the maximum speed stated on the label attached to the temporary spare wheel.

**INSPECTING THE TIRE FOR DAMAGE**

Inspect the tire sidewalls for cracking, cuts, bruises and other signs of damage or excessive wear. If you suspect internal damage to the tire, have the tire dismounted and inspected.

Periodically inspect the tire treads and sidewalls for damage, such as bulges in the tread or sidewalls, cracks in the tread groove and separation in the tread or sidewall.

**WARNING:** Do not scrub the sidewalls of the tires when you are parking.

If you have to mount a curb, do so slowly and approach it with the wheels at right-angles to the curb.

If you feel a sudden vibration or ride disturbance while driving, or you suspect your tire or vehicle has been damaged, immediately reduce your speed.

Examine the tires regularly for uneven wear of the tread. Uneven wear could mean that the wheel alignment is outside specification.

If your vehicle seems to pull to one side when you are driving, the wheels could be out of alignment. Have an authorized dealer periodically check the wheel alignment.

**TIRE ROTATION**

**WARNING:** If the tire label shows different tire pressures for the front and rear tires and the vehicle has a tire pressure monitoring system, then you need to update the settings for the system sensors. Always perform the system reset procedure after tire rotation. If you do not reset the system, it may not provide a low tire pressure warning when necessary.

Rotating your tires at the recommended interval will help your tires wear more evenly, providing better tire performance and longer tire life.

**Note:** If your tires show any uneven wear have the alignment checked by an authorized dealer before rotating tires.

**Note:** If you have a dissimilar spare wheel and tire assembly, it is intended for temporary use only and should not be used in a tire rotation.
**Tire Care**

**Note:** After having your tires rotated, inflation pressure must be checked and adjusted to the vehicle requirements.

**Note:** Front tires shown on the left side of the diagram.

**Non-directional tires**

![Non-directional tires diagram]

**Directional tires**

![Directional tires diagram]

To make sure the front and rear tires of your vehicle wear evenly and last longer, we recommend that you swap the tires from front to rear and vice versa at regular intervals between 5,000 km (3,000 mi) and 10,000 km (6,000 mi).
WHAT IS THE TIRE SEALANT AND INFLATOR KIT

The kit consists of an air compressor to re-inflate the tire and a canister of sealing compound that effectively seals most punctures. This kit provides a temporary tire repair allowing you to drive your vehicle up to 200 km (120 mi) at a maximum speed of 80 km/h (50 mph) to reach a tire service location.

Note: The temporary mobility kit contains enough sealant compound in the canister for one tire repair only. See an authorized dealer for replacement sealant canisters.

TIRE SEALANT AND INFLATOR KIT PRECAUTIONS

⚠️ WARNING: Depending on the type and extent of tire damage, some tires can only be partially sealed or not sealed at all. Loss of tire pressure can affect vehicle handling, leading to loss of vehicle control.

⚠️ WARNING: Do not use the kit on a previously damaged tire, for example when it has been driven under inflated. This could cause loss of vehicle control, personal injury or death.

Do not attempt to repair punctures larger than 6 mm (0.24 in) or damage to the tire's sidewall.

Only punctures located within the tire tread can be sealed with the kit.

Only use the kit supplied with your vehicle.

The temporary mobility kit contains enough sealant compound in the canister for one tire repair only.

After using the sealant, an authorized dealer needs to replace the tire pressure monitoring system sensor and valve stem on the wheel.

LOCATING THE TIRE SEALANT AND INFLATOR KIT

The kit is in the luggage compartment.

TIRE SEALANT AND INFLATOR KIT COMPONENTS

A Sealant bottle.
B Bottle cap.
C Sealant bottle access cap.
D Power switch.
E 12 volt DC power point connector.
Tire Sealant and Inflator Kit

F Pressure release valve.
G Protective cap.
H Tire inflation pipe.
I Warning Label.
J Pressure gauge.

Note: Make sure you regularly check the expiry date on the sealant bottle.

USING THE TIRE SEALANT AND INFLATOR KIT

WARNING: Do not leave the kit unattended when it is in use. Failure to follow this instruction could result in personal injury or death.

WARNING: Check the sidewall of the tire prior to inflation. If there are any cracks, bumps or similar damage, do not attempt to inflate the tire. This could cause personal injury.

1. Check for a punctured tire.

Note: Do not remove objects, for example nails or screws from a punctured tire.

2. To temporarily repair a punctured tire, release the tire inflation pipe and the 12 volt DC power point connector from the underside of the compressor.

3. Turn the sealant bottle access cap counterclockwise and remove it.
4. Remove the sealant bottle cap. Do not pierce or remove the seal.

5. Attach the sealant bottle to the compressor. Turn the sealant bottle clockwise until you feel a strong resistance.

   **Note:** Attaching the sealant bottle to the compressor pierces the seal. Do not loosen the bottle as sealant could escape.

6. Remove the tire valve dust cap and attach the tire inflation pipe.

7. Plug the 12 volt DC power point connector into the 12 volt DC socket. See **Power Outlet** (page 177).

8. Start the engine.
9. Switch the compressor on.

**WARNING:** Do not stand directly beside the tire while the compressor is operating. This could cause personal injury if the tire bursts.

10. Inflate the tire to between 2–3 bar (29–44 psi).

**Note:** If the tire pressure does not reach 1.8 bar (26 psi) within 10 minutes, the tire could be damaged beyond a temporary repair. Have your vehicle immediately checked. Do not drive your vehicle.

11. When the tire reaches the recommended tire pressure of between 2–3 bar (29–44 psi), switch the compressor and the ignition off.

12. Disconnect the tire inflation pipe and the 12 volt DC power point connector.

**Note:** Do not remove the sealant bottle from the compressor.

13. Reinstall the tire valve dust cap.

14. Place the warning label on the steering wheel and correctly stow the kit.
15. Immediately drive your vehicle for 3–10 km (2–6 mi). Do not exceed 80 km/h (50 mph).

**Note:** If the tire pressure has dropped to 1.8 bar (26.1 psi) or below, the tire could be damaged beyond a temporary repair. Have your vehicle immediately checked. Do not drive your vehicle.

**Note:** If the tire pressure has dropped but is still above 1.8 bar (26 psi), use the kit to inflate the tire again.

### After Using the Tire Sealant and Inflator Kit

**WARNING:** If you experience heavy vibrations, unsteady steering behavior or noises while driving, reduce your speed gradually and stop your vehicle as soon as it is safe to do so. Recheck the tire and its pressure. If the tire pressure is less than 1.3 bar (18.9 psi) or if there are any cracks, bumps or similar damage visible, do not continue driving with this tire. This could cause loss of vehicle control.

The kit only provides temporary mobility. Regulations concerning tire repair or replacement after using the kit could differ from country to country. We recommend you consult a tire specialist.

After using the kit:

- Do not drive your vehicle more than 200 km (124 mi) before repairing or replacing the punctured tire.
- Inform all other users of your vehicle that a tire was sealed using the kit. Make them aware of the special driving conditions that must be observed.
- Regularly check the tire pressure until the sealed tire is repaired or replaced by a tire specialist. Before the tire is removed from the rim, you must inform the tire specialist that the tire contains sealant.
- Take the kit to an authorized dealer to have the sealant bottle and the tire inflation pipe replaced.
WHAT IS THE TIRE PRESSURE MONITORING SYSTEM

The tire pressure monitoring system measures the vehicle’s tire pressures. A warning lamp illuminates if one or more tires are significantly underinflated or if there is a system malfunction.

TIRE PRESSURE MONITORING SYSTEM PRECAUTIONS

**WARNING:** The tire pressure monitoring system is not a substitute for manually checking tire pressures. You should periodically check tire pressures using a pressure gauge. Failure to correctly maintain tire pressures could increase the risk of tire failure, loss of control, vehicle rollover and personal injury.

**WARNING:** Do not use the tire pressure displayed in the information display as a tire pressure gauge. Failure to follow this instruction could result in personal injury or death.

**Note:** The use of tire sealants can damage the tire pressure monitoring system.

TIRE PRESSURE MONITORING SYSTEM LIMITATIONS

The warning lamp can illuminate when:

- You use a spare wheel or a tire sealant and inflator kit.
- The outside air temperature drops significantly. The tire pressure could decrease and activate the low tire pressure warning lamp. Check each tire to verify that none are flat. Inflate the tires, if needed, to the recommended pressures and carry out the reset procedure.

**Note:** Regularly checking the vehicle tire pressures can reduce the possibility for the warning lamp to illuminate due to outside air temperature changes.

**Note:** After you inflate the tires to the correct pressure, it may take up to two minutes of driving over 32 km/h (20 mph) for the warning lamp to turn off.

VIEWING THE TIRE PRESSURES - VEHICLES WITH: 4.2 INCH INSTRUMENT CLUSTER DISPLAY SCREEN

1. Using the information display controls on the steering wheel, select Settings.
2. Select **Information**.
3. Select **Tyre pressure**.

**VIEWING THE TIRE PRESSURES - VEHICLES WITH: 12.3 INCH INSTRUMENT CLUSTER DISPLAY SCREEN**

1. Press the menu button on the steering wheel to enter the information display main menu.
2. Select **Select screens**.
3. Select **Tyre pressure**.

**RESETTING TIRE PRESSURE MONITORING SYSTEM - VEHICLES WITH: 12.3 INCH INSTRUMENT CLUSTER DISPLAY SCREEN**

You must reset the tire pressure monitoring system after each tire replacement, tire rotation or after inflating the tires to the correct tire pressure.

**Note:** If you have a new sensor or have rotated the vehicle tires, park your vehicle for at least 20 minutes, before resetting the system.

1. Press the menu button on the steering wheel to enter the instrument cluster display main menu.
2. Select **Settings**.
3. Select **Tyre pressure**.
4. Press and hold the **OK** button until the system reset confirmation appears.

**RESETTING TIRE PRESSURE MONITORING SYSTEM - VEHICLES WITH: 4.2 INCH INSTRUMENT CLUSTER DISPLAY SCREEN**

You must reset the tire pressure monitoring system after each tire replacement, tire rotation or after inflating the tires to the correct tire pressure.

**Note:** The tire pressure monitoring system automatically re-learns the tire pressure sensors the next time you drive your vehicle for approximately 15 minutes.

1. Press the menu button on the steering wheel to enter the instrument cluster display main menu.
2. Select **Settings**.
3. Select **Tyre pressure**.
4. Press and hold the **OK** button until the system reset confirmation appears.

**Note:** The tire pressure monitoring system automatically re-learns the tire pressure sensors the next time you drive your vehicle for approximately 15 minutes.

1. Using the information display controls on the steering wheel, select **Settings**.
2. Select **Information**.
3. Select **Tyre pressure**.
4. Select **Reset**.
5. Press and hold the **OK** button until the system reset confirmation appears.

</table>
CHANGING A FLAT TIRE

**WARNING:** Failure to follow these guidelines could result in an increased risk of loss of vehicle control, injury or death.

**WARNING:** Do not attempt to change a tire on the side of the vehicle close to moving traffic. Pull far enough off the road to not obstruct the flow of traffic and avoid the danger of being hit when operating the jack or changing the wheel.

**WARNING:** Switch the ignition off and apply the parking brake. If your vehicle has a manual transmission, shift into first or reverse gear. If your vehicle has an automatic transmission, shift into park (P).

**WARNING:** Make sure that your vehicle is on firm and level ground with the front wheels pointing straight ahead and set up a warning triangle if available.

**WARNING:** To help prevent your vehicle from moving when changing a wheel, use an appropriate block or wheel chock to secure the wheel diagonally opposite to the wheel being changed. For example, when changing the front left wheel, place an appropriate block or wheel chock on the right rear wheel.

**WARNING:** Do not switch off stability control or select sport mode, when using a temporary spare wheel or after repairing a tire using the temporary mobility kit.

Make sure all passengers are out of your vehicle.

If the spare wheel is the same type and size as the your vehicle road wheels, you can fit the spare wheel and continue to drive in the normal manner. We recommend that you have the damaged road wheel and tire repaired or replaced as soon as possible.

If the spare wheel is not the same type and size as your vehicle road wheels, it has a label showing the maximum driving speed limit.

**Note:** Your vehicle may exhibit some different driving characteristics if you fit the spare wheel.

**Note:** The ground clearance of your vehicle may be reduced when the spare wheel is fitted. Take care when parking next to a curb.

**Note:** If the spare wheel is fitted to your vehicle, do not drive through an automatic car wash.

The spare wheel, vehicle jack, towing eye, wheel nut tool and wheel trim remover are in the luggage compartment under the floor covering or in the side panel.
1. To remove the spare wheel, vehicle jack and wheel nut tool, turn the securing nut counterclockwise and remove it. Remove the wheel from the spare wheel well.

2. Turn the vehicle jack securing bolt counterclockwise and remove it.

3. Turn the vehicle jack screw counterclockwise to remove the vehicle jack handle and wheel nut tool from the vehicle jack.
4. Unfold the vehicle jack handle and the hexagonal end into the correct position prior to use. Use the hexagonal end to operate the vehicle jack screw and to remove the wheel nuts.

5. If you have wheel trim, use the hook on the vehicle jack handle and wheel nut tool to remove the wheel trim.

6. Locate the vehicle jacking points. Small arrow-shaped marks indicate the locations.

7. Carefully position the vehicle jack onto the vehicle jacking point.

8. Place the hexagonal end of the vehicle jack handle and wheel nut tool onto the vehicle jack.

9. Turn the vehicle jack handle clockwise to raise the vehicle without lifting the wheel off the ground.

**WARNING:** Only use the jack provided as original equipment with your vehicle.

**WARNING:** The jack supplied with this vehicle is only intended for changing a flat tire in an emergency. Do not attempt to do any other work on your vehicle when it is supported by the jack, as your vehicle could slip off the jack. Failure to follow this instruction could result in personal injury or death.

**WARNING:** No person should place any portion of their body under a vehicle that is supported by a jack.

**WARNING:** Only use the specified jacking points. If you use any other locations you could damage vehicle components, such as brake lines.

**WARNING:** Never place anything between the vehicle jack and the ground.

**WARNING:** Never place anything between the vehicle jack and your vehicle.
Changing a Road Wheel

10. If your vehicle has locking wheel nuts, install the locking wheel nut tool and loosen the locking wheel nut first.

11. Loosen the wheel nuts.

12. Raise your vehicle until the tire is clear of the ground.

13. Remove the wheel nuts and the wheel.

Note: Do not lay alloy wheels face down on the ground. This may damage the paint.

**WARNING:** Make sure there is no grease or oil on the threads or the surface between the wheel studs and the wheel nuts. This can cause the wheel nuts to loosen while driving.

**WARNING:** Only use the spare wheel and tire assembly provided as original equipment with your vehicle.

**WARNING:** When you install a wheel, remove any corrosion, dirt or foreign materials present on the mounting surfaces of the wheel or the surface of the wheel hub, brake drum or brake disc that contacts the wheel. Make sure to secure any fasteners that attach the rotor to the hub so they do not interfere with the mounting surfaces of the wheel. Installing wheels without following these steps can cause the wheel nuts to loosen and the wheel to come off while your vehicle is in motion, resulting in loss of vehicle control, personal injury or death.

**WARNING:** Have the wheel nuts checked for tightness and the tire pressure checked as soon as possible.
14. Inspect the wheel pilot bore (A) and mounting surface prior to installation. Remove any visible corrosion or loose particles.
15. Install the wheel.
16. Install the wheel nuts finger tight. **Note:** Make sure that the cones on the wheel nuts are against the wheel.

**WARNING:** Do not install alloy wheels using wheel nuts designed for use with steel wheels.

<table>
<thead>
<tr>
<th>Nm (lb.ft)</th>
</tr>
</thead>
<tbody>
<tr>
<td>135 (100)</td>
</tr>
</tbody>
</table>

You can obtain a replacement locking wheel nut key and replacement locking wheel nuts from an authorized dealer using the reference number certificate.

17. Partially tighten the wheel nuts in the sequence shown.
18. Lower your vehicle and remove the vehicle jack.
19. Fully tighten the wheel nuts in the sequence shown. See **Wheel Nuts** (page 445).
20. Carefully install the wheel trim.

**WHEEL NUTS**

**WARNING:** Only use the specific wheel nuts and wheels provided as original equipment with your vehicle. If in doubt, contact an authorized dealer.

Note: We recommend using DOT 4 LV (Low Viscosity) High Performance Brake Fluid meeting WSS-M6C65-A2 or ISO 4925 Class 6 standards. Use of any fluid other than the recommended fluid could cause reduced brake performance and not meet our performance standards. Keep brake fluid clean and dry. Contamination with dirt, water, petroleum products or other materials could result in brake system damage and possible failure.
VEHICLE IDENTIFICATION NUMBER

LOCATING THE VEHICLE IDENTIFICATION NUMBER

You can find the vehicle identification number at the following locations.

On the left-hand side of the instrument panel.

Stamped into the floor panel on the right-hand side, in front of the front seat.

VEHICLE IDENTIFICATION PLATE

LOCATING THE VEHICLE IDENTIFICATION PLATE

The vehicle identification plate is within the right-hand door aperture.

VEHICLE IDENTIFICATION PLATE OVERVIEW
Vehicle Identification

A  Model.
B  Variant.
C  Engine designation.
D  Engine power and emission level.
E  Vehicle identification number.
F  Gross vehicle weight.
G  Gross train weight.
H  Maximum front axle weight.
I  Maximum rear axle weight.

**Note:** The vehicle identification plate may vary to that shown.

**Note:** Information on the vehicle identification plate is dependent upon market requirements.
WHAT IS A CONNECTED VEHICLE

A connected vehicle has technology that allows your vehicle to connect to a mobile network and for you to access a range of features. When used in conjunction with the FordPass app, it could allow you to monitor and control your vehicle further, for example checking the tire pressures, the fuel level and the vehicle location. For additional information, refer to the local Ford website.

CONNECTED VEHICLE REQUIREMENTS

Connected service and related feature functionality requires a compatible vehicle network.

Some remote features require additional service activation. Log in to your Ford account for details. Some restrictions, third party terms and message or data rates may apply.

CONNECTED VEHICLE LIMITATIONS

Evolving technology, cellular networks, or regulations could affect functionality and availability, or continued provision of some features. These changes could even stop some features from functioning.

CONNECTING THE VEHICLE TO A MOBILE NETWORK

WHAT IS THE MODEM

The modem allows access to a range of features built into your vehicle.

ENABLING AND DISABLING THE MODEM - VEHICLES WITH: SYNC 3/SYNC 2.5

1. Press Settings.
4. Switch connectivity features on or off.

ENABLING AND DISABLING THE MODEM - VEHICLES WITH: SYNC 4

1. Press Settings.
2. Press Connectivity.
4. Switch vehicle connectivity on or off.

CONNECTING FORDPASS TO THE MODEM

1. Make sure that the modem is enabled using the vehicle settings menu.
2. Open the FordPass app on your device and log in.
3. Add your vehicle or select your vehicle if already added.
4. Select the option to activate your vehicle.
5. Make sure that the name on the screen matches the name shown in your FordPass account.
6. Confirm that FordPass account is connected to the modem.

CONNECTING THE VEHICLE TO A WI-FI NETWORK - VEHICLES WITH: SYNC 4

1. Press Settings on the touchscreen.
2. Press Connectivity.
3. Press *Manage Wi-Fi Networks*.
4. Switch *Wi-Fi* on.
5. Press *View Available Networks*.
6. Select an available Wi-Fi network.

**Note:** Enter the network password to connect to a secure network.

---

**CONNECTING THE VEHICLE TO A WI-FI NETWORK - VEHICLES WITH: SYNC 3/SYNC 2.5**

1. Press *Settings*.
2. Press *Wi-Fi*.
3. Switch *Wi-Fi* on.
4. Press *View available networks*.
5. Select an available Wi-Fi network.

**Note:** Enter the network password to connect to a secure network.

---

**CONNECTED VEHICLE – TROUBLESHOOTING**

---

**CONNECTED VEHICLE – FREQUENTLY ASKED QUESTIONS - VEHICLES WITH: SYNC 4**

**Why can I not confirm the connection of my FordPass account to the modem?**

- The modem is not enabled. Switch vehicle connectivity on.
- The network signal is weak. Move your vehicle closer to a place where the network signal is not obstructed.

---

**Why can I not connect to a Wi-Fi network?**

- You entered the wrong network password. Enter the correct password.
- The network signal is weak. Move your vehicle closer to the Wi-Fi router or to a place where the network signal is not obstructed.
- There are multiple access points in range with the same network name. Choose a unique name for your network. Do not use the default name unless it contains a unique identifier, for example as part of the MAC address.

**Why does the Wi-Fi connection disconnect after successful connection?**

- The network signal is weak. Move your vehicle closer to the Wi-Fi router or to a place where the network signal is not obstructed.

**What can I do if I am close to a Wi-Fi router but the network signal strength is weak?**

- If your vehicle has a heated windshield, position your vehicle so that the windshield is not facing the Wi-Fi router.
- If your vehicle has metallic tinting on the windows but not on the windshield, position your vehicle so that the windshield is facing the Wi-Fi router or open the windows that are facing the router.
- If your vehicle has metallic tinting on the windows and the windshield, open the windows that are facing the router.
- If your vehicle is in a garage and you have the garage door closed, open the garage door as it could block the signal.
Why can I not see a network I expect to see in the list of available networks?

- The network is hidden. Make the network visible and try again, or manually add a network in the Wi-Fi settings menu.
- Some network security types are not supported, for example WEP.

Why do software downloads take too long?

- The network signal is weak. Move your vehicle closer to the Wi-Fi router or to a place where the network signal is not obstructed.
- Wi-Fi network is in high demand or has a slow Internet connection. Use a more reliable Wi-Fi network.

Why does the software not update when the system seems to connect to a Wi-Fi network and the signal strength is excellent?

- No software update is available at this time.
- Select automatic updates option in the settings menu to enable automatic software update or contact an authorized dealer.
- There could be a connection problem. Test the network using another device.

Why can I not confirm the connection of my FordPass account to the modem?

Vehicle Wi-Fi Hotspot

CREATING A VEHICLE WI-FI HOTSPOT

You can create a Wi-Fi hotspot in your vehicle and allow devices to connect to it for access to the Internet.

1. Press Settings on the touchscreen.
   
**Note:** The vehicle hotspot default setting is on.

3. Press Settings.
5. Press Hotspot Visibility.
   
**Note:** The hotspot visibility default setting is on.

Finding the Wi-Fi Hotspot Name and Password

1. Press Settings on the touchscreen.
3. Press Settings.
   
**Note:** The network name is the hotspot name.

4. Press Show Password.

Connecting a Device to the Wi-Fi Hotspot

1. On your device, switch Wi-Fi on and select the hotspot from the list of available Wi-Fi networks.
2. When prompted, enter the password.

Purchasing a Data Plan

1. Connect a device to the hotspot.
   
**Note:** The vehicle network carrier’s portal opens on your device.

2. If the portal does not open on your device, open a website and it redirects to the vehicle network carrier’s portal.
   
**Note:** Secure websites do not redirect.

3. Follow the instructions on the carrier portal to purchase a plan.

**Note:** If you have an active plan, the system does not redirect to the vehicle network carrier’s portal when you connect a device. Visit the vehicle network carrier’s website to purchase more data.

**Note:** If data usage information is available in the vehicle hotspot menu, it is approximate.

**Note:** If you carry out a master reset, the system does not remove your vehicle from your vehicle network carrier’s account. To remove your vehicle from the account, contact your vehicle network carrier.

**Note:** The vehicle network carrier provides Vehicle Hotspot services, subject to your vehicle network carrier agreement, coverage and availability.

CHANGING THE VEHICLE WI-FI HOTSPOT NAME OR PASSWORD

1. Press Settings on the touchscreen.
3. Press Settings.
5. Press Change Network Name.
   
6. Enter your required network name.
7. Press Done.
8. Press Change password.
9. Enter your required password.
10. Press Done.
Changing the Wi-Fi Hotspot Frequency

**Note:** The Vehicle Hotspot frequency band is selectable depending upon your device capabilities. You will be unable to connect your device to the Vehicle Hotspot if it does not support the selected frequency band.

1. Press **Settings** on the touchscreen.
2. Press **Vehicle Hotspot**.
3. Press **Settings**.
4. Press **Edit**.
5. Select a frequency.

**VEHICLE WI-FI HOTSPOT – TROUBLESHOOTING**

**VEHICLE WI-FI HOTSPOT – FREQUENTLY ASKED QUESTIONS**

Why can I not see the Wi-Fi hotspot name when I search for Wi-Fi networks on my cell phone or other device?

- Make sure Wi-Fi hotspot visibility is on.
- The system does not provide a Wi-Fi hotspot at this time.
- Check what frequency the hotspot is transmitting in the vehicle hotspot settings menu. If the frequency is 5 GHz and your device cannot see the network, change the frequency to 2.4 GHz.
Audio System

Audio System Precautions

**WARNING:** Driving while distracted can result in loss of vehicle control, crash and injury. We strongly recommend that you use extreme caution when using any device that may take your focus off the road. Your primary responsibility is the safe operation of your vehicle. We recommend against the use of any hand-held device while driving and encourage the use of voice-operated systems when possible. Make sure you are aware of all applicable local laws that may affect the use of electronic devices while driving.

Listening to loud audio for long periods of time could damage your hearing.

Switching the Audio Unit On and Off

Press the button on the volume control or on the touchscreen.

Selecting the Audio Source

1. Select Sources.
2. Select the desired source by pressing the tile on the touchscreen.

Playing or Pausing the Audio Source

Press to pause playback. Press again to resume playback.

Note: Not all sources can be paused. The button mutes these sources.

Adjusting the Volume

Turn to adjust the volume.

Some vehicles may be able to adjust the volume using buttons on the steering wheel.

Setting a Memory Preset

To store a radio station, press and hold one of the preset buttons.

Note: A maximum of thirty presets can be stored depending on the selected number of preset pages.

Muting the Audio

Press to mute the signal. Press again to restore the signal.

Note: The mute function is only available for sources that cannot be paused.
Press the button on the steering wheel to mute the signal. Press again to restore the signal.

**SCROLLING THROUGH MENU ITEMS - VEHICLES WITH: SYNC 4**

Use the touchscreen to scroll through menu items.

**SCROLLING THROUGH MENU ITEMS - VEHICLES WITH: SYNC 3/SYNC 2.5**

Use the rotary control or the touchscreen to scroll through menu items.

**SELECTING A MENU ITEM - VEHICLES WITH: SYNC 4**

Use the touchscreen to select a menu item.

**SELECTING A MENU ITEM - VEHICLES WITH: SYNC 3/SYNC 2.5**

Use the rotary control or the touchscreen to select a menu item.

**Returning to the Previous Screen**

**ADJUSTING THE SOUND SETTINGS**

**Balance and Fade** (if Equipped)

1. Press **Settings** on the touchscreen.
2. Press **Sound settings**.
3. Press **Balance/Fade**.
4. Press the arrows to adjust the settings.

**Tone Settings**

1. Press **Settings** on the touchscreen.
2. Press **Sound settings**.
3. Press **Tone Settings**.
Audio System

4. Press the arrows or slider bar to adjust the settings.

**Speed Compensated Volume**
1. Press Settings on the touchscreen.
2. Press Sound settings.
4. Press a setting.

**Occupancy Mode** (if Equipped)
1. Press Settings on the touchscreen.
2. Press Sound settings.
3. Press DSP Occupancy.
4. Press a setting.

**Sound Mode** (if Equipped)
1. Press Settings on the touchscreen.
2. Press Sound settings.
3. Press Sound Mode.
4. Press a setting.

**SETTING THE CLOCK AND DATE**
1. Press Settings on the touchscreen.
2. Press Clock settings.
3. Set the time.

**AM/FM RADIO LIMITATIONS**

The further you travel from an AM or FM station, the weaker the signal and the weaker the reception.

Hills, mountains, tall buildings, bridges, tunnels, freeway overpasses, parking garages, dense tree foliage and thunderstorms can interfere with the reception.

When you pass a ground-based broadcast repeating tower, a stronger signal may overtake a weaker one and result in the audio system muting.

**SELECTING AN AM/FM RADIO STATION - VEHICLES WITH: SYNC 4**

**Manually Changing Radio Stations**
Use the touchscreen to change radio stations.

**Note:** You can recall radio stations using the preset buttons.

**Automatically Changing Radio Stations**

Press to seek the next station up the frequency band.
Press and hold to quickly seek up the frequency band.

Press to seek the next station down the frequency band.
Press and hold to quickly seek down the frequency band.

Press the button on the steering wheel to switch to the next preset.
Audio System

Press and hold to seek the next station up the frequency band.

Press the button on the steering wheel to switch to the previous preset.

Press and hold to seek the next station down the frequency band.

**Selecting a Station from the List**

Press Stations on the touchscreen to view available stations.

**Note:** Station list is only available for FM.

**SELECTING AN AM/FM RADIO STATION - VEHICLES WITH: SYNC 3/SYNC 2.5**

**Manually Changing Radio Stations**

Use the rotary control or the touchscreen to change radio stations.

**Note:** You can recall radio stations using the preset buttons.

**Automatically Changing Radio Stations**

Press to seek the next station up the frequency band.

Press and hold to quickly seek up the frequency band.

Press to seek the next station down the frequency band.

Press and hold to quickly seek down the frequency band.

Press the button on the steering wheel to switch to the next preset.

Press and hold to seek the next station up the frequency band.

Press the button on the steering wheel to switch to the previous preset.

Press and hold to seek the next station down the frequency band.

**Selecting a Station from the List**

Press the OK button to view available stations.

**Note:** Station list is only available for FM.

DIGITAL AUDIO BROADCASTING RADIO

WHAT IS DIGITAL AUDIO BROADCASTING RADIO

Digital Audio Broadcasting (DAB) is a digital radio standard for broadcasting digital audio radio services. Your radio allows you to listen to DAB radio stations.

DIGITAL AUDIO BROADCASTING RADIO LIMITATIONS

Coverage differs from region to region and influences the quality of reception. It is broadcast nationwide, regionally and locally. Coverage may vary on weather conditions and terrain.

Note: This could cause the audio to dropout.

SELECTING A DIGITAL AUDIO BROADCASTING RADIO STATION - VEHICLES WITH: SYNC 4

Manually Changing Radio Stations

Use the touchscreen to change radio stations.

Note: You can recall radio stations using the preset buttons.

Automatically Changing Radio Stations

Press to seek the next station up the frequency band.
Press and hold to quickly seek up the frequency band.

GENERAL INFORMATION

**WARNING:** Driving while distracted can result in loss of vehicle control, crash and injury. We strongly recommend that you use extreme caution when using any device that may take your focus off the road. Your primary responsibility is the safe operation of your vehicle. We recommend against the use of any hand-held device while driving and encourage the use of voice-operated systems when possible. Make sure you are aware of all applicable local laws that may affect the use of electronic devices while driving.

**About SYNC**

The system allows you to interact with the entertainment, information and communication systems on your vehicle using voice commands and a touchscreen. The system provides easy interaction with audio, phone, navigation, mobile apps and settings.

**Note:** You can switch the system on and use it for up to an hour without switching the ignition on.

**Note:** You can use the system after you switch the ignition off for up to 10 minutes or until you open a door.

**Note:** For your safety, some features are speed-dependent. Their use is limited to when your vehicle speed is less than 5 km/h (3 mph).

**Using the Touchscreen**

E Feature bar.

**Status Bar**

- Cell phone microphone muted.
- Audio system muted.
- Software update installed.
- Wi-Fi connected.
- Cell phone roaming.
- Text message received.
Emergency Assistance off.

Cell phone network signal strength.

Vehicle data sharing on.

Vehicle location sharing on.

Vehicle data and vehicle location sharing on.

Traffic data source: Live traffic.

Traffic data source: Traffic broadcast.

Wireless charger active.

**Feature Bar**

Select to use the radio, a USB, a media player or a Bluetooth® device. See *Entertainment* (page 485).

Select to adjust climate settings. See *Climate* (page 487).

Select to make calls and access the phonebook on your cell phone. See *Phone* (page 490).

Select to use the navigation system. See *Navigation* (page 492).

Select to search for and use compatible apps on your iOS or Android device. See *Apps* (page 496).

Select to adjust system settings. See *Settings* (page 497).

**Cleaning the Touchscreen**

See *Cleaning Displays and Screens* (page 420).

**Updating the System**

**Updating the System Using a USB Drive**

**(Downloading an Update)**

1. Go to the SYNC update page on the local Ford website.
2. Download the update.

**Note:** The website notifies you if an update is available.

3. Insert a USB drive into your computer.

**Note:** The USB drive needs to be empty and meet the minimum requirements detailed on the website.

4. Follow the instructions provided to download the update to the USB drive.

**(Installing an Update)**

**Note:** You can use the system when installation is in progress.

1. Disconnect all other USB devices from the USB ports.
2. Connect the USB drive with the update to a USB port.

**Note:** Installation starts automatically within 10 minutes.

**Updating the System Using a Wi-Fi Network Connection**

**Switching Automatic System Updates On**

1. Select *Settings*.
2. Select *Automatic updates*.
3. Switch *Automatic system updates* on.
The system is now set to check for and receive system updates when it is connected to a Wi-Fi network.

**Note:** You can use the system when download is in progress.

**Note:** If the system is disconnected from the Wi-Fi network when download is in progress, the download continues the next time the system is connected to a Wi-Fi network.

### Connecting to a Wi-Fi Network

See [Connecting the Vehicle to a Wi-Fi Network](#) (page 466).

### Additional Information and Assistance

For additional information and assistance, we recommend that you contact an authorized dealer or refer to the local Ford website.

### USING VOICE RECOGNITION

The system allows you to interact with the entertainment, information and communication systems on your vehicle using voice commands. This allows you to keep your hands on the steering wheel and focus on what is in front of you.

- Press the voice control button on the steering wheel and wait for the voice prompt.

**Note:** Press the voice control button again to interrupt a voice prompt and begin speaking.

**Note:** Turn the volume control when a voice prompt plays to adjust the volume.

**Note:** Press and hold the voice control button on the steering wheel to use Siri on your iOS device.

The following voice commands are designed to help you from any screen:

- **List of commands**
- **Help**

The following tables list some of the more frequently used voice commands. For a complete list of voice commands, refer to the local Ford website.

#### General

<table>
<thead>
<tr>
<th>Voice Command</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>___ list of commands</td>
<td>Get a list of voice commands for a specific feature.¹</td>
</tr>
<tr>
<td>Cancel</td>
<td>Cancel an active voice session.</td>
</tr>
<tr>
<td>___ help</td>
<td>Get a list of voice commands for a specific feature.¹</td>
</tr>
<tr>
<td>Back</td>
<td>Return to the previous screen.</td>
</tr>
<tr>
<td>Main menu</td>
<td>Go to the main menu.</td>
</tr>
</tbody>
</table>

¹ For a complete list of voice commands, refer to the local Ford website.
### Description

Voice Command | Description
--- | ---
Next page | Go to the next page.
Previous page | Go to the previous page.

1 Add the name of the feature to the command.

### Entertainment

#### Audio Source

<table>
<thead>
<tr>
<th>Voice Command</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Radio</td>
<td>Use the radio.</td>
</tr>
<tr>
<td>CD Player</td>
<td>Use the CD player.</td>
</tr>
<tr>
<td>Bluetooth audio</td>
<td>Use a Bluetooth® device.</td>
</tr>
<tr>
<td>USB</td>
<td>Use a USB or media player.</td>
</tr>
</tbody>
</table>

### Radio

<table>
<thead>
<tr>
<th>Voice Command</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AM</td>
<td>Listen to AM radio.</td>
</tr>
<tr>
<td>___ AM</td>
<td>Tune to a specific AM frequency.</td>
</tr>
<tr>
<td>DAB</td>
<td>Listen to DAB radio.</td>
</tr>
<tr>
<td>FM</td>
<td>Listen to FM radio.</td>
</tr>
<tr>
<td>___ FM</td>
<td>Tune to a specific FM frequency.</td>
</tr>
</tbody>
</table>

1 Add the radio frequency to two decimal places to the command.
## SYNC™ 3 - Vehicles With: SYNC 3

### USB and Media Player

<table>
<thead>
<tr>
<th>Voice Command</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Play album ___</td>
<td>Play your music by category.¹</td>
</tr>
<tr>
<td>Play artist ___</td>
<td></td>
</tr>
<tr>
<td>Play audiobook ___</td>
<td></td>
</tr>
<tr>
<td>Play genre ___</td>
<td></td>
</tr>
<tr>
<td>Play playlist ___</td>
<td></td>
</tr>
<tr>
<td>Play podcast ___</td>
<td></td>
</tr>
<tr>
<td>Play song ___</td>
<td></td>
</tr>
<tr>
<td>Browse all albums</td>
<td>Browse music on a USB device.</td>

</tbody>
</table>
Automatic Blower Motor Speed Reduction

If necessary, the system decreases the blower motor speed when you are using voice commands to reduce the amount of background noise in your vehicle. It returns to normal when you are finished.

Switching Automatic Blower Motor Speed Reduction Off

Simultaneously press the A/C and recirculated air buttons.

ENTERTAINMENT

Select the audio option on the feature bar.

Using the Radio

Setting an AM/FM Radio Station

1. Select Sources.
2. Select AM or FM.

3. Rotate the control to change the frequency.

Selecting a FM Radio Station From a List

1. Select Sources.
2. Select FM.
3. Select Stations.
4. Select a radio station from the list.

Selecting a Digital Radio Station From a List

1. Select Sources.
2. Select DAB.
3. Select Stations.
4. Select an ensemble.
5. Select a radio station from the list.

A Audio source. Select to choose a different audio source.

B Presets. Swipe left to view more presets.

You can access these options using the touchscreen or voice commands.
Manually Changing Digital Radio Stations

Rotate the control to change the station.

Automatically Changing Radio Stations

Press to seek the next station up the frequency band.
Press and hold to quickly seek up the frequency band.

Press to seek the next station down the frequency band.
Press and hold to quickly seek down the frequency band.

Storing a Radio Station

Press and hold one of the preset buttons.

Note: The radio briefly mutes to indicate the station has been stored.

Note: You can add additional preset pages using the settings option on the feature bar.

Switching Traffic Announcements On

Select Traffic (TA).

Note: If you switch traffic announcements on, traffic announcements broadcast by radio stations interrupt the current audio source to help you plan your route.

Streaming Music From a Bluetooth® Device.

Check the compatibility of your device on the local Ford website.
Pair your device. See Phone (page 490).
Select Sources.
Select Bluetooth.

Searching for Tracks on Bluetooth® Device.

Select Browse.
Select a track.

Note: Select the cover art to view information about the current track.

Playing Tracks on Bluetooth® Device in a Random Order.

Select to play tracks in a random order.

Repeating Tracks on Bluetooth® Device.

Select the repeat icon to repeat tracks.

Note: You can repeat one track or all tracks on an audio format Bluetooth® Device. You can repeat one track, all tracks or all tracks in one folder on a Bluetooth® Device.

Note: A small number one appears next to the repeat icon to indicate that a track is set to repeat. A small folder icon appears next to it to indicate that a folder is set to repeat.
Playing Music From a USB or Media Player

Connect your device to a USB port.
Select Sources.
Select USB.

Note: The system indexes your music before you can play it.

Searching for Tracks on a USB or Media Player

Select Browse.
Select a track.

Note: Select the cover art to view information about the current track.

Note: You can also browse by album, artist, audiobook, genre, playlist, podcast or track name.

Playing Tracks on a USB or Media Player in a Random Order

Select to play tracks in a random order.

Repeating Tracks on a USB or Media Player

Select the repeat icon to repeat tracks.

Note: You can repeat one track or all tracks on an audio format USB or media player. You can repeat one track, all tracks or all tracks in one folder on a USB or media player.

Note: A small number one appears next to the repeat icon to indicate that a track is set to repeat. A small folder icon appears next to it to indicate that a folder is set to repeat.

Supported Devices

The system supports most USB and media players, including iOS and Android devices.

Supported File Formats

The system supports the following file formats:

- MP3, MP4, WMA, WAV, AAC, AIFF, APE, DSD, and FLAC audio file formats.
- MP3, WMA, WAV, M4A, M4B, AAC, and FLAC file extensions.
- FAT, exFAT, and NTFS file systems.

Audio File Metadata

The system organizes files on your USB or media player by metadata tags. Metadata tags contain information about the file. If the metadata tags for the files on your USB or media player contain no information, the system classifies them as unknown. The system can index up to 50000 tracks on a USB device or media player, and up to 10 devices.

CLIMATE

Touch the climate button on the touchscreen to access the climate control features.

Note: You can switch temperature units between Fahrenheit and Celsius. See Settings (page 497).

Accessing the Climate Control Menu

Touch the button to access additional controls for the front climate system.

Directing the Airflow

Touch the button to direct airflow to the windshield air vents and de-mister.
Touch the button to direct airflow to the instrument panel air vents.

Touch the button to direct airflow to the footwell air vents.

You can direct air through any combination of these air vents.

**Setting the Blower Motor Speed**

Touch up or down to increase or decrease the volume of air that circulates in your vehicle.

**Setting the Temperature**

Touch up or down on the left-hand temperature control to set the left-hand temperature.

*Note: This control also adjusts the right-hand side temperature when you switch off dual zone mode.*

Touch up or down on the right-hand temperature control to set the right-hand temperature.

**Switching Auto Mode On and Off**

Touch the button to switch on automatic operation, then set the temperature.

The system adjusts the blower motor speed, air distribution, air conditioning operation, and outside or recirculated air to reach and maintain the temperature you have set.

**Switching the Air Conditioning On and Off**

A pop-up appears on the screen to display the air conditioning options.

**MAX A/C:** Touch the button to activate and maximize cooling. The driver and passenger temperatures are set to LO, recirculated air flows through the instrument panel vents, air conditioning automatically turns on and the fan automatically adjusts to the highest speed.

**A/C:** Touch to switch the air conditioning on or off. Use A/C with recirculated air to improve cooling performance and efficiency.

*Note: In certain conditions, such as maximum defrost, the air conditioning compressor may continue to operate even though you switch off the air conditioning.*

**Switching the Climate Control On and Off**

Touch the button.

**Switching the Climate Controlled Seats On and Off**

Touch the button to cycle through the various climate controlled seat settings.

**Switching Dual Zone Mode On and Off**

Touch the button to switch on temperature control for the right-hand side of the vehicle.

**Switching the Heated Exterior Mirrors On and Off**

Touch the button.
Switching the Heated Windshield On and Off

Touch the button to clear the windshield of thin ice and fog. The heated windshield turns off after a short period of time.

Switching the Heated Rear Window On and Off

Touch the button to clear the rear window of thin ice and fog.

Switching the Heated Seats On and Off

Touch the button to cycle through the various heat settings.

Switching the Heated Steering Wheel On and Off

Touch the button.

Switching Maximum Air Conditioning On and Off

Touch the button for maximum cooling.

Recirculated air flows through the instrument panel air vents, air conditioning turns on and the blower motor adjusts to the highest speed.

Switching Maximum Defrost On and Off

Touch the button for maximum defrosting.

Air flows through the windshield air vents, and the blower motor adjusts to the highest speed.

You can also use this setting to defog and clear the windshield of a thin covering of ice.

**Note:** To prevent window fogging, you cannot select recirculated air when maximum defrost is on.

**Note:** The heated rear window also turns on when you select maximum defrost.

**Note:** Depending on your region, air conditioning turns on.

Switching Recirculated Air On and Off

Touch the button to switch between outside air and recirculated air.

The air currently in the passenger compartment recirculates. This may reduce the time needed to cool the interior, when used with A/C, and reduce unwanted odors from entering your vehicle.

**Note:** Recirculated air may turn off, or prevent you from switching on, in all air flow modes except MAX A/C to reduce the risk of fogging. Recirculation may also turn on and off in various air distribution control combinations during hot weather to improve cooling efficiency.

Switching the Ventilated Seats On and Off

Touch the button to cycle through the various ventilated seat settings.

Accessing Rear Climate Controls

Touch the button to access additional controls for the rear climate system.
Rear Climate Control Lock Indicator

**REAR LOCK**

Touch the button. When on, you can only operate the rear passenger settings through the front controls.

Switching Rear Auto Mode On and Off

**AUTO**

Touch the button to switch on rear automatic operation, then set the temperature.

Switching the Rear Climate Controlled Seats On and Off

**A/C**

Touch the button to cycle through the various climate controlled seat settings.

Switching the Rear Heated Seats On and Off

**Heated**

Touch the button to cycle through the various heat settings.

Switching the Rear Ventilated Seats On and Off

**Ventilated**

Touch the button to cycle through the various ventilated seat settings.

PHONE

**WARNING:** Driving while distracted can result in loss of vehicle control, crash and injury. We strongly recommend that you use extreme caution when using any device that may take your focus off the road. Your primary responsibility is the safe operation of your vehicle. We recommend against the use of any hand-held device while driving and encourage the use of voice-operated systems when possible. Make sure you are aware of all applicable local laws that may affect the use of electronic devices while driving.

Check the compatibility of your device on the local Ford website.

Pairing Your Cell Phone for the First Time

Go to the settings menu on your device and switch **Bluetooth®** on.

Make sure your cell phone is discoverable. See your cell phone’s user manual.

Select the phone option on the feature bar.

1. Select *Pair phone*.
   **Note:** A prompt alerts you to search for your vehicle on your cell phone.

2. Select your vehicle on your cell phone.
   **Note:** A number appears on your cell phone and on the touchscreen.

3. Confirm that the number on your cell phone matches the number on the touchscreen.
   **Note:** The touchscreen indicates that you have successfully paired your cell phone.

4. Download the phonebook from your cell phone when you are prompted.
   **Note:** If you pair more than one cell phone, use the phone settings to specify the primary phone. You can change this setting at any time.

Using Your Cell Phone

**Recent Call list**

Display and select an entry from a list of previous calls.

PHONE
**Contacts**
Display a smart search form to look up your contacts. Use the List button to alphabetically sort your contacts.

**Your phone**
Change ring tones, alerts or pair another cell phone.

**Change device**
Display the list of paired or connected devices that you can select.

**Do not disturb**
Reject incoming calls and switch ring tones and alerts off.

**Phone Keypad**
Directly dial a number.

**Text messages**
Display the cell phone messages.

**Siri**
Connect to Siri on your iOS device.

**Phone Voice Assistant**
Connect to the phone voice service on your Android device.

**Text Messaging**

**Setting Text Message Notification**

**iOS**
1. Go to the settings menu on your cell phone.
2. Select Bluetooth®.
3. Select the information icon to the right of your vehicle.
4. Switch text message notification on.

**Android**
1. Go to the settings menu on your cell phone.
2. Select Bluetooth®.
3. Select the profiles option.
4. Select the phone profile.
5. Switch text message notification on.

### Using Text Messaging

<table>
<thead>
<tr>
<th>Menu Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hear it</td>
<td>Hear the text message.</td>
</tr>
<tr>
<td>View</td>
<td>View the text message.</td>
</tr>
<tr>
<td>Call</td>
<td>Call the sender.</td>
</tr>
<tr>
<td>Reply</td>
<td>Reply to the text message with a standard text message.</td>
</tr>
</tbody>
</table>

**Apple CarPlay**
1. Connect your device to a USB port.
2. Follow the instructions on the touchscreen.

**Note:** Certain features of the system are not available when you are using Apple CarPlay.

**Switching Apple CarPlay Off**
1. Select Settings.
2. Select Apple CarPlay preferences.
3. Switch **Apple CarPlay** off.

**Android Auto**

1. Connect your device to a USB port.
2. Follow the instructions on the touchscreen.

**Note:** You might need to enable Android Auto from the settings menu.

**Note:** Certain features of the system are not available when you are using Android Auto.

**Switching Android Auto Off**

1. Select **Settings**.
2. Select **Android Auto**.
3. Switch **Android Auto** off.

**NAVIGATION**

**Note:** For more information, refer to the local Ford website.

Select the navigation option on the feature bar.

![Navigation features](image)

**A** Text entry field.

**B** Automatic suggestions based on the text you enter.

**C** Information icon.

**D** Search.

**E** Keyboard settings.

**Note:** Select one of the suggestions to copy the detail to the text entry field.

**Note:** You can enter a destination in a number of formats, **city street number**, **city number street**, zip code or point of interest.

**Note:** You do not have to enter the destination country.

**Note:** To enter mutated vowels or accented characters, for example ä or é, press and hold the corresponding character on the keyboard.
Select **Search**. Select **Start** to begin route guidance.

**Setting a Destination Using the Map Screen**

A Re-center the map.
B Selected location.
C 3D map rotation. Swipe left or right.
D Start route guidance.
E Destination name.

Select the location on the map. Select **Start** to begin route guidance.

**Changing the Format of the Map**

Display the map in one of the following formats:
- A two-dimensional map with the direction you are traveling toward the top of the screen.
- A two-dimensional map with north toward the top of the screen.
- A three-dimensional map with the direction you are traveling toward the front.

**Zoom**

Display more or less detail on the map.

**Note:** You can use pinch gestures to zoom in and out. Place two fingers on the screen and move them apart to zoom in. Place two fingers on the screen and bring them together to zoom out.

**Route Guidance**

A Turn indicator. Select to hear the last guidance prompt.
B Point of interest.
C Estimated time of arrival, distance to destination or time to destination.
D Current road.
E Mute guidance prompts.
F Cancel route guidance.

**Note:** To change guidance prompt volume, turn the volume control when a guidance prompt plays.

</tbody>
</table>

1 Reliant upon traffic message channel or live traffic.

### Adjusting the Guidance Prompt Volume

Turn the volume control when a guidance prompt plays to adjust the volume.

**Note:** If you have inadvertently adjusted the volume to zero, press the turn indicator button to play the last voice prompt and then adjust the volume to the desired level.
Muting Guidance Prompts
Select the mute option on the screen to mute guidance prompts.

Note: The system mutes the next and all future guidance prompts.

Adding Waypoints
You can add a waypoint to a navigation route as a destination along your route. You can add up to five waypoints.
1. Select the search option on the map.
2. Set a destination.
3. Select the flag icon.
4. Select Start.

Canceling Route Guidance

Canceling Route Guidance From the Route Guidance Menu
Select the route guidance menu option on the active guidance screen.
Select Cancel route.

Canceling Route Guidance From the Main Map
Select the icon in the upper right-hand corner of the main map to cancel route guidance.

Live Traffic (If Equipped)
Live traffic provides near real-time traffic information to help you plan the fastest route to your destination. You must have an active subscription for Live Traffic.

Switching Live Traffic On

Note: Make sure that the modem is enabled. See Connecting the Vehicle to a Mobile Network (page 465).
1. Select Settings.
2. Select FordPass Connect.
3. Select Connectivity settings.
4. Switch Vehicle connectivity on.
5. Switch Location on.
7. Switch Live Traffic on.

Navigation Map Updates
Please check the local Ford website or contact your dealership for navigation map updates.
HERE is the digital map provider for the navigation application. If you find map data errors, you can report them directly to HERE by visiting www.here.com. HERE evaluates all reported map errors and responds with the result of their investigation by e-mail.

**APPS**

The system allows you to interact with select mobile apps while keeping your eyes on the road. Voice commands, steering wheel buttons, or a quick tap on your touchscreen give you advanced control of compatible mobile apps. You can also stream your favorite music or podcasts, share your time of arrival with friends, and keep connected safely.

When you start an app through the system for the first time, you could be asked to grant certain permissions. You can review and change the permissions that you have granted at any time when your vehicle is not moving. We recommend that you check your data plan before using your apps through the system. Using them could result in additional charges. We also recommend that you check the app provider's terms and conditions and privacy policy before using their app. Make sure that you have an active account for apps that you want to use through the system. Some apps work with no setup. Others require you to configure some personal settings before you can use them.

**Note:** For more information about available apps, visit the local Ford website.

**Using Apps on an iOS Device**

Select the apps option on the feature bar.

1. If your device is connected via USB, switch Apple CarPlay off. See **Phone** (page 490).

2. Connect your iOS device to a USB port or pair and connect using **Bluetooth®**.

3. If prompted to enable CarPlay, select Disable.

4. Start the apps on your device that you want to use through SYNC.

**Note:** If you close the apps on your device, you will not be able to use them through the system.

5. Select the app that you want to use on the touchscreen.

**Note:** Connect your device to a USB port if you want to use a navigation app. When using a navigation app, keep your device unlocked and the app open.

**Using Apps on an Android Device**

Select the apps option on the feature bar.

1. If your device is connected via USB, switch Android Auto off. See **Phone** (page 490).

2. Pair your device. See **Phone** (page 490).

3. Start the apps on your device that you want to use through SYNC.

**Note:** If you close the apps on your device, you will not be able to use them through the system.

4. Select **Find mobile apps**.

**Note:** The system searches and connects to compatible apps that are running on your device.

5. Select the app that you want to use on the touchscreen.

**Note:** Mobile apps on your device use the USB port to establish a connection with SYNC. Some devices may lose the ability to play music over USB when mobile apps are enabled.
Using Mobile Navigation on an Android Device

1. Connect your device to a USB port.
2. Switch Android Auto off. See Phone (page 490).
4. Select the apps option on the feature bar.
5. Select the navigation app that you want to use on the touchscreen.

Note: When using a navigation app, keep your device unlocked and the app open.

SETTINGS

Select the settings option on the feature bar.

Select a tile to access the settings.

Select the option to display extra information.

Ambient Lighting
You can adjust the ambient lighting settings.

Android Auto
You can switch Android Auto on and off.

Apple CarPlay
You can switch Apple CarPlay on and off.

Audio
You can adjust the audio settings.

Automatic Updates
You can switch automatic updates on and off and adjust the settings.

Bluetooth®
You can switch Bluetooth on and off and pair your cell phone.

Clock
You can adjust the clock settings.

Display
You can adjust display settings like brightness and auto dim.

Emergency Assistance (If Equipped)
You can switch Emergency Assistance on and off.

FordPass
You can adjust the FordPass settings.

General
You can adjust settings like language, measurement units, or reset the system.

Mobile Apps
You can adjust permissions, enable, disable, and update mobile apps.

Navigation (If Equipped)
You can adjust navigation settings like map preferences and route guidance.

Phone
You can connect and disconnect your device, or manage the connected device settings.

Seats (If Equipped)
You can adjust the position and the massage function of the seats.

Sound
You can adjust the sound settings.
**SYNC™ 3 - Vehicles With: SYNC 3**

**Valet Mode (If Equipped)**
You can enable and disable the valet mode.

**Vehicle (If Equipped)**
You can adjust the camera settings.

**Voice Control**
You can adjust the voice control settings.

**Wi-Fi**
You can switch Wi-Fi on and off and adjust the settings.
## Voice Recognition

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Possible Cause and Resolution</th>
</tr>
</thead>
</table>
| The system does not understand what I am saying.                       | - You are using the wrong voice commands.  
  • See **Using Voice Recognition** (page 479).  
  • For a complete list of voice commands, refer to the local Ford website.  
  - You are speaking too soon.  
  • Wait for the voice prompt before you speak.                                                                                                                                 |
| The system does not understand the name of a track or artist.          | - **Bluetooth®** does not support voice commands.  
  • Connect your device to a USB port.  
  • If you have an iOS device, press and hold the voice control button on the steering wheel to use Siri to play specific tracks.  
  - You are using the wrong voice commands.  
  • See **Using Voice Recognition** (page 479).  
  • For a complete list of voice commands, refer to the local Ford website.  
  - You are not saying the name exactly as it appears on your device.  
  • Say the name of the track or artist exactly as it appears on your device. Spell out any abbreviations in the name.  
  The song or artist name may have some special characters that are not being recognized by the system.  
  - The name contains special characters, for example *, - or +.  
  • Rename the files on your device or use the touchscreen to select and play the track. |
### Possible Cause and Resolution

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Possible Cause and Resolution</th>
</tr>
</thead>
</table>
| The system does not understand the name of a contact in the phonebook on my device and calls the wrong contact. | You are not saying the name exactly as it appears on your device.  
  - Say the first and last name of the contact exactly as it appears on your device. Spell out any abbreviations in the name.  
  - The name contains special characters, for example *, -, or +.  
  - Rename the contact on your device or use the touchscreen to select and call the contact. |
| The system does not understand foreign names of contacts in the phonebook on my device. | You are not saying the name exactly as it appears on your device.  
  - Say the first and last name of the contact exactly as it appears on your device. The system applies phonetic pronunciation rules of the selected language to the names of contacts in the phonebook on your device. Select the name of the contact on the touchscreen and use the Hear it option to get an idea of how the system expects you to pronounce it. |
| The system voice prompts and the pronunciation of some words does not seem to be very accurate. | Device limitation.  
  - The system uses text-to-speech technology and uses a synthetically generated voice rather than pre-recorded human voice. |

### USB and Bluetooth® Audio

</tr>
</thead>
<tbody>
<tr>
<td>I have an iOS device that is correctly connected, I have restarted my apps and they are running but the system still cannot find them.</td>
<td>– Cable connection issue.</td>
</tr>
<tr>
<td></td>
<td>• Disconnect the cable from your device, wait for a moment and then connect it again to force the system to reconnect to your device.</td>
</tr>
<tr>
<td>I have an Android device running a media app which the system has found but I cannot hear the sound or the sound is very quiet.</td>
<td>– Device volume is low.</td>
</tr>
<tr>
<td></td>
<td>• Turn the volume up on your device.</td>
</tr>
<tr>
<td>I have an Android device running a number of compatible apps but the system cannot find all of them.</td>
<td>– Device limitation. Some Android devices have a limited number of Bluetooth® ports that apps can use to connect. If you have more apps running on your device than the number of available Bluetooth® ports, the system cannot find all of them.</td>
</tr>
<tr>
<td></td>
<td>• Close some of the apps to allow the system to find those that you want to use.</td>
</tr>
</tbody>
</table>
## Wi-Fi Connectivity

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Possible Cause and Resolution</th>
</tr>
</thead>
</table>
| I cannot connect to a Wi-Fi network.                                   | – Password error.  
  • Enter the correct network password.  
  – Weak network signal.  
  • Move your vehicle closer to the Wi-Fi hotspot or to a place where the network signal is not obstructed.  
  – Multiple access points in range with the same SSID.  
  • Use a unique name for your SSID. Do not use the default name unless it contains a unique identifier, for example as part of the MAC address. |
| The Wi-Fi connection disconnects after successful connection.           | – Weak network signal.  
  • Move your vehicle closer to the Wi-Fi hotspot or to a place where the network signal is not obstructed. |
| I am close to a Wi-Fi hotspot but the network signal strength is weak.  | – Obstructed network signal.  
  • If your vehicle has a heated windshield, position your vehicle so that the windshield is not facing the Wi-Fi hotspot.  
  • If your vehicle has metallic tinting on the windows but not on the windshield, position your vehicle so that the windshield is facing the Wi-Fi hotspot or open the windows that are facing the hotspot.  
  • If your vehicle has metallic tinting on the windows and the windshield, open the windows that are facing the hotspot.  
  • If your vehicle is in a garage and you have the garage door closed, open the garage door. |
# Possible Cause and Resolution

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Possible Cause and Resolution</th>
</tr>
</thead>
</table>
| I cannot see a network in the list of available networks that I expect to see. | – Hidden network.  
  • Make the network visible and try again. |
| Software downloads take too long.                                      | – Weak network signal  
  • Move your vehicle closer to the Wi-Fi hotspot or to a place where the network signal is not obstructed.  
  – Wi-Fi hotspot in high demand or has a slow Internet connection.  
  • Use a more reliable Wi-Fi hotspot. |
| The system seems to connect to a Wi-Fi network and the signal strength is excellent but the software does not update. | – No software update available.  
  – Wi-Fi network requires a subscription or acceptance of terms and conditions.  
  • Test the connection using another device. If the network requires a subscription or acceptance of terms and conditions, contact the network service provider. |

## Resetting the System

1. Simultaneously press and hold the seek up and the audio unit power buttons until the screen goes black.
2. Wait three minutes to allow the system to complete the reset.
3. Press the audio unit power button to switch the system on.

**Note:** You can reset the system to restore functionality that has stopped working. The system reset is designed to restore functionality and not delete any data that you have stored.

## Additional Information and Assistance

For additional information and assistance, we recommend that you contact an authorized dealer or refer to the local Ford website.
CENTER DISPLAY PRECAUTIONS

WARNING: Driving while distracted can result in loss of vehicle control, crash and injury. We strongly recommend that you use extreme caution when using any device that may take your focus off the road. Your primary responsibility is the safe operation of your vehicle. We recommend against the use of any hand-held device while driving and encourage the use of voice-operated systems when possible. Make sure you are aware of all applicable local laws that may affect the use of electronic devices while driving.

CENTER DISPLAY LIMITATIONS

Speed-restricted Features

For your safety, some features are not available while the vehicle is in motion at or above 8 km/h (5 mph). Settings that are not critical while driving your vehicle are shown as restricted on your display. Some of these settings include:

- Software updates.
- Personal profiles setup.
- Valet mode setup.
- Driver assistance settings.
- MyKey setup.
- Door keypad code setup.

These restricted features become available when your vehicle is no longer in motion.

STATUS BAR

The bar is on top of the display and indicates the status of your vehicle's features.

Audio System

Audio system muted.

Connected Device

Cell phone microphone muted.

Media player connected using Bluetooth®.

Cell phone network signal strength.

Cell phone roaming.

Text message received.

Unread email message.

Automatic crash notification system off.

Cell phone battery status.

Vehicle data sharing off.

Vehicle location sharing on.

Vehicle data and vehicle location sharing on.

**Vehicle Software Update**

Vehicle software update available.

Vehicle software update requires schedule.

Vehicle software update requires consent.

Vehicle software update requires Wi-Fi or has lost Wi-Fi connection.

Vehicle software update schedule reminder.

Vehicle software update not successful.

Vehicle software update successful.

Vehicle software update scheduled within one week.

**Wireless Accessory Charger**

Wireless accessory charger active.

**INFORMATION ON DEMAND SCREEN**

The information on demand screen displays cards on the side of the display and allows you to see information from different features.
WHAT IS VOICE INTERACTION

Voice Interaction allows you to control vehicle features using conversational requests.

SETTING THE WAKE WORD

1. Press **Settings** on the touchscreen.
2. Press **Ford Assistant**.
3. Switch **Listen for Wake Word** on.
4. Press **Preferred Wake Word**.
5. Press a setting.

BEGINNING A VOICE INTERACTION

Say the selected wake word.

Press the voice interaction button on the steering wheel.

WHAT IS ALEXA BUILT-IN

Allows you to use Alexa in your vehicle for auto specific use cases on the road and gives you access to an ever evolving number of skills that help to make your life more productive, entertaining, and connected while using your vehicle.

ALEXA BUILT-IN REQUIREMENTS

To use Alexa, all of the following must occur:
- Your vehicle modem is enabled.
- You are logged into an existing Amazon account.
- Vehicle location services are enabled.
- Vehicle connectivity and vehicle data sharing is enabled.

SIGNING INTO YOUR ACCOUNT

Press the button in the status bar and follow the on-screen prompts.

To sign in using the settings menu:
1. Press Settings on the touchscreen.
2. Press Amazon Alexa.
4. Sign into your account by either scanning the QR code or entering the on-screen code into the Amazon website.
5. Once logged in, follow the on-screen prompts.
6. When complete, the vehicle informs you that Alexa is ready to be used in the vehicle.

Signing Out of Your Account

1. Press Settings on the touchscreen.
2. Press Amazon Alexa.
3. Press Sign Out.

USING ALEXA BUILT-IN

To use Alexa, say “Alexa” or press the voice interaction button on the steering wheel and then say “Alexa” to invoke Alexa to start listening.

Note: If the wake word is not enabled, you can only use the voice interaction button.

You can use Alexa for the following and more:
- Entertainment.
- Hands-free calling.
- Traffic and navigation.
- Vehicle controls.
- Smart home device control.
- Weather and news information.

ALEXA BUILT-IN SETTINGS

Enabling the Wake Word

1. Press Settings on the touchscreen.
2. Press Amazon Alexa.
3. Switch Listen for Wake Word on or off.

Note: If the wake word is not enabled, you can only use the voice interaction button.

Contact List

Displays a list of connected phones and contact sharing status for each phone.
To change the contact sharing status:
1. Press Settings on the touchscreen.
2. Press Amazon Alexa.
3. Press Contact List.
4. Enable or disable sharing for each phone.

**Note:** You can share contacts from more than one phone at a time.

**Note:** If a contact list is not shared, hands-free calling does not work via Alexa.

**Things to Try**

Learn more about what you can do with Alexa by browsing the things to try.

1. Press **Settings** on the touchscreen.
2. Press **Amazon Alexa**.
3. Press **Things to Try**.
**PHONE PRECAUTIONS**

**WARNING:** Driving while distracted can result in loss of vehicle control, crash and injury. We strongly recommend that you use extreme caution when using any device that may take your focus off the road. Your primary responsibility is the safe operation of your vehicle. We recommend against the use of any hand-held device while driving and encourage the use of voice-operated systems when possible. Make sure you are aware of all applicable local laws that may affect the use of electronic devices while driving.

**CONNECTING YOUR PHONE**

1. Make sure **Bluetooth®** is enabled on your device.
2. Press **Add phone** on the touchscreen.  
   **Note:** A prompt alerts you to search for your vehicle on your cell phone.
3. Select your vehicle on your cell phone.  
   **Note:** A number appears on your cell phone and on the touchscreen.
4. Confirm the number on your cell phone matches the number on the touchscreen.  
   **Note:** The touchscreen indicates that you have successfully paired your cell phone.
5. Download the phonebook from your cell phone when you are prompted.  
   **Note:** If you pair more than one cell phone, use the phone settings on the center display to specify the primary phone. You can change this setting at any time.

**PHONE MENU**

This menu becomes available after pairing a phone.

**Recent Call list**

Display and select an entry from a list of previous calls.

**Contacts**

Display a smart search form to look up your contacts. Use the List button to alphabetically sort your contacts.

**Favorites**

Display the list of favorite contacts that are set up on your phone.

**Messaging**

Displays the list of text messages to read, listen to, or respond to.

**Email**

Displays the list of emails to read, listen to, or respond to.

**Phone List**

Display the list of paired or connected devices that you can select.  
**Note:** Up to 12 devices can be stored.

**Do not disturb**

Reject incoming calls and switch ring tones and alerts off.

**Phone Keypad**

Directly dial a number.
Voice Control

Press the button and say a command to use the Google or Siri voice assistant available on your connected phone to access supported features.

**Note:** Some features under the phone menu may not be available if the feature is not supported through the phone.
MAKING AND RECEIVING A PHONE CALL

Making Calls

To call a number in your contacts, select:

<table>
<thead>
<tr>
<th>Menu Item</th>
<th>Action and Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Contacts</td>
<td>You can then select the name of the contact you want to call. Any numbers stored for that contact display along with any stored contact photos. You can then select the number that you want to call. The system begins the call.</td>
</tr>
</tbody>
</table>

To call a number from your recent calls, select:

<table>
<thead>
<tr>
<th>Menu Item</th>
<th>Action and Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Recent Call list</td>
<td>You can then select an entry that you want to call. The system begins the call.</td>
</tr>
</tbody>
</table>

To call a number from your favorites, select:

<table>
<thead>
<tr>
<th>Menu Item</th>
<th>Action and Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Favourites</td>
<td>You can then select an entry that you want to call. The system begins the call.</td>
</tr>
</tbody>
</table>

To call a number that is not stored in your phone, select:

<table>
<thead>
<tr>
<th>Menu Item</th>
<th>Action and Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Phone Keypad</td>
<td>Select the digits of the number you wish to call.</td>
</tr>
<tr>
<td>Call</td>
<td>The system begins the call.</td>
</tr>
</tbody>
</table>

Pressing the backspace button deletes the last digit you typed.

Receiving Calls

During an incoming call, an audible tone sounds. Caller information appears in the display if it is available.

To accept the call, select:

<table>
<thead>
<tr>
<th>Menu Item</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accept</td>
<td>You can also accept the call by pressing the phone button on the steering wheel.</td>
</tr>
</tbody>
</table>

Note: You can also accept the call by pressing the phone button on the steering wheel.

To reject the call, select:

<table>
<thead>
<tr>
<th>Menu Item</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reject</td>
<td>Ignore the call by doing nothing. The system logs it as a missed call.</td>
</tr>
</tbody>
</table>

During a Phone Call

During a phone call, the contacts name and number display on the screen along with the call duration.

The phone status items are also visible:

- Signal Strength.
- Battery.

You can select any of the following during an active phone call:
### Phone - Vehicles With: SYNC 4

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>End call</td>
<td>Immediately end a phone call. You can also press the button on the steering wheel.</td>
</tr>
<tr>
<td>Keypad</td>
<td>Press this to access the phone keypad.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mute</td>
<td>You can switch the microphone off so the caller does not hear you.</td>
</tr>
<tr>
<td>Hndsfree off</td>
<td>Transfer the phone call audio to the cell phone or back to the touchscreen.</td>
</tr>
</tbody>
</table>

#### SENDING AND RECEIVING A TEXT MESSAGE

<table>
<thead>
<tr>
<th>Menu Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hear it</td>
<td>Hear the text message.</td>
</tr>
<tr>
<td>View</td>
<td>View the text message.</td>
</tr>
<tr>
<td>Call</td>
<td>Call the sender.</td>
</tr>
<tr>
<td>Reply</td>
<td>Reply to the text message with a standard text message.</td>
</tr>
</tbody>
</table>
SWITCHING TEXT MESSAGE NOTIFICATION ON AND OFF

**iOS**

1. Go to the settings menu on your cell phone.
2. Select *Bluetooth®*.
3. Select the information icon to the right of your vehicle.
4. Switch text message notification on or off.

**Android**

1. Go to the settings menu on your cell phone.
2. Select *Bluetooth®*.
3. Select the profiles option.
4. Select the phone profile.
5. Switch text message notification on or off.
CONNECTING A BLUETOOTH® DEVICE

1. Make sure Bluetooth® is enabled on your device.
2. Press Settings on the touchscreen.
3. Press Connectivity.
5. Press Add a Bluetooth Device.
   
   **Note:** A prompt alerts you to search for your vehicle on your device.

6. Select your vehicle on your device.
   
   **Note:** A number appears on your device and on the touchscreen.

7. Confirm that the number on your device matches the number on the touchscreen.
   
   **Note:** The touchscreen indicates that you have successfully paired your device.

The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Ford Motor Company is under license. Other trademarks and trade names are those of their respective owners.

PLAYING MEDIA USING BLUETOOTH®

**WARNING:** Driving while distracted can result in loss of vehicle control, crash and injury. We strongly recommend that you use extreme caution when using any device that may take your focus off the road. Your primary responsibility is the safe operation of your vehicle. We recommend against the use of any hand-held device while driving and encourage the use of voice-operated systems when possible. Make sure you are aware of all applicable local laws that may affect the use of electronic devices while driving.

1. Connect your device.
2. Press the audio system tile on the touchscreen.
3. Press Sources.
   
   Press to play a track. Press again to pause the track.

   Press to skip to the next track.

   Press and hold to fast forward through the track.

   Press once to return to the beginning of a track. Repeatedly press to return to previous tracks.

   Press and hold to fast rewind through the track.
APP PRECAUTIONS

**WARNING:** Driving while distracted can result in loss of vehicle control, crash and injury. We strongly recommend that you use extreme caution when using any device that may take your focus off the road. Your primary responsibility is the safe operation of your vehicle. We recommend against the use of any hand-held device while driving and encourage the use of voice-operated systems when possible. Make sure you are aware of all applicable local laws that may affect the use of electronic devices while driving.

APP REQUIREMENTS

When you start an app through the system for the first time, you could be asked to grant certain permissions. You can review and change the permissions that you have granted at any time when your vehicle is not moving. We recommend that you check your data plan before using your apps through the system. Using them could result in additional charges. We also recommend that you check the app provider’s terms and conditions and privacy policy before using their app. Make sure that you have an active account for apps that you want to use through the system. Some apps will work with no setup. Others require you to configure some personal settings before you can use them.

ENABLING APPS ON AN IOS DEVICE

1. Press **MOBILE APPS** on the touchscreen.
2. Press **Mobile Apps Help**.
3. Follow the instructions to pair and connect your device via Bluetooth® or with a USB cable.

**Note:** Some apps can run through Apple CarPlay if it is enabled.

4. Start the apps on your device that you want to use.

**Note:** The app must be open on your device to use it through the touchscreen.

5. Select the app that you want to use on the touchscreen.

**Note:** For troubleshooting assistance press Compatible Apps List under Mobile Apps Help.

ENABLING APPS ON AN ANDROID DEVICE

1. Press **MOBILE APPS** on the touchscreen.
2. Press **Mobile Apps Help**.
3. Follow the instructions to pair and connect your device via Bluetooth® or with a USB cable.

**Note:** Some apps can run through Android Auto if it is enabled.

4. Start the apps on your device that you want to use.

**Note:** The app must be open on your device to use it through the touchscreen.

5. Access the system applications.
6. Select the app that you want to use on the touchscreen.

**Note:** Some devices could lose the ability to play music over USB when MOBILE APPS are enabled.

**Note:** For troubleshooting assistance press Compatible Apps List under Mobile Apps Help.
Apps - Vehicles With: SYNC 4

SWITCHING APPLE CARPLAY ON AND OFF

Enabling Apple CarPlay with USB
1. Connect your device to a USB port.
2. Follow the instructions on your device and the touchscreen.

Note: Selecting "Enable Wireless CarPlay" on your device will prepare the device for wireless carplay when you re-enter the vehicle.

Enabling Wireless Apple CarPlay
1. Pair your device to Bluetooth®.
2. Follow the instructions on your device and the touchscreen.

Disabling Apple CarPlay
1. Press Settings on the touchscreen.
2. Press Phone List.
3. Select your device from the list.
4. Press Disable.

Re-Enabling Apple CarPlay
1. Press Settings on the touchscreen.
2. Press Phone List.
3. Select your device from the list.
4. Press Connect to Apple CarPlay.

Enabling Wireless Android Auto
1. Pair your device to Bluetooth®.
2. Follow the instructions on your device and the touchscreen.

Note: Certain Android Devices do not support Android Auto Wireless. Please check your Android OS version for compatibility.

Disabling Android Auto
1. Press Settings on the touchscreen.
2. Press Phone List.
3. Select your device from the list.
4. Press Disable.

Re-Enabling Android Auto
1. Press Settings on the touchscreen.
2. Press Phone List.
3. Select your device from the list.
4. Press Connect to Android Auto.

SWITCHING ANDROID AUTO ON AND OFF

Enabling Android Auto with USB
1. Connect your device to a USB port.
2. Follow the instructions on the touchscreen.

Note: Certain features of the system are not available when you are using Android Auto.
Navigating Connected Navigation

Your vehicle may be equipped with connected navigation. Depending on your version, you are given a 90 day or 3 year trial. After the trial period, you need to sign up to continue the experience. For additional information, visit ford.com/connectedservices.

Note: If you do not sign up or renew your subscription, you can still use navigation through a connected device.

Accessing Navigation

1. Access Navigation by pressing the map on the left side of the home screen.

Note: As the driver, be aware of all local traffic regulations and road attributes, and operate your vehicle in a safe and legal manner.

Navigation Map Updates

To update your Map data over Wi-Fi, your vehicle must be connected to a Wi-Fi access point. For USB updates and other details, contact an authorized Ford dealer.

Note: If you find map data errors, you may report them by going to www.here.com/mapcreator.

Adjusting the Map

Zooming the Map In and Out

You can use pinch gestures to zoom in and out. Place two fingers on the screen and move them apart to zoom in. Place two fingers on the screen and bring them together to zoom out.

Changing the Format of the Map

Press the map format button on the left side of the map screen to toggle between the available formats.

Note: Available formats are 2D, 3D and North Up.

Live Traffic

What is Live Traffic

You can observe real-time road congestion when live traffic is on.

Switching Live Traffic On and Off

1. Press Settings on the touchscreen.
2. Press Connectivity.
4. Switch Connected Navigation on or off.

Note: Switching off this feature disables all features of the Connected Navigation.

Setting a Destination

Setting a Destination Using the Text Entry Screen

1. Press Where To? at the top of the screen.
2. Press the search bar at the top of the screen.
3. Enter your destination using the keyboard.
4. Press Search.
5. Select a destination from the list.
6. Press the Go! button to begin navigation.
SETTING A DESTINATION USING THE MAP SCREEN

1. Press on the map to trigger the roaming and viewing screen.
2. Press on the map again to place a pin at that location.

Note: Information about the location of the pin appears on the screen.
3. Press the Go! button to begin navigation to the pin.

SETTING A DESTINATION USING A PREDICTIVE DESTINATION

Press the predicted destination card on the screen to navigate to it. These appear when the navigation system has learned your driving habits.

SETTING A DESTINATION USING A RECENT DESTINATION

1. Press Where To? at the top of the screen.
2. Press the Recents tile.
3. Select a destination from the list.

SETTING A DESTINATION USING A SAVED DESTINATION

1. Press Where To? at the top of the screen.
2. Press Saved Places.
3. Select a saved destination.

Note: Press the star icon next when viewing location details to save the location.

SETTING A DESTINATION USING A POINT OF INTEREST

1. Press and hold on a point of interest icon on the map.

Note: Information about the location of the point of interest appears on the screen.
2. Press the Go! button to begin navigation to the point of interest.

WAYPOINTS

ADDING A WAYPOINT

Press the Add Waypoint button when in an active navigation session.
1. Enter your waypoint on the keyboard.
2. Press Search.
3. Select a waypoint from the list.
4. Press Add to Trip.

EDITING WAYPOINTS

1. Press the waypoint you would like to edit.
2. Select an option to reorder or delete the waypoint.

ROUTE GUIDANCE

ADJUSTING THE GUIDANCE PROMPT VOLUME

Turn the volume control when a guidance prompt plays to adjust the volume.

REPEATING AN INSTRUCTION

Press the turn indicator to hear the last voice instruction.

CANCELING ROUTE GUIDANCE

Press the button to cancel route guidance to the selected location.
UPDATING THE VEHICLE SYSTEMS WIRELESSLY

Software Updates allow you to update your vehicle system software wirelessly. To make sure you receive all updates, set a recurring schedule and connect to Wi-Fi. See Connecting the Vehicle to a Wi-Fi Network (page 465). Updates may take longer if not connected to Wi-Fi, or may not download at all. Multiple connections may be required to complete a download.

Enabling Software Updates

1. Press Settings on the touchscreen.
2. Press System Updates.
3. Switch Automatic Updates on.

Note: Software Updates are enabled by default.

Note: If you do not want to receive Software Updates you can turn them off. You will not be notified of new updates.

Scheduling an Update

Scheduling an update allows you to set a convenient time for the update to complete. We recommend updating overnight when your vehicle is not in use.

Make sure your vehicle is connected and Automatic Updates is enabled.

Once you complete these steps, your schedule will be saved for future updates. As long as an update is not in process you can adjust your schedule.

Note: Some updates may be applied outside of your set schedule. Information about the unscheduled update appears on the touchscreen after it is applied.

Using the Settings Menu

1. Press Settings on the touchscreen.
2. Press System Updates.
3. Press Schedule Updates.
4. Use the controls to set the time and day of the update.
5. Save the schedule.

Note: You can set the updates to occur at any time.

Using the Status Bar Icon

When an update is available, tap the notification icon and follow the prompts on the screen.

Additional Software Update icons may appear on the status bar. See Status Bar (page 509).

Applying a Software Update

You can see the progress of the update on the touchscreen. An update cannot be canceled once it has been started.

During scheduled updates you will not be able to drive your vehicle, start the vehicle, use remote controls to lock and unlock the vehicle. The alarm, central locks, and door tones are disabled. The electronic door lock will not function during an update. You can open the doors using the mechanical latch if child locks are not on. Pull the handle until it stops to use the mechanical latch. Some updates may not allow you to use your vehicle during the update process.

Note: Some updates can complete in the background, but more complex updates can take up to 45 minutes.

Note: Double locking is switched off and central locking is switched on during and after an update.

Note: If your vehicle is plugged in, charging will stop during an update and resume when the update is complete.
Software Update Requirements

If certain requirements are not met during a scheduled update, the update will be postponed. You can update your schedule if you want to retry the update sooner. The requirements for the update are as listed:

- Your vehicle is not running.
- Your vehicle is stopped.
- Your vehicle is parked.
- The hazard indicators are switched off.
- The alarm is not sounding.
- The doors are closed.
- The parking lights are switched off.
- You are not pressing the brake pedal.
- An emergency call is not in progress.
- The Stop Safely lamp is not illuminated. See Instrument Cluster Warning Lamps (page 125).

Viewing Update Information

If an update is successful, the touchscreen will provide additional details or statuses about the update.

Note: You can also access this information under the System Updates tile.

If an update is not successful, follow the prompt that appears on the touchscreen.

PERFORMING A MASTER RESET

1. Press Settings on the touchscreen.
3. Press Reset.
4. Press Master Reset.
5. Follow the prompts on the screen to complete the reset.
THIRD PARTY SOFTWARE
COPYRIGHT
ACKNOWLEDGMENT

Your vehicle could have components that use open source software. For additional information, visit http://corporate.ford.com/ford-open-source.html.

DECLARATION OF CONFORMITY

Your vehicle could have components that transmit and receive radio waves and are therefore subject to government regulation.

These components must accept any interference received, including interference that could cause undesired operation. For certification labels and declarations of conformity, visit www.wirelessconformity.ford.com.

REACH

We are committed to promoting the responsible manufacturing, handling and use of our products and support the underlying goals of REACH, a European Union regulation that concerns the registration, evaluation, authorisation and restriction of chemicals.

We specifically support Regulation EC 1907/2006 Article 33(1) that relates to substances of very high concern which appear on the current list for authorisation.

If these substances do exist in a product, it is important to guarantee their safe use so the regulation is designed to enable you to take any appropriate risk management measures.

To find out more about the REACH directive, search REACH on the local Ford website.

Note: To find the local Ford website, visit https://corporate.ford.com/operations/locations/global-links.html.

REPLACEMENT PARTS RECOMMENDATION

We have built your vehicle to the highest standards using quality parts. We recommend that you demand the use of genuine Ford and Motorcraft parts whenever your vehicle requires scheduled maintenance or repair. You can clearly identify genuine Ford and Motorcraft parts by looking for the Ford, FoMoCo or Motorcraft branding on the parts or their packaging.

Scheduled Maintenance and Mechanical Repairs

One of the best ways for you to make sure that your vehicle provides years of service is to have it maintained in line with our recommendations using parts that conform to the specifications detailed in this Owner's Manual.

Genuine Ford and Motorcraft parts meet or exceed these specifications.

Collision Repairs

We hope that you never experience a collision, but accidents happen sometimes.

Genuine Ford replacement collision parts meet our stringent requirements for fit, finish, structural integrity, corrosion protection and dent resistance. During vehicle development we validate that these parts deliver the intended level of protection as a whole system. A great way to know for sure you are getting this level of protection is to use genuine Ford replacement collision parts.

Warranty on Replacement Parts

Genuine Ford and Motorcraft replacement parts are the only replacement parts that benefit from a Ford Warranty.

The Ford Warranty may not cover damage caused to your vehicle as a result of failed non-Ford parts.

For additional information, refer to the terms and conditions of the Ford Warranty.

MOBILE COMMUNICATIONS EQUIPMENT

WARNING: Driving while distracted can result in loss of vehicle control, crash and injury. We strongly recommend that you use extreme caution when using any device that may take your focus off the road. Your primary responsibility is the safe operation of your vehicle. We recommend against the use of any hand-held device while driving and encourage the use of voice-operated systems when possible. Make sure you are aware of all applicable local laws that may affect the use of electronic devices while driving.
Using mobile communications equipment is becoming increasingly important in the conduct of business and personal affairs. However, you must not compromise your own or others’ safety when using such equipment. Mobile communications can enhance personal safety and security when appropriately used, particularly in emergency situations. Safety must be paramount when using mobile communications equipment to avoid negating these benefits. Mobile communication equipment includes, but is not limited to, cellular phones, pagers, portable email devices, text messaging devices and portable two-way radios.

ECALL USER INFORMATION

eCall User Information According to Regulation (EU) 2017/78, Annex I, Part 3

1 DESCRIPTION OF THE ECALL IN-VEHICLE SYSTEM

1.1. Overview of the 112-based eCall in-vehicle system, its operation and functionalities: See What Is eCall (page 54).

1.2. The 112-based eCall service is a public service of general interest and is accessible free of charge.

1.3. The 112-based eCall in-vehicle system is activated by default. It is activated automatically by means of in-vehicle sensors in the event of a severe accident. It will also be triggered automatically when the vehicle is equipped with a TPS system which does not function in the event of a severe accident.

1.4. The 112-based eCall in-vehicle system can also be triggered manually, if needed. Instructions for manual activation of the system: See Manually Making an Emergency Call (page 54).

1.5. In the event of a critical system failure that would disable the 112-based eCall in-vehicle system, the following warning will be given to the occupants of the vehicle: See Emergency Call Indicators (page 55).
2 INFORMATION ON DATA PROCESSING

2.1. Any processing of personal data through the 112-based eCall in-vehicle system shall comply with the personal data protection rules provided for in Directives 95/46/EC (1) and 2002/58/EC (2) of the European Parliament and of the Council, and in particular, shall be based on the necessity to protect the vital interests of the individuals in accordance with Article 7(d) of Directive 95/46/EC (3).

2.2. Processing of such data is strictly limited to the purpose of handling the emergency eCall to the single European emergency number 112.

2.3. Types of data and its recipients.

2.3.1. The 112-based eCall in-vehicle system may collect and process only the following data:
- Vehicle Identification Number.
- Vehicle type (passenger vehicle or light commercial vehicle).
- Vehicle propulsion storage type (gasoline/diesel/CNG/LPG/electric/hydrogen).
- Vehicle last three locations and direction of travel.
- Log file of the automatic activation of the system and its timestamp.
- Any additional data (if applicable): -

2.3.2. Recipients of data processed by the 112-based eCall in-vehicle system are the relevant public safety answering points designated by the respective public authorities of the country on which territory they are located, to first receive and handle eCalls to the single European emergency number 112.
Additional information (if available): -

2.4. Arrangements for data processing.

2.4.1. The 112-based eCall in-vehicle system is designed in such a way as to ensure that the data contained in the system memory is not available outside the system before an eCall is triggered.
Additional remarks (if any): -

2.4.2. The 112-based eCall in-vehicle system is designed in such a way as to ensure that it is not traceable and not subject to any constant tracking in its normal operation status.
Additional remarks (if any): -

2.4.3. The 112-based eCall in-vehicle system is designed in such a way as to ensure that data in the system internal memory is automatically and continuously removed.
2.4.3.1. The vehicle location data is constantly overwritten in the internal memory of the system so as always to keep maximum of the last three up-to-date locations of the vehicle necessary for the normal functioning of the system.

2.4.3.2. The log of activity data in the 112-based eCall in-vehicle system is kept for no longer than necessary for attaining the purpose of handling the emergency eCall and in any case not beyond 13 hours from the moment an emergency eCall was initiated.

Additional remarks (if any): -

2.5. Modalities for exercising data subject’s rights.

2.5.1. The data subject (the vehicle’s owner) has a right of access to data and as appropriate to request the rectification, erasure or blocking of data, concerning him or her, the processing of which does not comply with the provisions of Directive 95/46/EC. Any third parties to whom the data have been disclosed have to be notified of such rectification, erasure or blocking carried out in compliance with this Directive, unless it proves impossible or involves a disproportionate effort.

2.5.2. The data subject has a right to complain to the competent data protection authority if he or she considers that his or her rights have been infringed as a result of the processing of his or her personal data.

2.5.3. Contact service responsible for handling access requests (if any): Contact the data protection officer of your local Public Safety Answering Point.

3 INFORMATION ON THIRD PARTY SERVICES AND OTHER ADDED VALUE SERVICES (IF FITTED)

3.1. Description of the operation and the functionalities of the TPS system/added value service: Your vehicle may be equipped with a modem that allows for emergency calls (eCall), automatic software updates and other services. See the information in this Owner’s Manual or in the FordPass app for a description of these services. We provide a 112-based eCall in-vehicle system and we do not provide a TPS eCall system.

3.2. Any processing of personal data through the TPS system/other added value service shall comply with the personal data protection rules provided for in Directives 95/46/EC and 2002/58/EC.

3.2.1. Legal basis for the use of TPS system and/or added value services and for processing data through them: For information on the legal bases for processing of personal data through added value services, review the data privacy information for any services to which you subscribe. This privacy information can be found in the FordPass app or on the local Ford website.

3.3. The TPS system and/or other added value services shall process personal data only on the base of the explicit consent of the data subject (the vehicle’s owner or owners).

3.4. Modalities for data processing through TPS system and/or other added value services, including any necessary additional information regarding traceability, tracking and processing of personal data: See the privacy information in the FordPass app or on the local Ford website.

3.5. The owner of a vehicle equipped with a TPS eCall system and/or other added value service in addition to the 112-based eCall in-vehicle system has the right to choose to use the 112-based eCall in-vehicle system rather than the TPS eCall system and the other added value service.

3.5.1. Contact details for handling TPS eCall system deactivation requests: You can have all added value services deactivated except for eCall. To find out more about having all added value services deactivated except for eCall, search Ask Ford on the local Ford website or contact the Ford Customer Relationship Center by e-mail through the FordPass app or by using the e-mail address on the local Ford website.
END USER LICENSE AGREEMENT

VEHICLE SOFTWARE END USER LICENSE AGREEMENT (EULA)

• You (“You” or “Your” as applicable) have acquired a vehicle having several devices, including SYNC® and various control modules, (“DEVICES”) that include software licensed or owned by Ford Motor Company and its affiliates (“FORD MOTOR COMPANY”). Those software products of FORD MOTOR COMPANY origin, as well as associated media, printed materials, and "online" or electronic documentation (“SOFTWARE”) are protected by international intellectual property laws and treaties. The SOFTWARE is licensed, not sold. All rights reserved.

• The SOFTWARE may interface with and/or communicate with, or may be later upgraded to interface with and/or communicate with additional software and/or systems provided by FORD MOTOR COMPANY.

IF YOU DO NOT AGREE TO THIS END USER LICENSE AGREEMENT (“EULA”) DO NOT USE THE DEVICES OR COPY THE SOFTWARE. ANY USE OF THE SOFTWARE, INCLUDING BUT NOT LIMITED TO USE ON THE DEVICES, WILL CONSTITUTE YOUR AGREEMENT TO THIS EULA (OR RATIFICATION OF ANY PREVIOUS CONSENT).

GRANT OF SOFTWARE LICENSE: This EULA grants you the following license:

• You may use the SOFTWARE as installed on the DEVICES and as otherwise interfacing with systems and/or services provide by or through FORD MOTOR COMPANY or its third party software and service providers.

Description of Other Rights and Limitations.

• Speech Recognition: If the SOFTWARE includes speech recognition component(s), you should understand that speech recognition is an inherently statistical process and that recognition errors are inherent in the process. Neither FORD MOTOR COMPANY nor its suppliers shall be liable for any damages arising out of errors in the speech recognition process. It is your responsibility to monitor any speech recognition functions included in the system.

• Limitations on Reverse Engineering, Decompilation and Disassembly: You may not reverse engineer, decompile, translate, disassemble or attempt to discover any source code or underlying ideas or algorithms of the SOFTWARE nor permit others to reverse engineer, decompile or disassemble the SOFTWARE, except and only to the extent that such activity is expressly permitted by applicable law notwithstanding this limitation or to the extent as may be permitted by the licensing terms governing use of any open source components included with the SOFTWARE.

• Limitations on Distributing, Copying, Modifying and Creating Derivative Works: You may not distribute, copy, make modifications to or create derivative works based on the SOFTWARE, except and only to the extent that such activity is expressly permitted by applicable law notwithstanding this limitation or to the extent as may be permitted by the licensing terms governing use of any open source components included with the SOFTWARE.
Customer Information

- **Single EULA:** The end user documentation for the DEVICES and related systems and services may contain multiple EULAs, such as multiple translations and/or multiple media versions (e.g., in the user documentation and in the software). Even if you receive multiple EULAs, you are licensed to use only one (1) copy of the SOFTWARE.

- **SOFTWARE Transfer:** You may permanently transfer your rights under this EULA only as part of a sale or transfer of the DEVICES, provided you retain no copies, you transfer all of the SOFTWARE (including all component parts, the media and printed materials, any upgrades, and, if applicable, the Certificate(s) of Authenticity), and the recipient agrees to the terms of this EULA. If the SOFTWARE is an upgrade, any transfer must include all prior versions of the SOFTWARE.

- **Termination:** Without prejudice to any other rights, FORD MOTOR COMPANY may terminate this EULA if you fail to comply with the terms and conditions of this EULA.

- **Internet-Based Services Components:** The SOFTWARE may contain components that enable and facilitate the use of certain Internet-based services. You acknowledge and agree that FORD MOTOR COMPANY, third party software and service suppliers, its affiliates and/or its designated agent may automatically check the version of the SOFTWARE and/or its components that you are utilizing and may provide upgrades or supplements to the SOFTWARE that may be automatically downloaded to your DEVICES.

- **Additional Software/Services:** The SOFTWARE may permit FORD MOTOR COMPANY, third party software and service suppliers, its affiliates and/or its designated agent to provide or make available to you SOFTWARE updates, supplements, add-on components, or Internet-based services components of the SOFTWARE after the date you obtain your initial copy of the SOFTWARE (“Supplemental Components”). SOFTWARE updates may cause you to incur additional charges from your wireless service provider. If FORD MOTOR COMPANY or third party software and services suppliers provide or make available to you Supplemental Components and no other EULA terms are provided along with the Supplemental Components, then the terms of this EULA shall apply. FORD MOTOR COMPANY, its affiliates and/or its designated agent reserve the right to discontinue without liability any Internet-based services provided to you or made available to you through the use of the SOFTWARE.
Customer Information

- **Links to Third Party Sites:** The SOFTWARE may provide you with the ability to link to third party sites. The third party sites are not under the control of FORD MOTOR COMPANY, its affiliates and/or its designated agent. Neither FORD MOTOR COMPANY nor its affiliates nor its designated agent are responsible for (I) the contents of any third party sites, any links contained in third party sites, or any changes or updates to third party sites, or (ii) webcasting or any other form of transmission received from any third party sites. If the SOFTWARE provides links to third party sites, those links are provided to you only as a convenience, and the inclusion of any link does not imply an endorsement of the third party site by FORD MOTOR COMPANY, its affiliates and/or its designated agent.

- **Obligation to Drive Responsibly:** You recognize your obligation to drive responsibly and keep attention on the road. You will read and abide with the DEVICES operating instructions particularly as they pertain to safety and you agree to assume any risk associated with the use of the DEVICES.

**UPGRADES AND RECOVERY MEDIA:** If the SOFTWARE is provided by FORD MOTOR COMPANY separate from the DEVICES on media such as a ROM chip, CD ROM disk(s) or via web download or other means, and is labeled "For Upgrade Purposes Only" or "For Recovery Purposes Only" you may install one (1) copy of such SOFTWARE onto the DEVICES as a replacement copy for the existing SOFTWARE, and use it in accordance with this EULA, including any additional EULA terms accompanying the upgrade SOFTWARE.

**INTELLECTUAL PROPERTY RIGHTS:** All title and intellectual property rights in and to the SOFTWARE (including but not limited to any images, photographs, animations, video, audio, music, text and "applets" incorporated into the SOFTWARE), the accompanying printed materials, and any copies of the SOFTWARE, are owned by FORD MOTOR COMPANY, or its affiliates or suppliers. The SOFTWARE is licensed, not sold. You may not copy the printed materials accompanying the SOFTWARE. All title and intellectual property rights in and to the content which may be accessed through use of the SOFTWARE is the property of the respective content owner and may be protected by applicable copyright or other intellectual property laws and treaties. This EULA grants you no rights to use such content outside its intended use. All rights not specifically granted under this EULA are reserved by FORD MOTOR COMPANY, its affiliates, and third party software and service providers and suppliers. Use of any on-line services which may be accessed through the SOFTWARE may be governed by the respective terms of use relating to such services. If this SOFTWARE contains documentation that is provided only in electronic form, you may print one copy of such electronic documentation.

**EXPORT RESTRICTIONS:** You acknowledge that the SOFTWARE is subject to U.S. and European Union export jurisdiction. You agree to comply with all applicable international and national laws that apply to the SOFTWARE, including the U.S. Export Administration Regulations, as well as end-user, end-use and destination restrictions issued by U.S. and other governments.
Customer Information

TRADEMARKS: This EULA does not grant you any rights in connection with any trademarks or service marks of FORD MOTOR COMPANY, its affiliates, and third party software and service providers.

PRODUCT SUPPORT: Please refer to FORD MOTOR COMPANY instructions provided in the documentation for the DEVICES product support, such as the vehicle owner guide.

Should you have any questions concerning this EULA, or if you desire to contact FORD MOTOR COMPANY for any other reason, please refer to the address provided in the documentation for the DEVICES.

No Liability for Certain Damages: EXCEPT AS PROHIBITED BY LAW, FORD MOTOR COMPANY, ANY THIRD PARTY SOFTWARE OR SERVICES SUPPLIERS, AND THEIR AFFILIATES SHALL HAVE NO LIABILITY FOR ANY INDIRECT, SPECIAL, CONSEQUENTIAL OR INCIDENTAL DAMAGES ARISING FROM OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THE SOFTWARE. THIS LIMITATION SHALL APPLY EVEN IF ANY REMEDY FAILS OF ITS ESSENTIAL PURPOSE. THERE ARE NO WARRANTIES OTHER THAN THOSE THAT MAY BE EXPRESSLY PROVIDED FOR YOUR NEW VEHICLE.

SYNC® Automotive Important Safety Information Read and follow instructions:

• Before using your SYNC® system, read and follow all instructions and safety information provided in this end user manual ("Owner Guide"). Not following precautions found in the Owner Guide can lead to an accident or other serious injuries.

General Operation

• Voice Command Control: Certain functions within the SYNC® system may be accomplished using voice commands. Using voice commands while driving helps you to operate the system without removing your hands from the wheel or eyes from the road.

• Prolonged Views of Screen: Do not access any function requiring a prolonged view of the screen while you are driving. Pull over in a safe and legal manner before attempting to access a function of the system requiring prolonged attention.

• Volume Setting: Do not raise the volume excessively. Keep the volume at a level where you can still hear outside traffic and emergency signals while driving. Driving while unable to hear these sounds could cause an accident.

• Navigation Features: Any navigation features included in the system are intended to provide turn by turn instructions to get you to a desired destination. Please make certain all persons using this system carefully read and follow instructions and safety information fully.

• Distraction Hazard: Any navigation features may require manual (non-verbal) setup. Attempting to perform such set-up or insert data while driving can distract your attention and could cause an accident or other serious injury. Stop the vehicle in a safe and legal manner before attempting these operations.

• Let Your Judgment Prevail: Any navigation features are provided only as an aid. Make your driving decisions based on your observations of local conditions and existing traffic regulations. Any such feature is not a
substitute for your personal judgment. Any route suggestions made by this system should never replace any local traffic regulations or your personal judgment or knowledge of safe driving practices.

- **Route Safety:** Do not follow the route suggestions if doing so would result in an unsafe or illegal maneuver, if you would be placed in an unsafe situation, or if you would be directed into an area that you consider unsafe. The driver is ultimately responsible for the safe operation of the vehicle and therefore, must evaluate whether it is safe to follow the suggested directions.

- **Potential Map Inaccuracy:** Maps used by this system may be inaccurate because of changes in roads, traffic controls or driving conditions. Always use good judgment and common sense when following the suggested routes.

- **Emergency Services:** Do not rely on any navigation features included in the system to route you to emergency services. Ask local authorities or an emergency services operator for these locations. Not all emergency services such as police, fire stations, hospitals and clinics are likely to be contained in the map database for such navigation features.

- **Your Responsibilities and Assumptions of Risk**
  - You agree to each of the following: (a) Any use of the SOFTWARE while driving an automobile or other vehicle in violation of applicable law or otherwise driving in an unsafe manner presents a significant risk of distracted driving and should not be attempted under any circumstances; (b) Use of the SOFTWARE at excessive volume poses a significant risk of hearing damage and should not be attempted under any circumstances; (c) The SOFTWARE may not be compatible with new or different versions of an operating system, third party software, or third party services, and the SOFTWARE may potentially cause a critical failure of an operating system, third party software, or third party service. (d) Any third party service accessed by or third party software used with the SOFTWARE (i) may charge an additional fee for access, (ii) may not work correctly, on an uninterrupted basis, or error free, (iii) may change streaming formats or discontinue operation, (iv) may contain adult, profane or offensive content; and (v) may contain inaccurate, false or misleading traffic, weather, financial or safety information or other content; and (e) Use of the SOFTWARE may cause you to incur additional charges from your wireless service provider (WSP) and any data or minute calculators that may be included in the software program are for reference only, are not warranted in any way and should not be relied upon in anyway.
  - When using the SOFTWARE, you agree to be responsible for and assume the entire risk to the items set forth in Section (a) – (e) above.
Disclaimer of Warranty

YOU EXPRESSLY ACKNOWLEDGE AND AGREE THAT USE OF THE DEVICES AND SOFTWARE IS AT YOUR SOLE RISK AND THAT THE ENTIRE RISK AS TO SATISFACTORY QUALITY, PERFORMANCE, COMPATIBILITY, ACCURACY AND EFFORT IS WITH YOU. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, THE SOFTWARE AND ANY THIRD PARTY SOFTWARE OR THIRD-PARTY SERVICES ARE PROVIDED "AS IS" AND "AS AVAILABLE", WITH ALL FAULTS AND WITHOUT WARRANTY OF ANY KIND, AND FORD MOTOR COMPANY HEREBY DISCLAIMS ALL WARRANTIES AND CONDITIONS WITH RESPECT TO THE SOFTWARE, THIRD PARTY SOFTWARE, AND THIRD-PARTY SERVICES, EITHER EXPRESS, IMPLIED OR STATUTORY, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES AND/OR CONDITIONS OF MERCHANTABILITY, OF SATISFACTORY QUALITY, OF FITNESS FOR AN ARTICULAR PURPOSE, OF ACCURACY, OF QUIET ENJOYMENT, AND NON-INFRINGEMENT OF THIRD-PARTY RIGHTS. FORD MOTOR COMPANY DOES NOT WARRANT (a) AGAINST INTERFERENCE WITH YOUR ENJOYMENT OF THE SOFTWARE, THIRD PARTY SOFTWARE, OR THIRD-PARTY SERVICES, (b) THAT THE SOFTWARE, THIRD PARTY SOFTWARE, OR THIRD-PARTY SERVICES WILL MEET YOUR REQUIREMENTS, (c) THAT THE OPERATION OF THE SOFTWARE, THIRD PARTY SOFTWARE, OR THIRD-PARTY SERVICES WILL BE UNINTERRUPTED OR ERROR-FREE, (d) OR THAT DEFECTS IN THE SOFTWARE, THIRD PARTY SOFTWARE, OR THIRD-PARTY SERVICES WILL BE CORRECTED. NO ORAL OR WRITTEN INFORMATION OR ADVICE GIVEN BY FORD MOTOR COMPANY OR ITS AUTHORIZED REPRESENTATIVE SHALL CREATE A WARRANTY. SHOULD THE SOFTWARE, THIRD PARTY SOFTWARE, OR THIRD-PARTY SERVICES PROVE DEFECTIVE, YOU ASSUME THE ENTIRE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION. SOME JURISDICTIONS DO NOT ALLOW THE DISCLAIMER OF IMPLIED WARRANTIES OR LIMITATIONS ON APPLICABLE STATUTORY RIGHTS OF A CONSUMER, SO THE ABOVE DISCLAIMER MAY NOT FULLY APPLY TO YOU. THE SOLE WARRANTY PROVIDED BY FORD MOTOR COMPANY SHALL BE FOUND IN THE WARRANTY INFORMATION INCLUDING WITH YOUR OWNER GUIDE. TO THE EXTENT THAT THERE IS ANY CONFLICT BETWEEN THE TERMS OF THIS SECTION AND THE WARRANTY BOOKLET, THE WARRANTY BOOKLET SHALL CONTROL.

Applicable Law, Venue, Jurisdiction

- The laws of the State of Michigan govern this EULA and Your use of the SOFTWARE. Your use of the SOFTWARE may also be subject to other local, state, national, or international laws. Any litigation arising out of or related to this EULA shall be brought and maintained exclusively in a court of the State of Michigan located in Wayne County or in the United States District Court for the Eastern District of Michigan. You hereby consent to submit to the personal jurisdiction of a court in the State of Michigan located in Wayne County and the United States District Court for the Eastern District of Michigan for any dispute arising out of or relating to this EULA.

Customer Information

Binding Arbitration and Class Action Waiver

(a) Application. This Section applies to any dispute EXCEPT IT DOES NOT INCLUDE A DISPUTE RELATING TO COPYRIGHT INFRINGEMENT, OR TO THE ENFORCEMENT OR VALIDITY OF YOUR, FORD MOTOR COMPANY, OR ANY OF FORD MOTOR COMPANY’S LICENSORS’ INTELLECTUAL PROPERTY RIGHTS.

Dispute means any dispute, action, or other controversy between You and FORD MOTOR COMPANY, other than the exceptions listed above, concerning the SOFTWARE (including its price) or this EULA, whether in contract, warranty, tort, statute, regulation, ordinance, or any other legal or equitable basis.

(b) Notice of Dispute. In the event of a Dispute, You or FORD MOTOR COMPANY must give the other a “Notice of Dispute”, which is a written statement of the name, address, and contact information of the party giving it, the facts giving rise to the dispute, and the relief requested. You and FORD MOTOR COMPANY will attempt to resolve any dispute through informal negotiation within 60 days from the date the Notice of Dispute is sent. After 60 days, You or FORD MOTOR COMPANY may commence arbitration.

(c) Small claims court. You may also litigate any dispute in small claims court in your county of residence or FORD MOTOR COMPANY’S principal place of business, if the dispute meets all requirements to be heard in the small claims court. You may litigate in small claims court whether or not You negotiated informally first.

(d) Binding arbitration. If You and FORD MOTOR COMPANY, do not resolve any dispute by informal negotiation or in small claims court, any other effort to resolve the dispute will be conducted exclusively by binding arbitration. You are giving up the right to litigate (or participate in as a party or class member) all disputes in court before a judge or jury. Instead, all disputes will be resolved before a neutral arbitrator, whose decision will be final except for a limited right of appeal under the Federal Arbitration Act. Any court with jurisdiction over the parties may enforce the arbitrator’s award.

(e) Class action waiver. Any proceedings to resolve or litigate any dispute in any forum will be conducted solely on an individual basis. Neither you nor FORD MOTOR COMPANY, will seek to have any dispute heard as a class action, as a private attorney general action, or in any other proceeding in which any party acts or proposes to act in a representative capacity. No arbitration or proceeding will be combined with another without the prior written consent of all parties to all affected arbitrations or proceedings.

(f) Arbitration procedure. Any arbitration will be conducted by the American Arbitration Association (the “AAA”), under its Commercial Arbitration Rules. If You are an individual and use the SOFTWARE for personal or vehicle use, or if the value of the dispute is $75,000 or less whether or not You are an individual or how You use the SOFTWARE, the AAA Supplementary Procedures for Consumer-Related Disputes will also apply. To commence arbitration, submit a Commercial Arbitration Rules Demand for Arbitration form to the AAA. You may request a telephonic or in-person hearing by following the AAA rules. In a dispute involving $10,000 or less, any hearing will be telephonic unless the arbitrator finds good cause to hold an in-person hearing instead. For more information, see adr.org or call 1-800-778-7879. You agree to commence arbitration only in your county of residence or FORD MOTOR COMPANY’S principal place of business. The arbitrator...
may award the same damages to you individually as a court could. The arbitrator may award declaratory or injunctive relief only to you individually, and only to the extent required to satisfy your individual claim.

(g) Arbitration fees and incentives.

- i. Disputes involving $75,000 or less. FORD MOTOR COMPANY will promptly reimburse your filing fees and pay the AAA’s and arbitrator’s fees and expenses. If you reject FORD MOTOR COMPANY’S last written settlement offer made before the arbitrator was appointed (“last written offer”), your dispute goes all the way to an arbitrator’s decision (called an “award”), and the arbitrator awards you more than the last written offer, FORD MOTOR COMPANY will give you three incentives: (1) pay the greater of the award or $1,000; (2) pay twice your reasonable attorney’s fees, if any; and (3) reimburse any expenses (including expert witness fees and costs) that your attorney reasonably accrues for investigating, preparing, and pursuing your claim in arbitration. The arbitrator will determine the amounts.

- ii. Disputes involving more than $75,000. The AAA rules will govern payment of filing fees and the AAA’s and arbitrator’s fees and expenses.

- iii. Disputes involving any amount. In any arbitration you commence, FORD MOTOR COMPANY will seek its AAA or arbitrator’s fees and expenses, or Your filing fees it reimbursed, only if the arbitrator finds the arbitration frivolous or brought for an improper purpose. In any arbitration FORD MOTOR COMPANY commences, it will pay all filing, AAA, and arbitrator’s fees and expenses. It will not seek its attorney’s fees or expenses from you in any arbitration. Fees and expenses are not counted in determining how much a dispute involves.

(h) Claims or disputes must be filed within one year. To the extent permitted by law, any claim or dispute under this EULA to which this Section applies must be filed within one year in small claims court (Section c) or in arbitration (Section d). The one-year period begins when the claim or dispute first could be filed. If such a claim or dispute is not filed within one year, it is permanently barred.

(I) Severability. If the class action waiver (Section e) is found to be illegal or unenforceable as to all or some parts of a dispute, then that portion of Section e will not apply to those parts. Instead, those parts will be severed and proceed in a court of law, with the remaining parts proceeding in arbitration. If any other provision of that portion Section e is found to be illegal or unenforceable, that provision will be severed with the remainder of Section e remaining in full force and effect.

Telenav Software End User License Agreement

Please read these terms and conditions carefully before you use the TeleNav Software. Your use of the TeleNav Software indicates that you accept these terms and conditions. If you do not accept these terms and conditions, do not break the seal of the package, launch, or otherwise use the TeleNav Software. TeleNav may revise this Agreement and the privacy policy at any time, with or without notice to you. You agree to visit http://www.telenav.com from time to time to review the then current version of this Agreement and of the privacy policy.
1. Safe and Lawful Use

You acknowledge that devoting attention to the TeleNav Software may pose a risk of injury or death to you and others in situations that otherwise require your undivided attention, and you therefore agree to comply with the following when using the TeleNav Software:

(a) observe all traffic laws and otherwise drive safely;
(b) use your own personal judgment while driving. If you feel that a route suggested by the TeleNav Software instructs you to perform an unsafe or illegal maneuver, places you in an unsafe situation, or directs you into an area that you consider to be unsafe, do not follow such instructions;
(c) do not input destinations, or otherwise manipulate the TeleNav Software, unless your vehicle is stationary and parked;
(d) do not use the TeleNav Software for any illegal, unauthorized, unintended, unsafe, hazardous, or unlawful purposes, or in any manner inconsistent with this Agreement;
(e) arrange all GPS and wireless devices and cables necessary for use of the TeleNav Software in a secure manner in your vehicle so that they will not interfere with your driving and will not prevent the operation of any safety device (such as an airbag).

You agree to indemnify and hold TeleNav harmless against all claims resulting from any dangerous or otherwise inappropriate use of the TeleNav Software in any moving vehicle, including as a result of your failure to comply with the directions above.

2. Account Information

You agree: (a) when registering the TeleNav Software, to provide TeleNav with true, accurate, current, and complete information about yourself, and (b) to inform TeleNav promptly of any changes to such information, and to keep it true, accurate, current and complete.

3. Software License

Subject to your compliance with the terms of this Agreement, TeleNav hereby grants to you a personal, non-exclusive, non-transferable license (except as expressly permitted below in connection with your permanent transfer of the TeleNav Software license), without the right to sublicense, to use the TeleNav Software (in object code form only) in order to access and use the TeleNav Software. This license shall terminate upon any termination or expiration of this Agreement. You agree that you will use the TeleNav Software only for your personal business or leisure purposes, and not to provide commercial navigation services to other parties.

3.1 License Limitations

(a) reverse engineer, decompile, disassemble, translate, modify, alter or otherwise change the TeleNav Software or any part thereof; (b) attempt to derive the source code, audio library or structure of the TeleNav Software without the prior express written consent of TeleNav; (c) remove from the TeleNav Software, or alter, any of TeleNav's or its suppliers' trademarks, trade names, logos, patent or copyright notices, or other notices or markings; (d)
distribute, sublicense or otherwise transfer the TeleNav Software to others, except as part of your permanent transfer of the TeleNav Software; or (e) use the TeleNav Software in any manner that

I. infringes the intellectual property or proprietary rights, rights of publicity or privacy or other rights of any party,

ii. violates any law, statute, ordinance or regulation, including but not limited to laws and regulations related to spamming, privacy, consumer and child protection, obscenity or defamation, or

iii. is harmful, threatening, abusive, harassing, tortuous, defamatory, vulgar, obscene, libelous, or otherwise objectionable; and (f) lease, rent out, or otherwise permit unauthorized access by third parties to the TeleNav Software without advanced written permission of TeleNav.

4. Disclaimers

• To the fullest extent permissible pursuant to applicable law, in no event will TeleNav, its licensors and suppliers, or agents or employees of any of the foregoing, be liable for any decision made or action taken by you or anyone else in reliance on the information provided by the TeleNav Software. TeleNav also does not warrant the accuracy of the map or other data used for the TeleNav Software. Such data may not always reflect reality due to, among other things, road closures, construction, weather, new roads and other changing conditions. You are responsible for the entire risk arising out of your use of the TeleNav Software. For example but without limitation, you agree not to rely on the TeleNav Software for critical navigation in areas where the well-being or survival of you or others is dependent on the accuracy of navigation, as the maps or functionality of the TeleNav Software are not intended to support such high risk applications, especially in more remote geographical areas.

• TELENAV EXPRESSLY DISCLAIMS AND EXCLUDES ALL WARRANTIES IN CONNECTION WITH THE TELENAV SOFTWARE, WHETHER STATUTORY, EXPRESS OR IMPLIED, INCLUDING ALL WARRANTIES WHICH MAY ARISE FROM COURSE OF DEALING, CUSTOM OR TRADE AND INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT OF THIRD PARTY RIGHTS WITH RESPECT TO THE TELENAV SOFTWARE.

• Certain jurisdictions do not permit the disclaimer of certain warranties, so this limitation may not apply to you.

5. Limitation of Liability

• TO THE EXTENT PERMITTED UNDER APPLICABLE LAW, UNDER NO CIRCUMSTANCES SHALL TELENAV OR ITS LICENSORS AND SUPPLIERS BE LIABLE TO YOU OR TO ANY THIRD PARTY FOR ANY INDIRECT, INCIDENTAL, CONSEQUENTIAL, SPECIAL OR EXEMPLARY DAMAGES (INCLUDING IN EACH CASE, BUT NOT LIMITED TO, DAMAGES FOR THE INABILITY TO USE THE EQUIPMENT OR ACCESS DATA, LOSS OF DATA, LOSS OF BUSINESS, LOSS OF PROFITS, BUSINESS INTERRUPTION OR THE LIKE) ARISING OUT OF THE USE OR INABILITY TO USE THE TELENAV SOFTWARE, EVEN IF TELENAV HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. NOTWITHSTANDING ANY DAMAGES THAT YOU MIGHT INCUR FOR ANY
REASON WHATSOEVER (INCLUDING, WITHOUT LIMITATION, ALL DAMAGES REFERENCED HEREIN AND ALL DIRECT OR GENERAL DAMAGES IN CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE), THE ENTIRE LIABILITY OF TELENAV AND OF ALL OF TELENAV’S SUPPLIERS SHALL BE LIMITED TO THE AMOUNT ACTUALLY PAID BY YOU FOR THE TELENAV SOFTWARE. SOME STATES AND/OR JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU.

6. Arbitration and Governing Law

- You agree that any dispute, claim or controversy arising out of or relating to this Agreement or the TeleNav Software shall be settled by independent arbitration involving a neutral arbitrator and administered by the American Arbitration Association in the County of Santa Clara, California. The arbitrator shall apply the Commercial Arbitration Rules of the American Arbitration Association, and the judgment upon the award rendered by the arbitrator may be entered by any court having jurisdiction. Note that there is no judge or jury in an arbitration proceeding and the decision of the arbitrator shall be binding upon both parties. You expressly agree to waive your right to a jury trial. This Agreement and performance hereunder will be governed by and construed in accordance with the laws of the State of California, without giving effect to its conflict of law provisions. To the extent judicial action is necessary in connection with the binding arbitration, both TeleNav and you agree to submit to the exclusive jurisdiction of the courts of the County of Santa Clara, California. The United Nations Convention on Contracts for the International Sale of Goods shall not apply.

7. Assignment

- You may not resell, assign, or transfer this Agreement or any of your rights or obligations, except in totality, in connection with your permanent transfer of the TeleNav Software, and expressly conditioned upon the new user of the TeleNav Software agreeing to be bound by the terms and conditions of this Agreement. Any such sale, assignment or transfer that is not expressly permitted under this paragraph will result in immediate termination of this Agreement, without liability to TeleNav, in which case you and all other parties shall immediately cease all use of the TeleNav Software. Notwithstanding the foregoing, TeleNav may assign this Agreement to any other party at any time without notice, provided the assignee remains bound by this Agreement.

8. Miscellaneous

8.1

This Agreement constitutes the entire agreement between TeleNav and you with respect to the subject matter hereof.

8.2

Except for the limited licenses expressly granted in this Agreement, TeleNav retains all right, title and interest in and to the TeleNav Software, including without limitation all related intellectual property rights. No licenses or other rights which are not expressly granted in this Agreement are intended to, or shall be, granted or
conferred by implication, statute, inducement, estoppel or otherwise, and TeleNav and its suppliers and licensors hereby reserve all of their respective rights other than the licenses explicitly granted in this Agreement.

8.3
By using the TeleNav Software, you consent to receive from TeleNav all communications, including notices, agreements, legally required disclosures or other information in connection with the TeleNav Software (collectively, "Notices") electronically. TeleNav may provide such Notices by posting them on TeleNav’s Website or by downloading such Notices to your wireless device. If you desire to withdraw your consent to receive Notices electronically, you must discontinue your use of the TeleNav Software.

8.4
TeleNav's or your failure to require performance of any provision shall not affect that party's right to require performance at any time thereafter, nor shall a waiver of any breach or default of this Agreement constitute a waiver of any subsequent breach or default or a waiver of the provision itself.

8.5
If any provision herein is held unenforceable, then such provision will be modified to reflect the intention of the parties, and the remaining provisions of this Agreement will remain in full force and effect.

8.6
The headings in this Agreement are for convenience of reference only, will not be deemed to be a part of this Agreement, and will not be referred to in connection with the construction or interpretation of this Agreement. As used in this Agreement, the words "include" and "including" and variations thereof, will not be deemed to be terms of limitation, but rather will be deemed to be followed by the words "without limitation".

9. Other Vendors Terms and Conditions

9.1 End User Terms Required by HERE North America, LLC
The data ("Data") is provided for your personal, internal use only and not for resale. It is protected by copyright, and is subject to the following terms and conditions which are agreed to by you, on the one hand, and TeleNav ("TeleNav") and its licensors (including their licensors and suppliers) on the other hand.

© 2013 HERE. All rights reserved.
The Data for areas of Canada includes information taken with permission from Canadian authorities, including: © Her Majesty the Queen in Right of Canada, © Queen’s Printer for Ontario, © Canada Post Corporation, GeoBase®, © Department of Natural Resources Canada.
HERE holds a non-exclusive license from the United States Postal Service® to publish and sell ZIP+4® information.

©United States Postal Service® 2014. Prices are not established, controlled or approved by the United States Postal Service®. The following trademarks and registrations are owned by the USPS: United States Postal Service, USPS, and ZIP+4

The Data for Mexico includes certain data from Instituto Nacional de Estadística y Geografía.

9.2 End User Terms Required by NAV2 (Shanghai) Co., Ltd

The data (“Data”) is provided for your personal, internal use only and not for resale. It is protected by copyright, and is subject to the following terms and conditions which are agreed to by you, on the one hand, and NAV2 (Shanghai) Co., Ltd (“NAV2”) and its licensors (including their licensors and suppliers) on the other hand. 20xx. All rights reserved

Terms and Conditions

Permitted Use. You agree to use this Data together with the Telenav Software solely for the internal business and personal purposes for which you were licensed, and not for service bureau, time-sharing or other similar purposes. Accordingly, but subject to the restrictions set forth in the following paragraphs, you agree not to otherwise reproduce, copy, modify, decompile, disassemble, create any derivative works of, or reverse engineer any portion of this Data, and may not transfer or distribute it in any form, for any purpose, except to the extent permitted by mandatory laws.

Restrictions. Except where you have been specifically licensed to do so by Telenav, and without limiting the preceding paragraph, you may not use this Data (a) with any products, systems, or applications installed or otherwise connected to or in communication with vehicles, capable of vehicle navigation, positioning, dispatch, real time route guidance, fleet management or similar applications; or (b) with or in communication with any positioning devices or any mobile or wireless-connected electronic or computer devices, including without limitation cellular phones, palmtop and handheld computers, pagers, and personal digital assistants or PDAs.

Warning. The Data may contain inaccurate or incomplete information due to the passage of time, changing circumstances, sources used and the nature of collecting comprehensive geographic data, any of which may lead to incorrect results.

No Warranty. This Data is provided to you “as is,” and you agree to use it at your own risk. Telenav and its licensors (and their licensors and suppliers) make no guarantees, representations or warranties of any kind, express or implied, arising by law or otherwise, including but not limited to, content, quality, accuracy, completeness, effectiveness, reliability, fitness for a particular purpose, usefulness, use or results to be obtained from this Data, or that the Data or server will be uninterrupted or error-free.

Disclaimer of Warranty: Telenav and its licensors (including their licensors and suppliers) disclaim any warranties, express or implied, of quality, performance, merchantability, fitness for a
PARTICULAR PURPOSE OR NON-INFRINGEMENT. Some States, Territories and Countries do not allow certain warranty exclusions, so to that extent the above exclusion may not apply to you.

Disclaimer of Liability: Telenav and its licensors (including their licensors and suppliers) shall not be liable to you: in respect of any claim, demand or action, irrespective of the nature of the cause of the claim, demand or action alleging any loss, injury or damages, direct or indirect, which may result from the use or possession of the information; or for any loss of profit, revenue, contracts or savings, or any other direct, indirect, incidental, special or consequential damages arising out of your use of or inability to use this information, any defect in the information, or the breach of these terms or conditions, whether in an action in contract or tort or based on a warranty, even if Telenav or its licensors have been advised of the possibility of such damages. Some States, Territories and Countries do not allow certain liability exclusions or damages limitations, so to that extent the above may not apply to you.

Entire Agreement. These terms and conditions constitute the entire agreement between Telenav (and its licensors, including their licensors and suppliers) and you pertaining to the subject matter hereof, and supersedes in their entirety any and all written or oral agreements previously existing between us with respect to such subject matter.

Governing Law. The above terms and conditions shall be governed by the laws of the State of Illinois [insert “Netherlands” where European HERE Data is used], without giving effect to (i) its conflict of laws provisions, or (ii) the United Nations Convention for Contracts for the International Sale of Goods, which is explicitly excluded. You agree to submit to the jurisdiction of the State of Illinois [insert “The Netherlands” where European HERE Data is used] for any and all disputes, claims and actions arising from or in connection with the Data provided to you hereunder.

Government End Users. If the Data is being acquired by or on behalf of the United States government or any other entity seeking or applying rights similar to those customarily claimed by the United States government, this Data is a “commercial item” as that term is defined at 48 C.F.R. (“FAR”) 2.101, is licensed in accordance with these End-User Terms, and each copy of Data delivered or otherwise furnished shall be marked and embedded as appropriate with the following “Notice of Use,” and shall be treated in accordance with such Notice:
B. Canada Data. The following provisions apply to the Data for Canada, which may include or reflect data from third party licensors (“Third Party Data”), including Her Majesty the Queen in Right of Canada (“Her Majesty”), Canada Post Corporation (“Canada Post”) and the Department of Natural Resources of Canada (“NRCan”):

1. Disclaimer and Limitation: Client agrees that its use of the Third Party Data is subject to the following provisions:

   a. Disclaimer: The Third Party Data is licensed on an “as is” basis. The licensors of such data, including Her Majesty, Canada Post and NRCan, make no guarantees, representations or warranties respecting such data, either express or implied, arising by law or otherwise, including but not limited to, effectiveness, completeness, accuracy or fitness for a particular purpose.

   b. Limitation on Liability: The Third Party Data licensors, including Her Majesty, Canada Post and NRCan, shall not be liable: (i) in respect of any claim, demand or action, irrespective of the nature of the cause of the claim, demand or action alleging any loss, injury or damages, direct or indirect, which may result from the use or possession of such Data; or (ii) in any way for loss of revenues or contracts, or any other consequential loss of any kind resulting from any defect in the Data.

I. US/Canada Territory

A. United States Data. The End-User Terms for any Application containing Data for the United States shall contain the following notices:

   “HERE holds a non-exclusive license from the United States Postal Service® to publish and sell ZIP+4® information.”

   “©United States Postal Service® 20XX. Prices are not established, controlled or approved by the United States Postal Service®. The following trademarks and registrations are owned by the USPS: United States Postal Service, USPS, and ZIP+4.”
2. Copyright Notice: In connection with each copy of all or any portion of the Data for the Territory of Canada, Client shall affix in a conspicuous manner the following copyright notice on at least one of: (i) the label for the storage media of the copy; (ii) the packaging for the copy; or (iii) other materials packaged with the copy, such as user manuals or end user license agreements: “This data includes information taken with permission from Canadian authorities, including © Her Majesty the Queen in Right of Canada, © Queen’s Printer for Ontario, © Canada Post Corporation, GeoBase®, © The Department of Natural Resources Canada. All rights reserved.”

3. End-User Terms: Except as otherwise agreed by the parties, in connection with the provision of any portion of the Data for the Territory of Canada to End-Users as may be authorized under the Agreement, Client shall provide such End-Users, in a reasonably conspicuous manner, with terms (set forth with other end user terms required to be provided under the Agreement, or as otherwise may be provided, by Client) which shall include the following provisions on behalf of the Third Party Data licensors, including Her Majesty, Canada Post and NRCan:

The Data may include or reflect data of licensors, including Her Majesty the Queen in the Right of Canada (“Her Majesty”), Canada Post Corporation (“Canada Post”) and the Department of Natural Resources Canada (“NRCan”). Such data is licensed on an “as is” basis. The licensors, including Her Majesty, Canada Post and NRCan, make no guarantees, representations or warranties respecting such data, either express or implied, arising by law or otherwise, including but not limited to, effectiveness, completeness, accuracy or fitness for a particular purpose. The licensors, including Her Majesty, Canada Post and NRCan, shall not be liable in respect of any claim, demand or action, irrespective of the nature of the cause of the claim, demand or action alleging any loss, injury or damages, direct or indirect, which may result from the use or possession of the data or the Data. The licensors, including Her Majesty, Canada Post and NRCan, shall not be liable in any way for loss of revenues or contracts, or any other consequential loss of any kind resulting from any defect in the data or the Data.

End User shall indemnify and save harmless the licensors, including Her Majesty, Canada Post and NRCan, and their officers, employees and agents from and against any claim, demand or action, irrespective of the nature of the cause of the claim, demand or action, alleging loss, costs, expenses, damages or injuries (including injuries resulting in death) arising out of the use or possession of the data or the Data.

4. Additional Provisions: The terms contained in this Section are in addition to all of the rights and obligations of the parties under the Agreement. To the extent that any of the provisions of this Section are inconsistent with, or conflict with, any other provisions of the Agreement, the provisions of this Section shall prevail.
II. Mexico. The following provision applies to the Data for Mexico, which includes certain data from the Instituto Nacional de Estadística y Geografía (“INEGI”):

A. Any and all copies of the Data and/or packaging containing Data for Mexico shall contain the following notice: “Fuente: INEGI (Instituto Nacional de Estadística y Geografía)”

III. Latin America Territory

A. Third Party Notices. Any and all copies of the Data and/or packaging relating thereto shall include the respective Third Party Notices set forth below and used as described below corresponding to the Territory (or portion thereof) included in such copy:

<table>
<thead>
<tr>
<th>Territory</th>
<th>Notice</th>
</tr>
</thead>
<tbody>
<tr>
<td>Argentina</td>
<td>IGN “INSTITUTO GEOGRÁFICO NACIONAL ARGENTINO”</td>
</tr>
<tr>
<td>Guadeloupe, French Guiana and Martinique</td>
<td>“Fuente: INEGI (Instituto Nacional de Estadística y Geografía)”</td>
</tr>
</tbody>
</table>

IV. Middle East Territory

A. Third Party Notices. Any and all copies of the Data and/or packaging relating thereto shall include the respective Third Party Notices set forth below and used as described below corresponding to the Territory (or portion thereof) included in such copy:

<table>
<thead>
<tr>
<th>Country</th>
<th>Notice</th>
</tr>
</thead>

<td>Jordan</td>
<td>“© Royal Jordanian Geographic Centre”. The foregoing notice requirement for Jordan Data is a material term of the Agreement. If Client or any of its permitted sublicensees (if any) fail to meet such requirement, HERE shall have the right to terminate Client’s license with respect to the Jordan Data.</td>
</tr>
</tbody>
</table>

B. Jordan Data. Client and its permitted sublicensees (if any) are restricted from licensing and/or otherwise distributing HERE’s database for the country of Jordan (“Jordan Data”) for use in Enterprise Applications to (i) non-Jordanian entities for use of the Jordan Data solely in Jordan or (ii) Jordan-based customers. In addition, Client, its permitted sublicensees (if any) and End-Users are restricted from using the Jordan Data in Enterprise Applications if such party is (i) a non-Jordanian entity using the Jordan Data solely in Jordan or (ii) a Jordan-based customer. For purposes of the foregoing, “Enterprise Applications” shall mean Geomarketing applications, GIS applications, mobile business asset management applications, call center applications, telematics applications, public organization Internet applications or for providing geocoding services.
V. Europe Territory

A. Use of Certain Traffic Codes in Europe

1. General Restrictions Applicable to Traffic Codes. Client acknowledges and agrees that in certain countries of the Europe Territory, Client will need to obtain rights directly from third party RDS-TMC code providers to receive and use the Traffic Codes in the Data and to deliver to End-Users Transactions in any way derived from or based on such Traffic Codes. For such countries, HERE shall deliver the Data incorporating Traffic Codes to Client only after receiving certification from Client of its having obtained such rights.

2. Display of Third Party Rights Legends for Belgium. Client shall, for each Transaction that uses Traffic Codes for Belgium, provide the following notice to the End-User: “Traffic Codes for Belgium are provided by the Ministerie van de Vlaamse Gemeenschap and the Ministérie de l’Equipement et des Transports.”

B. Paper Maps. With respect to any license granted to Client relating to making, selling or distributing paper maps (i.e., a map fixed on a paper or paper-like medium): (a) such license with respect to Data for the Territory of Great Britain is conditioned on Client’s entering into and complying with a separate written agreement with the Ordnance Survey (“OS”) to create and sell paper maps, Client’s paying to the OS any and all applicable paper map royalties, and Client’s complying with the OS copyright notice requirements; (b) such license for selling or otherwise distributing for charge with respect to Data for the Territory of Czech Republic is conditioned on Client’s obtaining prior written consent from Kartografie a.s.; (c) such license for selling or distributing with respect to Data for the Territory of Switzerland is conditioned on Client’s obtaining a permit from Bundesamt für Landestopografie of Switzerland; (d) Client is restricted from using Data for the Territory of France to create paper maps with a scale between 1:5,000 and 1:250,000; and (e) Client is restricted from using any Data to create, sell or distribute paper maps that are the same or substantially similar, in terms of data content and specific use of color, symbols and scale, to paper maps published by the European national mapping agencies, including without limitation, Landervermessungämter of Germany, Topografische Dienst of the Netherlands, Nationaal Geografisch Instituut of Belgium, Bundesamt für Landestopografie of Switzerland, Bundesamt für Eich-und Vermessungswesen of Austria, and the National Land Survey of Sweden.

C. OS Enforcement. Without limiting Section IV(B) above, with respect to Data for the Territory of Great Britain, Client acknowledges and agrees that the Ordnance Survey (“OS”) may bring a direct action against Client to enforce compliance with the OS copyright notice (see Section IV(D) below) and paper map requirements (see Section IV(B) above) contained in this Agreement.

D. Third Party Notices. Any and all copies of the Data and/or packaging relating thereto shall include the respective Third Party Notices set forth below and used as described below corresponding to the Territory (or portion thereof) included in such copy:

E. Respective Country Distribution. Client acknowledges that HERE has not received approvals to distribute map data for the following countries in such respective countries: Albania, Belarus, Kyrgyzstan, Moldova and Uzbekistan. HERE may update such list from time to time. The license rights granted to Client under this TL with respect to the Data for such countries are contingent upon Client’s compliance with all applicable laws and regulations, including, without limitation, any required licenses or approvals to distribute the Application incorporating such Data in such respective countries.

VI. Australia Territory

A. Third Party Notices. Any and all copies of the Data and/or packaging relating thereto shall include the respective Third Party Notices set forth below and used as described below corresponding to the Territory (or portion thereof) included in such copy:

Copyright. Based on data provided under license from PSMA Australia Limited (www.psma.com.au).
Product incorporates data which is © 20XX Telstra Corporation Limited, GM Holden Limited, Intelematics Australia Pty Ltd and Continental Pty Ltd.

B. Third Party Notices for Australia. In addition to the foregoing, the End-User Terms for any Application containing RDS-TMC Traffic Codes for Australia shall contain the following notice: “Product incorporates traffic location codes which is © 20XX Telstra Corporation Limited and its licensors.”

AT&T Vehicle Network Carrier Telematics Disclosure

END USER FOR PURPOSES OF THIS SECTION MEANS YOU AND YOUR HEIRS, EXECUTORS, LEGAL PERSONAL REPRESENTATIVES AND PERMITTED ASSIGNS. FOR PURPOSES OF THIS SECTION “UNDERLYING WIRELESS SERVICE CARRIER” INCLUDES ITS AFFILIATES AND CONTRACTORS AND THEIR RESPECTIVE OFFICERS, DIRECTORS, EMPLOYEES, SUCCESSORS AND ASSIGNS. END USER HAS NO CONTRACTUAL RELATIONSHIP WITH THE UNDERLYING WIRELESS SERVICE CARRIER AND END USER IS NOT A THIRD PARTY BENEFICIARY OF ANY AGREEMENT BETWEEN FORD AND UNDERLYING CARRIER. END USER UNDERSTANDS AND AGREES THAT THE UNDERLYING CARRIER HAS NO LEGAL, EQUITABLE, OR OTHER LIABILITY OF ANY KIND TO END USER. IN ANY EVENT, REGARDLESS OF THE FORM OF THE ACTION, WHETHER FOR BREACH OF CONTRACT, WARRANTY, NEGLIGENCE, STRICT LIABILITY IN TORT OR OTHERWISE, END USER’S EXCLUSIVE REMEDY FOR CLAIMS ARISING IN ANY WAY IN CONNECTION WITH THIS AGREEMENT, FOR ANY CAUSE WHATSOEVER, INCLUDING BUT NOT LIMITED TO ANY FAILURE OR DISRUPTION OF SERVICE PROVIDED HEREUNDER, IS LIMITED TO PAYMENT OF DAMAGES IN AN AMOUNT NOT TO EXCEED THE AMOUNT PAID BY END USER FOR THE SERVICES DURING THE TWO-MONTH PERIOD PRECEDING THE DATE THE CLAIM AROSE.

(ii) END USER AGREES TO INDEMNIFY AND HOLD HARMLESS THE UNDERLYING WIRELESS SERVICE CARRIER AND ITS OFFICERS, EMPLOYEES, AND AGENTS AGAINST ANY AND ALL CLAIMS, INCLUDING WITHOUT LIMITATION CLAIMS FOR LIBEL, SLANDER, OR ANY PROPERTY DAMAGE, PERSONAL INJURY OR DEATH, ARISING IN ANY WAY, DIRECTLY OR INDIRECTLY, IN CONNECTION WITH THIS AGREEMENT OR THE USE, FAILURE TO USE, OR INABILITY TO USE THE DEVICE EXCEPT WHERE THE CLAIMS RESULT FROM THE UNDERLYING CARRIER’S GROSS NEGLIGENCE OR WILLFUL MISCONDUCT. THIS INDEMNITY WILL SURVIVE THE TERMINATION OF THE AGREEMENT.

(iii) END USER HAS NO PROPERTY RIGHT IN ANY NUMBER ASSIGNED TO THE DEVICE.

(iv) END USER UNDERSTANDS THAT FORD AND THE UNDERLYING CARRIER CANNOT GUARANTY THE SECURITY OF WIRELESS TRANSMISSIONS, AND WILL NOT BE LIABLE FOR ANY LACK OF SECURITY RELATING TO THE USE OF THE SERVICES THE SERVICE IS FOR [END USER’S] USE ONLY AND END USER MAY NOT RESELL THE SERVICE TO ANY OTHER PARTY END USER UNDERSTANDS THAT THE UNDERLYING CARRIER DOES NOT GUARANTEE ANY END USER UNINTERRUPTED SERVICE OR COVERAGE. THE UNDERLYING CARRIER DOES NOT WARRANT THAT END USERS CAN OR WILL BE LOCATED USING THE SERVICE. THE UNDERLYING CARRIER

Personal Use Only

You agree to use this Data together with [insert name of Client Application] for the solely personal, non-commercial purposes for which you were licensed, and not for service bureau, time-sharing or other similar purposes. Accordingly, but subject to the restrictions set forth in the following paragraphs, you may copy this Data only as necessary for your personal use to (i) view it, and (ii) save it, provided that you do not remove any copyright notices that appear and do not modify the Data in any way. You agree not to otherwise reproduce, copy, modify, decompile, disassemble or reverse engineer any portion of this Data, and may not transfer or distribute it in any form, for any purpose, except to the extent permitted by mandatory laws.

Restrictions

Except where you have been specifically licensed to do so by NAV2, and without limiting the preceding paragraph, you may not (a) use this Data with any products, systems, or applications installed or otherwise connected to or in communication with vehicles, capable of vehicle navigation, positioning, dispatch, real time route guidance, fleet management or similar applications; or (b) with or in communication with any positioning devices or any mobile or wireless-connected electronic or computer devices, including without limitation cellular phones, palmtop and handheld computers, pagers, and personal digital assistants or PDAs. You agree to cease using this Data if you fail to comply with these terms and conditions.

Limited Warranty

NAV2 warrants that (a) the Data will perform substantially in accordance with the accompanying written materials for a period of ninety (90) days from the date of receipt, and (b) any support services provided by NAV2 shall be substantially as described in applicable written materials provided to you by NAV2, and NAV2's support engineers will make commercially reasonable efforts to solve any problem issues.
Customer Remedies

NAV2 and its suppliers’ entire liability and your exclusive remedy shall be, at NAV2’s sole discretion, either (a) return of the price paid, if any, or (b) repair or replacement of the Data that do not meet NAV2’s Limited Warranty and that are returned to NAV2 with a copy of your receipt. This Limited Warranty is void if failure of the Data has resulted from accident, abuse, or misapplication. Any replacement Data will be warranted for the remainder of the original warranty period or thirty (30) days, whichever is longer. Neither these remedies nor any product support services offered by NAV2 are available without proof of purchase from an authorized international source.

No Other Warranty:
EXCEPT FOR THE LIMITED WARRANTY SET FORTH ABOVE AND TO THE EXTENT PERMITTED BY APPLICABLE LAW, NAV2 AND ITS LICENSORS (INCLUDING THEIR LICENSORS AND SUPPLIERS) DISCLAIM ANY WARRANTIES, EXPRESS OR IMPLIED, OF QUALITY, PERFORMANCE, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OWNERSHIP OR NONINFRINGEMENT. Certain warranty exclusions may not be permitted under applicable law, so to that extent the above exclusion may not apply to you.

Limited Liability:
TO THE EXTENT PERMITTED BY APPLICABLE LAW, NAV2 AND ITS LICENSORS (INCLUDING THEIR LICENSORS AND SUPPLIERS) SHALL NOT BE LIABLE TO YOU: IN RESPECT OF ANY CLAIM, DEMAND OR ACTION, IRRESPECTIVE OF THE NATURE OF THE CAUSE OF THE CLAIM, DEMAND OR ACTION ALLEGING ANY LOSS, INJURY OR DAMAGES, DIRECT OR INDIRECT, WHICH MAY RESULT FROM THE USE OR POSSESSION OF THE INFORMATION; OR FOR ANY LOSS OF PROFIT, REVENUE, CONTRACTS OR SAVINGS, OR ANY OTHER DIRECT, INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF YOUR USE OF OR INABILITY TO USE THIS INFORMATION, ANY DEFECT IN THE INFORMATION, OR THE BREACH OF THESE TERMS OR CONDITIONS, WHETHER IN AN ACTION IN CONTRACT OR TORT OR BASED ON A WARRANTY, EVEN IF NAV2 OR ITS LICENSORS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. UNDER NO CIRCUMSTANCES SHALL NAV2’s OR ITS SUPPLIERS’ LIABILITY HEREUNDER EXCEED THE PRICE PAID. Certain liability exclusions may not be permitted under applicable law, so to that extent the above exclusion may not apply to you.

Export Control
You agree not to export to anywhere any part of the Data provided to you or any direct product thereof except in compliance with, and with all licenses and approvals required under, applicable export laws, rules and regulations.

IP Protection
The Data are owned by NAV2 or its suppliers and are protected by applicable copyright and other intellectual property law and treaties. The Data are provided solely on the basis of a license to use, not sale.

Entire Agreement
These terms and conditions constitute the entire agreement between NAV2 (and its licensors, including their licensors and suppliers) and you pertaining to the subject matter hereof, and supersedes in their entirety any and all written or oral agreements previously existing between us with respect to such subject matter.
Governing Law.

The above terms and conditions shall be governed by the laws of the People's Republic of China, without giving effect to (i) its conflict of laws provisions, or (ii) the United Nations Convention for Contracts for the International Sale of Goods, which is explicitly excluded. Any dispute arising from or in connection with the Data provided to you hereunder shall be submitted to the Shanghai International Economic and Trade Arbitration Commission for arbitration.

Gracenote® End User License Agreement (EULA)

This device contains software from Gracenote, Inc. of 2000 Powell Street Emeryville, California 94608 ("Gracenote").

The software from Gracenote (the "Gracenote Software") enables this device to do disc and music file identification and obtain music-related information, including name, artist, track, and title information ("Gracenote Data") from online servers ("Gracenote Servers"), and to perform other functions. You may use Gracenote Data only by means of the intended End User functions of this device. This device may contain content belonging to Gracenote's providers. If so, all of the restrictions set forth herein with respect to Gracenote Data shall also apply to such content and such content providers shall be entitled to all of the benefits and protections set forth herein that are available to Gracenote. You agree that you will use the content from Gracenote ("Gracenote Content"), Gracenote Data, the Gracenote Software, and Gracenote Servers for your own personal, non-commercial use only. You agree not to assign, copy, transfer or transmit the Gracenote Content, Gracenote Software or any Gracenote Data (except in a Tag associated with a music file) to any third party. YOU AGREE NOT TO USE OR EXPLOIT GRACENOTE CONTENT, GRACENOTE DATA, THE GRACENOTE SOFTWARE, OR GRACENOTE SERVERS, EXCEPT AS EXPRESSLY PERMITTED HEREIN.

You agree that your non-exclusive licenses to use the Gracenote Content, Gracenote Data, the Gracenote Software, and Gracenote Servers will terminate if you violate these restrictions. If your licenses terminate, you agree to cease any and all use of the Gracenote Content, Gracenote Data, the Gracenote Software, and Gracenote Servers.

Gracenote, respectively, reserve all rights in Gracenote Data, the Gracenote Software, and the Gracenote Servers and Gracenote Content, including all ownership rights. Under no circumstances will either Gracenote become liable for any payment to you for any information that you provide,
including any copyrighted material or music file information. You agree that Gracenote may enforce its respective rights, collectively or separately, under this agreement against you, directly in each company's own name.

Gracenote uses a unique identifier to track queries for statistical purposes. The purpose of a randomly assigned numeric identifier is to allow Gracenote to count queries without knowing anything about who you are. For more information, see the web page at www.gracenote.com for the Gracenote Privacy Policy.

THE GRACENOTE SOFTWARE, EACH ITEM OF GRACENOTE DATA AND THE GRACENOTE CONTENT ARE LICENSED TO YOU "AS IS". NEITHER GRACENOTE MAKES ANY REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED, REGARDING THE ACCURACY OF ANY GRACENOTE DATA FROM THE GRACENOTE SERVERS OR GRACENOTE CONTENT. GRACENOTE COLLECTIVELY AND SEPARATELY RESERVE THE RIGHT TO DELETE DATA AND/OR CONTENT FROM THE COMPANIES' RESPECTIVE SERVERS OR, IN THE CASE OF GRACENOTE, CHANGE DATA CATEGORIES FOR ANY CAUSE THAT GRACENOTE DEEMS SUFFICIENT. NO WARRANTY IS MADE THAT EITHER GRACENOTE CONTENT OR THE GRACENOTE SOFTWARE OR GRACENOTE SERVERS ARE ERROR-FREE OR THAT THE FUNCTIONING OF THE GRACENOTE SOFTWARE OR GRACENOTE SERVERS WILL BE UNINTERRUPTED. GRACENOTE IS NOT OBLIGATED TO PROVIDE YOU WITH ANY ENHANCED OR ADDITIONAL DATA TYPES THAT GRACENOTE MAY CHOOSE TO PROVIDE IN THE FUTURE AND IS FREE TO DISCONTINUE ITS ONLINE SERVICES AT ANY TIME. GRACENOTE DISCLAIM ALL WARRANTIES EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO,

IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, AND NON-INFRINGEMENT. NEITHER GRACENOTE WARRANTS THE RESULTS THAT WILL BE OBTAINED BY YOUR USE OF THE GRACENOTE SOFTWARE OR ANY GRACENOTE SERVER. IN NO CASE WILL GRACENOTE BE LIABLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES OR FOR ANY LOST PROFITS OR LOST REVENUES FOR ANY REASON WHATSOEVER. © Gracenote 2007.

Taiwan Territory

According to the "Technical Specifications for Low Power Radio Frequency Equipment" formulated by the National Communications and Communication Committee of the Executive Yuan: 3.8.2. For the low-power radio frequency equipment that has obtained the verification certificate, the company, firm or user shall not change the frequency, increase the power or change the characteristics and functions of the original design without authorization.

The use of low-power radio frequency equipment must not affect flight safety and interfere with legal communications: when the system detects interference, immediately stop using it until there is no interference.

The aforementioned legal communication refers to the wireless communication operated in accordance with the provisions of the Telecommunications Management Law. Low-power radio frequency equipment needs to endure the interference of legal communication or industrial, scientific and medical radio wave radiation electrical equipment.
SUNA TRAFFIC CHANNEL – TERMS AND CONDITIONS

By activating, using and/or accessing the SUNA Traffic Channel, SUNA Predictive or other content or material provided by Intelematics (together, SUNA Products and/or Services), you must accept certain terms and conditions. The following is a brief summary of the terms and conditions that apply to you. To view the full terms and conditions relevant to your use of the SUNA Products and/or Services, please consult:

<table>
<thead>
<tr>
<th>Website</th>
</tr>
</thead>
</table>

1. Acceptance

By using SUNA Products and/or Services, you will be deemed to have accepted and agreed to be bound by the terms and conditions fully detailed at:

<table>
<thead>
<tr>
<th>Website</th>
</tr>
</thead>
</table>

2. Intellectual Property

SUNA Products and/or Services are for your personal use. You may not record, or retransmit the content, nor use the content in association with any other traffic information or route guidance service or device not approved by Intelematics. You obtain no right of ownership in any Intellectual Property Rights (including copyright) in the data that is used to provide SUNA Products and/or Services.

3. Appropriate Use

SUNA Products and/or Services are intended as an aid to personal motoring and travel planning, and do not provide comprehensive or accurate information on all occasions. On occasions, you may experience additional delay as a result of using SUNA Products and/or Services. You acknowledge that it is not intended, or suitable, for use in applications where time of arrival or driving directions may impact the safety of the public or yourself.

4. Use of SUNA Products and Services while driving

You, and other authorized drivers of the vehicle in which SUNA Products and/or Services are available or installed and active, remain at all times responsible for observing all relevant laws and codes of safe driving. In particular, you agree to only actively operate SUNA Products and/or Services when the Vehicle is at a complete stop and it is safe to do so.

5. Service Continuity and Reception of the SUNA Traffic Channel

We will use reasonable endeavors to provide the SUNA Traffic Channel 24 hours a day, 365 days a year. The SUNA Traffic Channel may occasionally be unavailable for technical reasons or for planned maintenance. We will try to perform maintenance at times when congestion is light. We reserve the right to withdraw SUNA Products and/or Services at any time.

Also, we cannot assure the uninterrupted reception of the SUNA Traffic Channel RDS-TMC signal at any particular location.

6. Limitation of Liability

Neither Intelematics (nor its suppliers or the manufacturer of your device (the "Suppliers")) shall be liable to you or to any third party for any damages either direct, indirect, incidental, consequential or otherwise arising out of the use of or inability to use SUNA Products and/or
Services even if Intelematics or a Supplier has been advised of the possibility of such damages. You also acknowledge that neither Intelematics nor any Supplier guarantees nor make any warranties that relate to the availability, accuracy or completeness of SUNA Products and/or Services, and to the extent which it is lawful to do so, both Intelematics and each Supplier excludes any warranties which might otherwise be implied by any State or Federal legislation in relation to SUNA Products and/or Services.

7. Please Note
Great care has been taken in preparing this manual. Constant product development may mean that some information is not entirely up-to-date. The information in this document is subject to change without notice.
ELECTROMAGNETIC COMPATIBILITY

**WARNING:** Do not place objects or mount equipment on or near the airbag cover, on the side of the front or rear seatbacks, or in areas that may come into contact with a deploying airbag. Failure to follow these instructions may increase the risk of personal injury in the event of a crash.

**WARNING:** Do not fasten antenna cables to vehicle wiring, fuel pipes and brake pipes.

**WARNING:** Keep antenna and power cables at least 10 cm (4 in) from any electronic modules and airbags.

Note: We test and certify your vehicle to meet electromagnetic compatibility legislation. It is your responsibility to make sure that any equipment an authorized dealer installs on your vehicle complies with applicable local legislation and other requirements. Installation of some aftermarket electronic devices could degrade the performance of vehicle functions, which use radio frequency signals such as broadcast radio receiver, tire pressure monitoring system, push button start, Bluetooth® connectivity or satellite navigation.

Note: Any radio frequency transmitter equipment in your vehicle (such as cellular telephones and amateur radio transmitters) must keep to the parameters in the following illustrations and table. We do not provide any other special provisions or conditions for installations or use.
