CONSUMER INFORMATION REGULATIONS

This information is furnished in accordance with the Consumer Information Regulations of the National Highway Safety Administration. It includes information to determine Cargo Weight Rating and Longitudinal Center of Gravity Zone for any selected F-Series pickup as equipped with factory-installed options.

THE FOLLOWING F-SERIES PICKUP TRUCKS ARE RECOMMENDED FOR CARRYING SLIDE-IN CAMPERS ONLY WHEN EQUIPPED WITH OPTIONAL F-SERIES CAMPER PACKAGES.

Model	Cab Type	Wheelbase (inches)	GVWR (pounds)
F-150 HD 4X2	Regular Cab	144.5	8200
F-150 HD 4X2	Super Cab	163.0	8200
F-150 HD 4X4	Regular Cab	144.5	8200
F-150 HD 4X4	Super Cab	163.0	8200
F-250/F-350	All	All	All
F-450	Crew Cab	172.4	14500

NOTES:

SLIDE-IN CAMPER USAGE IS NOT RECOMMENDED ON THE FOLLOWING: Explorer Sport Trac, Ranger, F-150 Super Crew and Lincoln Mark LT.

THIS PAMPHLET COVERS F-150, F-250, F-350 (8200-13,000 GVWS) AND F-450 (14,500 GVWR).

LOADING INSTRUCTIONS

Secure loose items to prevent weight shifts that could affect the balance of your vehicle. When the truck camper is loaded, drive onto a scale and weigh the front and the rear wheels separately to determine the axle loads. Individual axle loads should not exceed either of the Gross Axle Weight Ratings (GAWR). The total of the axle loads should not exceed the Gross Vehicle Weight Rating (GVWR). These ratings are given on the vehicle certification label that is located on the left side of the vehicle, normally the dash, hinge pillar, door latch post, or door edge next to the driver. If weight ratings are exceeded, move or remove items to bring all weights below the ratings.

NOTE: All fuel and water tanks should be full and all passengers should be in the truck when it is weighed.

HOW TO DETERMINE MAXIMUM CARGO WEIGHT RATING AND LONGITUDINAL CENTER OF GRAVITY ZONE

This procedure should be followed to determine the Cargo Weight Rating and Center of Gravity Zone for a truck as equipped with factory-installed options. There is a set of tables applicable to each vehicle recommended for carrying a slide-in camper. The first table in each set lists the weight distribution of available optional equipment, and the second table is used to determine the Cargo Weight Rating and the Center of Gravity Zone of the selected vehicle.

STEP ONE – Locate the Option Table in the set that matches the Model, Cab Type, Wheelbase and Gross Vehicle Weight Rating (GVWR) of the vehicle for which you wish to determine the Cargo Weight Rating and the Center of Gravity Zone. Select those options with which you wish to equip your vehicle. Options that are not listed in the Option Table need not be considered in your calculations since they either are not physically compatible when a slide-in camper is installed (e.g., spare tire carrier located in the pickup box) or have only a minor weight effect, which is already included in the Vehicle Loading Data Table.

STEP TWO – Total (add or subtract as indicated) the front and rear weight columns separately as shown in the example. Note: If the vehicle is to be equipped with any SPECIAL ORDER OPTIONS (other than paint or trim), add an additional 20 lbs. to the front and 10 lbs. to the rear total option weights.

STEP THREE – Look at the Vehicle Loading Data Table next to the Option Table on which you indicated the desired options. Find the row of Option Weights – Columns II and III, that most closely represents but exceeds each of the total front and rear option weights found in step number two. *In some cases there may exist more than one row of option weights – Columns II and III, which will fit a particular vehicle. In these cases use the row with the smaller front GAWR (Column I). This row of figures establishes the pickup's Cargo Weight Rating – Column IV, and Center of Gravity Zone Limits – Columns V and VI.

* If either of your calculated front and rear option weights are greater than the maximums listed in the Table (Columns II and III), you have exceeded the option weight capacity for the vehicle selected. See your dealership for applicable option limitations.

NOTE: Vehicle configurations covered in this manual for which F-Series Camper Package is available should not be used for carrying a slide-in camper unless equipped with the Camper Package. Camper package is standard on F-150 Heavy Duty (HD) and optional on all other F-Series configurations in this manual.

DEFINITIONS – Slide-in camper means a structure with a roof, floor and sides for the purpose of providing shelter for people, and designed to be mounted on and removable from the cargo box area of a truck by the user.

PROPER TRUCK AND CAMPER MATCH

Using the A and B dimensions found in the proper Vehicle Loading Data Table, the required Center of Gravity for a slide-in camper must fall within this zone as shown in the following illustration. The Center of Gravity of the camper is determined by the camper manufacturer and is indicated in literature accompanying campers manufactured after October 1, 1973.

When the truck is used to carry a slide-in camper, the total cargo load of the truck consists of the manufacturer's camper weight figure; the weight of installed additional camper equipment not included in the manufacturer's camper weight figure, the weight of camper cargo, and the weight of the passengers* in the camper. The total cargo load should not exceed the truck's cargo weight rating and the camper's center of gravity should fall within the truck's recommended Center of Gravity Zone when installed.

***WARNING** – Passengers should be allowed to ride ONLY in seats with proper occupant restraint systems. Persons who are not properly restrained in designated seating positions are much more likely to suffer bodily injury in the event of a collision.

The Cargo Weight Rating and Longitudinal Center of Gravity Location Zone established by this folder are two important factors that have a direct influence on the handling and braking of a truck-camper combination. In addition, other factors such as road and wind conditions, height of camper load and condition of the tires also influence a vehicle's handling and braking. All factors must be considered and reasonable care must be exercised when operating a truck-camper vehicle. Ford offers many options that enhance a vehicle for camper usage. For optimum performance and enjoyment it is suggested that you equip your vehicle with those options specifically intended for camper hauling.

EXAMPLE: F-150 HD (4X2) REGULAR CAB — 144.5 IN (3671 mm) WHEELBASE

Total Option Weight														
Note: Be careful not to double count. Each option should only be added once.														

Total Option Weight Front = 53 lbs / Rear = 96 lbs

Choose 60 lbs (front) and 120 lbs (rear) which most closely represents and exceeds the 53 lbs front option weight and the 96 lbs rear option weight.

Enter the Cargo Weight Rating and the A and B dimensions from the appropriate table in the box below and retain this folder for future reference.

"Cargo Weight Rating" means the value specified by the manufacturer as the cargo-carrying capacity, in pounds, of a vehicle, exclusive of the weight of the occupants (in the vehicle), computed as 150 pounds times the number of designated seating positions.

	Our Example	Your Truck
Cargo Weight Rating	2447 lbs	_____ pounds
Center of Gravity Zone of Dimensions		
A.	69.6 inches	_____ inches
B.	49.0 inches	_____ inches
